

## **INSTALLATION INSTRUCTIONS**

Thank you for choosing Ambassador Marine. Your new Ambassador Marine faucet, sprayer, shower or accessory will give you years of trouble-free performance. Please read these instructions carefully before installing your new item.

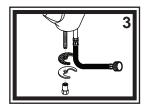

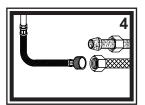

1) Turn off the water supply to your existing faucet (this procedure will vary depending on the specific plumbing system installed on your boat). Cover the sink drain to prevent any small parts or debris from falling in. Remove your existing faucet, taking care not to damage your existing water lines. Clean sink area in preparation for new faucet.

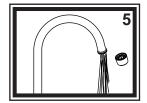

2) Screw mounting bolt into the bottom of the faucet. One end of the bolt is slotted to allow the use of a screwdriver to secure. Screw both connector hoses into the bottom of faucet (note: it is NOT necessary to use Teflon (Plumber's) tape on this connection as the o-rings will prevent leaks). Use a wrench or pliers on the hex nut molded into the brass shaft portion of the hoses. Do NOT attempt to tighten by turning the hose itself.

3) Place your new faucet through the hole in your sink. Make sure the black gasket properly lines up with the bottom of the faucet. From under the sink, slide the rubber horseshoe washer then the metal horseshoe washer onto the mounting bolt. Adjust faucet position on the sink as desired. Thread the lock nut onto the mounting bolt and tighten. It may be necessary to re-adjust the faucet position by slightly loosening the lock nut, adjusting to desired location, then re-tightening the lock nut.

4) Connect water supply lines (not provided) to the connector hoses. Wrap the brass fittings on the connector hoses with Teflon (Plumber's) tape. Follow the appropriate steps depending on your water supply lines. If you have pre-assembled water supply hoses with threaded connectors, simply screw on supply hose. If you have plastic water lines with formed ends, water lines will seat partially up into the brass fittings. Connect by tightening the coupling nuts. We do NOT suggest using sweat fittings as they are prone to blow-outs.

5) After installation is complete, remove the aerator. Be careful not to scratch the finish. Turn the water supply back on and allow both hot and cold water to run for at least one full minute. While water is running, check all connections for leaks. Replace aerator. Connections may need re-tightening.

High Arc Galley Faucet Chrome

### **Parts**

- 1) Blue/Red Cap
- 2) Handle Screw
- 3) Trinidad Handle
- 4) Ceramic Disc Cartridge
- 5) Aerator
- 6) Spout
- 7) Bonnet
- 8) C-Clamp
- 9) O-Ring
- 10) Body
- 11) Gasket
- 12) Rubber Horseshoe Washer
- 13) Metal Horseshoe Washer
- 14) Mounting Bolt
- 15) Lock Nut
- 16) Connector Hose

Your new faucet or accessory is protected by a clear-coat. To clean it, you only need to wipe it with a damp, soft cloth. NEVER use any abrasive cleaners, steel wool, or chemicals (including alcohol or ammonia), as they will harm the finish and void your warranty. If the item will be installed in a salt-air environment (boat exterior), regular cleaning with gentle soap and carnauba wax will prolong the life of the finish.

Ambassador Marine reserves the right to update specifications, change prices, or make substitutions without notice.

# **INSTALLATION INSTRUCTIONS**

Thank you for choosing Ambassador Marine.

Your new Ambassador Marine faucet, shower, sprayer or accessory will give you years of trouble-free performance. Please read these instructions carefully before installing your new item.

132-0202-CP (OEM) 133-0202-CP (Retail) Trinidad High Arc Galley Faucet Chrome

#### **IF REPLACING AN EXISTING FAUCET:**

Turn off the water supply to your existing faucet (this procedure will vary depending on the specific plumbing system installed on your boat). Cover the sink drain to prevent any small parts or debris from falling in. Remove your existing faucet, taking care not to damage your existing water lines. Clean sink/counter-top area in preparation for new faucet.

#### IF ADDING NEW HOLE(S) TO SINK/COUNTER-TOP:

See "Installation Hole Requirement" to the right, for this model. Check to ensure there is enough room for the faucet, including necessary supply line(s), pull-out hose, etc. under the sink/counter-top. Drill hole, using proper bit for sink/counter-top surface and diameter.

#### Installation Hole Requirement

This unit requires a minimum of this/these hole(s)

Your existing sink/counter-top may have additional hole(s) per-drilled, which may not be required for this installation. If so, you may be able to utilize a deck/cover plate or an additional accessory (i.e. soap dispenser) to utilize the extra hole(s). We offer a variety of deck/cover plates and soap dispensers to coordinate with your faucet and decor.

#### INSTALLING YOUR NEW AMBASSADOR MARINE UNIT:

#### NEEDED / HELPFUL TOOLS

.

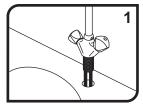

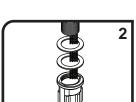

J

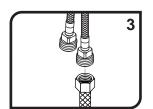

es Adjustable Wrench Pliers Plumber's (Teflon) Tape

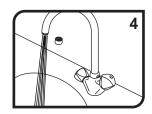

1) Remove the Mounting Nut (Easy Grip), metal and rubber Washers from the Mounting Shaft, if already attached. Place the faucet through the hole in your sink/counter-top, making sure the O-Ring remains recessed in the base of the Body. Position so that the O-Ring in the base forms a seal all the way around the hole.

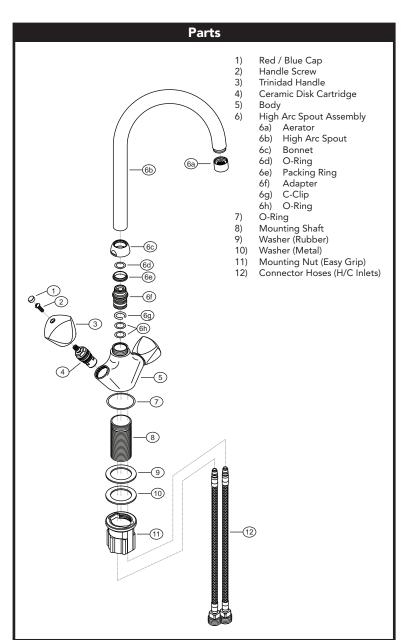

2) From under the sink, slide the rubber and metal Washers up the Mounting Shaft. Thread the Mounting Nut onto the Mounting Shaft and loosely tighten. Confirm the proper position of the faucet from above the sink. Tighten the easy grip Mounting Nut by hand or with an adjustable wrench or pliers. It may be necessary to re-adjust the faucet position by slightly loosening the Mounting Nut, adjusting to the desired location, then re-tightening the Mounting Nut.

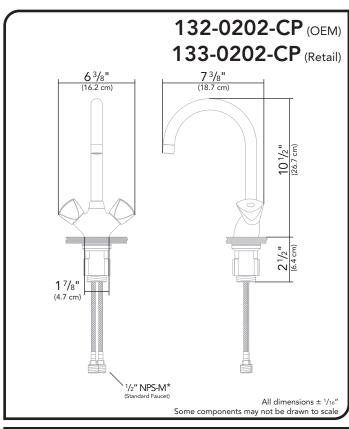

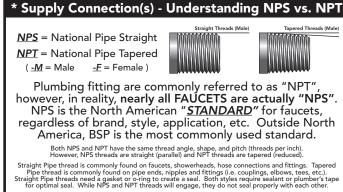

3) Connect water supply lines (not provided) to the Connector Hoses (red for hot, blue for cold). Supply line will vary depending on the specific plumbing system installed on your boat. To properly connect to the faucet, supply line must be the North American 'STANDARD 1/2" FAUCET' (1/2" NPS\*) connector with a washer in the female connector. Wrap the end of the Inlet Tube with plumber's (Teflon) tape. Follow the appropriate steps depending on your water supply line. If you have a per-assembled water supply hose with threaded swivel-nut connector, simply screw on supply hose. We do NOT suggest using sweat fittings as they are prone to blow-outs.

4) After installation is complete, unscrew the aerator. Be careful not to scratch the finish. Turn the water supply back on and allow both hot and cold water to run for at least one full minute. While water is running, check connections for leaks. Replace aerator. Connections may need re-tightening. Turn handle on/off, rotate spout side-to-side a few times to verify proper function.

### PROPER FINISH CARE

Your new faucet or accessory is protected by a marine grade finish. To clean it, you only need to wipe it with a damp, soft cloth. NEVER use any abrasive cleaners, steel wool, or chemicals (including alcohol or ammonia), as they will harm the finish and void your warranty. If the item will be installed in a salt-air environment (boat exterior), regular cleaning with gentle soap and carnauba wax will prolong the life of the finish.
