

ANTENNA EXTENDERS

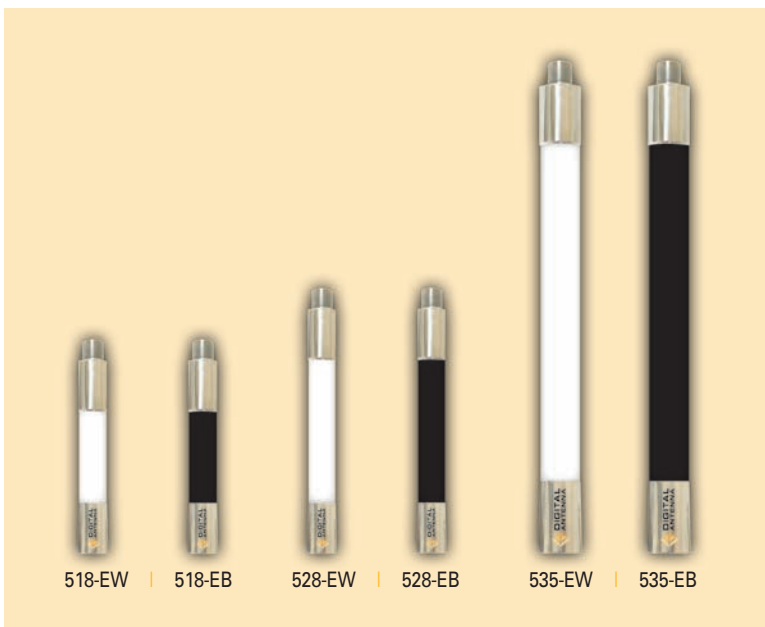

500 SERIES

YACHTS | BOATS | COMMERCIAL VESSELS

Constructed of high-quality reinforced fiberglass and finished to match Digital Antenna's award-winning antenna series, antenna extenders are used to increase height of an antenna to improve effective range or to place an antenna above on-board obstructions that may interfere with proper radiation. All extenders mount standard 1"-14 threaded mounts. Use a DM268 center brace when the combined length of your antenna and all extensions is more than 8 feet.

All Antenna Extenders Feature:

- Heavy duty fiberglass.
- Stainless steel ferrules.
- 1"-14 threaded top and base.
- High gloss urethane finish.
