2	Exhaust Pipe Gasket	2009-08	60572	Exc. Lexus GX470 Base Toyota 4Runner Limited, Sport, SR5, Sequoia Limited, SR5; Pipe to manifold; 2.165" ID	
3	Exhaust Pipe Gasket	2007-06	23591	Lexus LX470 Base Toyota LandCruiser Base; Converter to muffler; 1 31/32" ID x 2 35/64" OD	
2	Exhaust Pipe Gasket	2007	60572	Toyota Tundra Access Cab, Base, CrewMax, Double Cab, Limited, SR5, Work; Pipe to manifold; 2.165" ID	
QTY	OIL PAN	YEARS	PART NO.	DESCRIPTION	
1	Oil Pan Gasket Set	2009-05	OS 30742	Lexus GX470 Base Toyota 4Runner Limited, Sport, SR5; RTV sealant incl. for oil pan gskt.	
1	Oil Pan Gasket Set	2009-08	OS 30815	Exc. Lexus GX470 Base Toyota 4Runner Limited, Sport, SR5; RTV sealant incl. for oil pan gskt.	
1	Oil Pan Gasket Set	2007-06	OS 30741	Lexus LX470 Base Toyota LandCruiser Base; RTV sealant incl. for oil pan gskt.	
1	Oil Pan Gasket Set	2007	OS 30739	Exc. Lexus GX470 Base, LX470 Base Toyota 4Runner Limited, Sport, SR5, LandCruiser Base; RTV sealant incl. for oil pan gskt.	
1	Oil Pan Gasket Set	2006	OS 30739	Toyota Sequoia Limited, SR5, Tundra Access Cab, Base, Double Cab, Limited, SR5, Work; RTV sealant incl. for oil pan gskt.	
1	Oil Pan Gasket Set	2005	OS 30739	Exc. Lexus GX470 Base Toyota 4Runner Limited, Sport, SR5; RTV sealant incl. for oil pan gskt.	
1	Drain Plug Gasket	2009-05	70822		
QTY	CRANKSHAFT REAR SEAL	YEARS	PART NO.	DESCRIPTION	
1	Rear Main Seal Set	2009-05	BS 40679	Rubber; One-piece	
QTY	VALVE COVER	YEARS	PART NO.	DESCRIPTION	
1	Valve Cover Gasket Set	2009-05	VS 50592 R	w/Grommets & Spark plug tube seals; PermaDry® molded rubber gskts. incl.	
2	Grommet Set	2009-05	ES 72133	Valve Cover	
QTY	VALVE STEM SEAL SET	YEARS	PART NO.	DESCRIPTION	
1	Valve Stem Seal Set	2009-05	SS 72910	Premium valve stem seals incl.	
QTY	THERMOSTAT HOUSING	YEARS	PART NO.	DESCRIPTION	
1	O-Ring	2009-05	35555	Thermostat Housing	
QTY	WATER OUTLET GASKET	YEARS	PART NO.	DESCRIPTION	
2	Water Outlet Gasket	2009-05	35941	Water Outlet; Loc. Front; Water bypass	
2	Water Outlet Gasket	2009-05	35941	Water Outlet; Loc. Rear; Water bypass	
QTY	WATER PUMP	YEARS	PART NO.	DESCRIPTION	
1	Water Pump Gasket	2009-08	35718		
1	Water Pump Gasket	2007-05	35718	Exc. Toyota Sequoia Limited, SR5	
1	Water Pump Gasket	2007-05	35728	Toyota Sequoia Limited, SR5	
QTY	TIMING COVER	YEARS	PART NO.	DESCRIPTION	
1	Crankshaft Front Seal Set	2009-05	TCS 46035		
1	Camshaft Front Seal Set	2009-06	TCS 46050		
1	Camshaft Front Seal Set	2005	TCS 46036	To 10/31/04	
1	Camshaft Front Seal Set	2005	TCS 46050	From 11/01/04	
QTY	CARB & FUEL INJECTION	YEARS	PART NO.	DESCRIPTION	
1	Throttle Body Gasket	2009-06	61412		
1	Throttle Body Gasket	2005	61281	To 10/31/04	
1	Throttle Body Gasket	2005	61412	From 11/01/04	
QTY	OIL FILTER MOUNTING	YEARS	PART NO.	DESCRIPTION	
1	Oil Filter Adapter Gasket	2009-05	72973	Oil filter adapter seal; New Part Number - Check for Availability	
25		2013 - 2009; 5.7L 346 (5663cc) DOHC V8 (32 Valve) 94mm Bore i-Force VVT-i			25
MFI; Flex Fuel; Naturally Aspirated Toyota Eng.; Eng. Code 3URFBE					
QTY	CYLINDER HEAD	YEARS	PART NO.	DESCRIPTION	
1	Head Gasket	2013-09	26393 PT	Loc. R.H.; Head bolts not incl.; Head bolt replacement recommended; PermaTorqueMLS®	
1	Head Gasket	2013-09	26394 PT	Loc. L.H.; Head bolts not incl.; Head bolt replacement recommended; PermaTorqueMLS®	
1	Head Set	2013-09	HS 26394 PT	Head bolts not incl.; Head bolt replacement recommended; PermaDry® molded rubber valve cover gskts. incl.; Premium valve stem seals incl.	
1	Head Bolt Set	2013-09	ES 72249-1	Head bolts w/Washers; Replacement recommended	
QTY	CONVERSION SET	YEARS	PART NO.	DESCRIPTION	
1	Gasket Conversion Set	2013-09	CS 26394	RTV sealant incl. for oil pan gskt.	
QTY	MANIFOLD - INT. & EXH.	YEARS	PART NO.	DESCRIPTION

DRIVETRAIN GASKETS DIAGRAM CHART

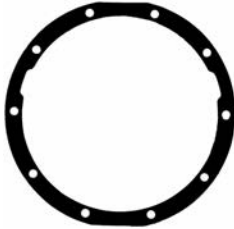

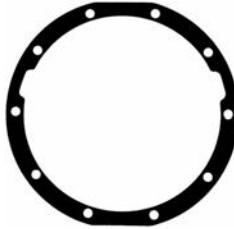

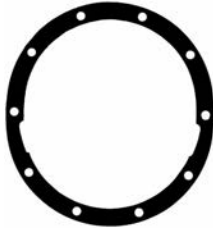

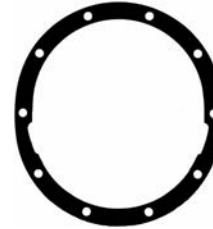

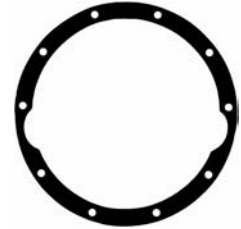

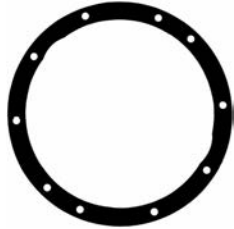

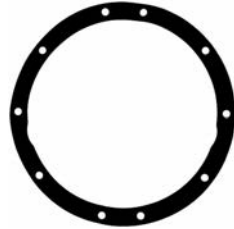

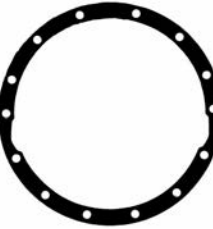

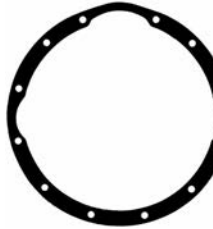

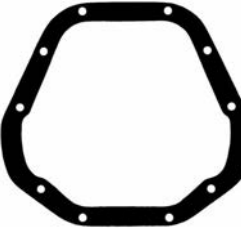

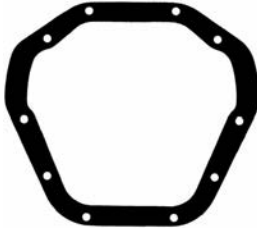

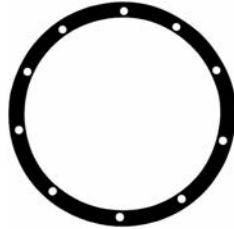

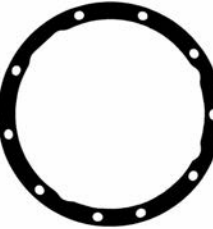

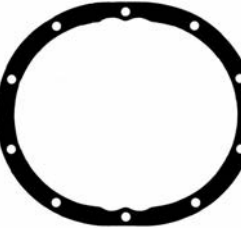

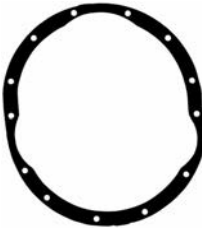

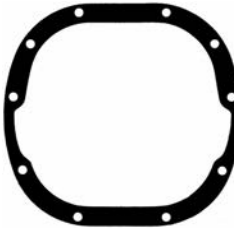

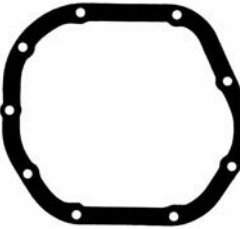

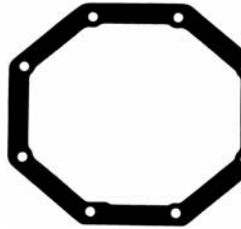

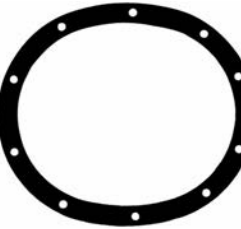

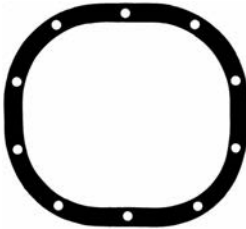

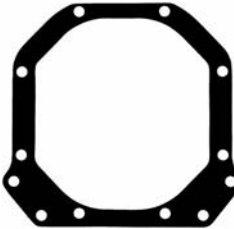

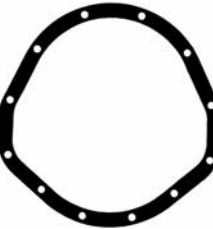

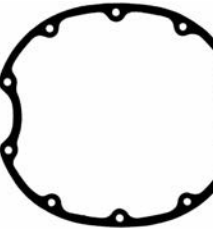

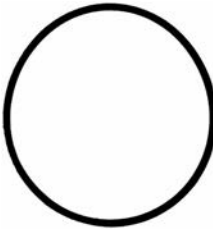

On the following pages you will find silhouettes and dimensions of every axle housing cover, differential carrier, axle flange, and automatic transmission oil pan gasket listed in this catalog. Each type of gasket is sorted by vehicle manufacturer and then by part number. For complete model and application information, please refer to the alphabetical catalog drivetrain listing before this section.

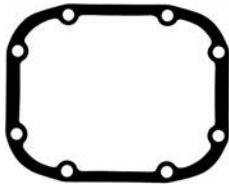

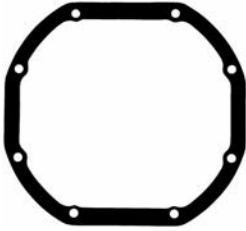

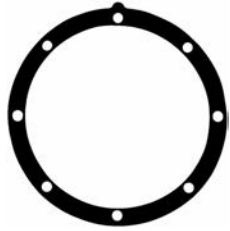

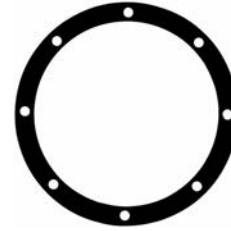

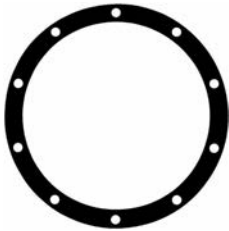

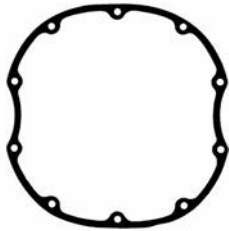

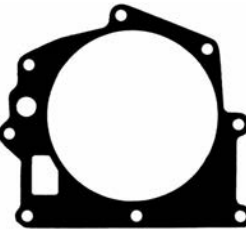

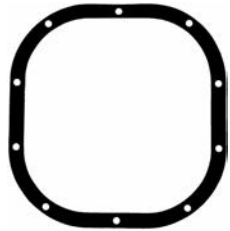

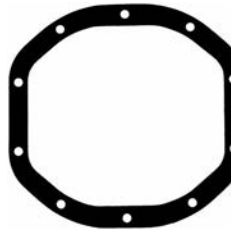

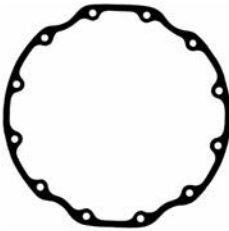

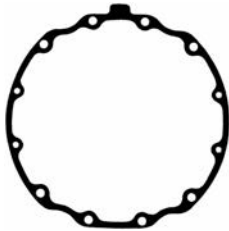

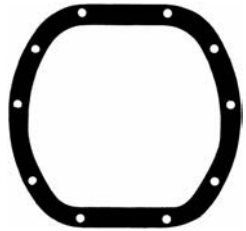

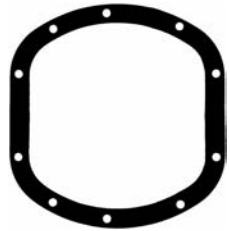

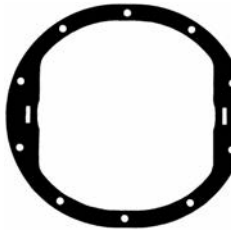

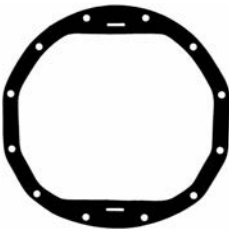

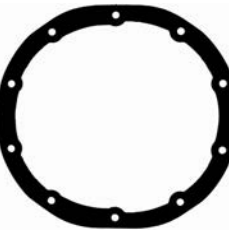

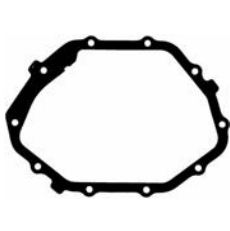

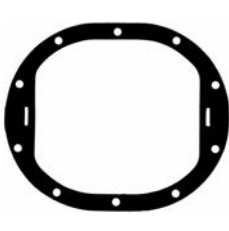

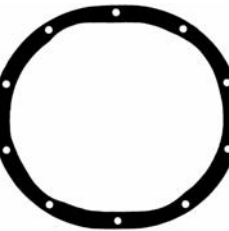

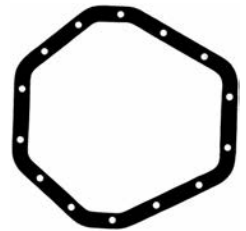

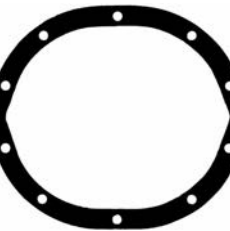

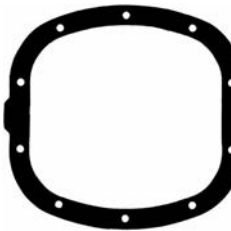

All dimensions are I.D. x O.D. or Bolt Circle (B.C.) x O.D. (if two measurements given) or Maximum Length (if one measurement given).

NOTES

O-RING ASSORTMENT OR 40-85

- Includes 382 O-rings in 30 popular sizes from 1/8" ID to 1-3/4" ID
- Size charts and built-in gauges for positive identification of each O-ring size
- Attractive plastic case securely holds O-rings in place
- Case available separately as Part No. **OR 40E-85**

WATER OUTLET GASKET ASSORTMENT WO 20-08

The most popular FEL-PRO® water outlet and thermostat housing gaskets are now available in this updated assortment that includes 44 of the top-selling numbers. Gaskets are packaged individually in the quantities shown below. Each assortment also contains the matching silhouette card for the part number, as well as a set of blank silhouette cards for customizing. We continue to offer the 2' x 3' pegboard backer (Part No. **PB 1**) and 2" pegboard hooks (Part No. **HK 2** for a pack of 100 and **HK 2A** for a pack of 25) for use with the assortment. The Silhouette Cards reflect the top-selling 50 water outlet and thermostat housing gaskets (Part No. **WO 2**).

EXHAUST FLANGE GASKET ASSORTMENT EX 20-08

The new Fel-Pro® Exhaust Flange Gasket Assortment includes all the best-selling exhaust flange and heat riser gaskets. The gaskets are packaged individually in the quantities shown below. The assortment also contains the matching silhouette cards for each number, as well as a set of blank silhouette cards for customizing. This assortment can be displayed on the 2' x 3' pegboard backer sold as (Part No. **PB 1**) and 2" pegboard hooks (Part No. **HK 2** for 100 pack and **HK 2A** for 25 pack) also available for use with the Water Outlet Assortment. The included Silhouette Card pack illustrates the top-selling 50 exhaust flange and heat riser gaskets (Part No. **EX 2**).

FEL-PRO® PACKINGS

FLEXIBLE METALLIC PUMP PACKING

2261

- Follow-up Rings, Double-Beveled, Individual Split
- Fits Chevrolet 1922-36 and Ford Models A, AA, B, BB 1928-34
- Truly circular...cut from spiral coils
- Packaged individually

McCORD® GRAPHITE LUBRICATED FIBER PACKING

- For valves and pumps
- Fiber yarn spools in individual boxes

1/4 lb. Spools

3201 - 1/4".....(approximately 8 ft.)

3202 - 3/16".....(approximately 18 ft.)

3203 - 1/8".....(approximately 28 ft.)

FEL-PRO® STOCKING AIDS

HEAD GASKET BIN RACK

GC 21

The counterperson can locate head gaskets easily and inventory them at a glance, using this specially designed rack. The rack fits on standard 36" wide shelves and allows efficient use of space to protect head gasket stock. Approximate dimensions are 33" long x 12" deep x 6" high.

GASKET STORAGE RACKS

GC 25: 33" Long

GC 35: 46" Long

Keep all your inventory of FEL-PRO gasket sets (such as Head Sets, Valve Covers, Oil Pans, Manifolds, etc.) neat and organized using these exclusive Gasket Storage Racks. Each Storage Rack is available only in boxes of four.

BLANK PEGBOARD

PB 1

This 2' x 3' bright red pegboard is ideal for displaying your FEL-PRO miscellaneous gaskets, using the hooks and silhouette cards shown below. It will hold up to 36 part numbers neatly and attractively.

PEGBOARD HOOKS

HK 2: 2" Hook Quantity 100

HK 2A: 2" Hook Quantity 25

HK 4: 4" Hook Quantity 50

HK 6: 6" Hook Quantity 20

These hooks are designed to use with the **PB 1** blank pegboard. Choose from 2-inch, 4-inch, or 6-inch lengths, depending on your individual needs.

SILHOUETTE CARDS

WO 2: Water Outlet Gasket Cards

EX 2: Exhaust Flange Gasket Cards

These convenient silhouette cards are designed for use in identifying the most popular FEL-PRO water outlet and exhaust flange gaskets. The silhouette cards may be used with the **PB 1** pegboard and **HK**-series hooks to create your gasket display. Card size is 3-7/8" x 5-7/8".

Included with both sets is a supply of blank cards which can be used to customize your display.

BC 2: Blank Silhouette Cards

A package of 50 blank silhouette cards allows the customization of your display to meet your individual needs. Card size is 3-7/8" x 5-7/8".

BIN BOXES

GC 5

This smaller Bin Box is designed for miscellaneous gaskets. It is perfect as a supplement to maximize shelf space. Approximate dimensions are 5" wide x 18" deep. This Bin Box is shipped 10 per carton.

GC 9

This larger Bin Box is designed to hold hundreds of miscellaneous gaskets on a single shelf. This extra sturdy box has approximate dimension of 9-1/2" wide x 18" deep. This Bin Box is shipped 10 per carton.

GC 10

This package of ten unassembled Bin Boxes will provide convenient gasket storage or replace the worn and damaged boxes now on your shelves. This Bin Box has approximate dimensions of 5-1/4" wide x 19" deep.

FEL-PRO® SHEET MATERIALS

KARROPAK®

This pliable, chemically-treated fibrous sheet packing is designed for use in sealing oil, water, and gasoline applications.

Assortment No. MA 71-85
1/3092, 1/3098, 1/3099

Includes display rack **MA 71E-85**
 (also available separately).

Rolls 36" wide

Individually boxed.

3031 — 1/64" x 50 yds.
3041 — 1/64" x 25 yds.
3051 — 1/64" x 15 yds.
3033 — 1/32" x 50 yds.
3043 — 1/32" x 25 yds.
3053 — 1/32" x 15 yds.
3044 — 1/16" x 15 yds.
3054 — 1/16" x 10 yds.

Rolls 18" Wide

Individually boxed.

3091 — 1/64" x 50 yds.
3095 — 1/64" x 25 yds.
3092 — 1/64" x 10 yds.
3093 — 1/32" x 50 yds.
3096 — 1/32" x 25 yds.
3098 — 1/32" x 10 yds.
3094 — 1/16" x 25 yds.
3097 — 1/16" x 15 yds.
3099 — 1/16" x 5 yds.

12" x 36" Sheets

Individually rolled and wrapped in clear plastic.

3045 — 1/64"
3046 — 1/32"
3047 — 1/16"

18" x 36" Sheets

Individually rolled.

3022 — 1/64"
3023 — 1/32"
3025 — 1/16"

36" x 36" Sheets

Individually rolled.

3011 — 1/64"
3027 — 1/32"
3020 — 1/16"

4" x 6" Sheets

Individually packaged sheet wrapped in clear plastic.

3195 — 1/32"

FEL-PRO® SHEET MATERIALS

FEL-RAMIC® MATERIALS

FEL-RAMIC water-resistant non-asbestos facing material is mechanically clinched to a perforated steel core. This material is very popular in high-temperature applications (such as manifolds and exhaust pipe flanges).

FEL-RAMIC® 101

Fiber on both sides:
2499 — 12" x 28" x 1/16"

FEL-RAMIC® 301

Fiber on one side:
3009 — 12" x 28" x 3/64"

PRO-RAMIC® 121

The PRO-RAMIC non-asbestos facing material is mechanically clinched to both sides of a perforated steel core. It is recommended for use as a head gasket material and an intake manifold material.

PRO-RAMIC® 121

Fiber on both sides:
2498 — 12" x 28" x 3/64"

CUTTING TOOL KIT

This is an assortment of cutting tools for the most popular sizes and shapes of gaskets and other soft materials.

CK 88 is a Cutting Tool Kit that consists of 1 Punch Driver and 10 Circular Punches for stamping Bolt Holes. The Punch Driver is 5-3/8" long. The Circular Punch sizes range from 1/4" to 1" diameter.

These punches are not recommended for Metal Materials.

CORK-RUBBER

An excellent material for sealing oil, coolant, or gasoline. It is recommended for use on valve cover, oil pan, and crankcase/access cover gasket applications.

10" x 26" Sheets

Individually rolled and wrapped in clear plastic.

3018 — 1/16"

3026 — 3/32"

3019 — 1/8"

18" x 36" Sheets

Individually packaged sheet wrapped in clear plastic.

3005 — 1/16"

3006 — 3/32"

3007 — 1/8"

3008 — 1/4"

RUBBER-FIBER

This material can be used for sealing oil, coolant, or gasoline. It is recommended for use on timing cover, axle housing cover, and differential carrier gasket applications.

10" x 26" Sheets

Individually rolled and wrapped in clear plastic.

3157 — 1/32"

3187 — 1/16"

18" x 36" Sheets

Individually rolled material with anti-stick coating on both sides.

3137 — 1/32"

3127 — 1/16"

25" x 25" Sheets

Individually rolled material with anti-stick coating on both sides.

3149-1 — 1/32"

3149-3 — 1/16"

RUBBER-CELLULOSE

This material can be used for sealing water or coolant. It is recommended for water outlet, thermostat housing, and water pump gasket applications.

Individually rolled and wrapped in clear plastic.

3075 — 10" x 26" x 3/64"

Individually packaged sheet wrapped in clear plastic.

3030 — 18" x 36" x 3/64"

4-PIECE MATERIAL ASSORTMENT PAK

3060 includes one each:

Cork-Rubber Sheet

Cork-Rubber Sheet

Rubber-Cellulose Sheet

Rubber-Fiber Sheet

10" x 8-5/8" x 1/8"

9-1/2" x 8-5/8" x 1/16"

9-3/4" x 8-5/8" x 3/64"

9-1/4" x 8-5/8" x 1/32"

Parts to Help Reduce Repair Costs

The FEL-PRO® Engine\$aver Hardware line is a collection of "problem solvers" that provide cost-saving alternatives to engine component replacement. They bring engine components back to proper performance, at a fraction of their replacement cost.

Engine\$aver Hardware Is Cost Efficiency Without Compromise

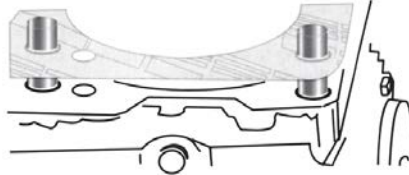

Cylinder Head Bolts

Help avoid the risks that go with reuse of head bolts on torque-to-yield applications.

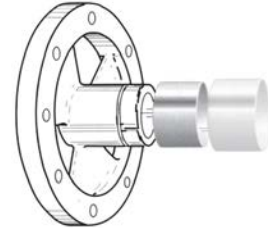

Cylinder Head Dowel Pins

Assure proper gasket and casting alignment for an accurate seal and correct head-to-block assembly.

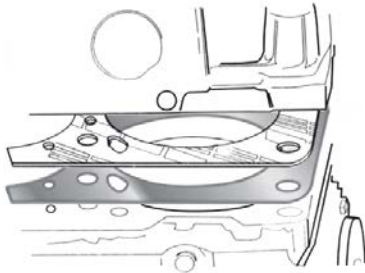

Sleeve 'N' Seal®

Repairs worn sealing surfaces and helps avoid replacement of costly harmonic balancers.

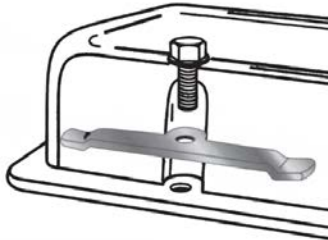

HeadSaver® Spacer Shims

Compensates for excess metal removed during machining operations, so you don't have to replace costly cylinder heads.

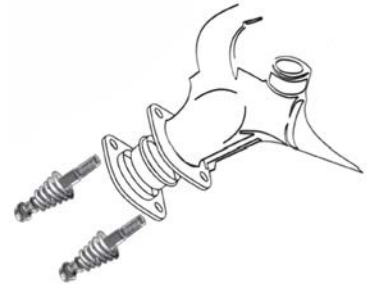

Valve Cover Load Spreaders®

Evenly distribute the clamping force on the valve cover flange and allow a proper seal between the valve cover and the new gasket.

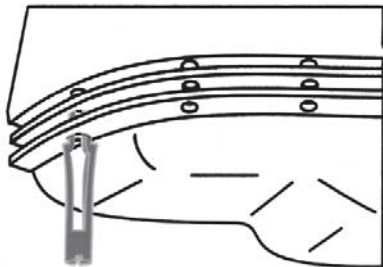

Exhaust Flange Bolt & Spring Kits

Quickly connect the exhaust manifold and the exhaust pipe on FWD vehicles and assure correct clamping force.

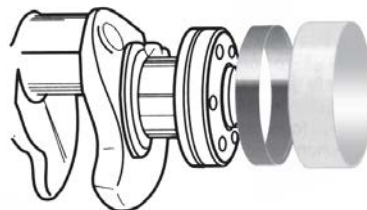

Oil Pan SnapUps®

Save time and prevent frustration by holding the pan and the gasket in place for quick, convenient bolt installation.

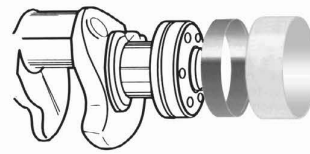

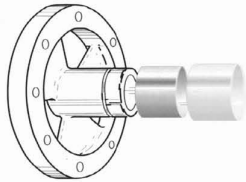

Crankshaft Repair Sleeves

Repair worn sealing surfaces without costly crankshaft replacement.

ES 72863 for 5/16" applications
ES 72864 for 6mm applications
ES 72865 for 8mm applications

HARMONIC BALANCER & CRANKSHAFT REPAIR SLEEVES

Sleeve 'N' Seal®

Repairs worn sealing surfaces and helps avoid replacement of costly harmonic balancers.

Crankshaft Repair Sleeves

Repair worn sealing surfaces without costly crankshaft replacement.

CYLINDER HEAD GASKET INSTALLATION TIPS

Remove Cylinder Heads Carefully

Loosen the head bolts in stages, in the reverse order of the tightening sequence. On engines with aluminum cylinder heads, remove the head only after the engine has cooled completely and reverse EXACTLY the recommended torquing procedure. Failure to do so may result in head warpage.

Never Reuse Head Gaskets

When a new head gasket is installed, it conforms to the microscopic surface irregularities of the cylinder head and engine block. The gasket material is permanently compressed in that position. If you reuse the gasket, it is impossible to refit it in the exact same position and it will not have the "life" to readjust itself, so gasket failure may result.

Clean Mating Surfaces

Thoroughly clean the cylinder head, engine block, head bolts, and bolt holes. A dirty bolt can alter torque readings by as much as 20 foot-pounds, and can form pockets in the gasket allowing leakage and eventual gasket failure.

Check for Warpage and Distortion

Check for warpage of both head and block sealing surfaces with a straightedge and a feeler gauge. Out-of-flat along the length should not be more than 0.003" for three-cylinder applications, 0.004" for four-cylinder applications, and 0.006" for six-cylinder applications. Across the width should never exceed 0.002" out-of-flat. These are combined measurements for both the head and block together, and should not exceed the maximum amounts shown. There should be no sudden irregularities exceeding .001" and a maximum out-of-flat of $\pm .001$ " in any 3" diameter should not be exceeded. When necessary, machine surfaces to return them to flat.

Check Head and Block Finishes

Surface finish is critical for a good seal. FEL-PRO® engineers recommend a micro inch surface finish between 60 to 100 Ra (400 to 800 Rz) for cast iron heads and blocks, 50 to 60 Ra (200 to 600 Rz) for aluminum heads and blocks, and 10 to 30 Ra maximum (500 Rz maximum) for multi-layered steel (MLS) applications. Check the finishes with a profilometer or a surface comparator. Check for a preferred waviness height of .0004"/.0005" with a waviness peak spacing of .100" (these values are usually associated with milling machines). Always consult your manufacturer's service manual for surface finish requirements.

Use A Non-Hardening Gasket Sealer

Sealers are NOT required on FEL-PRO PermaTorque® head gaskets. However, embossed steel shim, copper-faced, or steel-faced gaskets should be coated with a non-hardening automotive gasket sealer as a supplemental seal.

Lightly coat bolt threads and the underside of the bolt heads with motor oil. When they enter the water jackets of an engine, bolt threads should be coated with a non-hardening automotive sealer to prevent leakage. Refer to the manufacturer's service manual or examine the engine to determine where the bolt holes lead.

Watch Bolt Lengths and Sizes

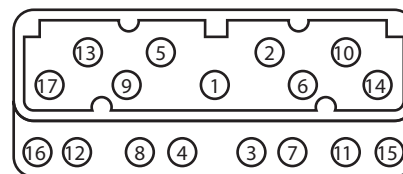

Head bolts on some engines may vary in length and size, and it is important that they be replaced in their original location. Either mark the bolts by position, or place them on a bench in the order you remove them.

Use a Torque Wrench

Uneven torque can cause block distortion and head warpage, resulting in coolant or combustion leaks. Use a good torque wrench, properly calibrated, and follow exact specifications for the proper torque. The basic tightening procedure is to first snug up bolts, then tighten in stages, and then complete with the final torque specified.

Follow Torquing Sequences

Each manufacturer has an approved torquing sequence to follow for each engine, to insure the best possible seal and eliminate chances of distortion and warpage. In general, the sequence starts at the center and spirals out to the ends of the head.

Consult the current FEL-PRO® Torque Tables™ booklet for specific torque specifications and bolt torquing sequence diagrams. The Torque Tables booklet contains information on domestic and imported passenger cars, light-duty trucks, and medium-duty trucks (including all engines currently covered by the FEL-PRO Gaskets product line).

CYLINDER HEAD GASKET INSTALLATION TIPS

Warm Engine and Retorque Head

Run the engine to normal operating temperature after torquing head bolts. Heat expansion and contraction can radically change the torque readings. Retorque all head bolts to the correct settings while the engine is still warm. If working with aluminum components, let the engine cool completely first. Remember that FEL-PRO® PermaTorque® designs do NOT require retorquing.

Retorque After 300 to 500 Miles

If retorque-type head gaskets are used, retorque after 300 to 500 miles.

Torque-To-Yield Head Bolts

Torque-to-yeild is a method used by most current engine manufacturers to tighten head bolts. The head bolts are torqued to their yield points, which may permanently stretch the bolts. This results in a more even clamping force over the entire area of the gasket. Bolts should first be tightened to a specified torque (measured in foot-pounds), and then tightened an additional partial turn (measured in degrees) to the bolt yield point. Use a Torque-to-Angle Indicator with your torque wrench to help you accurately measure the required partial turn in degrees.

Because the head bolts may have stretched, the engine manufacturer may recommend against reusing them. Consult the OEM manual on head bolt reuse. Since you may not know how many times a T-T-Y bolt has been removed and reinstalled, FEL-PRO engineers suggest that it is always a good idea to use new bolts. FEL-PRO head bolt sets are available for many domestic and imported engines. This catalog indicates which engines have bolt sets offered in the FEL-PRO product line.

Diagram #82

GASKET AND SEAL LOCATIONS

The following typical engines, shown in exploded views, include the location of the more important gaskets and seals listed in this catalog. There are smaller gaskets, particularly those used only on a limited number of engines, that cannot be shown. However, all required gaskets are included in FEL-PRO® sets. The FEL-PRO product line takes pride in supplying the most complete sets available anywhere.

FULL SET (FS) - Contains the gaskets and oil seals necessary for a complete engine overhaul.

HEAD SET (HS) - Contains the gaskets and oil seals necessary for a valve grinding job.

CONVERSION SET (CS) - When used with an HS set, contains the necessary gaskets and oil seals for a complete engine overhaul.

MANIFOLD SETS (MS) - Intake, Exhaust, or Combination Intake & Exhaust.

VALVE COVER SET (VS) - Top Cover.

PUSH ROD COVER SET (PS) - Side or Center Cover.

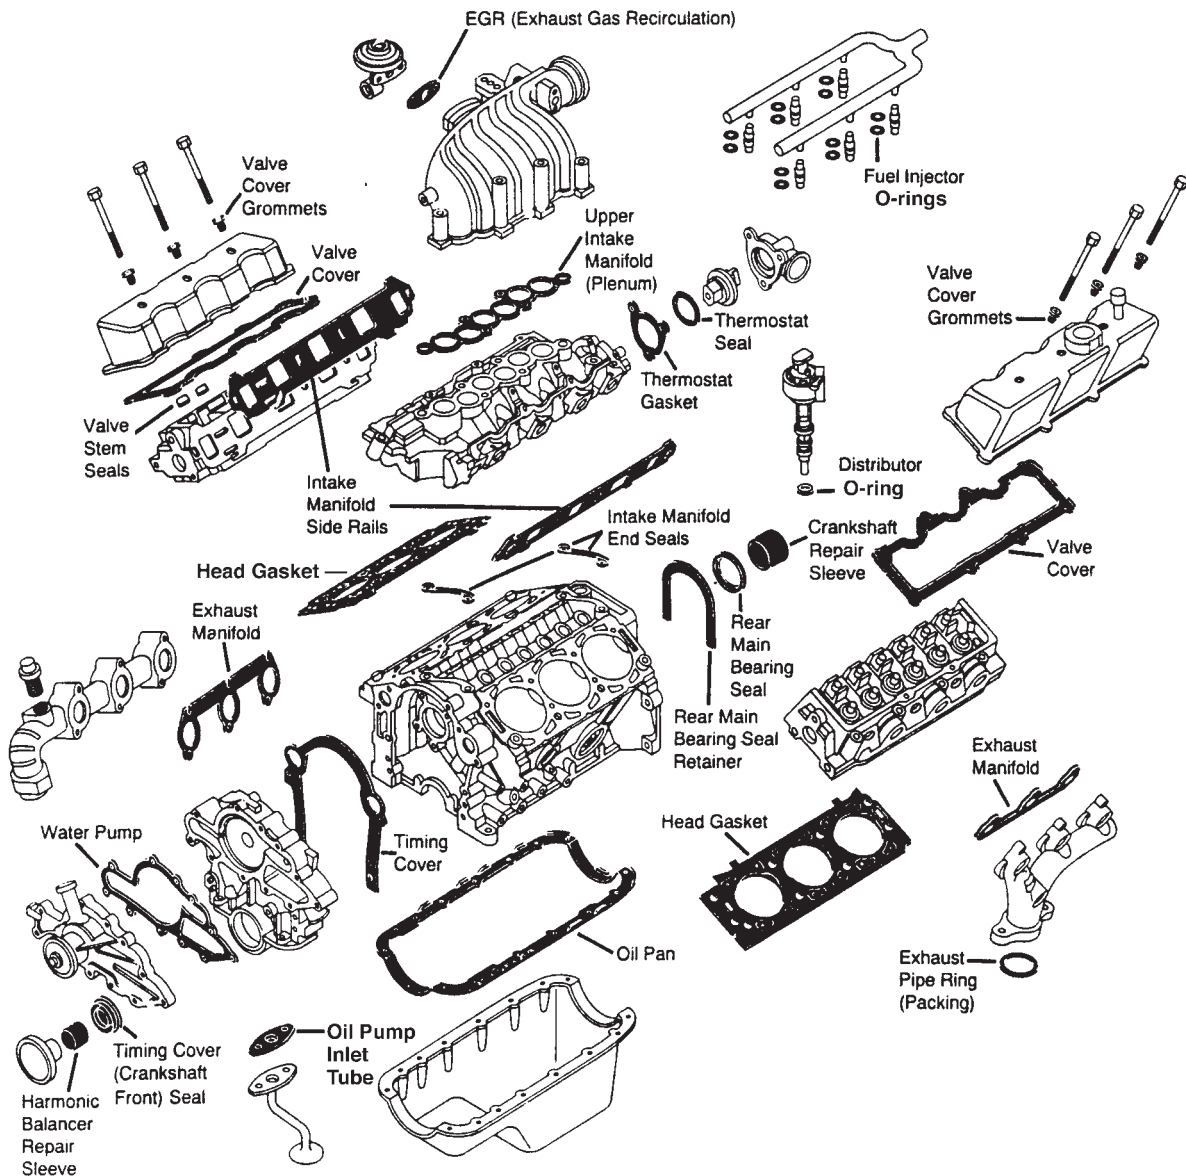

VALVE STEM SEAL SET (SS) - Intake, Exhaust, Auxiliary.

TIMING COVER SET (TCS) - Timing Cover Seal, Timing Cover Gasket, Oil Pan Gasket Segments, Front Oil Pan Seal.

REAR MAIN SEAL SET (BS) - Rear Main Bearing Oil Seal, Rear Main Bearing Cap Seals, Retainer Gasket.

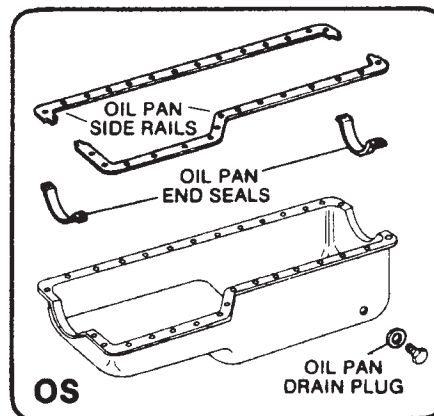

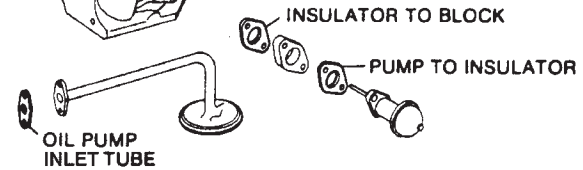

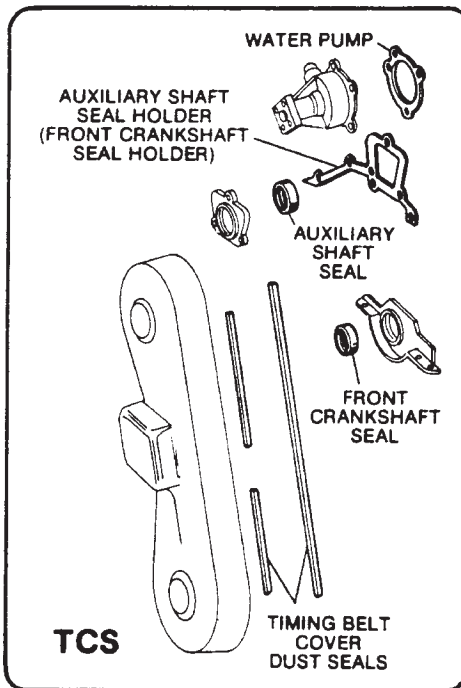

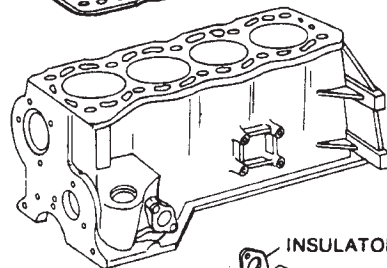

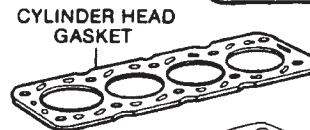

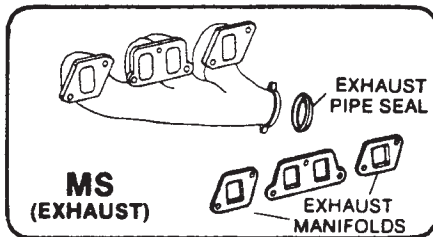

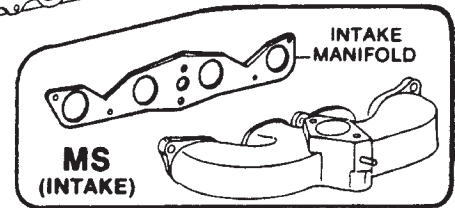

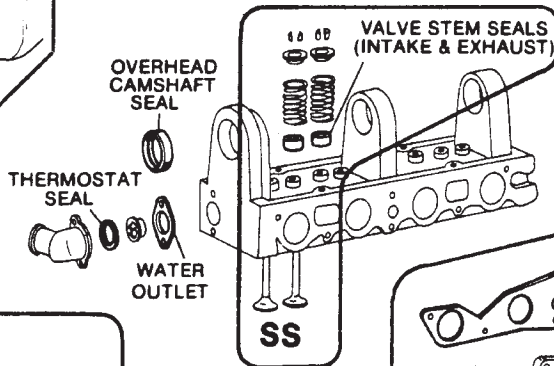

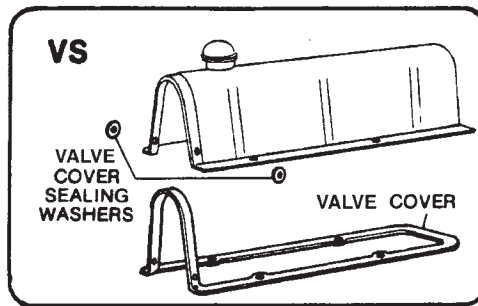

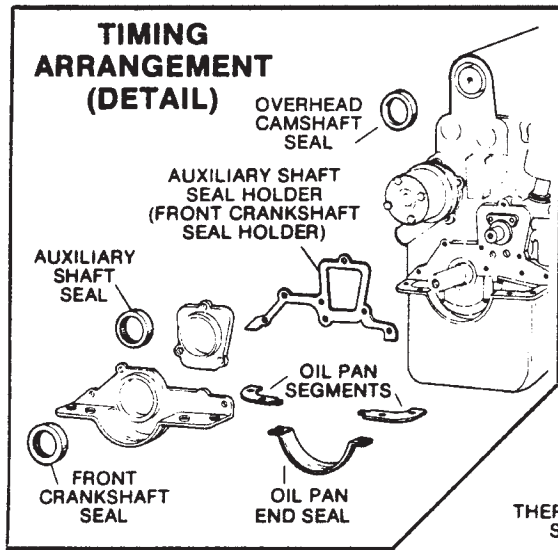

OIL PAN SET (OS) - One-piece or Multi-piece Gasket.

Typical V6 Overhead Valve Engine

Important Instructions

**ALWAYS CONSULT
THE MOST CURRENT PARTS CATALOG
AND SUPPLEMENTS FOR PARTS INFORMATION.**

This parts catalog is generally reprinted every two years. If this parts catalog is more than two years old, contact your local FEL-PRO[®] distributor to insure that you have the most up-to-date parts catalog.

**DESTROY ALL PREVIOUS
EDITIONS AND SUPPLEMENTS OF THIS PARTS CATALOG.**

This parts catalog replaces all previous editions and supplements.

**BEFORE INSTALLING
ANY PART LISTED IN THIS PARTS CATALOG, CONSULT THE
APPROPRIATE MANUFACTURER'S INSTRUCTION MANUAL
FOR INSTALLATION INSTRUCTIONS.**

This catalog contains parts information only. Before installing any of the parts referenced in this catalog ALWAYS consult the appropriate vehicle manufacturer's instruction manual for detailed installation instructions.

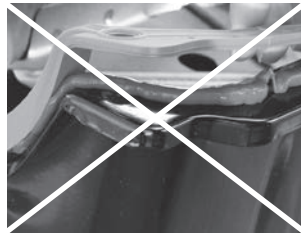

WARNING

Use parts only for applications and interchanges in this catalog. Failure to heed this warning could result in reduced life or failure of the part. All parts listed in this catalog are manufactured to the highest industry standards, but are not intended for use in space program, atomic energy/nuclear reactor equipment, medical, or aircraft applications.

TECBLOG CLEAN AND DRY

IT'S NO SECRET THAT FEL-PRO® GASKETS OFFER THE MOST RELIABLE SEAL FOR ANY REPAIR JOB. PROPER INSTALLATION IS THE KEY TO LONG SERVICE LIFE, AND INSTALLATION PRACTICES ARE CHANGING RAPIDLY AS GASKET DESIGNS ADVANCE.

In the past, it was not uncommon to coat a gasket with sealers, adhesives or RTV before installing it. Today, Fel-Pro offers many gasket designs with advanced leak-sealing technologies built into the gasket. With these modern gaskets, RTV or other sealers can actually decrease the gasket's ability to form a reliable seal, causing leaks. Fel-Pro PermaDryPlus® gaskets offer the latest in sealing technology. All PermaDryPlus gaskets feature proprietary in-house molded silicone rubber sealing beads bonded to rigid carrier construction. This provides a perfect fit – with no adhesives – saving installation time.

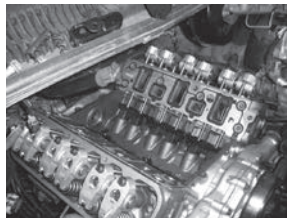

USING RTV ON GASKETS WITH FKM OR SILICONE SEALING BEADS CAUSES MULTIPLE ISSUES:

The sealer can chemically attack the rubber sealing beads and degrade them. RTV can act as a lubricant and cause the rubber gasket to slip out of place and split, creating an opportunity for leaks. Sealants can add thickness, which creates uneven clamping force as the gasket will not be able to seat properly. Also, RTV can extrude out when the gasket is compressed, and it could end up in an oil or coolant passage and restrict or block flow.

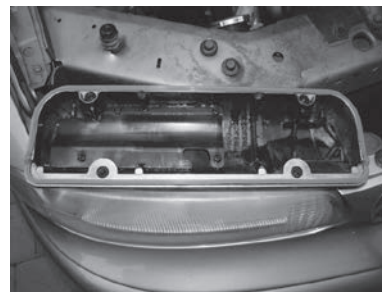

INTAKE MANIFOLD GASKETS

Intake manifold gaskets have become problematic leak areas over the last several years. PermaDryPlus intake manifold gaskets are designed to provide a permanent seal. They have an aluminized steel carrier that resists corrosion and is not susceptible to degradation from exposure to fuels, oils and coolants. In-house developed FKM fluoroelastomer resists all fluids and is used to create edge-molded seals, as well as primary and secondary sealing beads that provide additional sealing and compensate for corrosion-roughened surfaces. To ensure all of these technologies work the way they were designed to, these intake manifold gaskets must be installed on a clean, dry surface with no additional sealants used.

MOLDED RUBBER GASKETS

PermaDry® gaskets are intended for vehicles that used a molded rubber gasket as original equipment. These gaskets are made using Fel-Pro's proprietary molded rubber formulations and are precision engineered for each application. To guarantee a leak-free repair, PermaDry gaskets must also be installed without the use of additional sealants.

PermaDry® gasket installed dry

WHAT IF SEALANT IS NEEDED?

In cases where a sealant is needed for installation of a Fel-Pro gasket, a FIT® Form will be included, along with the proper sealant. Only apply the sealant in the manner and locations directed. Intake manifold gasket sets may contain a small tube of RTV. This RTV is not to be used on the gasket face, but rather to fill the gap where the bottom corners of the gasket meet the end seals.

FEL-PRO

FEL-PRO INSTALLATION TIPS

OIL PAN GASKET

Perma-Dry

To effectively seal this sophisticated engine application, FEL-PRO has included PERMA-DRY® molded rubber gasket(s) in this set.

CLEAN MATING SURFACES of all foreign material including old gaskets, RTV and oil. You may wish to use a degreaser. Also, clean oil return holes.

CHECK PAN FLANGES for flatness. Straighten stamped metal covers. Replace if severely distorted. Distorted cast aluminum or plastic covers are difficult to straighten and should be replaced.

ATTACH AND ALIGN GASKET TO PAN.

IMPORTANT: This molded rubber allows gasket must be installed **DRY** without any chemical adhesive.

REINSTALL OIL PAN TO ENGINE. Install cap screws, finger tight. Torque cap screws to OEM specifications. Over-torquing can distort pan and cause leakage.

TEST RUN ENGINE. Check all mating areas thoroughly to determine that all seals hold during operation.

Printed in U.S.A.

PermaDryPlus® intake gaskets installed dry: RTV used for end seals.

HEAD GASKETS

Fel-Pro head gaskets are also designed so that no additional sealers are needed. Modern facing materials and their pre-applied coatings, along with the proprietary coatings found on PermaTorque® MLS head gaskets, will compensate for minor surface imperfections, resist scrubbing, and provide the proper amount of torque retention to create a true no-torque head gasket. Use no sealers, adhesives or other additives with these gaskets.

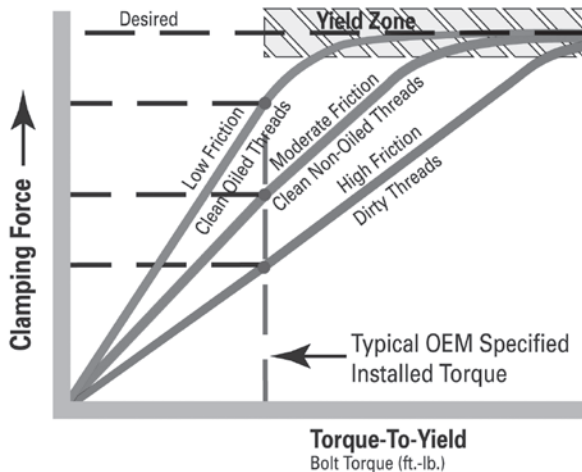

TECBLOG T-T-Y BOLT INSTALLATION

MANY VEHICLE MANUFACTURERS USE TORQUE-TO-YIELD HEAD BOLTS, ESPECIALLY ON ENGINES WITH ALUMINUM HEADS AND/OR IN CONJUNCTION WITH MLS HEAD GASKETS. THEY PROVIDE MORE CONSISTENT CLAMPING LOADS ACROSS THE ENTIRE HEAD-TO-BLOCK MATING SURFACE.

Bolts are elastic by nature, meaning that within their elastic range they'll stretch as load on the bolt increases. As long as the bolt is not stressed beyond its proof load (the maximum load a bolt can withstand and still behave in an elastic manner) it will retract if the torque is relieved. Traditionally, torque specs are calculated to keep fasteners within their elastic range because maximum clamp load is achieved when the bolt reaches its elastic limit or "yield" point.

Typical bolts can be an issue when you use them on aluminum heads and with a gasket that doesn't relax, such as an MLS gasket. The expansion rate of aluminum heads will stretch typical bolts past their yield point and can snap them. Plus, newer engines require high clamping forces (due to increased combustion pressure) that can't be achieved with the smaller diameter bolts normally found in engines. Unfortunately, using a larger diameter bolt is not the answer, as the larger a bolt is, the less it will stretch. Remember, bolt stretch is how we get maximum clamping load. Therefore, the solution is Torque-To-Yield, or T-T-Y, bolts.

CLAMPING FORCE AT SPECIFIED TORQUE

T-T-Y head bolts are engineered to stretch within a controlled yield zone. Once they reach this zone, they are designed to spring back to provide a more precise level of clamping force. This stretches the bolts into their elastic range, and in some cases, the stretching approaches the bolts' elastic limit, permanently stretching them. Once the yield zone is reached, the clamping force will be more consistent. Getting to the precise yield zone (for maximum clamping force) is accomplished by tightening bolts to a certain torque spec, then turning the bolts an additional number of degrees.

TORQUE-TO-YIELD PROCEDURE

For example, on the Subaru EJ253 2.5L naturally aspirated engine, a torque specification for a single bolt is to tighten to 22 ft/lbs, then 51 ft/lbs, loosen 180 degrees, then loosen another 180 degrees, torque to 31 ft/lbs, turn an additional 80-90 degrees, and finally turn another 40-45 degrees.

TORQUE SPECS

2007
Subaru Impreza 2.5i
2.5L 2457CC H4 99.5mm Bore
SOHC Model EJ253 16 Valve MFI

TORQUE SPECIFICATIONS ARE SHOWN IN FOOT-POUNDS

- 1st Step: 22
- 2nd Step: 51
- 3rd Step: loosen 180 degrees
- 4th Step: loosen 180 degrees
- 5th Step: 31
- 6th Step: turn 80-90 degrees
- 7th Step: turn 40-45 degrees
- 8th Step: Bolts 1-2 turn 40-45 degrees

While a sequence like this is complicated – especially since every head bolt must be tightened this way, and in a particular order – it provides much more consistent clamping force, which creates a better seal.

TECBLOG T-T-Y BOLT INSTALLATION

CONTINUED

HEAD BOLT SETS

Since T-T-Y bolts are designed to stretch, reusing them can cause improper or uneven torque and clamping force. Stretched bolts can damage threads in the engine, especially on aluminum blocks, and since the bolts are weakened, they may break if retorqued. You should always replace the bolts.

Fel-Pro ES 72229 Head Bolt Set

Fel-Pro ES 71129
Head Bolt Set with sealer pre-applied
to bolt threads where necessary.

Before removing T-T-Y head bolts, allow the engine to fully cool. Removing the bolts while the engine is hot can cause cylinder head warpage. T-T-Y bolts should be removed in the reverse order and sequence in which they were installed.

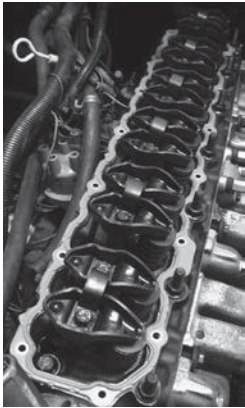

It is very important to follow the proper torquing sequence and specifications when installing T-T-Y head bolts. Always clean the threads where the bolts pass through. Any thread damage, corrosion or rust will create excessive friction, giving you a false torque reading, robbing you of valuable clamping force. Using engine oil, lightly oil the threads and under the heads/washers on T-T-Y bolts unless otherwise specified by the vehicle service manual. Clean, oiled threads prevent binding, allowing for accurate and consistent torquing. Be careful not to over-oil the bolts, especially if they are threading into a blind hole. Too much oil will hydrolock the bolt and give false torque readings.

Any bolts that pass through a water jacket must have a sealer applied to the threads to prevent corrosion and leaks. Fel-Pro head bolt sets are application-specific, so when a head bolt will be in contact with coolant, Fel-Pro provides coated bolts.

TECBLOG TIME IS MONEY

THE OLD ADAGE “TIME IS MONEY” IS ESPECIALLY TRUE WHEN IT COMES TO SEALING ENGINES. SAVING TIME BY INSTALLING FEL-PRO® PERMADRYPLUS® RESULTS IN A MORE PROFITABLE JOB.

In business, time does indeed equal money. The more efficient you are during each hour you work – getting as much as possible done in that hour – the more profitable your business is. That’s why it’s so important to use products that enable you to work as efficiently as possible. Fel-Pro® PermaDryPlus® gaskets are one such product. With their time-saving engineering features, they’re the most “efficient” gaskets you can install!

RIGID CARRIER CONSTRUCTION

All PermaDryPlus gaskets feature proprietary in-house molded rubber sealing beads bonded to rigid carrier construction. This provides for instant fit, setting the gasket perfectly in place – and with no adhesives – saving installation time. Plus, it lasts longer, so the job is only done once!

LOCATING TABS

PermaDryPlus valve cover and intake manifold gaskets feature locating tabs – precisely located tabs or extrusions built into the gasket – that allow a technician to instantly place the gasket in the right location, eliminating the need to spend time aligning the gasket.

TORQUE LIMITERS

PermaDryPlus gaskets have built-in torque limiters (pictured below). These strategically located and integrated metal stops assist with self-centering the bolt during installation, while preventing overtightening – a mistake that can cause leaks and costly, time-consuming comebacks.

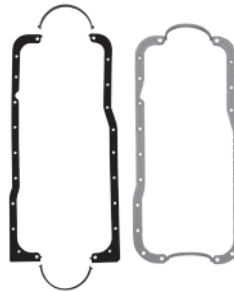

Self-centering torque limiters

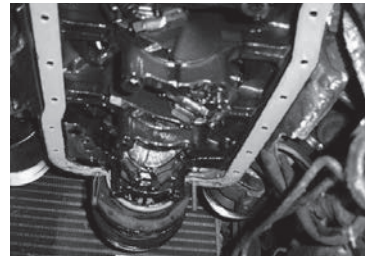

Close-up

ONE-PIECE CONSTRUCTION

Many traditional oil pan gaskets are composed of up to four pieces – each of which needs to be positioned in place (sometimes with adhesives that require additional time to set). Other oil pan gaskets require RTV, which is messy, time-consuming and requires time to set. Neither is the case with a PermaDryPlus oil pan gasket. These one-piece beauties install in seconds – simply and easily.

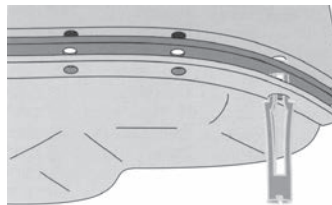

Ford 302 gasket comparison: Which one looks easier to install?

Example of a quick installation using SnapUps®

SNAP-UPS®

PermaDryPlus oil pan gaskets also include a bag of SnapUps® in the set. These time-saving little wonders are designed to hold up the pan and allow for easier bolt installation.

SnapUps® in action

Part No.	Application
ES72863	For all 5/16" bolt applications
ES72864	For all 6mm bolt applications
ES72865	For all 8mm bolt applications

Performance is our middle name too.

We get it. The thrill of primal, chest-pounding power. The rush of punching it and feeling that massive motor get up and haul. The satisfaction of maximizing all that performance. That's why we know you'll never stop pushing your engine's potential to the limit. **And we'll never stop pushing ahead with technology to make sure it all stays sealed.**

Trust Fel-Pro® PermaTorque® MLS to seal your Power Stroke®.
