

# CORROSION BLOCK®

MARINE | MINING | INDUSTRIAL | AGRICULTURAL  
PROTECTS • PENETRATES • LUBRICATES • KILLS CORROSION ON CONTACT

PROTECTS METAL AND ELECTRONICS DURING  
PLAY AND STORAGE

CHEMICALLY NEUTRALIZES SALT WATER

HYDROPHOBIC FILM PROVIDES CONTINUAL  
CORROSION PROTECTION

A unique product that has the ability to both prevent and stop corrosion in more places on power sports equipment than any other product of its type. **Corrosion Block®** is a clean, clear ultra-thin fluid which leaves a non-greasy atmospheric barrier to protect all metal surfaces. **Corrosion Block®** leaves no gummy residue because it does not contain wax, resin, tar, asphalt, silicone or Teflon. It can be sprayed, brushed or wiped on.

## CORROSION BLOCK LIQUID & AEROSOL

Corrosion Block® Liquid and Aerosol has been designed to act as a corrosion prevention compound, with the added benefits of being a superior penetrating lubricant, moisture displacer, electrical insulator (dielectric to over 36KV), electrical contact spray. Suitable as H2 Lubricants for use in food production and packaging facilities where there is no direct food contact and promoting a safer working environment as all products are non-toxic, non-hazardous, bio-degradable and remain active against new and existing corrosion for up to 12 months, reducing the need for constant reapplication and replacement of corroded parts and reducing shutdowns and call-outs required to perform maintenance.

### APPLICATIONS

- Pressure gauges
- Motor operated valves
- Electronics
- Fuse panels
- Terminal strips
- Battery terminals
- Fan motors
- Circuit boards
- Intercom systems
- Solenoids
- Junction motors
- Switches
- Circuit breakers
- Gear boxes
- Transformers & switchgear
- Fishing vessels & all equipment
- Rods & reels
- 4x4 and off road vehicles
- Wheel bearings
- Roller furling gear
- Air conditioning Units
- Locks & hinges
- Sliding doors, electric gates
- Swimming pool pumps
- Agricultural machinery and equipment
- Earth moving equipment
- Transport vehicles
- Golf carts, turf & grounds equipment
- Outdoor electrical fixtures

20114	Plastic Drum	114 litres	1
20205	Plastic Drum	205 litres	1

## CORROSION BLOCK GREASE

Corrosion Block® Grease is a multi-purpose, waterproof grease that has been approved suitable for all types of applications in the marine, mining, industrial and agricultural industries, reducing the need for using a variety of products that cater for specific applications only. With a dropping point of over 260°C and operating in cold temperature extremes you need not look any further than Corrosion Block® Grease for all your grease application needs. Being suitable for use as an H2 Lubricant in the food production and packaging facilities Corrosion Block® Grease it is the ideal product to use in offshore, coastal or inland production and packaging operations. The unique composition of Corrosion Block® Grease makes it ideal for use in wet and humid applications as it contains no solids or fillers such as clay and wax. Therefore it doesn't wash out and separate the oil component from the fillers which often happens with most greases on the market.

- Superior rust and corrosion protection
- Waterproof - won't separate, cake or wash out
- NLGI approved as an automotive wheel bearing and chassis lubricant
- Excellent extreme pressure (EP) properties
- Excellent thermal/oxidative stability
- High/low temperature performance
- Resists bleeding or melting at high temperatures
- Suitable for sealed for life applications
- Dielectric/non conductive
- Use in electrical applications that require grease
- Workplace safe and environmentally friendly
- Out performs competitive greases 5:1
- Multi grease compatible. Easy conversion with no cross contamination concerns

25060	Drum	60 kg	1
25180	Drum	180 kg	1

**CORROSION BLOCK GEL**

Corrosion Block® Gel was specifically developed by adjusting the Corrosion Block® Liquid formula to produce a thicker consistency which is more resistant to wear and abrasion and which becomes fluid again under pressure helping spread into spaces otherwise inaccessible to conventional greases. Corrosion Block® Gel is ideal for use on exposed metal surfaces that haven't been treated with primers or paints and that require a protective coating until it can be treated with primers and/or paint etc. Corrosion Block® Gel has become popular in the off-road vehicle market, to protect under bodies against the effects of saltwater and off-roading, while providing additional protection as the thicker film Corrosion Block® Gel leaves withstands more abrasion in turn increasing time before reapplication is required.

ITEM NO.	CONTAINER	VOLUME	UNITS PER BOX

**REELFAST OIL**

Reelfast® is an ultra-thin reel oil that has been developed to extend the Corrosion Block® range and offer superior corrosion protection and lubrication to even the smallest bearings and moving components within your fishing reels. Reelfast® is the ideal product to use when servicing your reels and is mono and braided line friendly, gives no scent off, reduces heat build-up within reels and repels saltwater and it neutralises the corrosive effects of saltwater on your reel and within its components. Reelfast® is safe for the environment at the same time, as it is non-toxic, non-hazardous and it is also dielectric so can help protect your electronic equipment if you don't have a can of Corrosion Block® nearby.

ITEM NO.	CONTAINER	VOLUME	UNITS PER BOX
21001	Plastic Bottle	29 ml	60

**ACF-50 LIQUID & AEROSOL**

Specifically developed for the aviation industry, according to very strict regulations and being put through its paces in numerous tests and trials through some of the leading aviation companies and military units. ACF-50® has proven itself a world class product with a history of over 30 years in the global aviation market and currently boasts 29 OEM Approvals and Ratings in the Aviation Industry. ACF-50® has also become very popular in the civilian market for use on motorcycles and high performance racing cars and motorcycles across the world, due to its ultra-thin film barrier and superior anti-corrosion protection.

- 29 OEM Approvals in aviation industry
- Approved for use on all metals & electronics
- Chemically neutralizes the corrosive effects of road salt
- Clean, clear, ultra thin fluid which leaves a non-greasy atmospheric barrier to protect base metal
- Will not dry out or trap moisture in
- Remains active for up to 12 months
- Safe for plastics, paints and rubbers
- No wax, no Teflon, no silicon, no water, no tar, no asphalt
- Regular ACF-50 treatments reduce maintenance costs and improve overall durability of components

**APPLICATIONS**

**Motorcycles**

- Casings
- Cooling Fins
- Throttle Linkages
- Brake Cables
- Battery Terminals
- Chrome
- Chain
- Springs
- Engine Components
- Under Panels
- Electrical Ignition

- Stands
- Switches

**Aviation**

- Leading Edges
- Inlet Rings
- Actuators
- Landing Gear Mechanisms
- Galley/Lavatory
- Structures
- Seat Tracks
- Door sills
- Electrical Contacts

10013	Aerosol Can	365 ml	12
10032	Plastic Bottle & trigger Sprayer	1 l	4

ITEM NO.	CONTAINER	VOLUME	UNITS PER BOX
10004	Plastic Bottle	4 l	4
10020	Plastic Drum	20 l	1
10205	Plastic Drum	205 l	1
10114	Plastic Drum	114 l	1

## U-MARK® W20 WATER BASED PAINT MARKER

STYLE	Valve Activated
DIMENSIONS	136 x 16 mm
DRYING TIME	Approx. 60 sec (on most surfaces)
MARKING TEMP RANGE	2° to 54° C
BOX/CASE QUANTITY	12 ea. per box/144 ea. per case

ITEM NO	COLOUR
10851	Black
10852	Blue
10853	Green
10854	Red
10855	White
10856	Yellow
10857	Orange
10860	Metallic Silver
10861	Pink
10862	Violet
10864	Metallic Gold
10867	Grey
10869	Dark Green

### Features

- A U-Mark® exclusive, the most innovative paint marker yet, with top-of-its class performance, reduced environmental impact and excellent durability. Don't confuse "water based" with "wimpy"
- W20 delivers fade resistant marks that are as permanent and tough as those made by any standard paint marker
- Thick, opaque, permanent marks are streak-free and UV resistant. Ideal for marking on metals, glass, plastics, wood, stone, canvas, poster board and more
- Clear barrel helps identify paint level and colour in an instant
- Marker body and cap are made of clear polypropylene and may be recycled
- Less than 0.6% VOC, low odour and non-flammable
- Reversible tip
- 10 ml fill quantity
- Works with U-Holder
- Greenlabel®
- Formula Conforms to ASTM D 4236
- Made in USA

### Typical Uses

- Wherever product odour, safety and environmental impact are a concern
- General purpose industrial marking for quality assurance, colour coding and parts identification
- Window and auto glass marking (marks are removed with most standard glass and window cleaners without leaving a halo)
- Suitable for signs, posters, canvas, stone, concrete, etc

**CORROSION  
BLOCK**

# reelfast

Prevents corrosion. Lubricates fine roller bearings & gears.  
Reduces wear. Reduces heat build up in reels. Reduces salt build up on reels.  
Micro thin anti-friction lubricant. Mono & Braid line friendly.

- Will target and expel moisture from corroded surfaces thereby killing corrosion on contact
- Forms a specially engineered clean, thin film to protect the metal surface from future corrosion attacks
- Is dielectric (non -conductive) and safe for use on electronic devices and connections.
- Highly versatile and suitable for use in marine, industrial and agricultural environments.
- Excellent penetrating lubricant for loosening seized nuts and bolts
- Will not affect riveted components, rubber and plastic surfaces.
