BuffBall

CARE AND USE GUIDE

Super Mini BuffBall

Mini 3" BuffBall

5" BuffBall

7" BuffBall

INSTRUCTIONS FOR USE:

- Properly secure FLITZ BUFFBALL onto drill or air tool (Use only in forward or clockwise rotations).
- Apply thin coat of FLITZ POLISH onto surface.
- Buff lightly and allow polish to break down.
- Increase speed and buff at high speed (up to 2500 rpm).
- Repeat until desired result.

WASHING INSTRUCTIONS: (Pre-Soak Recommended)

Machine Wash: (For 5" & 7" BuffBall)

- Use regular laundry detergent (add Oxiclean for best results).
- Do not use fabric softeners.
- Air dry only (machine dry will void warranty).

Hand Wash: (For 2" & 3" BuffBall)

- Soak in a bucket for 1 hour with dish soap and Oxiclean.
- Rinse out with hose or in shop sink & air dry.

WARRANTY:

1 year warranty against premature failure. Warranty void when using polishing compounds other than FLITZ POLISH.

FLITZ®

FLITZ USES

HOUSEHOLD

Nickel & Chrome Faucets, Glass Shower Doors, Granite, Marble & Sterling Silver, Brass Hardware, Copper Pots & Pans, Glass & Stainless Stove Tops, Stainless Steel Kitchen Appliances, Painted Appliances, Aluminum Gutters, Fiberglass Tubs & Showers, Corian, Tile, Formica, Silver Plate, Bronze & Silver Flatware, Black Streaks

MARINE

Chrome, Fiberglass Hulls, Eisenglass, Plexiglass Windows & Hatches, Stainless Steel & Bronze Hardware, Glass, Anodized Aluminum, Stainless or Aluminum Bow Rails

SPORTING GOODS

Snowmobiles, Golf Clubs, Knives, Fishing Tackle, Factory Blued Guns, Brass & Silver Lures, Nickel, Stainless Steel, Tumbling, Tactical Matte Finishes

AVIATION

Aluminum & Painted Airplanes, Spinners, Leading Edges, Plexiglass & Plastic Windows, Exhaust Stains

AUTOMOTIVE, CYCLE, TRUCK, AND RV

Valve Covers & Motor Castings, Aluminum & Chrome Wheels, Painted & Plexiglass Surfaces, Chrome Exhaust Pipes, Headlights, Diamond Plate

FARMING

Painted Tractors, Aluminum Livestock & Horse Trailers, Painted Tractor Wheels, Headlights, Exhaust Pipes

WHEELS

Use Flitz Paste or Flitz Liquid: Apply a small amount of Flitz Polish to: wheel, chrome, aluminum, magnesium, or painted wheels. Spread with buffer at low speed. Finish with a high speed (at least 2500 RPM). Wipe off any residue with Microfiber Polishing Cloth.

LARGE ALUMINUM AREA

Semi-Truck -- Aircraft -- Pontoon Boats: Apply Flitz Paste (thin coat) to surface to be buffed. Use an orbital buffer, lamb's wool, or foam pad to buff. Wipe surface with baking flour or cornstarch to remove black residue. Use a solvent, such as denatured alcohol to remove black residue around rivets & crevices.

HEAVILY OXIDIZED ALUMINUM

To save time, use an acid pre-cleaner. Scrub, rinse & dry. Polish with Flitz Paste & paper towel. Finish with Microfiber Polishing Cloth NOTE: Use safety glasses & gloves when using an acid pre-clean.

DIAMOND PLATE ALUMINUM

Use Flitz Polish with BuffBall to reach ALL grooves and crevices. Start with low speed & finish with high speed. For LONG TERM protection, treat with Flitz Sealant.

CLEAR COATING ON METAL

Flitz will not harm or remove clear protective coatings. How to tell if clear coat is over the metal? Apply a drop of Flitz-Polish to the metal, use a paper towel, apply pressure & briskly rub. IF the paper towel DOESN'T turn black then your metal has been clear-coated. You must remove the clearcoat, in order to polish the metal from tarnish. Acetone or paint stripper (available at most hardware stores. A clear coat may be re-applied, after polishing - if desired.

REMOVE RUST ON METAL

Use Flitz Polish with #0000 steel wool to act as an abrasive. Marine Application: Use ONLY: Bronze wool as an abrasive with Flitz Polish. Bronze wool will not rust.

HEADLIGHTS

Apply Flitz Polish directly onto outside of headlight lens & run Flitz BuffBall (at slow speed) to spread the polish out. Increase speed under pressure. Buff until clear. *For EXTREME faded headlights or covered with clear coat, wet sanding is required. Use 1500 to 2000 grit sandpaper and wet sand the lens, for a smooth surface. Buff with FLITZ Polish to finish. "Seal" with FLITZ Sealant, giving you safe driving for years to come.

HEAVY TARNISH AND ANTIQUES

Brass, Copper, Bronze ONLY... Use FLITZ Instant Brass/Copper Tarnish Remover on surface to be cleaned. (Wear gloves) spray on, let sit up to one minute & rinse with water. Repeat if necessary. Polish with FLITZ Microfiber Cloth. Product is free from acid (made with organic salt).

EISENGLASS

Scuff marks & discoloration: Apply FLITZ Polish with a damp microfiber cloth. Buff with a clean & dry FLITZ Microfiber Cloth or FLITZ BuffBall.

CALCIUM, LIME, HARD WATER STAINS

Spray FLITZ Instant Calcium, Rust, Lime Remover & scrub affected area (Don't Let Dry). Rinse with clean water after two minutes.

HUNTING & RIFLE CLEANING

Always take extreme care and be sure your gun is not loaded while cleaning. Apply FLITZ Polish or FLITZ Bore Cleaner to a clean gun patch or bore brush. Lightly scrub inside the barrel. This will remove lead or copper fouling. Then buff the bore with a clean gun patch. Also use FLITZ Polish on a soft gun patch to remove powder residue from the front revolver cylinders. FLITZ Polish safely removes rust on factory gun bluing. Use FLITZ Sealant for longest protection.

FIBERGLASS, PLEXIGLASS & PAINT

Flitz will safely remove oxidation, sun fading and scuff marks. For a SMALL area, apply FLITZ Polish with a damp microfiber cloth. For a LARGE area, apply a thin coat of FLITZ Polish & spread with FLITZ BuffBall at low speed. Finish buffing at high speed (2500rpm) for best results. (An orbital buffer or low speed buffer, may be used as well with FLITZ Polish. For longest shine & protection, use FLITZ Sealant (ceramic coating). Spray Sealant onto polished surface and buff with a clean & dry FLITZ Microfiber Cloth.
