

DATREX 400RT Type I USCG DX400RTJ / DX401RTJ

TYPE

Type I USCG Approved Offshore PFD / Lifejacket

USES

Datrex 400RT is the most comfortable Type I USCG approved PFD in the market providing many years of use in multitude of commercial and recreational applications. It is designed for maximum wearability and buoyancy for offshore and rough waters where rescue may be delayed. With a minimum buoyancy of 24 lbs., it can turn an unconscious person from face down in the water to a vertical or slightly backward position. Polyethylene foam provides maximum flotation and will not lose buoyancy if cut or punctured. Sewn on SOLAS retro-reflective tape meet or exceed all requirements for commercial vessels carrying passengers for hire. The safest and most comfortable Type I available. This flotation device is recommended for use in offshore use.

FEATURES

Can be worn continuously without compromise to comfort. Large patches of SOLAS grade reflective. Light loop and whistle attachment over shoulder. Strongest stainless steel hardware available.

SPECIFICATIONS

ITEM NO.	DX400RTJ / DX401RTJ
USE	Offshore USCG Type I PFD
SIZES	Adult Universal and Child (DX401RTJ)
MINIMUM BUOYANCY	24 lbs
FOAM	Polyethylene
SHELL MATERIAL	Weather and fade-resistant polyester
RETRO-REFLECTIVE	SOLAS grade 63 Sq. Inches
COLOR	International Orange

DX400RTJ

DX401RTJ

APPROVAL/COMPLIANCE

United States Coast Guard
