

DR. SHRINK DS-724W PERMANENT HEAT SHRINK TAPE

DS-724W PERMANENT HEAT SHRINK TAPE is a white coextruded Polyethylene film with a special acrylic adhesive system designed to bond to Dr. Shrink's premium shrink wrap and other low surface energy films. This self-wound tape exhibits good shear properties under moderate loads, has a wide service temperature range, and excellent UV resistance.

Total Thickness	.006"
Adhesive Thickness	.002"
Service Temperature Range	-20F to 160F

Peel Adhesion Results (PSTC-101). 2 Hour Dwell *
