SURFACE MOUNT **LED DOCKING LIGHTS**

Safe docking made simple and sophisticated.

- Easy, do-it-yourself installation with virtually no hull intrusion
- Small light size allows for a clean look and variety of mounting options
- Available with a Stainless Steel or Black Powder Coat bezel

 **attwood®**

SURFACE MOUNT LED DOCKING LIGHTS

BRIGHTER LIGHT & WIDER BEAM

Compared to its 55-watt halogen competition, the Attwood Surface Mount LED Docking Light draws a fraction of the power while producing a brighter output. The Attwood product also transmits light in a much broader pattern as opposed to a narrow beam generated by today's competitors. Simply put, Attwood's docking light performs like a true "docking light" instead of a narrow-beam headlight.

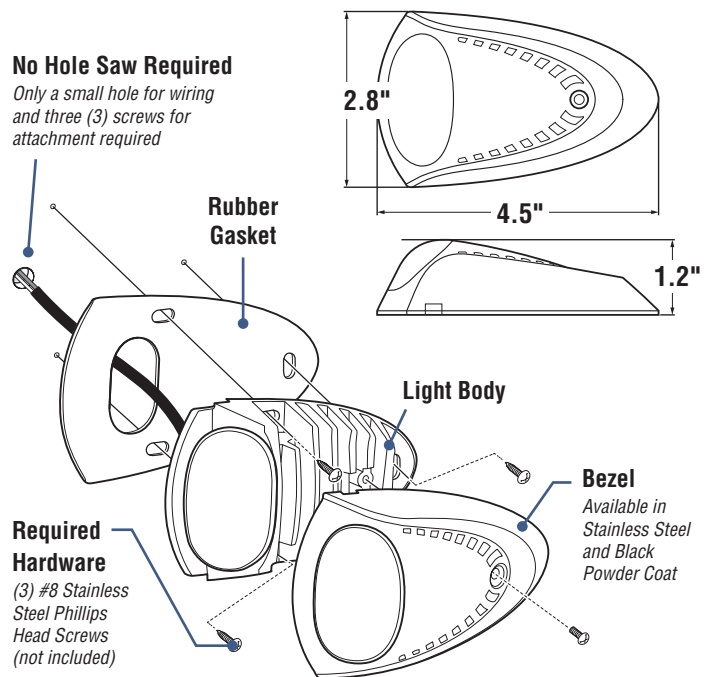

LONGER LASTING

Backed by a 10-year warranty, Attwood's LED Docking Light is designed and tested for extreme conditions. Attwood used only the highest grade Stainless Steel and aluminum components to ensure the product is resistant to corrosion. The rubber gasket provided creates a barrier that protects your hull from water entry, ensures the light is watertight and keeps all electrical components fully sealed.

No Hole Saw Required

Only a small hole for wiring and three (3) screws for attachment required

EASIER SURFACE MOUNT INSTALLATION

Power draw and performance are important, but what about assembly? At 1.2" thick, the lights are designed to be mounted directly to the surface of the hull. With only a small hole for wiring and three (3) screws for attachment, Attwood's surface mount design makes installation quick and uncomplicated. This new LED Docking Light allows for fewer hull cuts and minimal intrusion while producing results that are reliable and attractive.
