

DATREX MAXFLOW MESH VEST

DX2300

DX2300

TYPE

DATREX COMMERCIAL MAXFLOW MESH VEST

USES

DATREX Maxflow Level 70 Newton lifejacket/PFD is designed for continuous wear while working near shore or easy access to safety. Level 70N is a new standard from USCG that harmonizes the approval across North America and replacing Type III type designation.

Significant features with Datrex Maxflow:

- Both USCG and TC approved, also conforms to ANSI Standards
- Maxflow system to keep the user cooler and more comfortable
- Split foam system that surrounds the torso more uniformly and feels less bulky
- Mesh sides and shoulder for added breathability and comfort, keeping you cool all day
- Contoured lightweight and durable flotation foam for freedom of movement
- True and tailored sizing for today's users available from Small to 2X-Large
- New standard replacing Type III designation
- Two 1" encircling belts with a heavy-duty zipper closure
- Hidden belt to reduce snags
- Two large pockets with hook and loop closure, pull tabs and tether loops inside pockets
- Molle to attach accessories
- Harness hole on back panel to work universally with fall harness protection
- High visibility orange with SOLAS grade retroreflective
- Hand warmer liner behind pockets with fleece
- SOLAS grade retro-reflective tape on front and back of shoulders
