

# Spinning Reels

## Tangled line when casting

- Spool is overfilled with line.
- Line size being used is too large for the reel.
- Memory set in line.

[FIX] re-spool with new line.

## Rough gears or reel makes grinding noise on retrieve

- Inadequate lubrication on gears or bearings.
- Gears stripped or damaged.

## Bail will not close or closes partially

- Bail wire is bent out of shape.
- Bail spring broken or weak.
- Dirt or lack of lubrication in bail arm assemblies.

## Line twist

- Line was improperly spooled onto reel.
- Turning reel handle while fish is stripping line.
