

Marine Vinyl Protectant – Bio-Kleen Amazing Armor

- A biodegradable marine, rv and auto vinyl conditioner and leather protectant.
 - Unlike most vinyl and leather conditioners this is a non greasy formula that won't leave residue behind on your clothing or skin.
 - A vinyl conditioner that protects, conditions and shines vinyl, leather, rubber, plastic and finished wood.
 - The ultimate protection by guarding against ozone, ultraviolet (UV) rays (with a Sun Protection Factor SPF 70!) and oxygen destruction that cracks and hardens vinyl, leather, rubber and plastic.
 - Apply Bio-Kleen Amazing Armor to rubber rv roofs to seal the surface and reduce chalking that causes white streaks.
 - This marine vinyl protectant forms an anti static, micro thin layer of protection that deters water, airborne pollutants, stains, dust and dirt; this prolongs the time in between cleaning and makes it easier to clean the next time. Bonus!
 - You can also use Bio-Kleen Amazing Armor to shine and protect your automotive interior dash, vinyls and leathers, tires and trimming. Giving you all the needed protection and shine without that 'greasy sheen' look.
-

Uses:

Excellent for boat, RV, automotive and household items. Use on: marine vinyl, vinyl seats, leather seats, tires, bumper guards, trim, dash boards, vinyl tops, rubber RV roofs, vinyl furniture, luggage, shoes, golf bags, purses and much more.

 - 100% of the packaging is recyclable
 - No Animal Testing - No Animal Ingredients - Cruelty Free
 - Environmentally Friendly, Biodegradable, Non Aerosol, Ozone Safe
-

Prior to applying a vinyl conditioner, clean surface first with **Vinyl Cleaner** ensuring no stains are set in. The vinyl protectant will also adhere to the surface better and last longer.

Apply vinyl conditioner with **Premium Microfiber Towel** or a **Microfiber Applicator**.

Directions:

Clean surface first with a **vinyl cleaner**.

For interior vinyl, leather and upholstery: Spray evenly onto a clean, lint-free cloth or applicator to avoid overspray. Wipe cloth or applicator onto a clean, dry surface producing a shiny, protected finish. Reapply regularly for adequate protection.

For tires and rubber rv roof: Spray evenly across surface and allow to dry. Wipe away any excess product. Indirect sunlight applications are recommended.
