ZXU

OUR
PURPOSE

**TOGETHER
AT 2XU,
WE ARE
GOING TO
CREATE
A FITTER,
HEALTHIER
WORLD.**

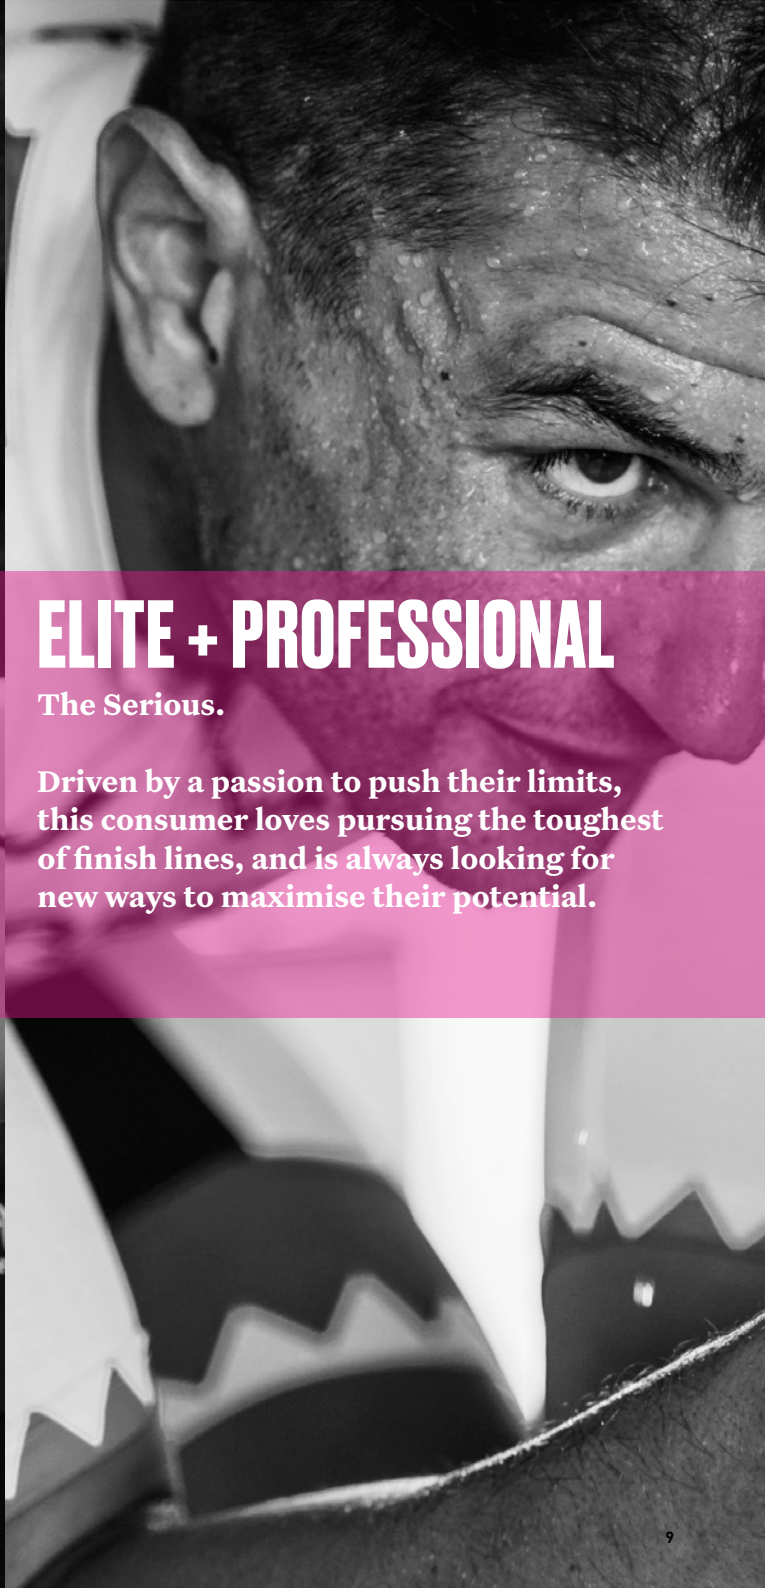

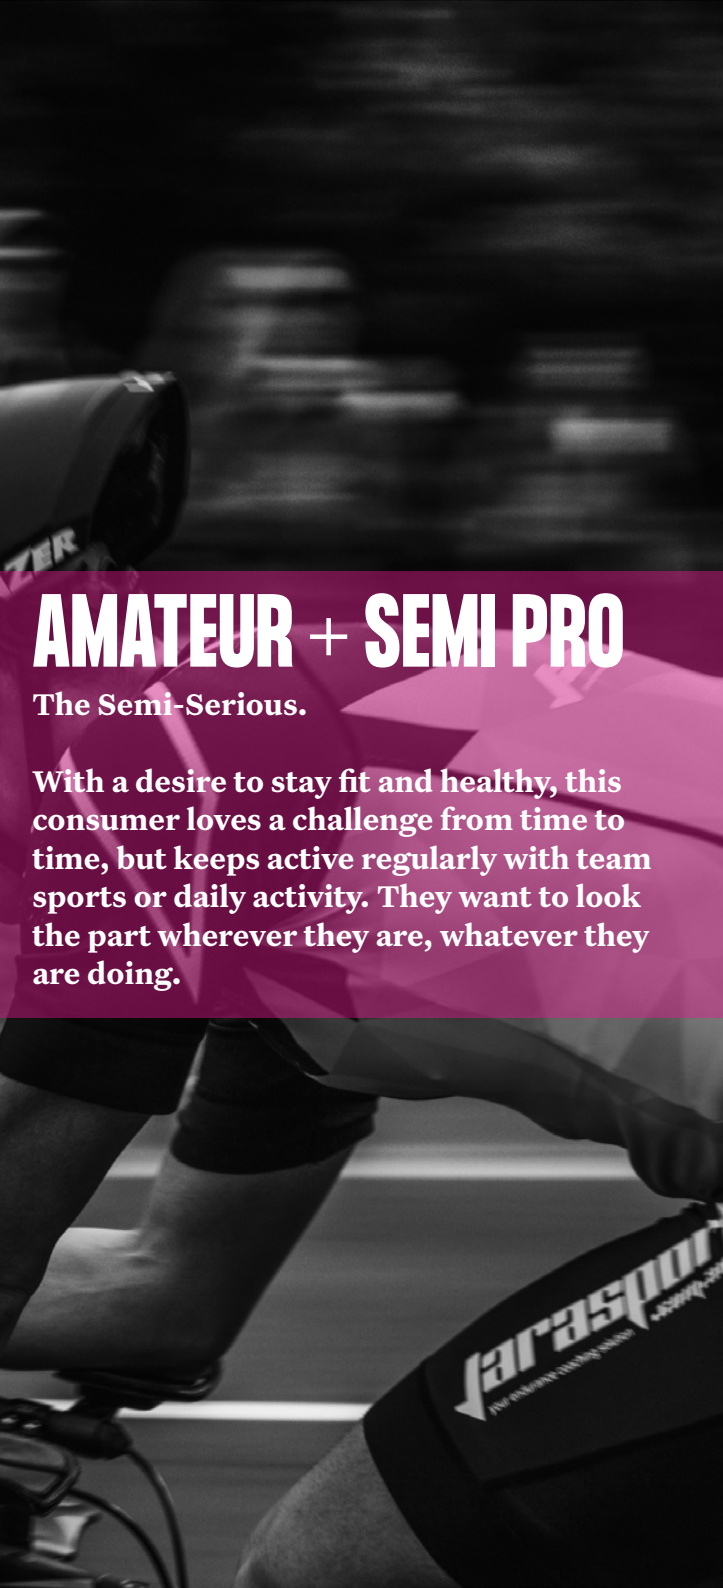

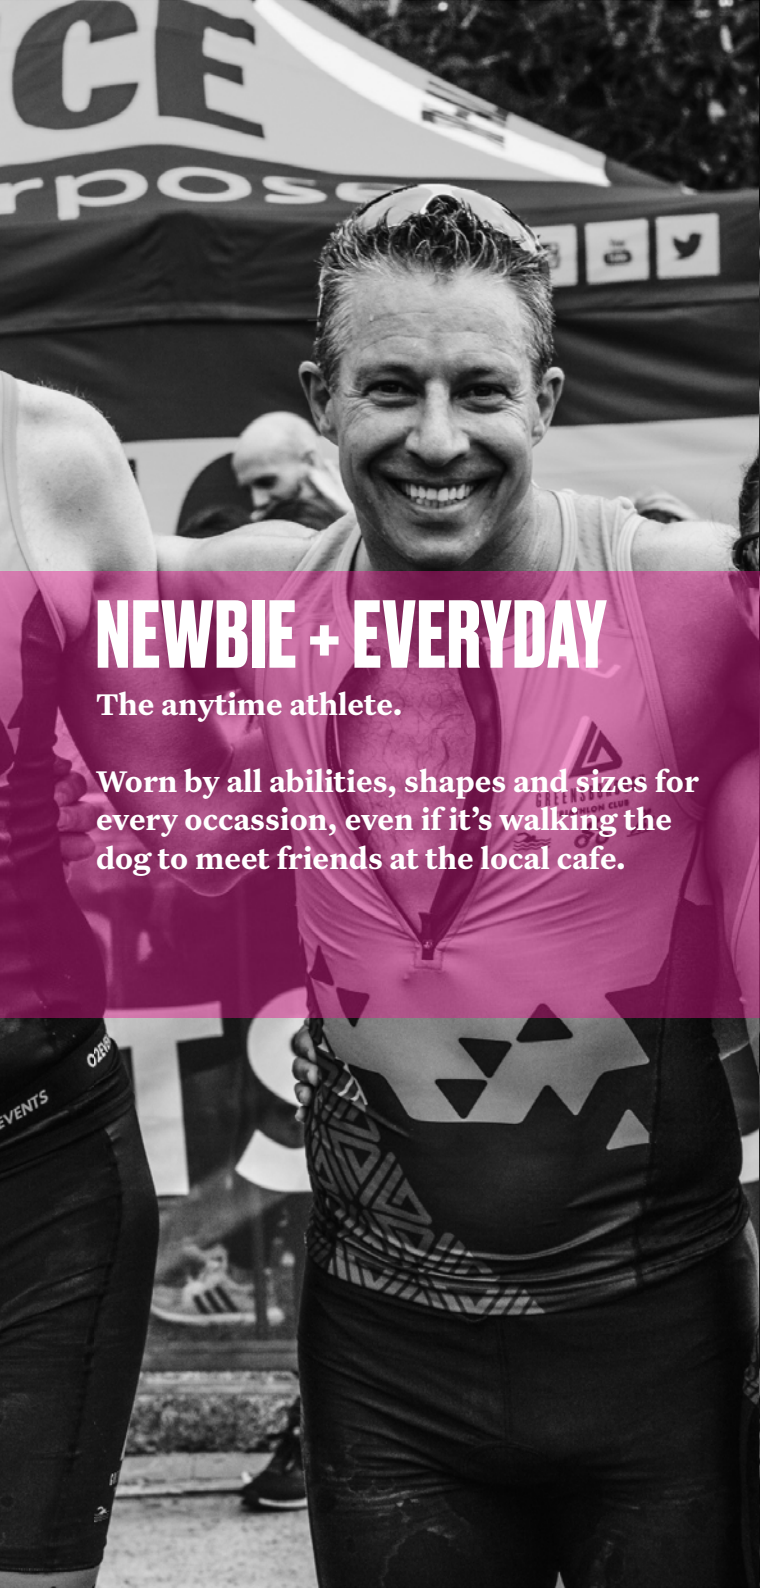

**THE COMPLETE
ATHLETE
SYSTEM**

The athlete is at the core of our design process. We are the only brand that caters for the complete athlete system - from preparation and reducing injury through to increasing performance and improving recovery. This is the Two-Times-You promise.

ALL LEVELS
OF ATHLETIC
ABILITY

You deserve the best. Whether you are a weekend warrior looking to improve your overall health and fitness, or an athlete chasing Olympic gold, innovation, technology and performance are always at the forefront of our minds.

NEWBIE + EVERYDAY

The anytime athlete.

Worn by all abilities, shapes and sizes for every occasion, even if it's walking the dog to meet friends at the local cafe.

AMATEUR + SEMI PRO

The Semi-Serious.

With a desire to stay fit and healthy, this consumer loves a challenge from time to time, but keeps active regularly with team sports or daily activity. They want to look the part wherever they are, whatever they are doing.

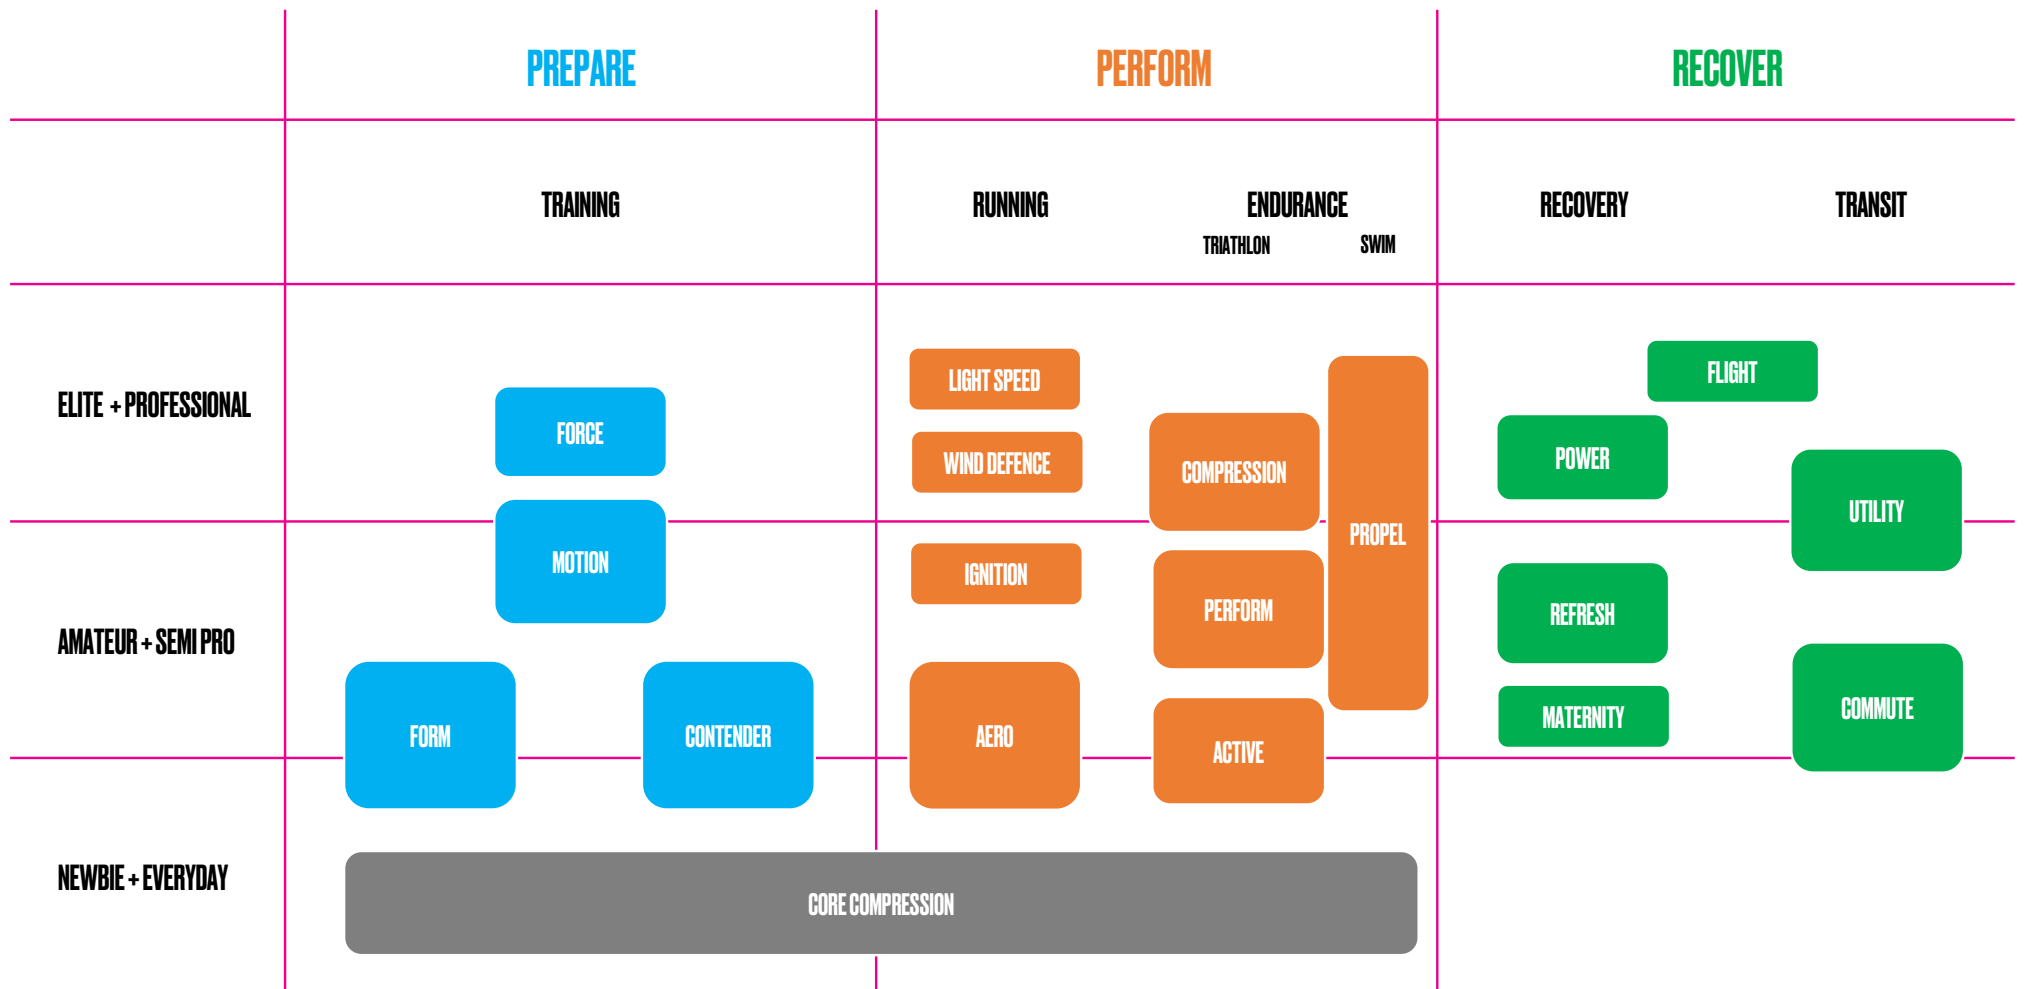

ELITE + PROFESSIONAL

The Serious.

Driven by a passion to push their limits, this consumer loves pursuing the toughest of finish lines, and is always looking for new ways to maximise their potential.

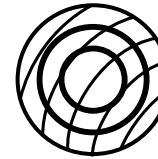

COLLECTION
NAMING
SYSTEM

A new collection naming system that allows us to segment our range not only across the athlete lifecycle, apply our various technologies across ranges and at the same time easily communicate a way for consumers to navigate our ranges.

PRODUCT KEY

MCS

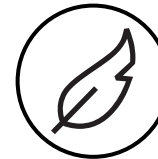

MCS (Muscle Containment Stamping) is a revolutionary fabric support system that traces over key muscle, tendon and fascia groups to provide greater compression power, reducing muscle oscillation and micro-tears and hence limiting fatigue and strain during intensive exercise. New for H1 21, we have leveraged learnings from our MCS technology to launch 2XU's first 3D printed training capsule, combining functional silicon bonding and 3D filament in textile prints to add support in place of distracting elastics and underwires.

X-VENT

Combining a moisture wicking double-knit constructed main with a square mesh back panel, X-VENT technology ensures our run Aero capsule rapidly wicks sweat away from the skin while enhancing breathability and ventilation

X-LITE

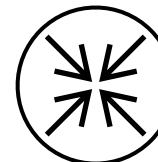

Using a puffed construction for near-weightless performance, X-LITE ensures our Light Speed run capsule tops provide exceptional moisture wicking, reflect UV rays (UPF 50+) while the textured construction stops the fabric clinging to the body even in humid conditions. New for H1 21, we have strategically engineered zones of ventilation into the Light Speed Tech capsule using this fabric to keep you cool where you need it the most.

X-DRY

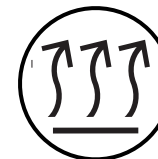

With a natural fibre hand-feel, X-DRY fabric has superior moisture wicking qualities, dries four times faster than cotton and has an odour neutraliser embedded at yarn level to keep your fresher for longer between washes, reducing your environmental footprint.

X-LOCK

Leveraged across our Vectr sock capsule, X-LOCK technology provides advanced arch and plantar fascia support, and keeps the foot in place within the sock to reduce blistering.

X-HEAT

X-HEAT fabric with carbon nano technology warms you up quickly, while ceramic infused yarns omit far infrared rays to maintain a comfortable body temperature in cold conditions. Used in our Ignition capsule, the fabric structure has zero static cling, superior moisture management and a naturally occurring antibacterial and anti-odour feature to keep you fresher for longer between washes, reducing your environmental footprint.

PROVEN PERFORMANCE

Developed from relentless testing and proven both on the field and in-market, these are the essential products to build your range around.

MA3849b / WA4173b
Core Compression
Tights

Lightweight & Flexible Support

Powerful, lightweight PWX fabric with circular knit 360-degree stretch, reduces muscle movement and damage whilst maintaining flexibility for ultimate sports performance.

Graduated Compression

Firm graduated compression boosts blood flow to muscles, improving performance, lowering risk of injury and speeding up recovery.

Athletic Waistband

Drawstring waistband provides adjustable secure fit.

Quick-Drying

High quality, durable, moisture-wicking yarns outlast the competition and keep the skin cool and dry.

Garment Features:

1. Full length compression tight
2. PWX highly powerful, lightweight and flexible compression fabric
3. Drawstring waistband for adjustable secure fit
4. Graduated compression for improved circulation
5. Signature X logo on thigh and calf
6. Flatlock seams to reduce chafe

Long Sleeve

Lightweight & Flexible Support

Powerful, lightweight PWX fabric with circular knit 360-degree stretch, reduces muscle movement and damage to the upper body whilst improving postural awareness, increasing performance and reducing risk of injury.

Stay Cool

PWX VENT panels through centre back and under arms improve air flow by almost 200%, increasing evaporation of your sweat to keep you at optimal performance temperature

Quick-Drying

High quality, durable, moisture-wicking yarns outlast the competition and keep the skin cool and dry.

Garment Features:

1. Compression long sleeve top
2. PWX highly powerful, lightweight and flexible compression fabric
3. Compression increases circulation for improved recovery and reduced muscle stiffness post-exercise
4. PWX Vent panels deliver greater breathability in key regions
5. Raglan sleeve construction for unrestricted movement
6. Signature X logo on arm
7. Flatlock seams to reduce chafe

PREPARE

PREP

REDUCE INJURY

Every athlete knows preparation is key for future performance and reducing the risk of injury. You are laying the foundation, building your body's durability and strength.

TRAINING

GO-TO-MARKET

COMPLEMENT YOUR WORKOUT THROUGH FREEDOM OF MOVEMENT, COMFORT AND DURABILITY WITHOUT COMPROMISE ON PERFORMANCE AND TREND.

CONSUMER PROFILE

Our training consumer are those looking to build a solid base for their endurance and running sports, they are seeking the same quality from their workout as they expect from their race day sessions. They understand the importance of quality over quantity and are willing to put the hard work in while no one is watching.

COLLECTIONS GUIDE

FORCE

Smash your goals at every workout with our strongest collection.

MOTION

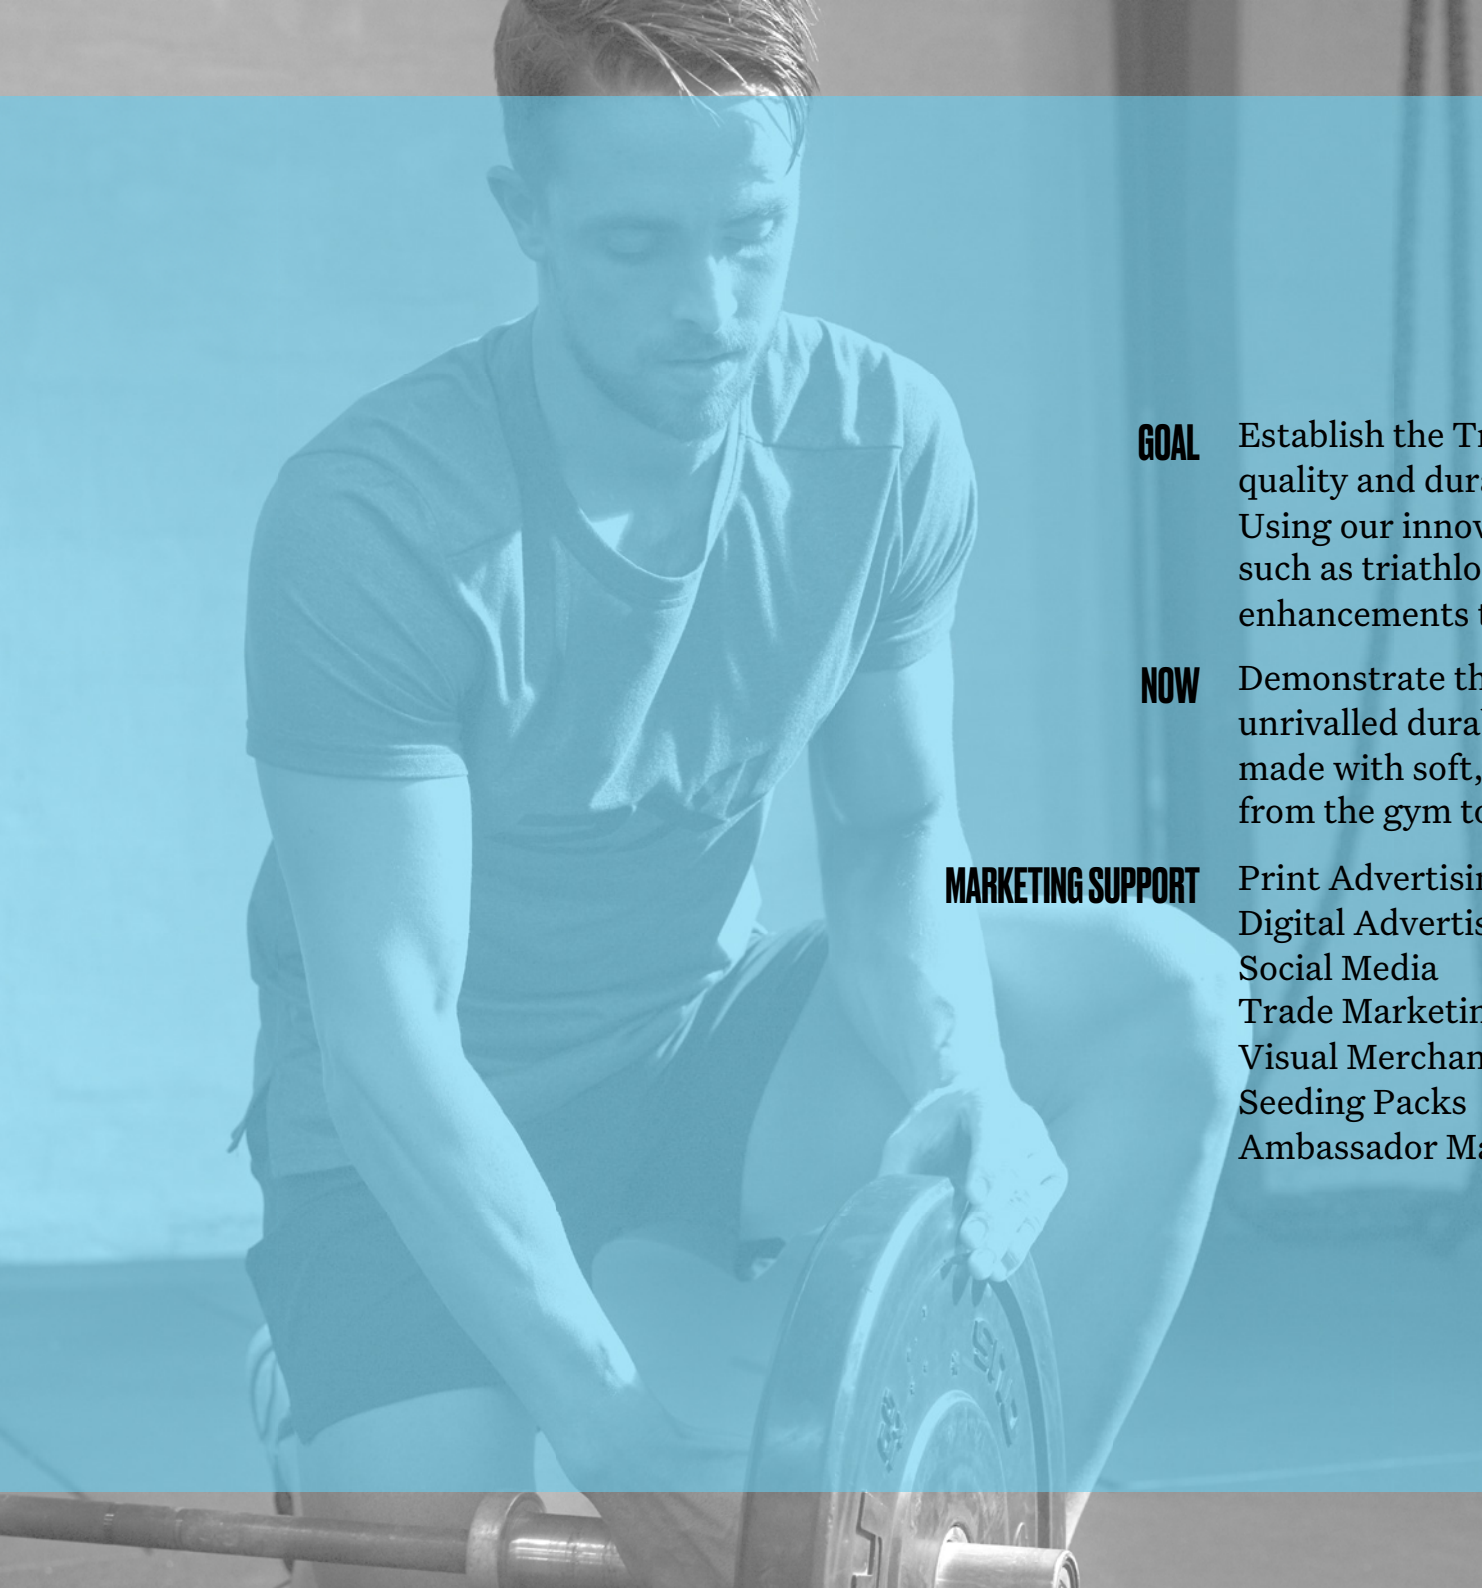

Engineered to move with your body during the toughest workout.

CONTENDER

Unrivalled everyday comfort.

FORM

All day support, coverage and comfort.

GOAL Establish the Training range to be the go-to for quality and durability, just like our compression. Using our innovations across performance sports such as triathlon and running to bring further enhancements to the range.

NOW Demonstrate the versatility within the range - unrivalled durability for the toughest of workouts made with soft, comfortable fabrics that take you from the gym to the street.

Muscle Containment Stamping (MCS)

Muscle Containment Stamping (MCS) traces glutes, to aid postural awareness for pelvic and lower back stability; hamstrings, to reduce muscle strain during lifts and squats; quadriceps, to lower impact during running, jumping and squatting; and calves, for injuries from accelerating and decelerating phases.

Designed To Be Layered

Flat jacquard elastic waistband delivers a smooth, secure feel and allows for easy layering beneath shorts or joggers if required.

Lightweight & Flexible Support

Powerful, lightweight PWX fabric with circular knit 360-degree stretch, reduces muscle movement and damage whilst maintaining flexibility for ultimate sports performance.

Graduated Compression

Firm graduated compression boosts blood flow to muscles, improving performance, lowering risk of injury and speeding up recovery.

Quick-Drying

High quality, durable, moisture-wicking yarns outlast the competition and keep the skin cool and dry.

PREFORMO

A woman is running on a track, seen from behind. The image is overlaid with a large, textured, golden-yellow 'BRM' logo. The background is a blurred outdoor setting with a car visible in the distance.

BRM

PERFORM BETTER

In training or in a race we all deep down look at performance. We constantly measure ourselves against personal records, competitors and yesterday. This is our measure, our sign of progress.

RUNNING

GO-TO-MARKET

**WHETHER IT'S A MARATHON, OR A SHORT RECOVERY RUN, RACE-DAY PERFORMANCE IS PARAMOUNT.
LEADING FABRIC TECHNOLOGY CAN PROVIDE AN EDGE OVER THE COMPETITION.**

CONSUMER PROFILE

Relentless in their pursuit of performance, our running consumer seeks the highest quality product for their run. They run on the road, track and trail in the heat and in the cold. They want to feel confident knowing their product won't let them down in any situation.

COLLECTIONS GUIDE

LIGHT SPEED

Versatility for unrivalled run comfort.

IGNITION

Stay warm, dry and protected.

WIND DEFENCE

Beat the elements with confidence.

AERO

Stay cool and on-track for every run everyday.

GOAL Innovation will be at the forefront of our running collections driving us to lead the market and become the go to technical running apparel brand.

NOW Utilize the strength of compression (Recovery and Performance) to grow running consumer base and introduce them to hero products.

Ignition Compression

Cold-weather essentials for every runner, the Ignition Compression range protects you from the elements, keeping you warm and dry on the run.

MA6311b / WA6312b

Wind Defence Compression Tights

Stay Warm

Advanced 20k/20k waterproof stretch membrane panels on upper legs withstand rain and showers while soft brushed PWX Thermal fabric on lower legs create small pockets of air that trap body heat in.

Firm Muscle Support

Powerful, lightweight PWX fabric with circular knit 360-degree stretch, reduces muscle movement and damage whilst maintaining flexibility for ultimate sports performance.

Graduated Compression

Graduated compression boosts blood flow to muscles, improving performance, lowering risk of injury and speeding up recovery.

Quick-Drying

High quality, durable, moisture-wicking yarns outlast the competition and keep the skin cool and dry.

Be Seen

Reflective X logos for greater visibility in low-light conditions.

MA6552b / WA6352b
Ignition Mid-Rise Compression Tights

Stay Warm

The soft brushed PWX Thermal fabric construction creates small air pockets that trap body heat in.

Firm Muscle Support

Powerful, lightweight PWX fabric with circular knit 360-degree stretch, reduces muscle movement and damage whilst maintaining flexibility for ultimate sports performance.

Graduated Compression

Graduated compression boosts blood flow to muscles, improving performance, lowering risk of injury and speeding up recovery.

Quick-Drying

High quality, durable, moisture-wicking yarns outlast the competition and keep the skin cool and dry.

Aero Reflect Hi-Rise
Comp Tights

Be Seen

All over tonal reflective print, provides 360 visibility in low-light conditions.

Firm Muscle Support

Lightweight yet powerful PWX fabric reduces muscle movement and damage whilst compression boosts blood flow to muscles, improving performance, lowering risk of injury and speeding up recovery.

Multiple Pockets

Extra high figure flattering, slimming and secure waistband includes a zip back pocket and side pockets, providing ample bounce-free secure storage for phone, cards and keys.

Total Comfort

High quality, durable, moisture-wicking yarns outlast the competition to provide squat proof coverage and keep the skin cool and dry.

Garment Features:

1. Full length compression tight
2. PWX highly powerful, lightweight and flexible compression fabric
3. Graduated compression for improved circulation
4. Hi-Rise figure flattering, slimming and secure fit waistband
5. All over subtle tonal reflective print
6. Rear zip pocket
7. Side pockets
8. Signature reflective X logo
9. Flatlock seams to reduce chafe

Best For:	Mild Weather
Colours:	IRF/SRF
Size Range:	XXS, XS, XST, S, ST, M, MT, L, LT, XL, XXL
Rise:	Hi-Rise
Waistband:	12cm power mesh
Fabric:	Front: PWX 70D. 72% Nylon, 28% Lycra Back: PWX 160D. 65% Nylon, 35% Lycra (Power, Weight, Flexibility)

GO-TO-MARKET

SERVING THE MOST DEMANDING ATHLETES WITH THE HIGHEST PERFORMING PRODUCT FROM THE START TO FINISH LINE.

CONSUMER PROFILE

The original misfits, endurance athletes are all shapes and sizes, all abilities and all ages. They are all chasing the finish line, some are after Olympic Gold or World Championships, others, just celebrating with their team at the local race. They all seek comfort and performance, no matter their level.

COLLECTIONS GUIDE

COMPRESSION

The ultimate weapon for racing at all distances.

PERFORM

Stand-out performance across long and short course racing.

ACTIVE

Take your race day to the next level.

PROPEL

Speed, buoyancy and performance in the water.

MARKETING SUPPORT

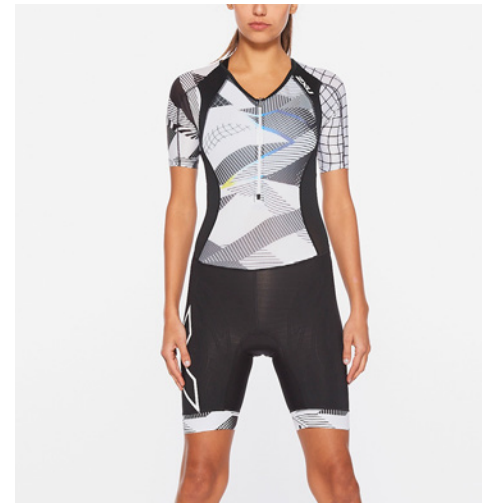

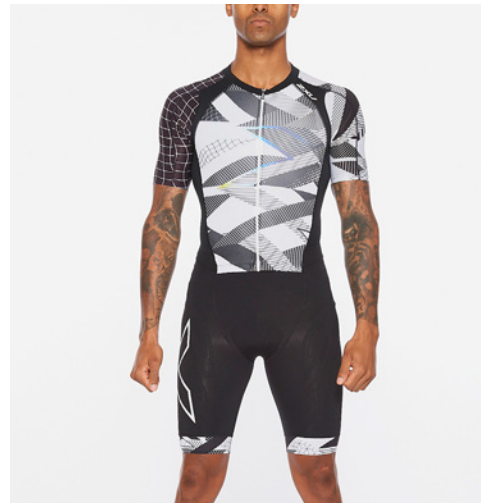

GOAL Lead and drive the market with innovations across triathlon and wetsuits, breaking records and setting new boundaries.

Compression Tri

Designed in accordance with RMIT University research, the Compression Tri range features the latest in triathlon innovation, delivering big on performance - think superior muscle stabilization, heat-beating technology and unrivaled aerodynamics.

MT5516d / WT5521d
Compression Full Zip Sleeved Trisuit

Ultimate Cooling

PWX VENT lower body provides support whilst improving air flow by almost 200% whilst Swiss COLDBLACK® on upper body reduces absorption of heat rays and provides UV protection to keep you at optimal performance temperature.

Muscle Containment Stamping (Mcs)

Muscle Containment Stamping (MCS) traces quadriceps, dissipating the load transfer on the knee joint during running.

Lightweight & Flexible Support

Powerful, lightweight PWX fabric with circular knit 360-degree stretch, reduces muscle movement and prevents fatigue.

Unrivaled Aerodynamics

The 3D mesh structure of premium Italian SBR VENT through upper body provides exceptional aerodynamics and is ergonomically engineered to fit to your body like a second skin.

Pro Ld Chamois

Made from low profile 90 density 6mm high impact perforated foam, this chamois provides support in the aero position and is quick-drying for less bulk on the run.

Essential Storage

Easily accessible rear pockets provide adequate storage for your race-day essentials.

Garment Features:

1. Sleeved trisuit
2. Ergonomically engineered panelling
3. Powerful, lightweight PWX VENT lower body
4. Quadriceps Muscle Containment Stamping (MCS)
5. Premium Italian SBR VENT upper body
6. Advanced Swiss COLDBLACK® upper body and back yoke
7. Premium Italian-engineered silicone leg grippers
8. Low profile Pro LD chamois
9. Full length semi-auto lock zip
10. Easily accessible rear pockets

Propel Pro

The Propel Pro Wetsuit features the latest in wetsuit technology and design innovation to ensure natural swimmers have ultimate flexibility and minimal water resistance for their best time yet.

MW5124c / WW5125c

Propel:Pro Wetsuit

Ultimate Flexibility

Premium Japanese Yamamoto 45 Cell seamless shoulder and arm neoprene provides ultimate flexibility.

Minimal Water Resistance

Nano Super Composite Skin (SCS) hydrodynamic coating reduces surface drag for more speed and improved durability whilst Velocity Strakes provide hydrodynamic stability in choppy water and assist you swim in a straight line.

Optimal Bouyancy

Premium Japanese Yamamoto 39 Cell neoprene is bouyant but still flexible and varies in thickness throughout the core of the wetsuit, moving your centre of bouyancy lower, preventing sinky legs and putting you in perfect horizontal swimming position.

Enhanced Power & Efficiency

Embossed concave water entrapment zone on arm sleeve, enhances power and feel of water whilst the floating zip panel provides unrestricted movement for improved distance per stroke.

Improved Rotation

Rollbar technology ensures less bouyancy on perimeter of wetsuit, allowing snappier side-to-side rotation and eliminating dead spots in your freestyle.

Inner Comfort & Support

Our neck panel eliminates seams to improve comfort and reduce chafing whilst the often-overlooked internal liner is engineered for 520% stretch to ensure comfort and low absorption.

Garment Features:

1. Full tri wetsuit
2. Nano SCS hydrodynamic coating
3. Shoulder and arm premium Japanese Yamamoto 45 Cell flexible neoprene
4. Body premium Japanese Yamamoto 39 Cell bouyant neoprene
5. Arm sleeve embossed concave water entrapment zone
6. Chest seamless bouyancy inserts
7. Velocity Strakes on front body
8. Floating zip panel
9. Core Intermediate Stretch Zone (ISZ) panels
10. Rollbar technology
11. Lower leg propulsion panel
12. Quick release ankle Transition Panel
13. 520% internal stretch lining
14. Two-year warranty

Men:

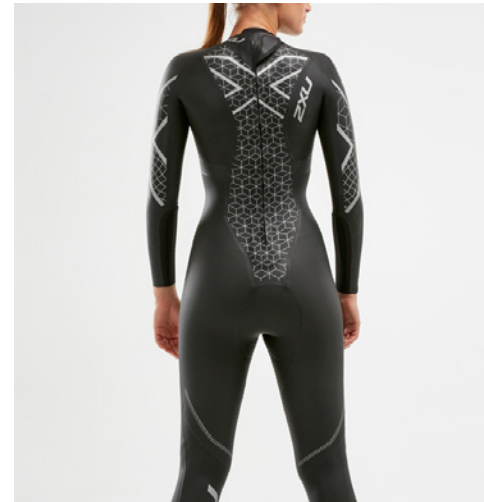

Best For: Cold Weather, Wet Weather, Mild Weather, Hot Weather
Colours: BLK/SIL
Size Range: XS, S, ST, SM, M, MT, MS, L, LT, XL, XLT, XXL, XXXL

SWIMRUN: PRO
WETSUIT

MW5479c / WW5480c
SWIMRUN: 1
WETSUIT

Ultimate Flexibility

Premium Japanese Yamamoto 1.5mm shoulder and underarm neoprene ensure you get most out of your strokes in water whilst flexible hip and pelvis panels allow you to run freely.

Reduced Water Resistance

Super Composite Skin (SCS) hydrodynamic coating reduces surface drag for more speed.

Maximum Bouyancy

Premium Japanese Yamamoto neoprene is as thick as 8mm in upper legs to ensure you have the bouyancy to carry what you need and maintain a horizontal swimming position without sinking legs.

Improved Rotation

Rollbar technology ensures less bouyancy on perimeter of wetsuit, allowing snappier side-to-side rotation and eliminating dead spots in your freestyle.

Comfort & Support

Front zip provides increased ventilation without having to remove during run whilst the often-overlooked internal liner is engineered for 520% stretch to ensure comfort and low absorption.

Essential Storage

Internal front and zipped rear pocket provides adequate storage for your race-day essentials whilst a front whistle pocket ensures safety.

Garment Features:

1. SwimRun wetsuit
2. SCS hydrodynamic coating
3. Full body premium Japanese Yamamoto bouyant and flexible neoprene
4. Front full body zipper
5. Hyperflex 1.5mm shoulder and underarm panels
6. Rollbar technology
7. Flexible hip and pelvis panels
8. 8mm upper leg bouyancy inserts
9. Abrasion resistant rear double-sided nylon panel
10. Internal front and zip rear pockets
11. Whistle for safety
12. 520% internal stretch lining

BREED

RECOVER

RECOVER FASTER

Recovery is training. Most of the time it is overlooked but it forms a vital part in preparing for the next race or session. Whether in transit or resting on the couch, there is always a time for the body to be working.

RECOVERY

GO-TO-MARKET

RECOVERY IS THE MOST IMPORTANT PILLAR OF THE ATHLETE CYCLE. OUR PRODUCT, THROUGH INNOVATION AND PRACTICALITY, ALLOWS THE ATHLETE TO BE READY TO GO FOR THEIR NEXT SESSION.

CONSUMER PROFILE

Athletes want to be working when they are resting. The demands of today's high-level athlete is such that time between training and races has become shorter and shorter. Athletes are seeking out new ways to speed up recovery, making each day less taxing on their bodies.

COLLECTIONS GUIDE

POWER

Work extra hard while recovering from the hardest of sessions.

REFRESH

Everyday recovery to keep the body fresh.

FLIGHT

Protection from long and short haul flights.

GOAL

Utilise our renowned recovery compression to drive other category growth. Advance recovery technology and innovation.

NOW

Be the home of recovery, in-store, at events and online. Be known for recovery and the versatility of the recovery range across sports.

Power Recovery

Featuring graduated stamping technology and powerful over-foot compression, the Power Recovery Compression Tights will help you return to your peak in the fastest possible time.

MA4417b / WA4418b
Power Recovery
Compression Tights

Graduated Stamping

Leveraging the learnings of MCS technology, graduated stamping on the external surface precisely controls the compression profile, ensuring maximum boosting of blood flow for faster recovery.

Over-Foot Stirrup

Starting at the ball of the foot, an over-foot stirrup provides targeted compression relief from the furthest extremity for entire lower body relief.

Graduated Compression

Extra firm PWX fabric with circular knit 360-degree stretch, reduces muscle movement whilst a graduated compression profile boosts blood flow to muscles speeding up recovery.

Designed To Be Layered

Flat jacquard elastic waistband delivers a smooth, secure feel and allows for easy layering beneath shorts or joggers if required.

Quick-Drying

High quality, durable, moisture-wicking yarns outlast the competition and keep the skin cool and dry.

Garment Features:

1. Full length compression tight
2. PWX highly powerful and flexible compression fabric
3. Graduated compression for improved circulation
4. External graduated stamping
5. Over-foot stirrup
6. Flat jacquard elastic waistband for easy layering
7. Signature X logo on calf
8. Flatlock seams to reduce chafe

Men:

Best For: Cold Weather, Mild Weather, Hot Weather
Colours: BLK/NRO
Size Range: XXS, XS, S, ST, M, MT, L, LT, XL, XLT, XXL, XXLT, XXXL
Rise: Regular
Waistband: 5cm brushed inward facing elastic
Fabric: PWX 105D. 65% Nylon, 35% Lycra

Flight

Arrive ready to hit the ground running with the Flight collection. Made from a cotton-blend brushed fabric for ultimate comfort, and featuring graduated compression for boosted circulation & reduced swelling in the air, you'll land fresh and ready for the day ahead.

MA5642b / WA5643b

Flight Compression Tights

Graduated Compression

Maintains healthy circulation, minimising swelling and stiffness on long-haul flights.

Improved Circulation

Boosted venous return and lymphatic drainage lowers the risk of DVT and swelling.

Ultimate Comfort

Cotton-blend brushed fabric is soft against the skin and ensures body maintains a comfortable temperature in the air.

Designed To Be Layered

Flat jacquard elastic waistband delivers a smooth, secure feel and allows for easy layering beneath shorts or joggers if required.

UA5689e

Flight Compression Socks Ultra Light

GLOSSARY

105D Power Mesh PWX Compression

The latest 105D Power Mesh PWX Compression technology offers incredible stabilisation for greater power output and reduced muscle movement to minimise fatigue. Powerful mesh construction delivers increased ventilation to keep the body cool, as well as aerodynamic, dimpled air flow technology for enhanced speed and moisture management.

39 Cell Neoprene

The most buoyant neoprene available, with a thickness ranging from 1mm to 5mm (5mm is the maximum permitted).

45 Cell Neoprene

Flexible material with a 1mm thickness, applied mainly to sleeves for ultimate flexibility, comfort and freedom of movement.

X-Lite

Super lightweight 96gsm fabric for a near-weightless performance. This lightweight fabric offers superior breathability and cooling for maximum performance gains. With a revolutionary knit structure this fabric offers unrivaled moisture management. Hyper Stretch Double-Sided Nylon For durability and flexibility.

Interlock Compression

Engineered with 40+40D nylon and latest elastomeric fibres, this 2XU fabric delivers strength, power, flexibility and durability with superior hand feel. Interlock is body sculpting and super flexible, with impressive muscle support and definition.

LD Chamois

Quick-drying long course triathlon chamois fused onto a high-density, hydrophobic foam base to manage moisture and deliver the comfort required to go the distance. Offers ample support for the bike while remaining discreet on the run.

Muscle Containment Stamping (MCS)

A revolutionary fabric support system traced over key muscle, tendon and fascia groups with targeted compression technology to wrap precise areas to further reduce muscle oscillation and damage. The advanced engineering provides greater compression power without excessive bulk.

Pro LD Chamois

Italian designed and made, this multi-layered chamois is exclusive to 2XU. Includes 80-density low-water absorption foam for added support in the aero position, and soft edging for less bulk on the run. Extremely comfortable and low profile, while still providing the cushioning required for long distance racing.

PWX Compression

2XU's proprietary PWX compression fabric has been developed for sport using medical technology. Developed at the yarn level, a compression fabric that is highly powerful but also lightweight and flexible. This is an oxymoron that no other brand has achieved. 2XU's proprietary knit fabrication uses highly durable high filament nylon yarns and the most powerful and long lasting elastane yarns to ensure our compression fabric retains consistent power, shape and comfort with repeat usage.

PWX 70D

Our most flexible and breathable compression fabric. Light yet offering powerful compression and multidirectional stretch. Combining nylon and Invista Lycra yarns for greater durability. Moisture wicking, antibacterial and UPF 50+ sun protection.

PWX 105D

Powerful yet still light, this fabric is engineered for sports. Offering powerful compression and multi-directional stretch. Combining nylon and Invista Lycra yarns for greater durability. Moisture wicking, antibacterial and UPF 50+ sun protection.

PWX 105D+

This latest PWX fabric offers powerful compression in a mid weight for greater coverage. Multidirectional stretch for consistent power. Combining nylon and INVISTA Lycra yarns for greater durability. Moisture wicking, antibacterial and UPF 50+ sun protection.

Sensor Mesh X

Utilising high filament Nylon Lycra® blend, this durable water repellent fabric offers optimal air flow and moisture management.

SBR Power

Built from 70D elastane, SBR POWER offers unmatched power, durability and strength. Featuring high-denier Nylon yarn for impressive support and moisture management, plus mid-level gauge for muscle stabilisation.

SBR Skin

Powerful 70D elastane delivers muscle support and enhanced performance. Excellent stretch and recovery memory allows the garment to move with the body from start to finish.

SBR Vent

This Italian fabric delivers extreme cooling properties and exceptional aerodynamics. Low-denier construction, 3D mesh structure and cross-section yarns ensure this fabric keeps your body cool, dry and comfortable.

Speedline Chamois

Quick drying and low profile, this chamois is designed for moisture management and support in the saddle, while remaining incredibly lightweight and discreet on the run.

Swiss Vent

Industry-leading fabric engineered by the world's premier Swiss fabric mill. High-ventilation matrix knit, Coldblack heatblocking technology, X-Cross polyester yarns and fine denier properties combine to create the world's leading heat beating triathlon fabric. Tested and proven by the world's best. Vapor Featuring micro-filament polyester yarn with hydrophobic properties, this fabric offers supreme comfort and drape. A lower denier (finer) yarn on the outside wicks moisture from the higher denier (thicker) yarn on the inside to keep the wearer comfortable and dry. Zero cling to the body.

Yamamoto Limestone Neoprene

The world's most flexible swim neoprene, manufactured in Japan from ecological limestone rather than oil-based materials. A patented closed-cell neoprene rubber with an expansion ratio seven times greater than conventional wetsuit materials, delivering enhanced comfort and an unprecedented range of movement.

Yamamoto SCS Coated Neoprene

Unique patented material that features a specifically processed coating applied over a patented closed-cell neoprene rubber. This coating results in a micellar surface that repels water when in contact with air and exhibits hydrophilic properties when under water, ensuring ultra-low resistance in competitive conditions for enhanced comfort and reduced water resistance, with complete freedom of movement. Features an expansion ratio seven times greater than conventional wetsuit materials for easy wear in all conditions.

SEASONAL
LOOKBOOK

H2 2020

2XU

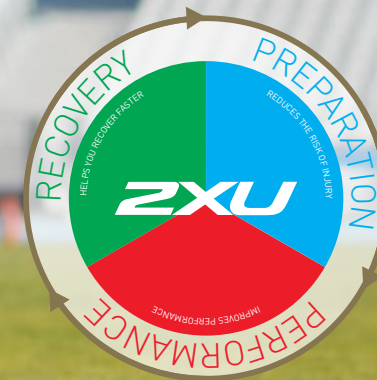

HUMAN PERFORMANCE. MULTIPLIED.

THE COMPLETE ATHLETE CYCLE

There are no shortcuts to improving performance and the most effective thing you can do to maximise your performance occurs well before you step foot onto the field, court, track, stage or pool.

By looking at the complete athlete cycle, 2XU delivers product that performs across all facets of the process, leading to greater performance, no matter our finish line.

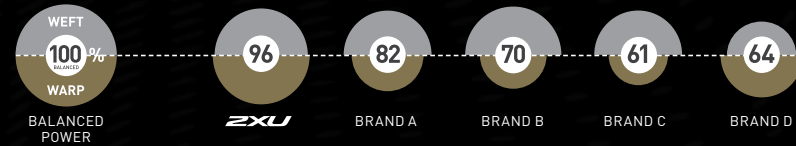

THE WORLD'S BEST. TESTED. PROVEN. FACT.

2XU is the global leader in converting scientific, evidence-based research into the world's best performance-enhancing compression garments.

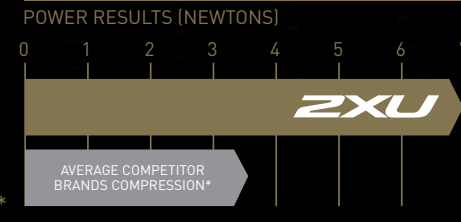

We have scientifically engineered the **LIGHTEST, MOST POWERFUL** and **MOST FLEXIBLE** compression fabric in the world, which retains its strength and integrity well beyond our competitors. Our garments are independently tested at every stage of development to give athletes the ultimate edge in training, performance and recovery. But don't take our word for it - more than a decade of research by the world's leading independent research institutes shows the true biomechanical and physiological benefits of 2XU compression.

TWO TIMES YOU

ELITE

Highly committed and competitive runners focused on winning or beating their personal best. They are most often part of a run club and are training towards key events from 10K, Half Marathon and Marathon+ distance.

With multiple training sessions each week, they are looking for the performance and recovery benefits that 2XU provides.

ELITE

They are serious about their training, attending sessions 5+ times per week. Most likely they are attending high intensity or functional training sessions where the focus is on developing strength and improving aerobic capacity.

They are seeking products that provide support to push their limits in these sessions.

ELITE

They are serious about their training, attending sessions 5+ times per week. Most likely they are attending high intensity or functional training sessions where the focus is on developing strength and improving aerobic capacity.

They are seeking products that help them perform at their peak and back it all up again for the next session.

ELITE

Highly committed and competitive athletes focused on winning or beating their personal best. They are most often part of a Triathlon club and are training towards key events (Olympic distance – Ironman).

With multiple training sessions each week, they are looking for the performance and recovery benefits that 2XU provides to keep them performing at their peak.

PERFORM

A regular runner, running multiple times per week they are focused on achievement be that a new distance, faster time or the completion of a mass participation event.

They are looking for products that help them achieve their best and eliminate soreness or injury post-run.

PERFORM

Committed to improving their health and physical appearance, they are part of a gym or studio that they attend 2-3 times per week. Functional training will be a staple as will be some low impact studio sessions.

They choose products that make them feel good when working out, through providing coverage and support as well as looking their best.

PERFORM

Focused on improving their physical performance, they regularly 'hit the gym' or attend functional classes aiming to increase muscle and reduce excess weight.

They look for products that help them work out free from distractions whilst looking good.

PERFORM

Whilst not necessarily describing themselves as a Triathlete, they are incredibly fit and take part in a number of triathlon events each season as a means of staying fit and achieving physical goals.

They want to look the part and have products that help them train and race to their full potential.

ACTIVE

They don't consider themselves a 'runner' but are committed to getting out and going for a run or jog. More often than not these are people looking to improve their health and physical fitness with running being the easiest way to get moving.

They are looking for products that help them run easier and eliminate the pain they feel post-run.

ACTIVE

With a primary focus on staying 'fit', these women see training as a means to an end - both from a physical and well-being point of view. They may be a member of a gym or studio, have a PT, and workout 1-2 times per week.

They are seeking products that provide comfort and support in the areas they need it.

ACTIVE

These guys are working out to get themselves back in shape and stay on top of their current weight. It is most likely that their training is a mixture of weights and cardio activity designed to improve their physical appearance.

ACTIVE

New to the sport of triathlon, they have completed one or more 'enticer' triathlons and have now committed to competing more frequently.

They are looking for products that help them perform and enjoy the experience.

CONSUMER GROWTH TRENDS

TWO TIMES YOU

PERFORMANCE MATTERS

INSIGHTS: Continued growth in mass participation events across Running and Triathlon with participants looking to push their performance and achieve a new personal best.

The mass take up of wearable technology and performance tracking apps such as Strava highlight the desire to track, share and improve personal performance

IMPLICATIONS: 2XU performance positioning enables consumers to prepare, perform and recover like never before and achieve their personal best.

THE GREAT OUTDOORS

INSIGHTS: Recreational and competitive running continues to grow on the back of increased number of organised outdoor running events such as Park Run.

Training is also moving outdoor to complement traditional gym workouts.

IMPLICATIONS: 2XU performance fabrics with proven breathability, cooling and moisture management technology assists training and competing in a broad range of outdoor environment

TRAINING TO TRAIN

INSIGHTS: Rapid global growth in functional training across all consumer groups shows no signs of slowing.

Training also underpins majority of other activities (team sports, running and triathlon) to build strength and functional fitness

IMPLICATIONS: 2XU Compression enables consumers to increase their power for their best workout and aid their recovery so they can back it up again the next day.

ACTIVE RECOVERY

INSIGHTS: Broad understanding for the role that recovery plays for athletes of all levels to not only prevent injury but aid performance.

IMPLICATIONS: 2XU Recovery range is proven to aid recovery to keep consumers performing day in, day out.

MR6206a / WR6207a

GHST
1/2 ZIP
LONG SLEEVE
TOP

1/ TOTAL COMFORT

Ribbed raglan sleeves provide maximum movement, a 1/2 zip design lets you adjust airflow, while slit thumb-holes on cuffs provide extra warmth on cooler days.

2/ STAY COOL

Quick-dry, lightweight moisture-wicking fabric pulls sweat away from the skin while mesh panels across back allow air to flow freely.

3/ BE SEEN

Reflective logos and colour hit through ribbed shoulder provide visibility in low-light conditions.

4/ NO SMELL

Antibacterial and anti-odour technology keeps you fresher for longer between washes, reducing your environmental footprint.

Recommended Activities Running.

Colours Available Men: BLK/WHT, POS/UAQ.

Women: BLK/WHT, ULT/WHT.

Size Range Men: XS, S, M, L, XL, XXL. Women: XXS, XS, S, M, L, XL.

Fabric Single Jersey: 88% Polyester, 12% Spandex. Mesh: 92% Polyester, 8% Spandex. Rib: 90% Polyester, 10% Spandex.

GARMENT FEATURES

- 1/2 zip long sleeve
- Stand collar
- Lightweight moisture-wicking jersey on front and arms
- Mesh back panel
- Two-tone ribbed shoulders
- Thumb-holes at sleeve cuffs
- Reflective logos and trims
- Antibacterial and anti-odour technology

UTILITY LONGLINE INSULATION JACKET

With a water-resistant shell, 3M featherless fill for sustainable warmth and waterproof storage, the Utility Longline Insulation Jacket protects you from the elements when you're in transit.

1/ STAY WARM

Lightweight 3M™ Thinsulate™ Featherless Insulation is fast to dry and mimics the performance of 600 fill-power natural down even when wet, whilst a thermo-reflective inner back panel retains body heat for added warmth.

2/ STAY DRY

Double-weave, downproof shell with environmentally responsible C6 DWR treatment withstands rain and showers.

3/ ESSENTIAL STORAGE

Fleece-lined front side pockets with zip closure for warmth, plus an internal pocket and waterproof zip pocket on the chest for valuables.

4/ NO SMELL

Antibacterial and anti-odour technology keeps you fresher for longer between washes, reducing your environmental footprint.

Product Code WR6284b

Recommended Activities Transit, Casual.

Colours Available BLK/BLK, WHT/BLK.

Size Range XXS, XS, S, M, L, XL.

Fabric Outer Shell: 100% Polyester. Lining: 100% Nylon.

Thermo Reflective Lining: 100% Polyester. Insulation: 100% Polyester.

FABRIC GLOSSARY

105D Power Mesh PWX Compression

The latest 105D Power Mesh PWX Compression technology offers incredible stabilisation for greater power output and reduced muscle movement to minimise fatigue. Powerful mesh construction delivers increased ventilation to keep the body cool, as well as aerodynamic, dimpled air flow technology for enhanced speed and moisture management.

39 Cell Neoprene

The most buoyant neoprene available, with a thickness ranging from 1mm to 5mm (5mm is the maximum permitted).

45 Cell Neoprene

Flexible material with a 1mm thickness, applied mainly to sleeves for ultimate flexibility, comfort and freedom of movement.

X-Lite

Super lightweight 96gsm fabric for a near-weightless performance. This lightweight fabric offers superior breathability and cooling for maximum performance gains. With a revolutionary knit structure this fabric offers unrivaled moisture management.

Hyper Stretch Double-Sided Nylon

For durability and flexibility.

Interlock Compression

Engineered with 40+40D nylon and latest elastomeric fibres, this 2XU fabric delivers strength, power, flexibility and durability with superior hand feel. Interlock is body sculpting and super flexible, with impressive muscle support and definition.

LD Chamois

Quick-drying long course triathlon chamois fused onto a high-density, hydrophobic foam base to manage moisture and deliver the comfort required to go the distance. Offers ample support for the bike while remaining discreet on the run.

Muscle Containment Stamping (MCS)

A revolutionary fabric support system traced over key muscle, tendon and fascia groups with targeted compression technology to wrap precise areas to further reduce muscle oscillation and damage. The advanced engineering provides greater compression power without excessive bulk.

Pro LD Chamois

Italian designed and made, this multi-layered chamois is exclusive to 2XU. Includes 80-density low-water absorption foam for added support in the aero position, and soft edging for less bulk on the run. Extremely comfortable and low profile, while still providing the cushioning required for long distance racing.

PWX Compression

2XU's proprietary PWX compression fabric has been developed for sport using medical technology. Developed at the yarn level, a compression fabric that is highly powerful but also lightweight and flexible. This is an oxymoron that no other brand has achieved.

2XU's proprietary knit fabrication uses highly durable high filament nylon yarns and the most powerful and long lasting elastane yarns to ensure our compression fabric retains consistent power, shape and comfort with repeat usage.

PWX 70D Our most flexible and breathable compression fabric. Light yet offering powerful compression and multi-directional stretch. Combining nylon and Invista Lycra yarns for greater durability. Moisture wicking, antibacterial and UPF 50+ sun protection.

PWX 105D Powerful yet still light, this fabric is engineered for sports. Offering powerful compression and multi-directional stretch. Combining nylon and Invista Lycra yarns for greater durability. Moisture wicking, antibacterial and UPF 50+ sun protection.

PWX 105D+ This latest PWX fabric offers powerful compression in a mid weight for greater coverage. Multi-directional stretch for consistent power. Combining nylon and INVISTA Lycra yarns for greater durability. Moisture wicking, antibacterial and UPF 50+ sun protection.

FABRIC GLOSSARY CONT.

Sensor Mesh X

Utilising high filament Nylon Lycra® blend, this durable water repellent fabric offers optimal air flow and moisture management.

SBR Power

Built from 70D elastane, SBR POWER offers unmatched power, durability and strength. Featuring high-denier Nylon yarn for impressive support and moisture management, plus mid-level gauge for muscle stabilisation.

SBR Skin

Powerful 70D elastane delivers muscle support and enhanced performance. Excellent stretch and recovery memory allows the garment to move with the body from start to finish.

SBR Vent

This Italian fabric delivers extreme cooling properties and exceptional aerodynamics. Low-denier construction, 3D mesh structure and cross-section yarns ensure this fabric keeps your body cool, dry and comfortable.

Speedline Chamois

Quick drying and low profile, this chamois is designed for moisture management and support in the saddle, while remaining incredibly lightweight and discreet on the run.

Swiss Vent

Industry-leading fabric engineered by the world's premier Swiss fabric mill. High-ventilation matrix knit, Coldblack heat-blocking technology, X-Cross polyester yarns and fine denier properties combine to create the world's leading heat-beating triathlon fabric. Tested and proven by the world's best.

Vapor

Featuring micro-filament polyester yarn with hydrophobic properties, this fabric offers supreme comfort and drape. A lower denier (finer) yarn on the outside wicks moisture from the higher denier (thicker) yarn on the inside to keep the wearer comfortable and dry. Zero cling to the body.

Yamamoto Limestone Neoprene

The world's most flexible swim neoprene, manufactured in Japan from ecological limestone rather than oil-based materials. A patented closed-cell neoprene rubber with an expansion ratio seven times greater than conventional wetsuit materials, delivering enhanced comfort and an unprecedented range of movement.

Yamamoto SCS Coated Neoprene

Unique patented material that features a specifically processed coating applied over a patented closed-cell neoprene rubber. This coating results in a micellar surface that repels water when in contact with air and exhibits hydrophilic properties when under water, ensuring ultra-low resistance in competitive conditions for enhanced comfort and reduced water resistance, with complete freedom of movement. Features an expansion ratio seven times greater than conventional wetsuit materials for easy wear in all conditions.

RESEARCH REFERENCES

x

1 Power balance: The smaller difference in weft and warp values is better for consistent compression power and flexibility in all directions. Less differentiation between weft and warp equals balanced power. We have adapted CK machines and stretched the application of these machines to create our fabrics - other brands have tried to copy but have been unsuccessful.

2 Compression power: The more force needed to stretch the fabric means the greater compression power the fabric exerts for muscle stabilisation and protection. This test stretches 50 x 100mm fabric samples along the weft direction of the knit. It is stretched to 170mm in length (IE: 170% of its original length), and the required force is measured by the Instron machine.

BULK DYE AND SUBLIMATION MANUFACTURING

BULK-DYE

Our bulk-dye offering presents 3 colour options of black, navy and red. When selecting a bulk-dye garment 3 types of logo embellishment are available;

EMBROIDERY

Embroidery is the longest lasting embellishment method and provides a quality finish to garments. Whilst providing a nice finish on outer layers (e.g. jackets), embroidery is not ideal for larger back logos and chest logos applied on a thin/breathable fabric.

SCREEN PRINT

Screen printing is the most common method of textile printing, as it can be printed on almost all fabric types and provides long lasting prints with an accurate colour reproduction. Due to the set-up fees for each individual colour used, screen printing is recommended for medium to large volume orders.

HEAT TRANSFER

Heat transfer prints are pressed onto garments via high-temperature and heavy pressure. With less durability than screen print or embroidery, we strongly recommend cold machine wash only.

SUBLIMATION

Sublimation printing uses ink or dye to transfer your artwork into your desired garment. Sometimes referred to as "dye-sublimation printing," this process has many unique elements to it which allow you to have full creative freedom when customising your apparel. Traditionally this process is the most popular in the industry as it is so versatile allowing you to receive the exact colour and design you desire.

TEAM X FABRIC TECHNICAL INFORMATION

HI~FIL⁺

Utilising high filament technology, 2XU has engineered a performance fabric to maximise moisture management. Cross-channeled yarns wick vapour from the inner to outer layers in order to keep the wearer as dry and as comfortable as possible, while a mesh structure promises breathability. HI FIL+ includes Polygiene® odour control technology ensuring you stay fresh and odour free. Wear more, wash less and reduce your environmental footprint.

VAPOR

A lightweight, high-gauge woven fabric with four-way mechanical stretch. A solution that blocks out wind while remaining light and packable. High-filament yarns wick moisture away from the body to keep the wearer comfortable, dry and with zero cling to the body.

VAPOR^{XX}STRETCH

2XU's latest technology. Korean-made high gauge woven fabric with a powerful four-way stretch to move with you. High-filament polyester yarn wicks moisture and a dWR water repellent keeps you dry and comfortable. Beautiful hand feel and drape ensure style meets function.

ACTIVE LINER

For extreme moisture control through hot conditions, 2XU's ACTIVE LINING is built with polyester filament yarns to keep the wearer dry and chafe-free.

3D THERMAL SPHERE LOOP

Utilising 3D high filament polyester knit structure to maximise moisture management and trap heat to keep you warm. Polygiene® odour control technology ensuring you stay fresh and odour free.

DRIRELEASE

Permanent moisture-wicking properties that won't wash out. Dri-release® is eco-friendly and is embedded at the yarn level. This technology dries four times faster than cotton, is pilling resistant, wrinkle resistant, has no static cling and will retain its shape. FreshGuard® technology is also embedded in the yarn to eliminate odour.

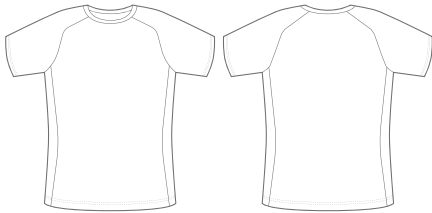

Polygiene is the world's leading permanent Anti-Bacterial treatment. As the most respected and customer recognised permanent Anti-Bacterial treatment on the market, Polygiene prevents the growth of odour-causing bacteria and fungi at the source, permanently. Only active on the textile, it does not interfere with the skin's natural bacterial flora and does not wash out, as the technology is bound and permanently integrated into the fabric. Polygiene means no more washing after every wear.

CX5723A

UNISEX SIZE RANGE: 6,8,10,12,14

SUBLIMATION or BULK DYE (black, red and navy)

GARMENT FEATURES

01. Semi-fitted, casual style tee.
02. Crew neckline with neck band and interior taping for comfort and durability.
03. Short sleeve with raglan design.
04. Chafe-free flatlock seam construction.
05. Designed for all-round functionality.

FABRIC BENEFITS

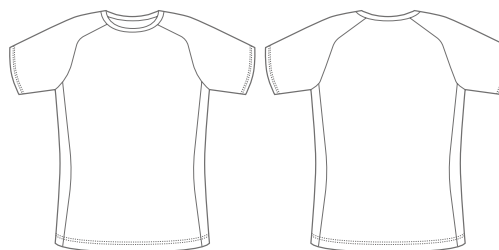

DRI RELEASE

Permanent moisture-wicking properties that won't wash out. Dri-release® is eco-friendly and is embedded at the yarn level. This technology dries four times faster than cotton, is pilling resistant, wrinkle resistant, has no static cling and will retain its shape.

FreshGuard®

Technology embedded in the yarn to eliminate odour.

BULK DYE LOGO EMBELLISHMENT OPTIONS

Garment pictured is sublimated, available bulk dye colours are black, navy and red.
Dri Release sublimation finishes with a marle look due to fabric composition.

YOUTH TEAM X LONGSLEEVE COMFORT TOP

CX5759A

UNISEX SIZE RANGE: 6,8,10,12,14

SUBLIMATION or BULK DYE (black, red and navy)

GARMENT FEATURES

01. Semi-fitted, casual style long sleeve top.
02. Crew neckline with neck band and interior taping for comfort and durability.
03. Long sleeve with raglan design.
04. Chafe-free flatlock seam construction.
05. Designed for all-round functionality.

YOUTH TEAM X POLO

CX5758A

UNISEX SIZE RANGE: 6,8,10,12,14

SUBLIMATION or BULK DYE (black, red and navy)

GARMENT FEATURES

01. Semi-fitted, classic style polo.
02. Self fabric collar with two-button placket.
03. Short sleeves with self fabric armbands.
04. Side vents with tennis tail at hem for a full range of motion.
05. Chafe-free flatlock seam construction.
06. Designed for all-round functionality.

FABRIC BENEFITS

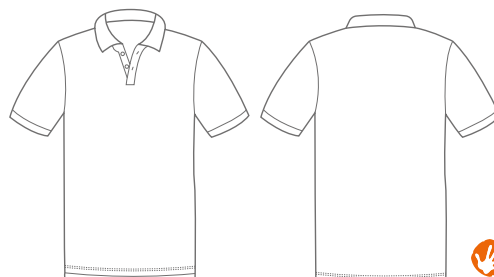

HI FIL

Utilising 2XU's breakthrough moisture management technology. Keeps you drier through high-filament yarns and cooler through our advanced knit structure.

Polygiene®

Odour control technology ensures you stay fresh and odour-free. Wear more, wash less and reduce your environmental footprint.

BULK DYE LOGO EMBELLISHMENT OPTIONS

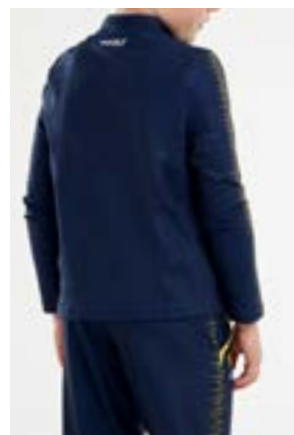

Garment pictured is sublimated, available bulk dye colours are black, navy and red.

YOUTH TEAM X LONGSLEEVE 1/4 ZIP TOP

CX5760A

UNISEX SIZE RANGE: 6,8,10,12,14

SUBLIMATION or BULK DYE (black, red and navy)

GARMENT FEATURES

01. Semi-fitted style.
02. Long sleeve, set -n sleeve design.
03. Stand-up collar for warmth and protection.
04. 1/4 zip at centre front.
05. Designed for all-round functionality.

FABRIC BENEFITS

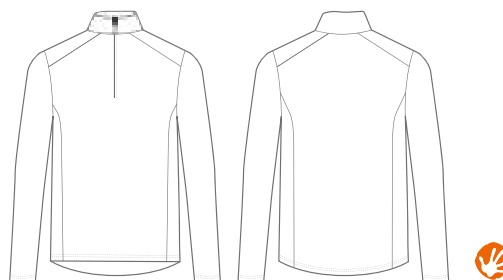

3D THERMAL SPHERE LOOP

Utilising 3D high filament polyester knit structure to maximise moisture management and trap heat to keep you warm.

Polygiene®

Odour control technology ensuring you stay fresh and odour free. Wear more, wash less and reduce your environmental footprint.

BULK DYE LOGO EMBELLISHMENT OPTIONS

Garment pictured is sublimated, available bulk dye colours are black, navy and red.

YOUTH TEAM X ZIP HOODIE

CX5761A

UNISEX SIZE RANGE: 6,8,10,12,14

SUBLIMATION or BULK DYE (black, red and navy)

GARMENT FEATURES

01. Semi-fitted style.
02. Hood with adjustable bungee cord.
03. Full front zipper.
04. Sleeve and hem cuffs for optimal comfort and fit.
05. Side front pockets.
06. Designed for all-round functionality.

FABRIC BENEFITS

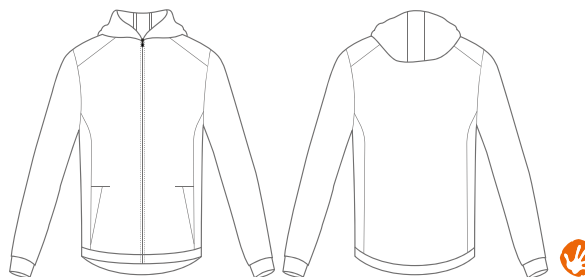

3D THERMAL SPHERE LOOP

Utilising 3D high filament polyester knit structure to maximise moisture management and trap heat to keep you warm.

Polygiene®

Odour control technology ensuring you stay fresh and odour free. Wear more, wash less and reduce your environmental footprint.

BULK DYE LOGO EMBELLISHMENT OPTIONS

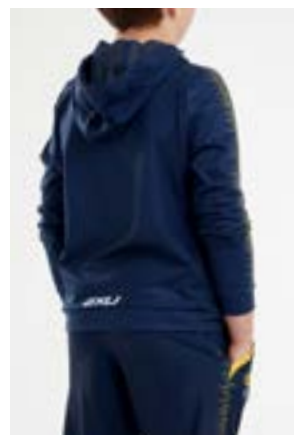

Garment pictured is sublimated, available bulk dye colours are black, navy and red.

YOUTH TEAM X PULLOVER HOODIE

CX5932A

UNISEX SIZE RANGE: 6,8,10,12,14

SUBLIMATION or BULK DYE (black, red and navy)

GARMENT FEATURES

01. Semi-fitted pullover style.
02. Hood with adjustable bungee cord.
03. Sleeve and hem cuffs for optimal comfort and fit.
04. Side front pockets.
05. Designed for all-round functionality.

FABRIC BENEFITS

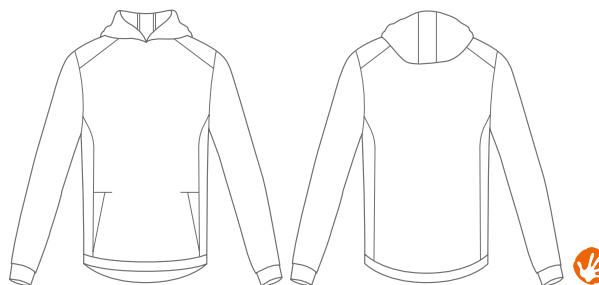

3D THERMAL SPHERE LOOP

Utilising 3D high filament polyester knit structure to maximise moisture management and trap heat to keep you warm.

Polygiene®

Odour control technology ensuring you stay fresh and odour free. Wear more, wash less and reduce your environmental footprint.

BULK DYE LOGO EMBELLISHMENT OPTIONS

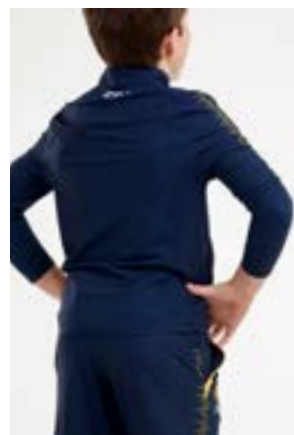

Garment pictured is sublimated, available bulk dye colours are black, navy and red.

YOUTH TEAM X TRACK JACKET

CX5762A

UNISEX SIZE RANGE: 6,8,10,12,14

SUBLIMATION or BULK DYE (black, red and navy)

GARMENT FEATURES

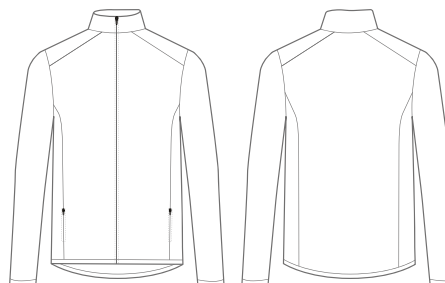

01. Semi-fitted style.
02. 4-way stretch for ease of movement and comfort.
03. Stand-up collar for warmth and protection.
04. Full front zipper.
05. Side front zip pockets for convenient storage.
06. Designed for all-round functionality.

FABRIC BENEFITS

VAPOR X STRETCH

2XU's latest technology. Korean-made high gauge woven fabric with a powerful four-way stretch to move with you. High-filament polyester yarn wicks moisture and a DWR water repellent keeps you dry and comfortable. Beautiful hand feel and drape ensure style meets function.

BULK DYE LOGO EMBELLISHMENT OPTIONS

Garment pictured is sublimated, available bulk dye colours are black, navy and red.

YOUTH TEAM X TRACK PANT

CX5763B

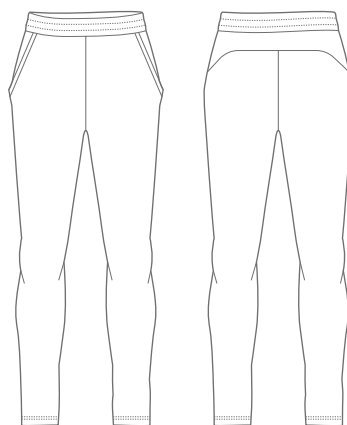

UNISEX SIZE RANGE: 6,8,10,12,14

SUBLIMATION or BULK DYE (black, red and navy)

GARMENT FEATURES

01. Semi-fitted style with tapered leg.
02. 4-way stretch for ease of movement and comfort.
03. 4cm width elasticated waist band with a hidden drawcord for a personalised and secure fit.
04. Side front pockets for convenient storage.
05. Designed for all-round functionality.

FABRIC BENEFITS

VAPOR X STRETCH

2XU's latest technology. Korean-made high gauge woven fabric with a powerful four-way stretch to move with you. High-filament polyester yarn wicks moisture and a dWR water repellent keeps you dry and comfortable. Beautiful hand feel and drape ensure style meets function.

BULK DYE LOGO EMBELLISHMENT OPTIONS

Garment pictured is sublimated, available bulk dye colours are black, navy and red.

YOUTH TEAM X CASUAL SHORT

CX5764B

UNISEX SIZE RANGE: 6,8,10,12,14

SUBLIMATION or BULK DYE (black, red and navy)

GARMENT FEATURES

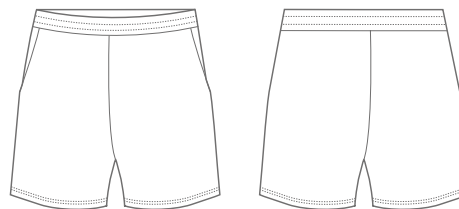

01. Straight hem design.
02. 4cm width elasticated waistband with an internal drawcord for a personalised and secure fit.
03. Side front pockets for convenient storage.
04. Designed for all-round functionality.

FABRIC BENEFITS

VAPOR

A lightweight, high-gauge woven fabric with a four-way mechanical stretch. A solution that blocks out wind while remaining light and packable. High-filament yarns wick moisture away from the body to keep the wearer comfortable, dry and with zero cling to the body.

BULK DYE LOGO EMBELLISHMENT OPTIONS

Garment pictured is sublimated, available bulk dye colours are black, navy and red.

CUSTOM CYCLE COLLECTION

2XU
C U S T O M

50M **2XU**
C U S T O M

THE NEW **2XU CUSTOM CYCLE COLLECTION** HAS BEEN EXCLUSIVELY ENGINEERED IN PARTNERSHIP WITH **JELLY BELLY PRO CYCLING TEAM.**

CYCLING TEAM

“ The 2XU race skinsuit provides a great fit in a very aerodynamic package that still has pockets for those really long races. ”

“ As athletes we're always too cold, or too hot and are always modifying a piece of clothing with a pair of scissors. At Jelly Belly Pro Cycling we were able to work directly with 2XU to create a range of products that more than encompasses the gamut of weather conditions we experience when racing and training and in a fit that is comfortable, aerodynamic and looks amazing. I've no longer a need for my scissors. ”

“ I really enjoy wearing the lightweight 2XU summer jersey on those hot days in the big mountains. Staying cool and comfortable makes all the difference in the long stage races that the Jelly Belly Pro Cycling Team partakes in. ”

- JELLY BELLY PRO CYCLING TEAM

CUSTOM CYCLING FABRIC TECHNICAL INFORMATION

The Custom Cycling collection has been engineered to deliver enhanced comfort and aerodynamics. The collection delivers world leading cycling garment technology for first class performance.

KINETIC POWER

Engineered specifically for cycle. This durable, high denier nylon elastane knit provides increased power through higher muscle holding ability.

KINETIC SPEED

Swiss-made Kinetic Speed, with golf ball air trapping performance for increased aerodynamics.

VAPOR

Lightweight stretch high gauge woven fabric that blocks out the wind while staying light and packable.

HI~FILXTREME

High filament polyester yarns provides extreme moisture management and breathability, while the brushed inner delivers warmth and comfort.

FLXPRO

Utilising a polyester elastane blend to provide essential stretch and recovery.

SMD

High filament yarns in a mesh knit structure to ensure moisture control.

HI~FILVENT+

A high filament polyester yarn created into a cycle-specific vent knit structure to optimise ventilation and improve aerodynamics. Polygiene® antibacterial for lifetime odour elimination.

ITALIASUB

Italian-made and engineered specifically for cycle. This sublimation fabric offers customisation, extreme moisture management and high filament yarns to ensure extra comfort.

HI~FIL+

A performance fabric using high filament technology for maximum moisture management. Cross channelled yarns wick vapour from the inner to outer layers to keep the wearer dry and comfortable. Polygiene® antibacterial for lifetime odour elimination.

2X20K

Lightweight and flexible PU membrane that provides 20k waterproofing and 20k moisture vapour transfer. This fabric features a high filament jersey backing for comfort.

CUSTOM CYCLING FABRIC TECHNICAL INFORMATION

ICE X

Cooling technology that actively lowers skin temperature when contact is made with the skin. The fabric weave also blocks IR and UV rays for added sun protection.

ICE X MESH

ICE X MESH technology draws heat from the body and lowers skin temperature by up to 3°C / 5.4°F. The ultimate solution for endurance demands, ICE X MESH will keep athletes cool through the harshest conditions.

VELO HEAT

Italian-made high filament brushed polyester to encourage the perfect microclimate. The high gauge knit provides dryness and warmth, while the brushed backing traps heat. The high filament x section yarns aid dryness.

VELO MESH

High filament yarns in a mesh knit structure which aids cooling and moisture control.

VELOPRO HEAT

High filament yarn coupled with high density Lycra yarn gives high power, durability and breathability. The brushed backing traps heat for warmth and increases moisture management.

HI FIL VELO

An Italian-made, cycle-specific HI FIL VELO performance fabric engineered for maximum moisture management. Cross channelled yarns wick vapour from the inner to the outer layers to keep the wearer dry and comfortable, while the mesh structure promotes breathability.

VELO POWER

Velo Power utilises Italian-made high-filament nylon yarns, coupled with high denier elastane fibres for exceptional durability and muscle holding ability.

SENSOR MESH

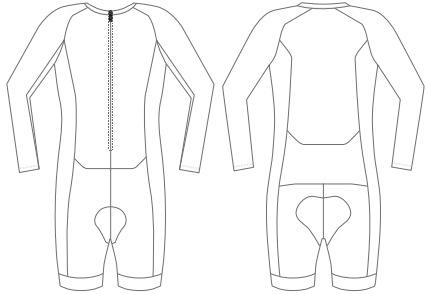

Utilising a polyester-elastane breathable matrix for optimal air flow for the ultimate in moisture management.

SUBLIMATION/BULK DYE

SIZE RANGE: 2XS - 5XL

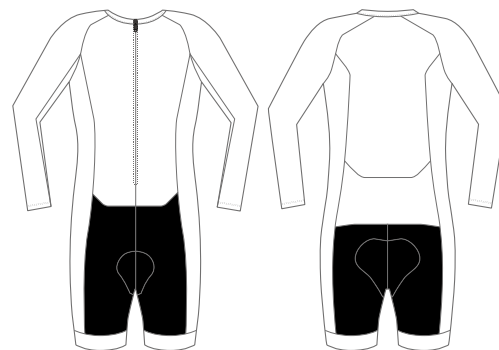

GARMENT FEATURES

01. ACF: Anatomical Cycle Fit
02. Alta Badia chamois
03. Reflective trims for visibility
04. Rear pockets for storage
05. 75mm wide Italian leg grippers for performance and comfort

BULK DYE COLOUR OPTIONS

- Black
- Navy 282C
- Bluette 2728C
- Red 186C
- Gunmetal Grey 18-0201 TPX
- White

*Areas highlighted in black denotes bulk dye fabric.

FABRIC BENEFITS

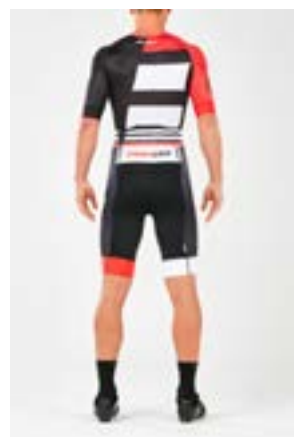

01. VELO POWER
Velo Power utilises Italian-made high-filament nylon yarns, coupled with high denier elastane fibres for exceptional durability and muscle holding ability.
02. KINETIC SPEED
Swiss-made Kinetic Speed, with golf ball air trapping performance for increased aerodynamics.
03. ICE X MESH
Draws heat from the body and lowers skin temperature by up to 3°C / 5.4°F. The ultimate solution for endurance demands, ICE X MESH will keep athletes cool through the harshest conditions.
04. ICE X
Offering superior cooling performance with support and moisture control, ICE X utilises a high filament polyester cooling yarn construction to lower body temperature when working out. This is supported by powerful elastane yarns that provides the right amount of stretch and recovery for cycling.
05. ALTA BADIA CHAMOIS
Italian-made maximum 120 density foam chamois with multi-zoned padding and pre-shaped technology to provide ultimate comfort. Engineered as a seamless one-piece design, perforated for excellent breathability and enhanced moisture management, with a low profile outer edge to prevent chafing. Antibacterial protection has been added for anti-odour control.

SUBLIMATION/BULK DYE

SIZE RANGE: 2XS - 4XL

Steph is 182cm, 64kgs and wears a Small

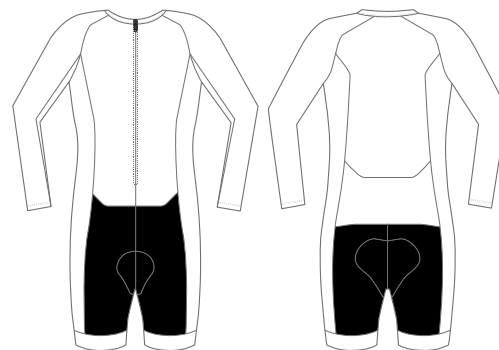

GARMENT FEATURES

01. ACF: Anatomical Cycle Fit
02. Alta Badia chamois
03. Reflective trims for visibility
04. Rear pockets for storage
05. 75mm wide Italian leg grippers for performance and comfort

BULK DYE COLOUR OPTIONS

- Black
- Navy 282C
- Bluette 2728C
- Red 186C
- Gunmetal Grey 18-0201 TPX
- White

*Areas highlighted in black denotes bulk dye fabric.

FABRIC BENEFITS

01. VELO POWER
Velo Power utilises Italian-made high-filament nylon yarns, coupled with high denier elastane fibres for exceptional durability and muscle holding ability.
02. KINETIC SPEED
Swiss-made Kinetic Speed, with golf ball air trapping performance for increased aerodynamics.
03. ICE X MESH
Draws heat from the body and lowers skin temperature by up to 3°C / 5.4°F. The ultimate solution for endurance demands, ICE X MESH will keep athletes cool through the harshest conditions.
04. ICE X
Offering superior cooling performance with support and moisture control, ICE X utilises a high filament polyester cooling yarn construction to lower body temperature when working out. This is supported by powerful elastane yarns that provides the right amount of stretch and recovery for cycling.
05. ALTA BADIA CHAMOIS
Italian-made maximum 120 density foam chamois with multi-zoned padding and pre-shaped technology to provide ultimate comfort. Engineered as a seamless one-piece design, perforated for excellent breathability and enhanced moisture management, with a low profile outer edge to prevent chafing. Antibacterial protection has been added for anti-odour control.

WOMEN'S ELITE CYCLE JERSEY

WX4953A

SUBLIMATION

SIZE RANGE: 2XS - 4XL

Steph is 182cm, 64kgs and wears a Small

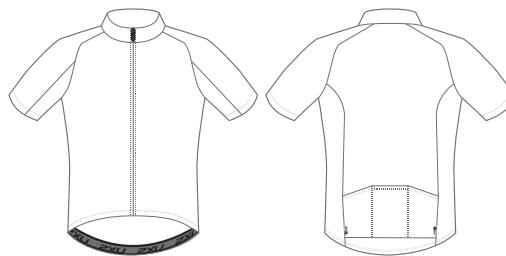

GARMENT FEATURES

01. ACF: Anatomical Cycle Fit
02. Reflective trims for visibility
03. Rear pockets for storage

FABRIC BENEFITS

01. HI FIL VELO
An Italian-made, cycle-specific HI FIL VELO performance fabric engineered for maximum moisture management. Cross channelled yarns wick vapour from the inner to the outer layers to keep the wearer dry and comfortable, while the mesh structure promotes breathability.
02. VELO MESH
High-filament yarns in a mesh knit structure to aid cooling and moisture control.

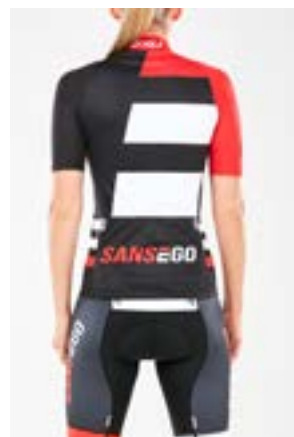

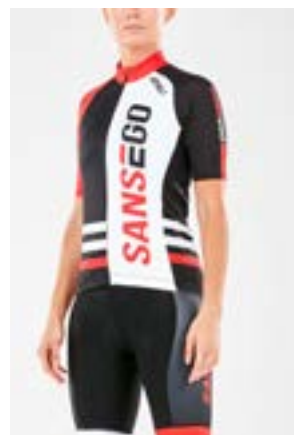

WOMEN'S PERFORM CYCLE JERSEY

WX4959A

SUBLIMATION

SIZE RANGE: 2XS - 4XL

Steph is 182cm, 64kgs and wears a Small

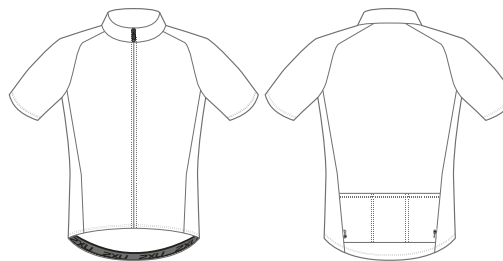

GARMENT FEATURES

01. ACF: Anatomical Cycle Fit
02. Reflective trims for visibility
03. Rear pockets for storage
04. Polygiene® antibacterial for lifetime odour elimination

FABRIC BENEFITS

01. HI FIL+
A performance fabric using high filament technology for maximum moisture management. Cross channelled yarns wick vapour from the inner to outer layers to keep the wearer dry and comfortable. Polygiene® antibacterial for lifetime odour elimination.
02. HI FIL VENT+
A high filament polyester yarn created into a cycle-specific vent knit structure to optimise ventilation and improve aerodynamics. Polygiene® antibacterial for lifetime odour elimination.

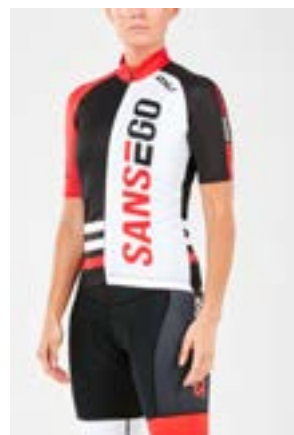

WOMEN'S SPRING CYCLE GILET

WX4967A

SUBLIMATION

SIZE RANGE: 2XS - 4XL

Steph is 182cm, 64kgs and wears a Small

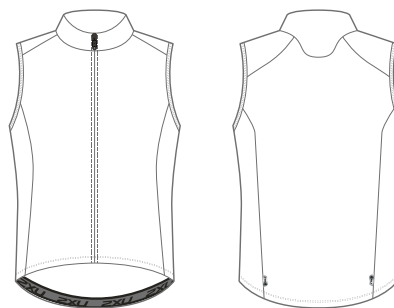

GARMENT FEATURES

01. ACF: Anatomical Cycle Fit
02. Reflective trims for visibility

FABRIC BENEFITS

01. VAPOR STRETCH
Lightweight stretch high gauge woven fabric that blocks out the wind while staying light and packable.
02. SENSOR MESH
Utilising a polyester-elastane breathable matrix for optimal air flow for the ultimate in moisture management.

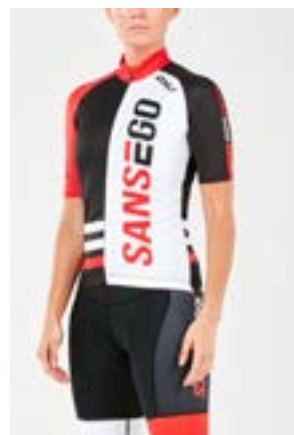

WOMEN'S WIND DEFENCE CYCLE GILET

WX4969A

THE 2XU STORY

To those who compete to win: 2XU compression can be the difference between victory or defeat.
To those who compete against themselves: 2XU compression is the means to a personal best.
To those who compete against the pressure of modern life: 2XU compression is fitness made possible.

2XU (pronounced Two Times You) has grown to become one of the most technical sporting apparel brands in the world; driven by a relentless obsession to advance human performance through the development of world-leading performance-enhancing compression garments.

2XU is at the forefront of global sports compression wear and is a market leader in converting scientific, independent, evidenced based research into the world's best performance enhancing sportswear. Starting out as a triathlon specific sportswear brand in 2005, the past decade has seen our range of apparel and accessories grow, together with the advancement of our world-leading performance-enhancing compression garments.

Elite athletes rely on 2XU every day and we're proud to be the official compression partner of the Australian Institute of Sport, the National Strength and Conditioning Association and numerous other national and state sports governing bodies. Together with world renowned tertiary institution, RMIT University, 2XU utilises elite athletes and sports science experts in conjunction with the world's leading fabric testing technology to validate the performance advantage of our garments.

Now present in 71 countries around the world, 2XU has graced the bodies of multiple world champion athletes and has formed powerful alliances and partnerships across organisations and sports world-wide including basketball, rugby, football, baseball, hockey, swimming, netball, soccer, triathlon, cycling, and running.

Our garments take athletes beyond what they thought possible and enable them to train smarter, recover faster and perform better.

COMPRESSION BENEFITS

Since 2005, 2XU has been developing the world's most advanced compression technology, which support athletes prepare, perform and recover better.

PREPARATION

Proper warm up is important to prepare for training and competition. 2XU's graduated compression garments promote increased blood flow for faster warm up and greater oxygen to muscle tissue. This allows muscles to move more efficiently.

PERFORMANCE

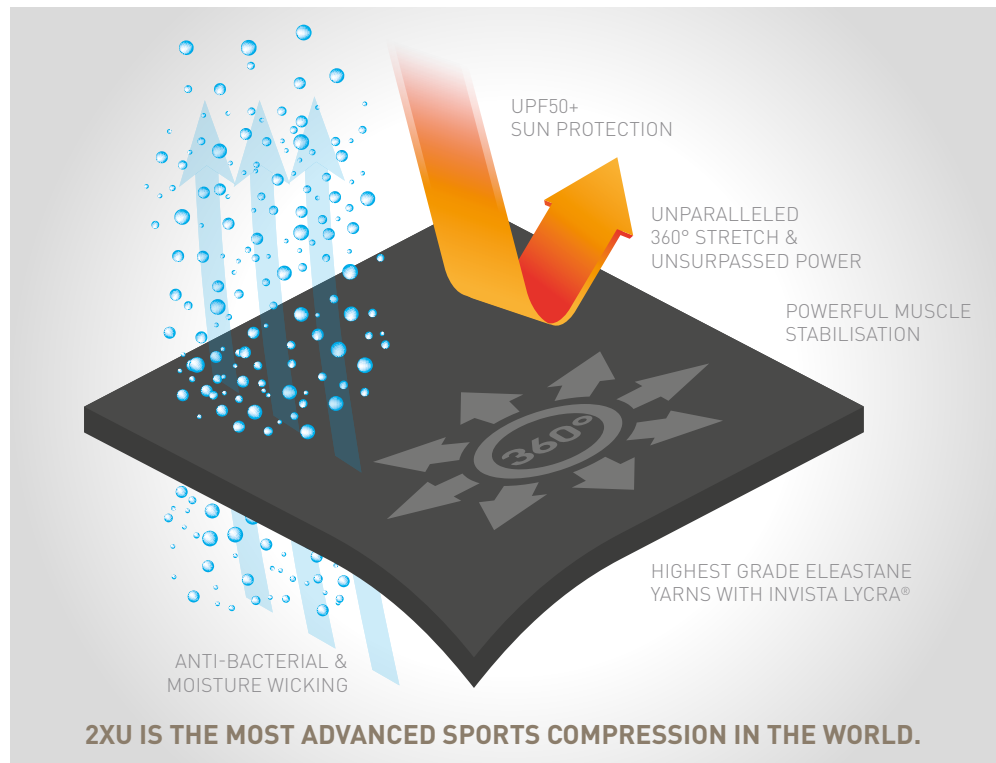

Protect muscles to help reduce damage, fatigue and long term overuse injuries for a stronger performance. 2XU compression helps to align and keep muscles in place to reduce muscle oscillation that can lead to muscle strain and soreness.

RECOVERY

Restore your body back to peak levels in the fastest possible time. 2XU graduated compression increases venous return to the heart and increases blood circulation. This helps with the removal of blood lactate from muscles to reduce swelling and speed up muscle repair for faster recovery.

COMPRESSION FABRIC TECH INFO

Custom compression range uses two main fabric types to ensure optimal compression for each body part.

As a premium global sportswear brand, 2XU's point of difference is a unique fabric combination that is light, flexible, powerful and durable; delivering physiological benefits far beyond the competition.

Further fabric benefits include:

- > Superior grade circular knit structure to deliver multi-directional stretch, greater flexibility, power and durability
- > Highest grade elastane yarns with invistra lycra® for durability
- > Anti-bacterial and anti-odour properties to reduce stink
- > Moisture-wicking fabric to keep the wearer dry
- > Flatlock seams to reduced chafing
- > UPF50+ for maximum sun protection

UPPER BODY COMPRESSION RANGE

TR2 COMPRESSION

WAX4756b

WOMEN'S TR2 CUSTOM COMPRESSION TIGHTS
(SIZE RANGE: XXS - XXL, XST, ST, MT, LT)

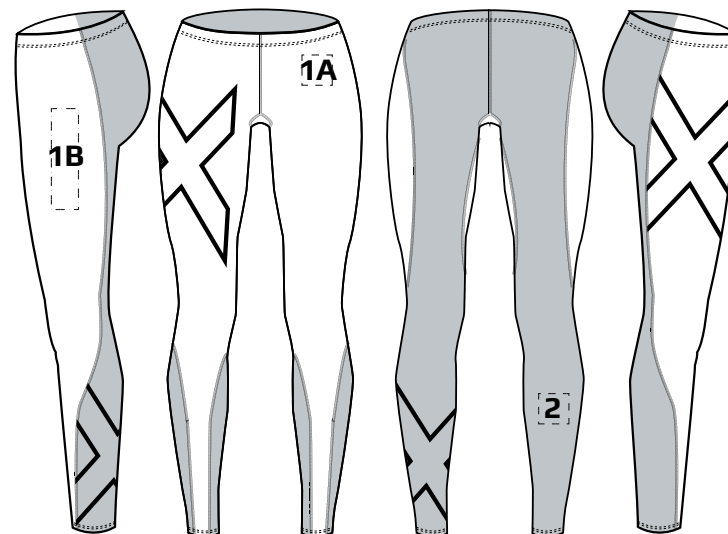

GARMENT FEATURES

01. Compression support to adductor, glute, quad, hamstring and calf muscles to reduce muscle vibration
02. PWX 70D front and 105D back panels for flexibility and power
03. Graduated compression for greater recovery between workouts
04. Drawstring waistband for secure fit
05. Flatlock seams to reduce chafing

COMPRESSION BENEFITS

- Reduced muscle fatigue and soreness
- Reduced muscle damage and risk of overuse injuries
- Improved performance
- Improved muscle alignment
- Increased agility
- Faster recovery

TR2 COMPRESSION

WAX4757b

WOMEN'S TR2 CUSTOM COMPRESSION 3/4 TIGHTS
(SIZE RANGE: XXS - XXL, XST, ST, MT, LT)

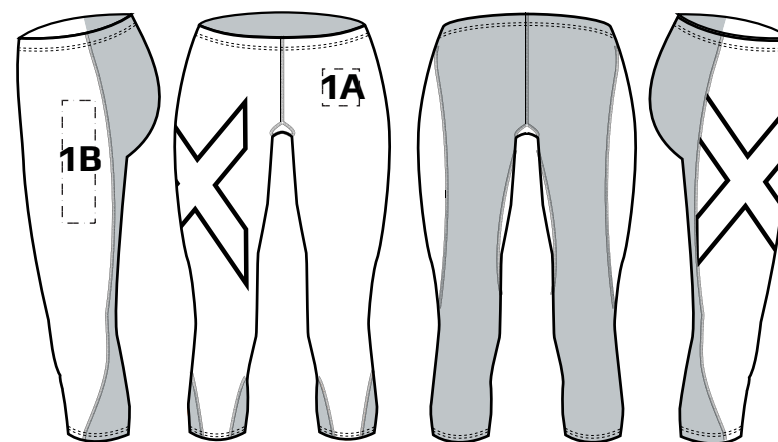

GARMENT FEATURES

01. Compression support to adductor, glute, quad, hamstring and calf muscles
02. PWX 70D front and 105D back panels for flexibility and power
03. Drawstring waistband for secure fit
04. Flatlock seams to reduce chafing

COMPRESSION BENEFITS

- Reduced muscle fatigue and soreness
- Reduced muscle damage and risk of overuse injuries
- Improved performance
- Improved muscle alignment
- Increased agility

TR2 COMPRESSION

WAX4758b

WOMEN'S TR2 CUSTOM COMPRESSION SHORTS
(SIZE RANGE: XXS - XXL)

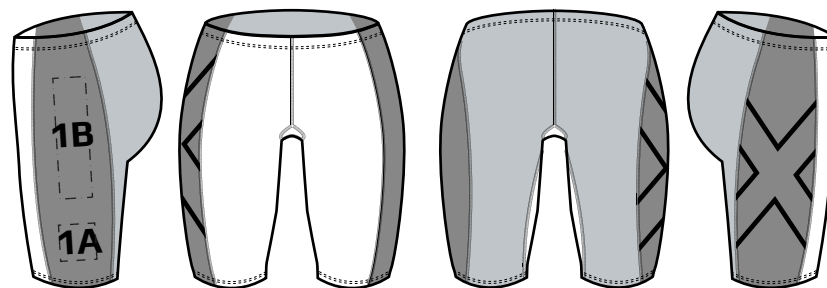

GARMENT FEATURES

01. Compression support to adductor, glute, quad and hamstring muscles to reduce muscle vibration
02. PWX 70D front and 105D back panels for flexibility and power
03. Drawstring waistband for secure fit
04. Flatlock seams to reduce chafing

COMPRESSION BENEFITS

- Reduced muscle fatigue and soreness
- Reduced muscle damage and risk of overuse injuries
- Improved performance
- Improved muscle alignment
- Increased agility

MID-RISE COMPRESSION

WAX4753b

WOMEN'S MID-RISE CUSTOM COMPRESSION TIGHTS

(SIZE RANGE: XXS - XXL, XST, ST, MT, LT)

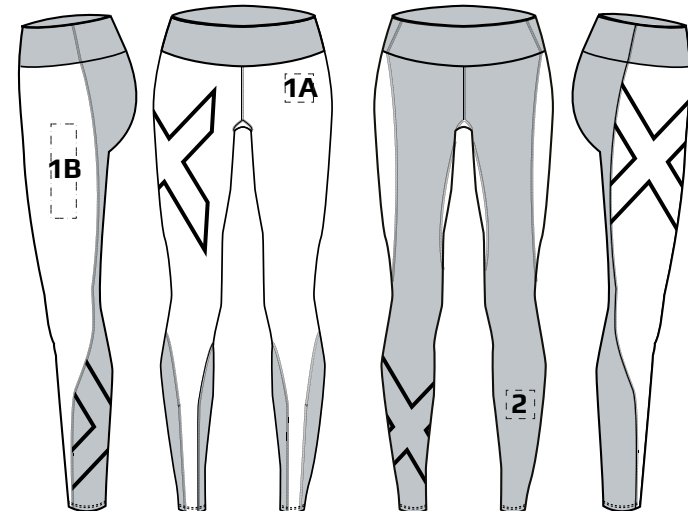

GARMENT FEATURES

01. Compression support for greater protection to abductor, glute, quad, hamstring and calf muscles
02. Graduated compression for improved warmup and faster recovery post exercise
03. PWX 70D front and 105D back panels for flexibility and power
04. Power comfort wide waistband
05. Body firming and sculpting fit
06. Flatlock comfort seams to reduce chafe

COMPRESSION BENEFITS

- Reduced muscle fatigue and soreness
- Reduced muscle damage and risk of overuse injuries
- Improved performance
- Improved muscle alignment
- Increased agility
- Faster recovery

MID-RISE COMPRESSION

WAX4754b

WOMEN'S MID-RISE CUSTOM COMPRESSION 3/4 TIGHTS
(SIZE RANGE: XXS - XXL, XST, ST, MT, LT)

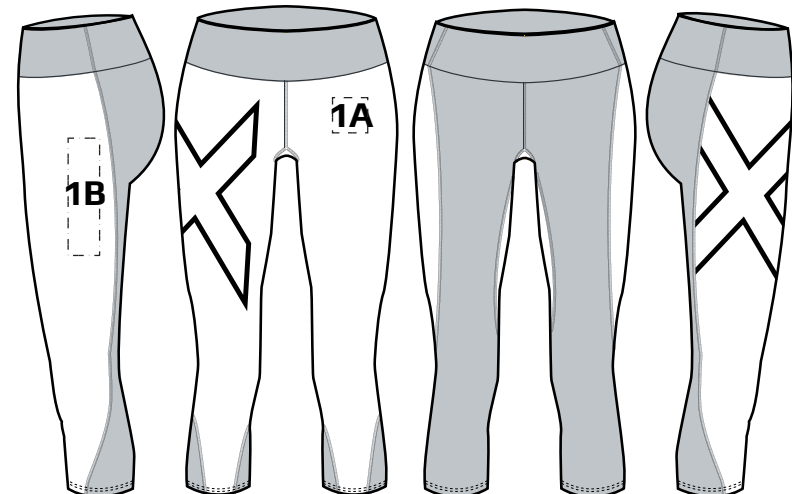

GARMENT FEATURES

01. Compression support for greater protection to abductor, glute, quad, hamstring and calf muscles to reduce muscle vibration
02. PWX 70D front and 105D back panels for flexibility and power
03. Power comfort wide waistband
04. Bodyfirming and sculpting fit
05. Flatlock comfort seams to reduce chafe

COMPRESSION BENEFITS

- Reduced muscle fatigue and soreness
- Reduced muscle damage and risk of overuse injuries
- Improved performance
- Improved muscle alignment
- Increased agility

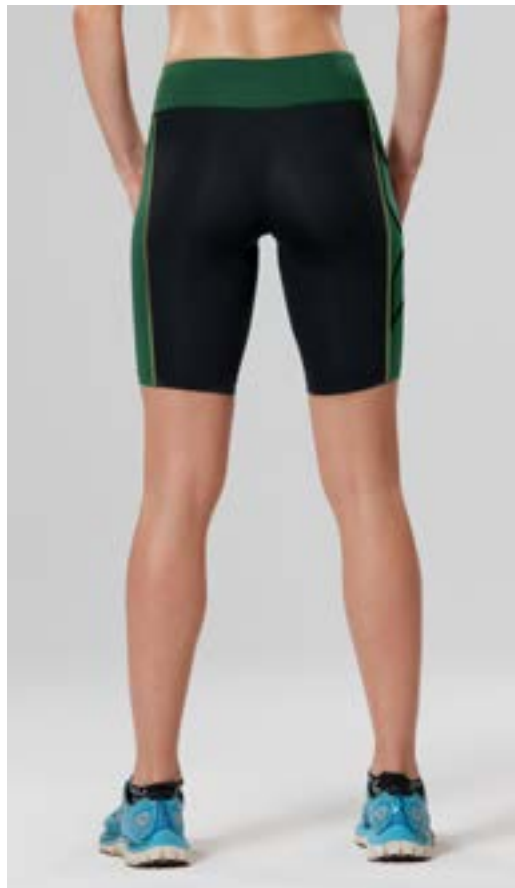

MID-RISE COMPRESSION

WAX4755b

WOMEN'S MID-RISE CUSTOM COMPRESSION SHORTS

(SIZE RANGE: XXS - XXL)

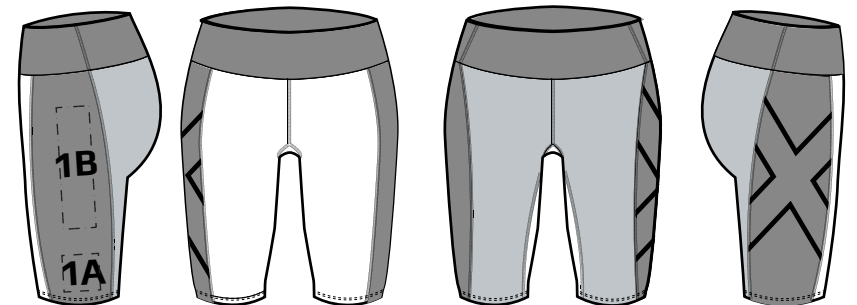

GARMENT FEATURES

01. Compression support to abductor, glute, quad and hamstring muscles to reduce muscle vibration

2XU
C U S T O M

BSR FABRIC TECHNICAL INFORMATION

The BSR range uses high-end fabric types to ensure optimal fit for each body part. As a premium global sportswear brand, 2XU's point of difference is a unique fabric combination that is light, flexible, powerful and durable; delivering physiological benefits far beyond the competition.

3D THERMAL

A 3D knit structure of this mesh fabric comes finished with a brushed underside to offer a seriously warm, bulk-free solution. High-filament polyester yarns deliver extreme moisture management and optimal thermoregulation.

HI^FIL +

Utilising high filament technology, 2XU has engineered a performance fabric to maximise moisture management. Cross-channeled yarns wick vapour from the inner to outer layers to keep the wearer as dry and comfortable as possible, while a mesh structure promises breathability. Hi FIL+ includes Polygiene ® odour control technology ensuring you stay fresh and odour free. Wear more, wash less and reduce your environmental footprint.

HI^FIL STRETCH

Utilising high-filament technology and elastane fibres, 2XU has engineered a performance fabric to maximise moisture management while offering stretch for flexibility.

VAPOR MESH

Utilising a durable and lightweight mesh structure, 2XU has engineered a performance fabric to deliver superior moisture management and comfort.

VAPOR STRETCH

Featuring micro-filament polyester yarn with hydrophobic properties, this fabric offers supreme stretch and comfort. A lower denier (finer) yarn on the outside wicks moisture from the higher denier (thicker) yarn on the inside to keep the wearer comfortable and dry. Moisture managing and zero cling to the body.

X LITE LINING

Light-weight with superior breathability, this brief liner keeps the wearer dry and comfortable through every workout.

X STRETCH FLEECE

Engineered to offer an equilibrium environment between the skin and fabric, this premium membrane offers stretch for flexibility, a soft micro fleece inner plus superior waterproof and vapour release ratings.

EMBELLISHMENT OPTIONS

Customise your BSR garments by using one of the following embellishment options with your branding.

SCREEN PRINT

Screen printing is the most common method of textile printing, as it can be printed on almost all fabric types and provides long lasting prints with an accurate colour reproduction (based on Pantone C colour codes). Screen printing is the preferred method for designs consisting of few colours and not featuring too much detail. Due to the set-up fees for each individual colour used, screen printing is recommended for mid to larger order quantities from a costing point of view. Logos featuring a colour gradient or that are too fine in detail can not be screen printed.

HEAT TRANSFER

Heat transfer prints are designs pressed onto garments via high-temperature and heavy pressure. This printing method allows for both fine logo details and colour gradients as well as multiple colours without extra costs. With less durability than screen print or embroidery, we recommend cold machine wash only.

EMBROIDERY

Embroidery is the longest lasting embellishment method and provides a quality finish to garments. This method allows multiple colours per logo without any extra costs, and works on most fabric types. Whilst providing a nice finish on outer layers (e.g. jackets), embroidery is not ideal for larger back logos, and chest logos applied on a thin/breathable fabric. Embroidery is not available for small and intricate designs, or for colour gradients.

BULK DYE AND SUBLIMATION MANUFACTURING

BULK-DYE

Our bulk-dye offering presents 3 colour options of black, navy and red. When selecting a bulk-dye garment 3 types of logo embellishment are available;

EMBROIDERY

Embroidery is the longest lasting embellishment method and provides a quality finish to garments. Whilst providing a nice finish on outer layers (e.g. jackets), embroidery is not ideal for larger back logos and chest logos applied on a thin/breathable fabric.

SCREEN PRINT

Screen printing is the most common method of textile printing, as it can be printed on almost all fabric types and provides long lasting prints with an accurate colour reproduction. Due to the set-up fees for each individual colour used, screen printing is recommended for medium to large volume orders.

HEAT TRANSFER

Heat transfer prints are pressed onto garments via high-temperature and heavy pressure. With less durability than screen print or embroidery, we strongly recommend cold machine wash only.

SUBLIMATION

Sublimation printing uses ink or dye to transfer your artwork into your desired garment. Sometimes referred to as "dye-sublimation printing," this process has many unique elements to it which allow you to have full creative freedom when customising your apparel. Traditionally this process is the most popular in the industry as it is so versatile allowing you to receive the exact colour and design you desire.

PERFORM X FABRIC TECHNICAL INFORMATION

HI~FIL+

Utilising high filament technology, 2XU has engineered a performance fabric to maximise moisture management. Cross-channeled yarns wick vapour from the inner to outer layers in order to keep the wearer as dry and as comfortable as possible, while a mesh structure promises breathability. HI FIL+ includes Polygiene® odour control technology ensuring you stay fresh and odour free. Wear more, wash less and reduce your environmental footprint.

VAPOR

A lightweight, high-gauge woven fabric with a 4-way mechanical stretch. A solution that blocks out wind while remaining light and packable. High-filament yarns wick moisture away from the body to keep the wearer comfortable, dry and with zero cling to the body.

Polygiene is the world's leading permanent Anti-Bacterial treatment. As the most respected and customer recognised permanent Anti-Bacterial treatment on the market, Polygiene prevents the growth of odour-causing bacteria and fungi at the source, permanently. Only active on the textile, it does not interfere with the skins natural bacterial flora and does not wash out, as the technology is bound and permanently integrated into the fabric. Polygiene means no more washing after every wear.

ACTIVE LINER

For extreme moisture control through hot conditions, 2XU's ACTIVE LINING is built with polyester filament yarns to keep the wearer dry and chafe-free.

ICEX

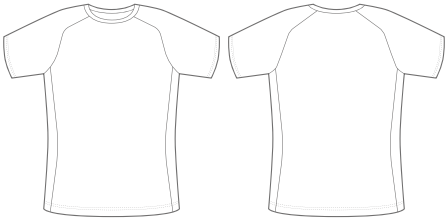

Cooling technology that actively lowers skin temperature upon contact with skin. Engineered from high filament yarns, this impressive fabric keeps you cool in the heat and wicks moisture to keep you dry. Excellent stretch and recovery memory to move with the body.

CUSTOM TRIATHLON RANGE

CUSTOM TRI FABRIC TECHNICAL INFORMATION

Our Custom Tri collection is specifically designed and engineered for the rigours of triathlon and is built for all-round performance.

KINETIC COOL

Developed with cutting-edge hydrophobic polyester, KINETIC COOL minimises water retention and hydrodynamic drag, improves water repulsion by up to 50%, and accelerates drying. Complete with a four-way stretch system for outstanding flexibility.

PWX COMPRESSION

Premium compression fabric engineered to offer optimal POWER, WEIGHT + FLEXIBILITY in perfect equilibrium.

SENSOR MESH

Mesh structure for more airflow and soft hand feel for comfort. SENSOR MESH has a high LYCRA® content for enhanced flexibility with the body. With high filament polyester yarn for impressive moisture management, this fabric keeps the wearer dry and comfortable.

KINETIC SPEED

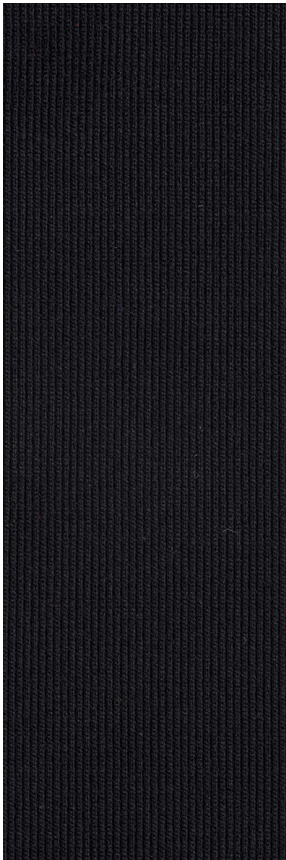

Utilises swiss air turbulent technology for improved aerodynamics and 2XU's powerful 70D/CK compression fabric for greater endurance and power.

Engineered with high-quality LYCRA® fibre to enhance garment shape retention and fit. A revolutionary fabric unmatched in speed and compression performance.

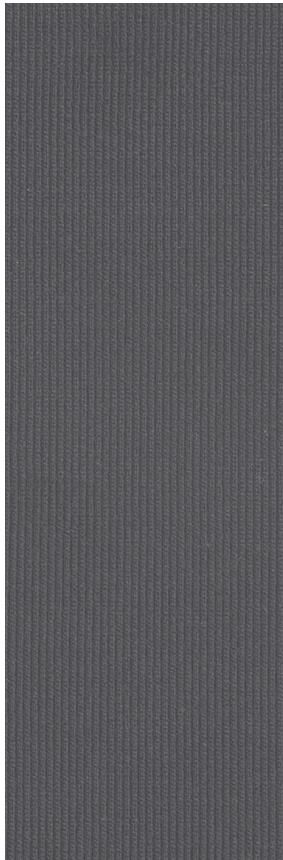

CUSTOM TRI BULK DYE OPTIONS

Choose from these five bulk dye fabric colours to best customise your tri kit.

BLACK

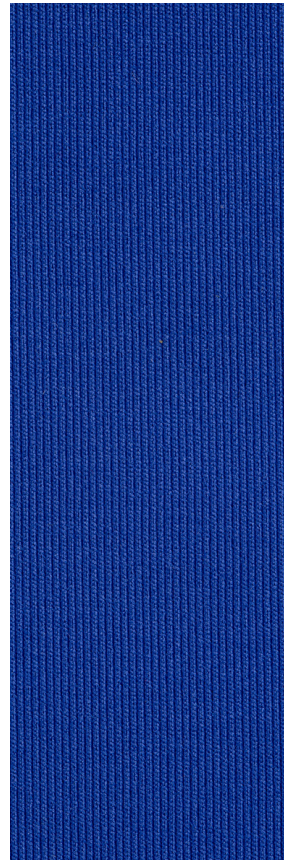

GUNMETAL GREY

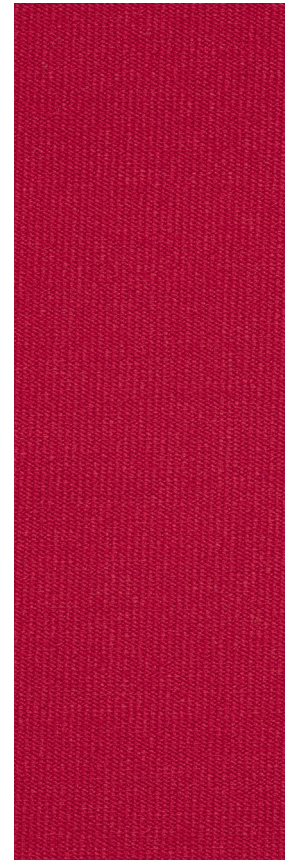

NAVY 282C

REFLEX BLUE C

RED 186 C

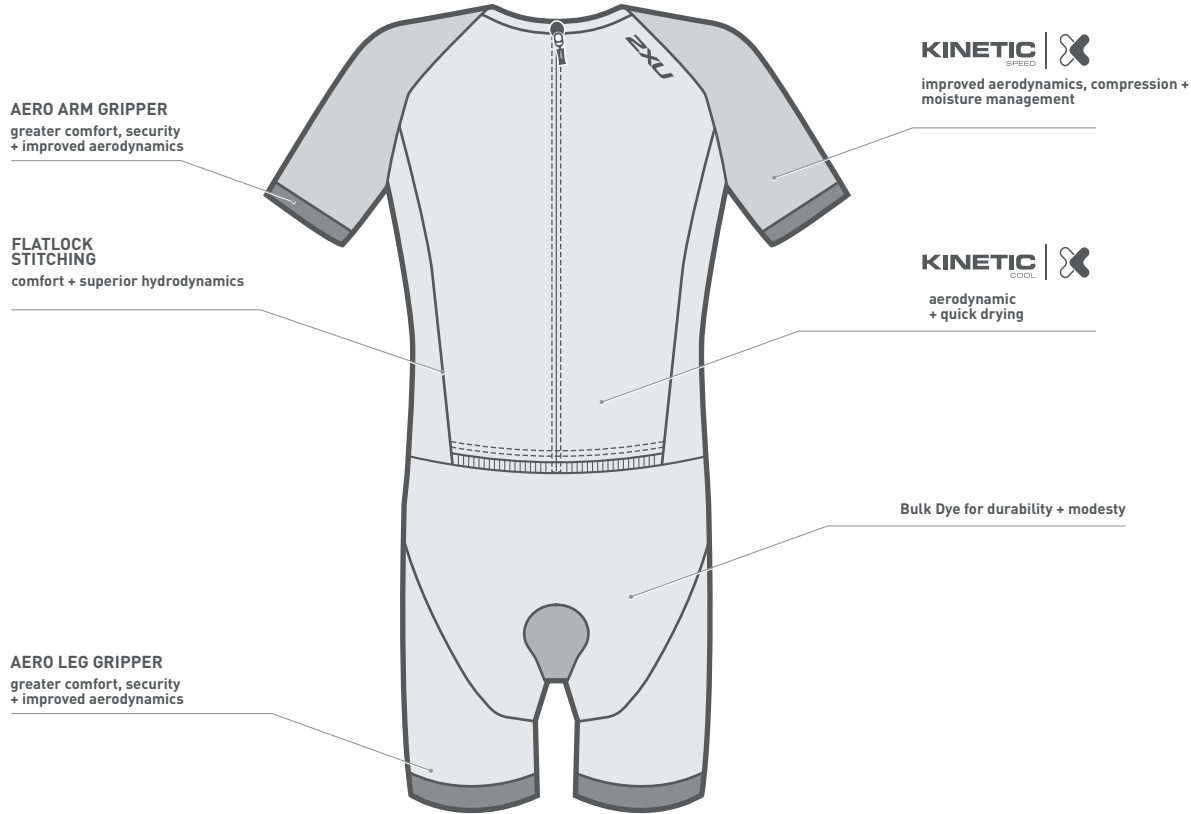

*Enquire with your 2XU Custom representative for additional customisation options.

AERO TRI-X

CUSTOM TRI SUITS

DELIVERING UNRIVALED PERFORMANCE FOR SWIM, BIKE AND RUN DEMANDS, THE 2XU AERO TRI COLLECTION REPRESENTS BEST IN CLASS TRIATHLON ENGINEERING.

MEN'S AERO TRI-X SKIN SUIT

MX3259D

BULK DYE/SUBLIMATION

SIZE RANGE: 2XS - 4XL

GARMENT FEATURES

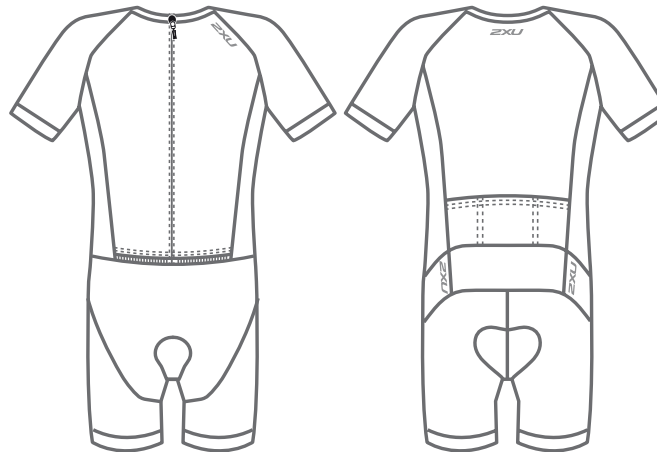

01. Unique open front waist skinsuit design
02. Aero arm + leg grippers
03. 3 rear pockets

FABRIC BENEFITS

KINETIC  KINETIC 

LDCHAMOIS

Quick drying long course triathlon chamois fused onto high density, hydrophobic foam base to manage moisture and deliver comfort to go the distance.

WOMEN'S AERO TRI-X SKIN SUIT

WX3260D

BULK DYE/SUBLIMATION

SIZE RANGE: 2XS - 2XL

GARMENT FEATURES

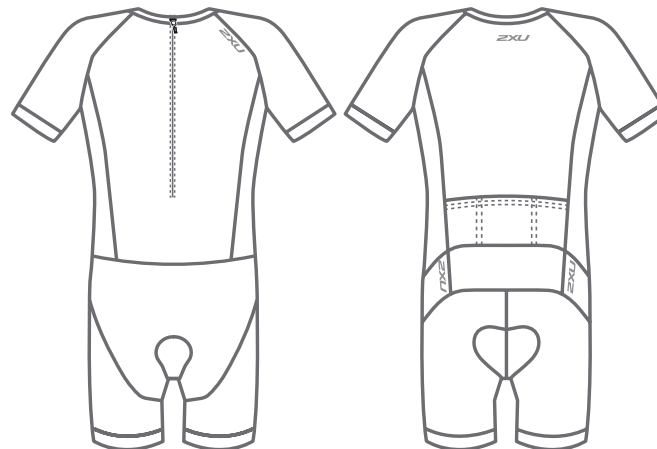

01. Aero arm + leg grippers
02. 3 rear pockets

FABRIC BENEFITS

KINETIC |  KINETIC | 

LDCHAMOIS

Quick drying long course triathlon chamois fused onto high density, hydrophobic foam base to manage moisture and deliver comfort to go the distance.

MEN'S AND WOMEN'S SLEEVELESS AERO TRI SUIT

MX3390D/WX3391D
BULK DYE/SUBLIMATION
SIZE RANGE: 2XS - 4XL

GARMENT FEATURES

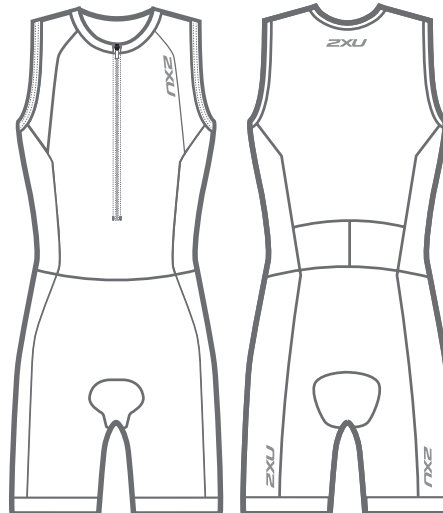

01. Front zipper
02. Sleeveless design
03. 2 rear pockets

ACTIVE

CUSTOM TRI SUITS, SINGLETs AND SHORTS

FEATURING PREMIUM FABRICS, TRIMS AND BENEFITS TYPICALLY EXPECTED IN ELITE STYLES, THE ACTIVE COLLECTION IS THE MOST COMPETITIVE PROPOSITION ON THE CIRCUIT.

MEN'S ACTIVE TRI SUIT

MX0013D

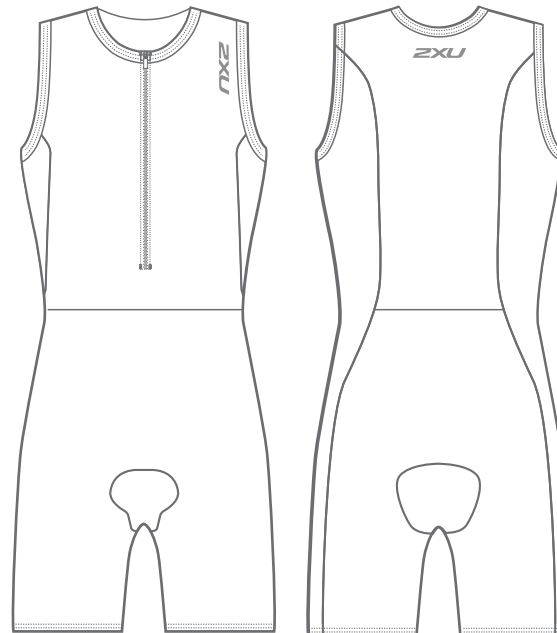

BULK DYE/SUBLIMATION

SIZE RANGE: 2XS - 4XL

GARMENT FEATURES

01. 3/4 front or rear semi-lock zipper
02. Kinetic cool for thermo-regulation + 4 way stretch
03. 70D Kinetic Speed fabric for supreme aerodynamics
04. Flatlock seams to prevent chaffing
05. Silicone leg gripper

FABRIC BENEFITS

SBR FLEECE CHAMOIS

Using a micro-filament polyester yarn, 2XU has developed a fleece with enough padding for the bike while remaining discreet for the swim and run. Using polyester yarns with hydrophobic properties, this fabric delivers critical antibacterial protection and will remain dry through all three disciplines.

CUSTOM

TEAM/YOUTH

IMPROVED PERFORMANCE
CONSTRUCTED FROM LIGHTWEIGHT, YET POWERFUL PWX FABRIC TO ENSURE MAXIMUM POWER, WEIGHT AND FLEXIBILITY.

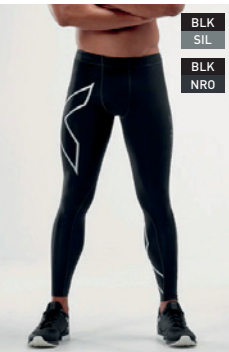

GRADUATED COMPRESSION
BOOSTS BLOOD FLOW TO MUSCLES, REDUCING MUSCLE SORENESS AND SWELLING WHILE IMPROVING PERFORMANCE.

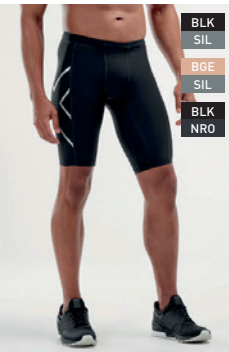

STAY DRY
MOISTURE WICKING YARNS ABSORB SWEAT AWAY FROM THE SKIN, KEEPING YOUR HEAD IN THE GAME.

NO SMELL
1/ ANTIBACTERIAL AND ANTI-ODOUR TECHNOLOGY KEEPS YOU FRESHER FOR LONGER.
2/ LESS WASHING REDUCES YOUR ENVIRONMENTAL FOOTPRINT.

COMPRESSION SHORTS

TRAVEL

Arrive ready to hit the ground running.

GRADUATED COMPRESSION
IMPROVED BLOOD FLOW TO DECREASE SWELLING.

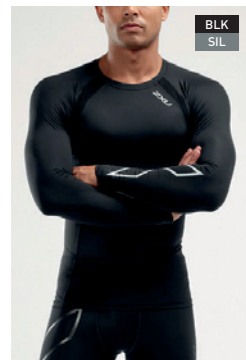

THERMOREGULATION
COTTON BLEND BRUSHED FABRIC, SOFT AGAINST SKIN AND ENSURE BODY MAINTAINS OPTIMUM TEMPERATURE.

REDUCED LONG-HAUL FATIGUE
LESS MUSCLE STIFFNESS AND LOWER RISK OF BLOOD POOLING AND DVT (DEEP VEIN THROMBOSIS).

2XU
HUMAN PERFORMANCE. MULTIPLIED.

RUNNING

Run your personal best,
no matter what the weather
conditions.

STAY WARM

- 1/ 600 FILL POWER DOWN INSULATION.
- 2/ RECYCLED DOUBLE-KNIT WAFFLE.
- 3/ NANO ACTIVATED CERAMIC INFUSED YARNS.
- 4/ PWX THERMAL.

STAY DRY

- 1/ ADVANCED 20K/20K AND 20K/10K WATERPROOF STRETCH MEMBRANES.
- 2/ ENVIRONMENTALLY RESPONSIBLE C6 DWR TREATMENT.

BE SEEN

REFLECTIVE LOGOS AND TRIMS
PROVIDE VISIBILITY IN LOW-LIGHT
CONDITIONS.

ESSENTIAL STORAGE

BOUNCE-FREE POCKETING
SOLUTIONS FOR SECURING PHONES,
KEYS OR CARDS.

IMPROVED PERFORMANCE

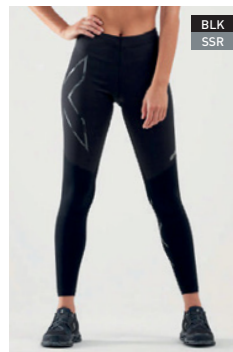

- 1/ MUSCLE CONTAINMENT STAMPING (MCS).
- 2/ GRADUATED COMPRESSION.
- 3/ PWX - MOST POWERFUL, LIGHTWEIGHT AND FLEXIBLE COMPRESSION FABRIC.

TRAINING

Designed to provide unrestricted movement and withstand the impact of your toughest workouts.

BUILT TO LAST
DURABLE GARMENT YARNS
RESIST PILLING AND ABRASION.

STAY DRY
1/ PERFORATED FABRIC PROVIDES
VENTILATION WHERE YOU NEED IT MOST.
2/ MOISTURE-WICKING PROPERTIES REMOVE
SWEAT FROM SKIN SURFACE.

ULTIMATE COMFORT
1/ COMFORT WAISTBANDS ENSURE
STREAMLINED SILHOUETTE.
2/ LONGER LENGTHS PROVIDE COVERAGE
AND UNRESTRICTED MOVEMENT.

IMPROVED PERFORMANCE
1/ MUSCLE CONTAINMENT STAMPING (MCS).
2/ GRADUATED COMPRESSION.
3/ PWX - MOST POWERFUL, LIGHTWEIGHT
AND FLEXIBLE COMPRESSION FABRIC.
4/ FITNESS - ULTRA MATTE BODY
SCULPTING LUXE FEEL.

NO SMELL
1/ ANTIBACTERIAL AND ANTI-ODOUR
TECHNOLOGY KEEPS YOU FRESHER
FOR LONGER.
2/ LESS WASHING REDUCES YOUR
ENVIRONMENTAL FOOTPRINT.
