

## **SERIES OVERVIEW COPY FOR ALL APOLLO™ AMPLIFIERS**

### **SHORT**

Fusion® Apollo™ amplifiers are the difference between hearing the music and feeling it. They are efficient, easy to install and work with your compatible Fusion stereo system<sup>1</sup>. You can choose from zone, monoblock and multichannel amplifier options.

<sup>1</sup>Amplifiers are designed exclusively for use with Fusion DSP-enabled stereos (Apollo RA770, Apollo RA670, Apollo WB670 and RA210) and Fusion speakers

### **MEDIUM**

Fusion® Apollo™ amplifiers are the difference between hearing the music and feeling it. They are efficient, easy to install and work with your compatible Fusion stereo system<sup>1</sup>. The compact zone amplifier provides audio zone expansion for high-quality sound in more areas on your boat. The monoblock and multichannel amplifiers add extra power to your system. They all use less power, so you can listen to music longer with less drain on your battery. Plus, the Easy Tune feature<sup>2</sup> automatically regulates audio settings for the best sound quality without manual adjustments.

<sup>1</sup>Amplifiers are designed exclusively for use with Fusion DSP-enabled stereos (Apollo RA770, Apollo RA670, Apollo WB670 and RA210) and Fusion speakers

<sup>2</sup>Requires setup using the Fusion-Link™ app on a compatible smartphone
