### Woven Cord Strapping

Dr. Shrink, Inc.'s strapping is a composite strap made from high strength polyester fiber coated with a polymer binder. Strapping is used with wooden uprights and buckles to form the support structure under shrink wrap covers. It is also used to create the perimeter band that will secure the shrink wrap material. The strapping can be secured by hand-tying and using the appropriate wire buckles.

Standard core inside diameter is 3"

Strap width tolerance: +1/32", -3/32"
