ANTI-REFLECTIVE TREATMENT

Glare and bright light can come at you from all directions, often bouncing back directly into your eyes. That's why our scientifically engineered anti-reflective coating is applied to the inside of most Bolle lenses.

HD POLARIZED LENSES

Our polarized lenses align light rays from the sun, giving you a crystal clear view at all times. So whether it's sea, trout stream or road, you'll be able to see what's really ahead.
