\* Due to spacing under the cowl, the 7359 will not work with the 60° models. Not sure if yours is 90°? There are two ways to determine your engine type:

**METHOD 1.** The 60° V4 and V6 cowl will have vents at the top, the 90° typically will not.

**METHOD 2.** Looking at the top of the outboard, the 90° motor will have a more triangular profile while the 60° is more rounded.
