WORLD'S FINEST HOOKS

2019 New Products

G Finesse Tricky Head

From the master finesse magician himself, Shin Fukae, comes the new Tricky Head jig head. It's the newest innovation from G Finesse. Designed to be fished with the popular shaky head technique, it brings several additional advantages to the tackle box. The Tricky Head is snag free. The weighted lead head is uniquely shaped to remain vertical during presentation, allowing the jig to bounce in and around structure while the worm or swimbait is held firmly in place by a lockdown tin keeper. You've got to see it to believe it.

Available in black or plain lead, in sizes 1/16, 3/32, 1/8 or 3/16 oz. Page 11.

Spring Lock Monster

Go big or go home. When conditions call for big baits, Gamakatsu's new Spring Lock Monster is precisely designed to hold and position them perfectly straight and firmly attached. Weighted with 3/8 or 1/2 ounce lead, the Spring Lock Monster stands up to aggressive casts and viciously hard hook sets. The "center point" bait screw is easy to start and tighten. Baits stay straight every time and all the time.

9/0, 10/0 or 12/0 hook sizes await trophy-caliber catches. Page 39.

Barbless Big River Bait

The innovative design has overtaken bait fisheries from coast to coast. Now the Big River Bait Hook is available as barbless to comply with conservation initiatives and new regulations. No need to pinch the barb on these forged shank hooks. The large gap and unique shape enable instant penetration and holding power. Corrosion resistant and available in all popular sizes. Available in 2/0, 3/0, 4/0, 5/0 and 6/0 sizes. Page 28.

Finesse Jig Head

When new tournament techniques emerge, our pro-staff are usually holding the rod. Case in point, the new Finesse Jig Head is designed to optimize the "Ned Rig." It's all about precise positioning of small soft plastics in a manner that translates into that slow, gliding fall that big bass can't resist. The spring keeper and light wire #1 hook are critical features. Lead heads are unpainted allowing for easy customization.

Available in 1/16, 3/32 and 1/8 oz. sizes. Page 65.

Crappie Jig Head

Designed for tournament focused crappie anglers. This premium design, specialized Crappie Jig Head, features a sticky sharp Gamakatsu hook fully molded through the lead head. The smooth eye won't burr even the lightest line. A heavy-duty spring lock keeper encircles the shank for nearly half its length. Soft plastics won't move a millimeter with this innovation. #2 light wire jig hooks in NS black. Available in 1/16, 3/32 and 1/8 oz. sizes. Page 65.

G-Box 3700, Utility Case

Size 14" x 9" x 2".

Our largest, smartest G Box storage case. Easily fits most hard baits and plugs. Micro adjustable dividers allow perfect customization. One-handed open and close system. Rounded corners slide in and out of tackle bags, backpacks or boat compartments easily. High-impact resistant polycarbonate. Page 79.

G-Box 3200, Utility Case

Size 8.1" x 5.7" x 1.6".

Slit foam allows single or treble hooks to neatly stay in place. Perfect storage for rigs, flies, jig heads and more. Easy one-handed open and close. Rounded corners easy to get out of tackle bags or boat compartments. High-impact resistant polycarbonate. Page 79.

G-Box 250, Duo Side Case

Size 7" x 4.2" x 1.6".

The best of both storage systems in one case. One side features slit foam for flies, rigs and jigs. The other side has micro adjustable dividers for storing hooks, swivels, split rings and other tackle. Compact design is great for hiking, kayak trips, or wader pockets. Page 79.

2019 New Products

Magic Eye Tuna Plug

You've likely heard about the advantages of using tandem Gamakatsu double, single-point hooks instead of factory trebles on your favorite tuna plugs. Hookup ratios increase and releases are far kinder to our finned friends. Magic Eye Tuna Plug 3X Hooks make rigging the system dramatically easier because the hook eyes are beveled so they slide right on a split ring without needing special pliers or tools. It's faster, easier and foolproof. Attach with hook points opposed. Available in 3/0, 4/0, 5/0, 6/0 and 7/0 sizes. Page 56.

Tuned Tuna with Welded Eye

A great hook for Stiff Rigs and other trolling applications. The forged needle point helps ensure a solid hook set. New welded eye will not open or flex. Available in 8/0, 9/0, 10/0 and 11/0 sizes. Page 56.

Double Assist 520

New vertical jigging techniques like "slow pitch" and "shore" jigging are gaining attention at a rapid rate. Many of the top anglers are using two assist hooks instead of one. Think about it, you're doubling your odds of hooking short or soft biters. Gamakatsu's Double Assist hooks are designed for fast and easy replacement on all types of butterfly, flat fall and "iron" jigs. The 6" super strong braided line loop can be adjusted to position each hook at the exact desired length, even or offset. Red heat shrink tubing on the hook shank is an added attractor and prevents chafing and bite-offs. And there's no concern of knots coming undone. Hooks are forged and barbed. Available in 2/0 and 4/0 in packages of two. Page 54.

Sockeye Rig Flame Red and Chartreuse

When the sockeye start running, you better be ready to get in the game fast. With our Sockeye Rigs, you are geared up in seconds. Tied on 30 lbs. leaders with sticky sharp 3/0 red Octopus hooks, available in 2 colors - chartreuse or flame red. Nothing is easier or faster, except maybe your limit. We've done the work for you to maximize your time on the water. Page 61

G Finesse Waterproof Back Pack

- Waterproof PVC Material
- Backpack design with adjustable waist strap
- Velcro and latch closure sinches down for water tight transport.

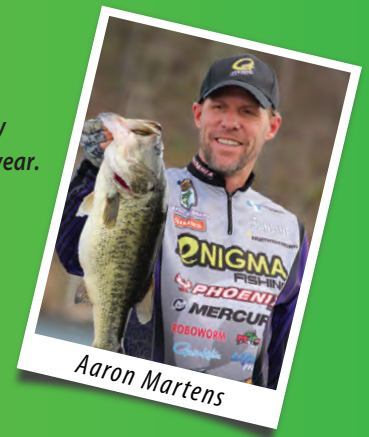

Page 79

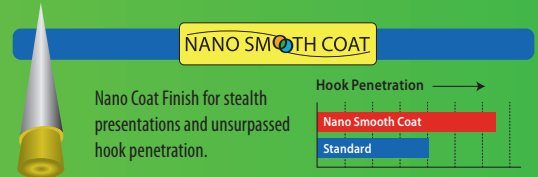

G Finesse...A Ground-Breaking Achievement In Hook Design
Gamakatsu entered the market on the promise of the sharpest hooks produced. It was Gamakatsu that created the "super sharp" hook category and continues to add new application-specific hooks to its offering every year.

"Over my entire career fishing Gamakatsu I envisioned making the best finesse hook in the world. Gamakatsu's New G Finesse Series combine **Ultra Sharp Tournament Grade Wire** with **Nano Smooth Technology** for the ultimate in hook penetration. This new technology will take my finesse fishing to a whole new level!" ~ Aaron Martens

Aaron Martens

G Finesse Heavy Cover Worm

The new Aaron Martens Signature G Finesse Heavy Cover Worm hook does what others can't. Extreme versatility. Martens says it best, "This hook let's me do so much, easily the most versatile soft plastics hook on the market". Featuring Aaron's custom designed keeper that holds plastics tight for endless casts without rips or tears. The rock solid keeper is made of non-corrosive tin, not plastic or lead, so it won't wear out or add unwanted weight. Like all G Finesse hooks, tournament grade wire and Nano Smooth Coat finish perfect the design. Available in sizes 2, 1, 1/0, 2/0, 3/0, 4/0.

G Finesse Treble Hook ... Thinner, Stronger, Sharper, Better.

Gamakatsu continues to expand its ground-breaking G Finesse series hooks with the G Finesse Treble Hook. Designed by Bassmaster Elite pro, Aaron Martens, the G Finesse Treble redefines "sharp" and "effective".

Gamakatsu's G Finesse Treble Hook is patterned after traditional O'Shaughnessy style hooks. Aaron has long been a proponent of the O'Shaughnessy hook style with its distinctive acute angle at the bottom of the hook. Martens believes the addition of the O'Shaughnessy bend, hooks and holds fish better than round bend designs. He should know, a past B.A.S.S. Angler of the Year, had three second place finishes in Bassmaster's Classics and is always in the hunt on the Bassmaster Elite Tour. When you fish as much as Aaron does, small details make a big difference. The G Finesse Treble Hooks is available in sizes 6,5,4,3,2, 1, 1/0. Nano Smooth Coat finish.

G Finesse Treble Hook MH Hook

G Finesse for big, tough fish that live in the heaviest cover. Aaron Martens frequently chases them and he asked us for medium heavy G Finesse treble to meet those needs. We answered. The new G Finesse Treble MH features a tougher medium heavy, tournament grade wire for additional strength. The same Nano Smooth Coat finish and short shank promote instant hook penetration. Available in Sizes 6, 5, 4, 3, 2, 1, 1/0.

G Finesse Drop Shot Hook

"I've increased my hook-up percentage by 40%... I rarely miss a fish with this new drop shot hook. These are the sharpest, strongest, most advanced hooks of their kind on the market."

Martens has been instrumental in the development of Gamakatsu's new G Finesse Drop Shot Hook. Completely "pro-designed", Gamakatsu's new G Finesse series is a giant leap forward in fishing hook technology. "The new G Finesse Drop Shot Hook is like Gamakatsu's standard Drop Shot Hook except that I had them pull the point more towards the eye to open up the gap. Also, the hook wire, called TGW (Tournament Grade Wire) is a smaller diameter, 20% thinner, but just as strong as their other hooks." Gamakatsu's G Finesse Drop Shot Hooks are available in sizes, 2, 1, 1/0 and 2/0. Nano Smooth Coat finish.

Mike McClelland

Mike McClelland Inspired G Finesse Hybrid Worm

The G Finesse Hybrid Worm is the brainchild of pro-staffer; Mike McClelland. He's spent more than a few hours on the water, competing in over 234 tournaments, including 10 times at the Bassmaster Classic. Mike knows the subtleties of rigging worms and soft plastic like no one else, so he and Gamakatsu's designers combined the best of his current favorite Gamakatsu worm hook and incorporated a distinctive new acute hook angle to keep baits aligned perfectly straight. Hence, the "Hybrid" name. The Nano Smooth Coat finish makes it easy to thread the thinnest finesse baits or the fattest Senkos with ease. Add industry-changing Tournament Grade Wire (TGW) to the package and things couldn't be more perfect. Take our word for it, or better yet, fish it yourself. *The G Finesse Hybrid Worm is available in sizes 1/0 to 8/0.*

Shinichi Fukae

G Finesse Swivel Shot

Drop-shot fishing for bass is nothing new but Gamakatsu's approach to it is. Our all-new Swivel Shot eliminates line twist that's commonly associated with drop shotting and vastly improves rigging efficiency. Gamakatsu's produced a revolutionary new "Twist Free" design using a premium swivel above the hook. The hook, a super-sharp Gamakatsu offset point Octopus hook, is strong enough to winch big bass out of slop --- another unique attribute of their Swivel Shot system. The Easy-Change weight system below the hook improves rigging efficiency and easy leader length adjustments without retying your rig. FLW Pro Sinnichi Fukae was instrumental in the development and testing of Gamakatsu's Swivel Shot and shared that it has been an essential element in his tournament success. Without a doubt, the Swivel Shot is an enormous leap forward in drop shot fishing that's sure to maximize angler's efficiency, increase hook-ups and land trophy-sized bass without the worry posed by conventional drop shot hooks and rigging. *Available in NS Black. Sizes: 2 - 3/0*

G Finesse Gamakatsu Tournament Snap

Gamakatsu's Tournament Snap is better by design. Primarily used on plugs for bass, walleye, salmon, stripers, steelhead, trout, panfish and other species, Gamakatsu's Tournament Snap is stainless steel and enables a full range of movement, enhancing the effectiveness of whatever plug is used. Better yet, and unlike other plug snaps, Gamakatsu's Tournament Snap will not accidentally open. The clever design of the Tournament Snap stays closed at all times as the plug eye is threaded onto the snap. It's easy and effective! Tested extensively and used under rigorous tournament conditions. *Gamakatsu's Tournament Snaps are available in two sizes, (M) Medium and (L) Large.*

G Finesse Tricky Head.

From the master finesse magician himself, Shin Fukae, comes the new Tricky Head jig head. It's the newest innovation from G Finesse. Designed to be fished with the popular shaky head technique, it brings several additional advantages to the tackle box. The Tricky Head is snag free. The weighted lead head is uniquely shaped to remain vertical during presentation, allowing the jig to bounce in and around structure while the worm or swimbait is held firmly in place by a lockdown tin keeper. You've got to see it to believe it. *Available in black or plain lead, in sizes 1/16, 3/32, 1/8 or 3/16 oz.*

NEW

G Finesse Weedless Wacky

Gamakatsu's Tournament-winning Pro Staffer, Shinichi Fukae, never rests. On the heels of last year's new Swivel Shot Drop Shot hook, he worked tirelessly with Gamakatsu's engineers to develop the new G Finesse Weedless Wacky hook. Look closely and you'll see, it's not an ordinary weedless design. The weed guards are not plastic, they're titanium wire—solidly encased and directly molded to the hook shank. They won't come loose and they don't vibrate or add resistance. The extremely thin gauge wire retains its shape, yet is flexible enough to compress with even the gentlest nibbles. Bass won't feel a thing, until of course, the precision sharpened Gamakatsu hook does its job. The G Finesse Weedless Wacky hook features Gamakatsu's exclusive Nano Smooth Coat finish to add stealth and reduce friction for effortless hook penetration. The hook itself features Tournament Grade Wire (TGW) that is a smaller diameter, yet stronger, than other Drop Shot hooks. *Available in sizes 2, 1, 1/0, 2/0 and 3/0*

G Finesse Worm Light with Tin Keeper

When conditions require finesse, the pros use new G Finesse Worm Light hooks. The light wire allows for threading of extremely small diameter worms with ease. Even the most fragile plastics are less likely to tear, saving on baits and increasing fishing time. The non-corrosive tin keeper doesn't add weight. Like all G Finesse hooks, the Worm Light hook penetrates with significantly less force making them substantially more effective. *Available in sizes 1, 1/0, and 2/0, all with Nano Smooth Coat Finish.*

G Finesse Swivel Shot Drop Shot

The original G Finesse Swivel Shot changed the game and professional anglers were eager to play. Some, like Shin Fukae, recognized the G Finesse advantage but didn't want to break from tradition entirely. The G Finesse Swivel Shot Drop Shot features our top of the line Tournament Grade Wire Drop Shot hook. Both the hook and swivel system feature the benefits of a Nano Smooth Coat finish. *Available in sizes 2, 1, 1/0 and 2/0.*

G Finesse Swivel Shot Worm

It's more than just a new hook. It's the origination of a revolutionary new technique made possible by Gamakatsu's industry-changing G Finesse series. Pro Staff Shinichi Fukae spent the last year perfecting the concept and proving its power. We've combined our G Finesse Worm Light w/ Tin Keeper hook with the G Finesse Swivel Shot System to create the first ever Swivel Shot Worm. Unique in form, function and finesse. Texas Rig the Swivel Shot Worm to be fished in and around cover. The light wire allows for threading extremely small diameter worms, held firmly in place by the near weightless, tin keeper. The hook also features our unique Nano Smooth Coat Finish. Adding the "twist-free" advantage of the Swivel Shot allows super fast rigging without tangles. You can be assured the presentation is always perfect, and that translates into more strikes and more bent rods. Available in sizes 1, 1/0, 2/0. Nano Smooth Coat finish.

G Finesse Jig Head Wacky

Gamakatsu's Jig Head Wacky is a vast improvement over other wacky jigs. The nickel/titanium weed guard is the first indication that Gamakatsu's raised the bass fishing bar. This weed guard is small but mighty as it effectively clears hazards yet maintains its shape and rigidity under the most demanding use. The jig head is an improvement as well. Better designed to resist snags the hook eye is recessed to prevent getting hung-up in structure. Even the hook is different, a custom addition that's based on a shiner hook but modified for the Jig Head Wacky. The result is a much higher ratio of hook-ups and landed fish than any other comparable brand.

Available in Black and Green Pumpkin. Sizes: 1/0-1/16, 1/0-3/32, 1/0-1/8, 1/0-3/16

History of Gamakatsu

Gamakatsu started producing fish hooks in 1955. At that time, they were the smallest hook manufacturer in Japan and all of their hooks were made by hand. In 1963 they introduced a new automated heating facility which catapulted them to the forefront of the Japanese market. In 1974, they introduced fully automated hook making machines and found it necessary to build a second factory in order to meet the demand they had created.

In 1976, being well established as the leading Japanese hook manufacturer, Gamakatsu started building a new factory to produce high quality fishing rods for the Japanese market.

After upgrading the hook manufacturing machines in 1986, they expanded their product line. As a result, Gamakatsu Co. Ltd became a major manufacturer with a full line of high quality fishing rods, hooks, apparel, and fishing related items by 1987.

In 1988, after upgrading the automated tempering facilities and expanding the hook factory, Gamakatsu Co. Ltd opened Gamakatsu International Co., Ltd. in Thailand and Gamakatsu Shantou Co. Ltd. in China in 1989.

When anglers purchase Gamakatsu hooks, they are buying an original product made by GAMAKATSU. Many hook suppliers are using fabricated Japanese sounding names bought from several different manufacturers.

Market Leader GAMAKATSU

Gamakatsu is the leading fish hook manufacturer in Japan. They are constantly testing new materials, trying to improve their product which already sets the standard for the rest of the industry.

In 1992 Gamakatsu USA Inc. was established to provide Gamakatsu brand hooks to the U.S. market. Obviously, Gamakatsu is well on it's way of achieving their goal of becoming the market leader in the USA and the world!

Environment has our attention

Since 1955, Gamakatsu has strictly stuck to the theme of "Nature and Technology". We work hard to develop new, hi-tech products that benefit the outdoorsman without adversely effecting the environment.

Gamakatsu's policy of technical development has always been "the best of quality". We are always searching for new ways to make our existing products better in addition to constantly looking for unique products which are not yet available. We believe that only this attitude can give our customers the best they deserve!

All over the world

Gamakatsu products are used worldwide. With offices located around the world, Gamakatsu is able to research its markets and develop unique products that meet the needs of even the most demanding anglers.

*Aaron Martens
Gamakatsu Pro*

History of Gamakatsu

Invention of hooks

20,000 years ago, the invention of the fish hook marked the beginning of sport fishing. The first hooks were made of wood or bones. As technology improved, so did the hooks. Records show that copper hooks were made in Banchen 7,000 years ago and artificial flies were used in Egypt 4,000 years ago. Fishing was also a popular form of entertainment in ancient China.

Today, modern materials and manufacturing techniques have resulted in hundreds of styles of extremely high quality hooks, designed for specific types of fish and fishing methods.

Quality of hooks

Gamakatsu hooks are the corner stone of the Gamakatsu company, and are famous worldwide. Material and technology are what makes these hooks superior to all other brands. The Gamakatsu company, in conjunction with a material manufacturer, developed a material known as High Carbon steel specifically for the manufacture of fish hooks. This material not only contains a higher percentage of carbon, but also has very few impurities. As a result, GAMAKATSU has earned Anglers' trust throughout the world. The life of a fish hook is measured by the sharpness, hardness, and viscosity of the point. Using low quality materials results in points that are weak and not truly sharp. In order to use High Carbon steel, Gamakatsu developed a unique electronic tempering process which enables hooks to be tempered in a stable condition. As a result, Gamakatsu is able to manufacture consistently high quality, extremely sharp hooks in large quantities.

Hook producing

The methods used in creating Gamakatsu hooks is what makes it so superior to all other brands. First, only the most premium grade of high carbon steel is used. This insures against any blemishes in the metal which can weaken the hook.

Secondly, Gamakatsu has the most advanced tempering system in the world. Every hook is heated to the exact temperature that is perfect for that particular style and size then cooled in oil. This process produces hooks which are super strong, but not brittle. It is extremely difficult to achieve a balance between strength and flexibility, and it took many years for Gamakatsu to perfect this process.

Finally, and perhaps most importantly, our sharpening process is the most modern in the world, and results in a perfectly conical point that is unequaled in sharpness.

Simply the best

Gamakatsu's dedication to producing the highest quality fish hook made, as well as the innovation they bring to the industry has kept the company at the forefront of the premium hook market. Among the innovative ideas that Gamakatsu has introduced are:

- Durability - A unique tempering process allowing us to make a hook of superior strength and durability.
- Strength - Hooks made of high carbon steel for superior strength.
- Sharpness - Conically needle honed points that are sharp from the package and stay sharp.
- Color Variation - Colored hooks in red, blue, green, gold, nickel, bronze, black, shrimp and fluorescent colors F-red, F-chartreuse, F-pink, F-orange, F-glow, F-green, F-purple to match the color of your lure or bait.
- Style Variation - Innovative hook designs like the extra wide gap (EWG) that hook and hold fish better.

Gamakatsu makes a hook for any and every fishing situation. So go ahead, tie on a Gamakatsu because it is "Simply the best!"

G Finesse Worm Light with Tin Keeper

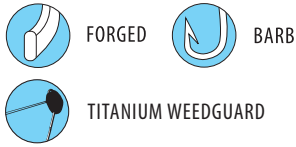

SIZES	1	1/0	2/0
Nano Smooth Coat	LS 358210(4)	358211(4)	358212(4)

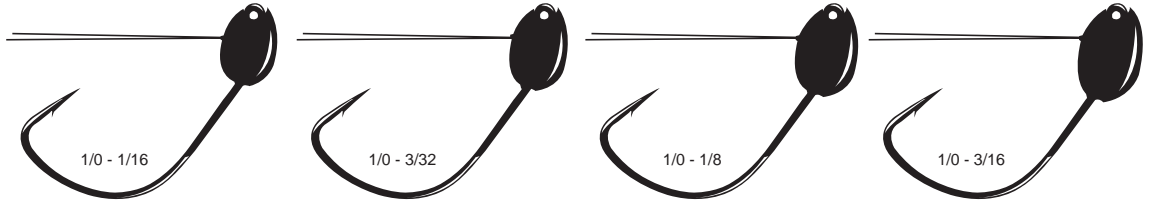

When conditions require finesse, the pros use new G Finesse Worm Light hooks. The light wire allows for threading of extremely small diameter worms with ease. Even the most fragile plastics are less likely to tear, saving on baits and increasing fishing time. The non-corrosive tin keeper doesn't add weight. Like all G Finesse hooks, the Worm Light hook penetrates with significantly less force making them substantially more effective.

G Finesse Jig Head Wacky

SIZES	1/0-1/16	1/0-3/32	1/0-1/8	1/0-3/16
Black	LS 312411-BK-1/16(3)	312411-BK-3/32(3)	312411-BK-1/8(3)	312411-BK-3/16(3)
Green Pumpkin	LS 312411-GP-1/16(3)	312411-GP-3/32(3)	312411-GP-1/8(3)	312411-GP-3/16(3)

Gamakatsu's Jig Head Wacky is a vast improvement over other wacky jigs. The nickel/titanium weed guard is the first indication that Gamakatsu's raised the bass fishing bar. This weed guard is small but mighty as it effectively clears hazards yet maintains its shape and rigidity under the most demanding use. The jig head is an improvement as well. Better designed to resist snags the hook eye is recessed to prevent getting hung-up in structure. Even the hook is different, a custom addition that's based on a shiner hook but modified for the Jig Head Wacky. The result is a much higher ratio of hook-ups and landed fish than any other comparable brand.

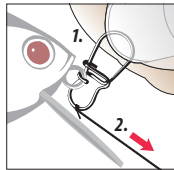

G Finesse Tournament Snap

SIZES	Medium (60 lb.)	Large (80 lb.)
LS	333000-M(10)	333000-L(10)

Tournament Snap design intensifies the lures swimming action

High quality stress relieved stainless steel.

- 1. TWIST & CLICK** - Hook the open end of the Tournament Snap inside the lure eye. Twist and click into place.
- 2. PULL** - Keep you line tight and pull at a 90 degree angle away from the lure to finish setting.

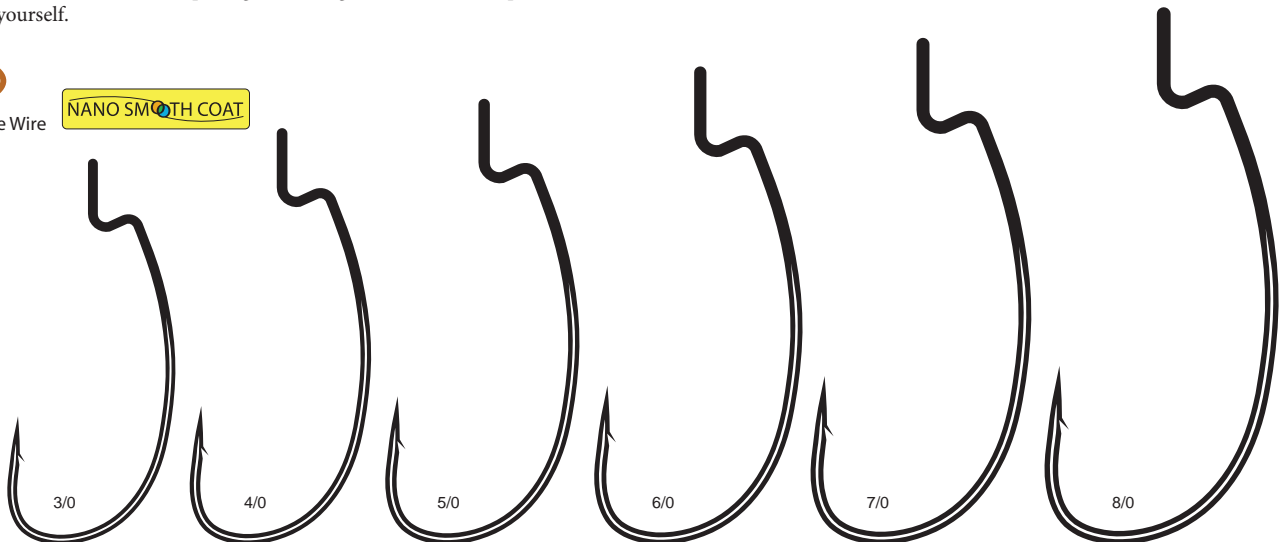

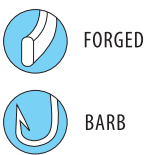

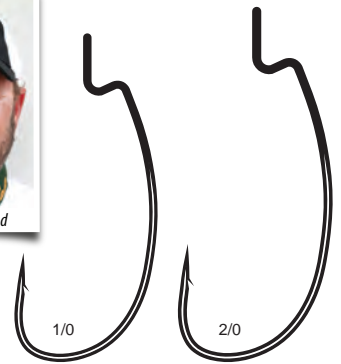

G Finesse by Mike McClelland

G Finesse Hybrid Worm

Gamakatsu Hybrid Worm is the definitive choice for all of my soft plastic rigs on tour. The unique hybrid design helps me hook and land more fish than ever before. When combined with Tournament Grade Wire and Nano Smooth Coat technology, Hybrid Worm is the ultimate fish catching machine. ~ Mike McClelland

SIZES	1/0	2/0	3/0	4/0	5/0	6/0	7/0	8/0
Nano Smooth Coat	LS 366211(4)	366212(4)	366213(4)	366214(4)	366215(4)	366216(4)	366217(4)	366218(4)

The G Finesse Hybrid Worm is the brainchild of pro-staffer; Mike McClelland. He's spent more than a few hours on the water, competing in over 234 tournaments, including 10 times at the Bassmaster Classic. Mike knows the subtleties of rigging worms and soft plastic like no one else, so he and Gamakatsu's designers combined the best of his current favorite Gamakatsu worm hook and incorporated a distinctive new acute hook angle to keep baits aligned perfectly straight. Hence, the "Hybrid" name. The Nano Smooth Coat finish makes it easy to thread the thinnest finesse baits or the fattest Senkos with ease. Add industry-changing Tournament Grade Wire (TGW) to the package and things couldn't be more perfect. Take our word for it, or better yet, fish it yourself.

**Treble Hooks
Double Hook**

Trout Treble

SIZES	18	16	14
Red	LS 273301(4)	273302(4)	273303(4)
Gold	LS 273201(4)	273202(4)	273203(4)

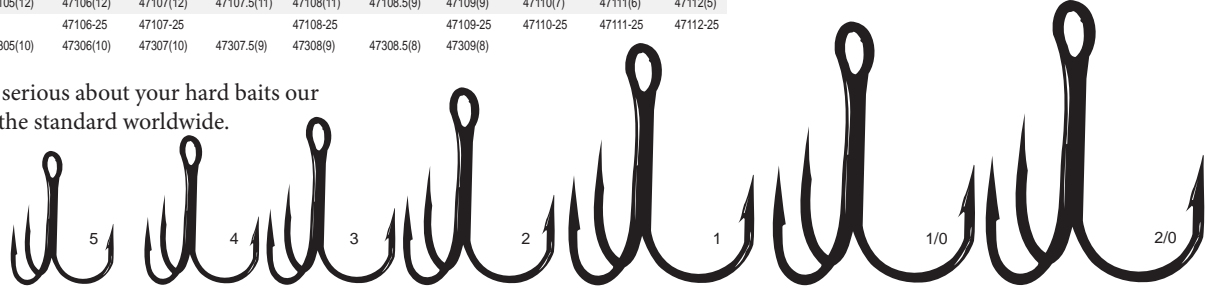

Developed for that discerning trout fishermen in mind. With the advances and popularity of artificial dough and paste type baits, it was only a matter of time that an added extra edge was needed. These high quality, sticky sharp trebles fit the bill. The light wire design will allow your bait to float higher and keep it more in the strike zone. Also, the fine wire design will allow for quick and deeper hook penetration.

EWG - EXTRA WIDE GAP

For crankbaits of all types --- there's nothing better --- it's the perfect replacement hook. First, we opened the points of this treble up slightly for even better hooking performance. The Short Shank EWG Treble converts those fish that slash at your bait into sure hook-ups. The shorter shank and wide gap design provides less room for fish to throw the hook. In fact, this attribute actually wedges the fish between the hook and the crankbait...it's the ultimate in fish holding, which means fish landing performance. That's not all. It also features Gamakatsu's exclusive "Magic Eye" that makes changing hooks a breeze. The hook's inline points run parallel to the bait creating a perfect balance point so your crankbaits run true.

Treble EWG, Short Shank, 2X Strong (Magic Eye)

SIZES	6	4	2	1	1/0
NS Black	LS 317407(6)	317408(6)	317409(6)	317410(6)	317411(6)

All the attributes of the Short Shank EWG Treble just beefed up to 2X Strong dimensions for tackle-busting big game species like striper, musky and peacock bass.

Octopus Light

Gamakatsu answered the call for a fine wire Octopus hook, the Octopus Light for use in drop shot and trout fishing.

Gamakatsu's Octopus Light features an offset beak point for optimal penetration with bait or plastics. The smaller diameter hook wire enhances hook penetration and is a certain advantage when fishing timid or light-biting fish.

Octopus Circle 4x Strong, Straight Eye (Inline-point), **TOURNAMENT LEGAL**

To comply with new angling regulations in the Gulf of Mexico, we've redesigned and reinforced our most popular circle hook. The new 4X Strong Circle Hook is built for the toughest battles in the deep sea. The straight eye, NS black finish and inline point (not offset) complies with the new rules, but doesn't reduce the hook's effectiveness. This is the new "go-to" hook charter captains and professional anglers are using for deep dropping and reef and wreck fishing. Heavy up your rods, reels and line, because the 4X Strong Circle Hook will never give up when it comes to pulling snapper and monster grouper out of their fortified hangouts.

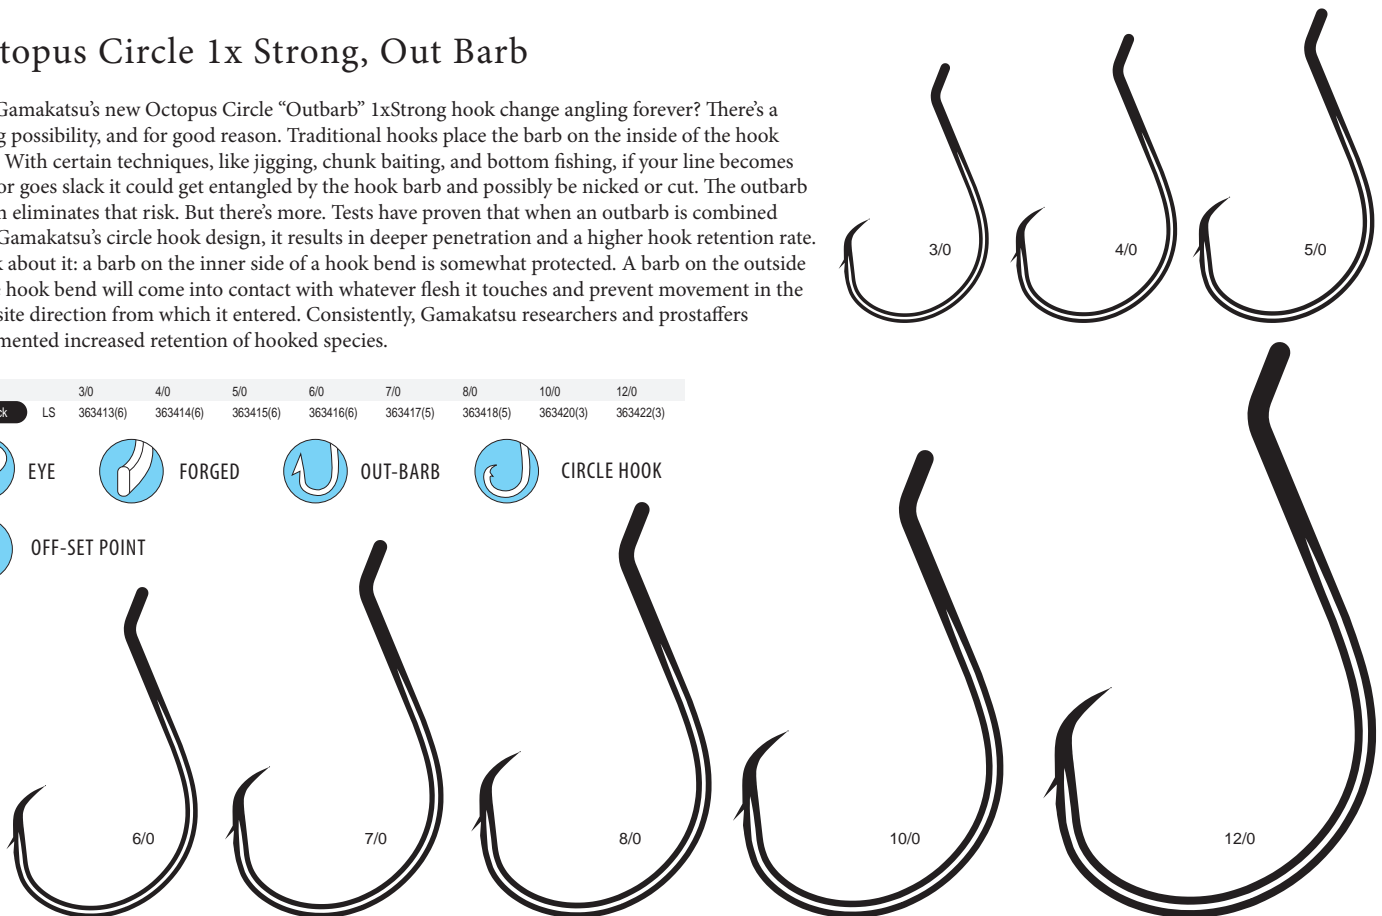

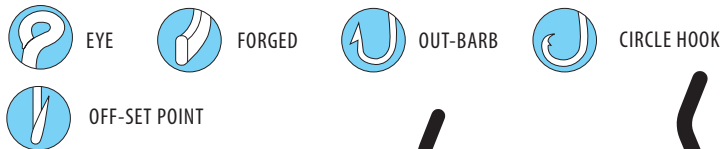

SIZES	1/0	2/0	3/0	4/0	5/0	6/0	7/0	8/0	9/0	10/0

Octopus Circle 1x Strong, Out Barb

Will Gamakatsu's new Octopus Circle "Outbarb" 1xStrong hook change angling forever? There's a strong possibility, and for good reason. Traditional hooks place the barb on the inside of the hook bend. With certain techniques, like jigging, chunk baiting, and bottom fishing, if your line becomes limp or goes slack it could get entangled by the hook barb and possibly be nicked or cut. The outbarb design eliminates that risk. But there's more. Tests have proven that when an outbarb is combined with Gamakatsu's circle hook design, it results in deeper penetration and a higher hook retention rate. Think about it: a barb on the inner side of a hook bend is somewhat protected. A barb on the outside of the hook bend will come into contact with whatever flesh it touches and prevent movement in the opposite direction from which it entered. Consistently, Gamakatsu researchers and prostaffers documented increased retention of hooked species.

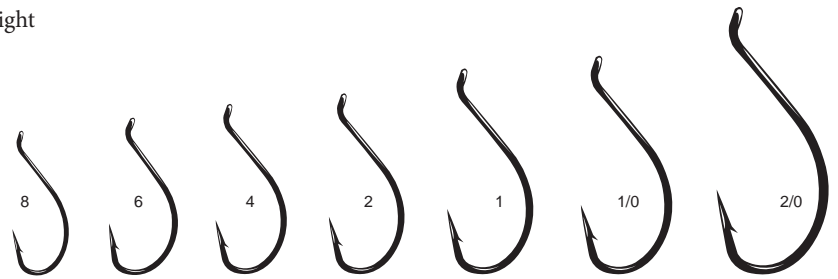

SIZES	3/0	4/0	5/0	6/0	7/0	8/0	10/0	12/0
NS Black	LS 363413(6)	363414(6)	363415(6)	363416(6)	363417(5)	363418(5)	363420(3)	363422(3)

Walleye Wide Gap

SIZES	8	6	4	2	1	1/0	2/0
NS Black	LS 202406(10)	202407(10)	202408(10)	202409(8)	202410(8)	202411(6)	202412(6)

The reception to our Big River Bait Hook has been so strong that anglers immediately began asking for a siwash-style hook they could use on their spinners, spoons and plugs for salmon. The answer...this fast penetrating hook holds better than conventional hook designs. When fished barbless (which requires pinching the barb down) it's the best barbless hook you'll find. The unique Big River hook design locks fish in place when hooked. Forged for exceptional strength and built Gamakatsu sharp the Big River Open Eye is sure to make great lures even better.

Big River Bait Open Eye Barbless

OPEN EYE

The *Finesse Heavy Cover Worm Hook* is a light wire, finesse hook that features the first wide gap straight shank hook for finesse worm fishing. Just like all the Heavy Cover Hooks the *Finesse* features a welded eye and wire keeper that assures your worm doesn't slide down the hook.

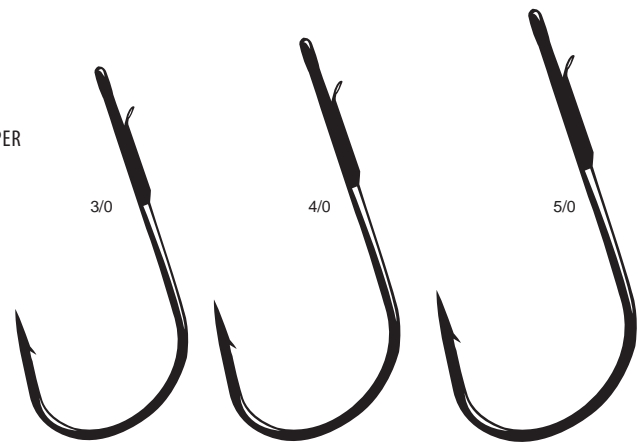

Heavy Cover Worm with Welded Wire Keeper

SIZES	3/0	4/0	5/0
NS Black LS	304413(4)	304414(4)	304415(4)

The new standard in Flip hooks has arrived. The new Heavy Cover Worm hook has been built to the highest standards to fight the biggest fish in the heaviest cover. The Heavy Cover Worm features our rock solid welded eye, perfect for tying a Snell knot with braid. Gamakatsu has worked with our top pros to design an improved keeper. Instead of a bulky heat shrink barb, the Heavy Cover Worm features a small wire keeper. The keeper has a small compact profile and is strategically placed for superior holding power.

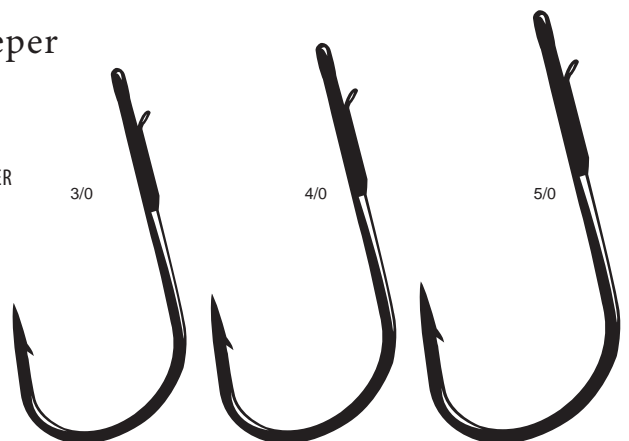

Super Heavy Cover Worm with Welded Wire Keeper

SIZES	3/0	4/0	5/0
NS Black LS	310413(4)	310414(4)	310415(4)

The *Super Heavy Cover Worm Hook* is indestructible with a welded eye and extra heavy duty cold-forged hook wire that will not flex. It's perfect for flipping into heavy cover or punching through thick overhead cover. The addition of an oversized barb holds hooked fish solid and the punch wire/keeper firmly secures worms so they stay rigged cast-after-cast.

EWG - EXTRA WIDE GAP

BARB

Our most popular and versatile hook, the legendary EWG worm hook is the gold standard in high performance wide gap hook designs. This hook fishes a Senko to perfection. Use it to pitch a Brush Hog or Sweet Beaver to shoreline targets. It's great for Texas rigging or Carolina rigging a 10" worm. A soft plastic jerkbait fisherman's dream hook.

SuperLine

An EWG on steroids. This high carbon heavy wire hook was designed to fish braided line in heavy cover. For serious flipping in the tulle's, overhead mats, or pads. The EWG Superline will increase your strike to hook ratio when you need to get nasty.

Perfect when you require a quicker descent rate without increasing size or adding weights. Want to turn up the heat with a Senko? Go with a Superline for that deadly quick descent!

 EWG - EXTRA WIDE GAP

SuperLine

There are times when calling up fish requires a little something extra. For this purpose we designed the EWG Ringed Superline. Need to fish a Horny Toad in the slop and want it to walk? Our solid piece ring allows the bait to swing freely. Fishing a Fluke for schooling smallmouth or big spots and want that super erratic action? This is your hook. Handles braided line and heavy monofilament with ease.

Extra Wide Gap (EWG) Monster

SIZES	5/0	6/0	7/0
NS Black	LS 283415(5)	283416(4)	283417(4)

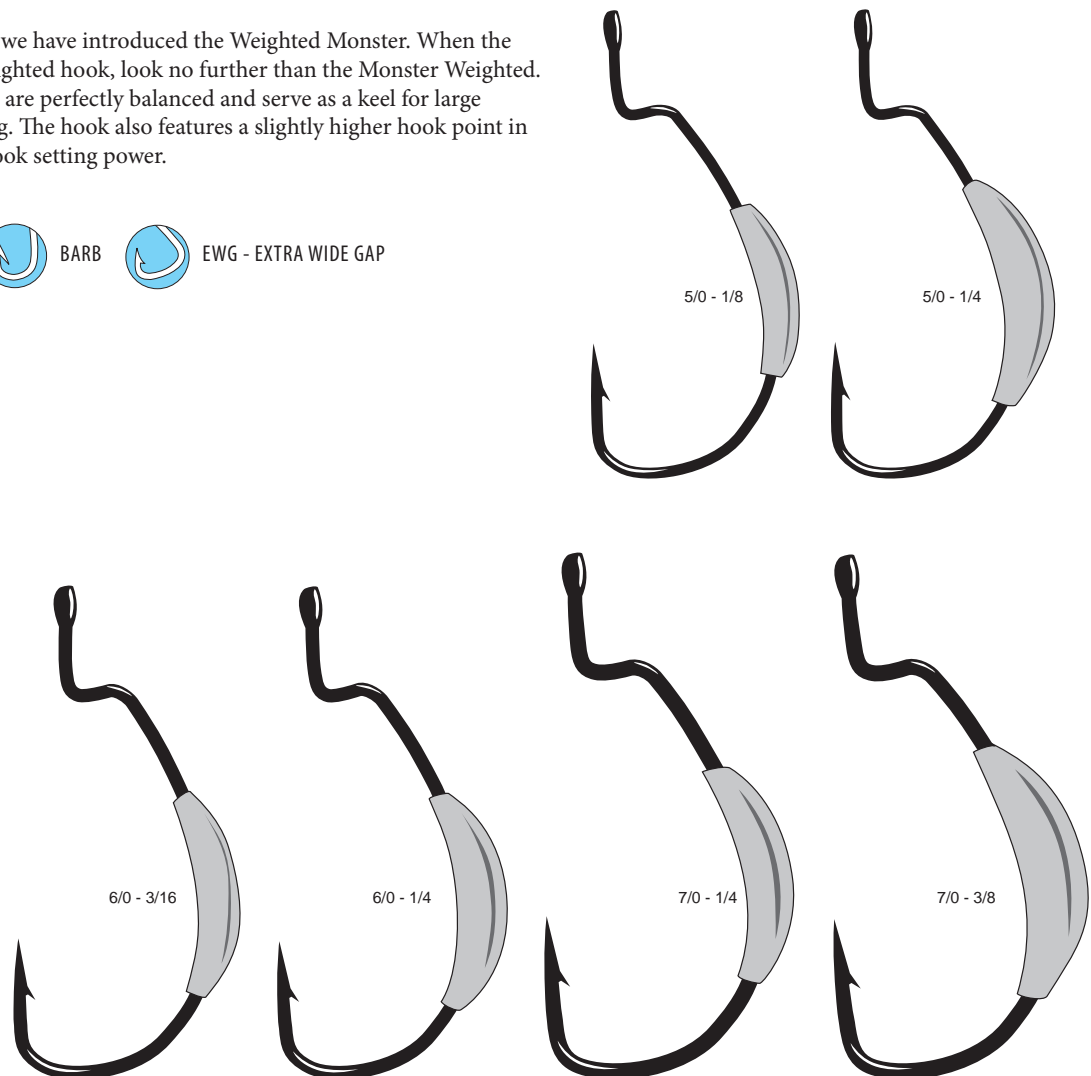

When only a high carbon heavy wire hook will do your choice should be the EWG Monster. Hard core doesn't even begin to describe the Monster. Slinging a Mission Fish back in the cover? We now have the perfect hook. Loading for bear with a giant Gitzit, Double Wide Beaver, or oversized Slug-O? The Monster has you covered. Headed to El Salto, Clear Lake, or the California Delta for double digit behemoths? Gamakatsu Monster is the choice when you are taking no prisoners. Heavy line, heavy rods, big baits, and big fish is EWG Monster time!

Extra Wide Gap (EWG) Monster, Weighted

SIZES	5/0 - 1/8	5/0 - 1/4	6/0 - 3/16	6/0 - 1/4	7/0 - 1/4	7/0 - 3/8

On the heels of the EWG Monster we have introduced the Weighted Monster. When the situation calls for a bulletproof weighted hook, look no further than the Monster Weighted. Strategically placed milled weights are perfectly balanced and serve as a keel for large swimbaits or any oversized offering. The hook also features a slightly higher hook point in relation to the eye to help aid in hook setting power.

Gamakatsu Micro Gap hooks

Offering sport fisherman the ultimate in design, the finest quality forged steel and unparalleled workmanship. Originally designed for finesse presentations for ice fishing, the Micro Gap selections are perfectly suited to many fly tying techniques as well. The fine wire design penetrated with less pressure, lessening tissue damage allowing for easier catch and release fisheries. All Micro Gap hooks are finished in NS black.

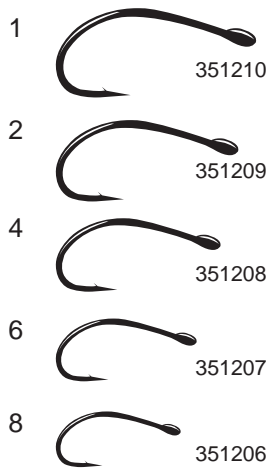

*The **Micro Perfect Gap** hook has an up-eye design for easy snelling and optimal gap for minnows or small plastics.*

*The **Micro Wide Gap** features a straight hook eye for minnow and soft plastics.*

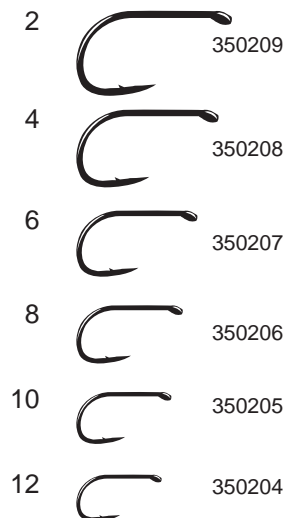

*The **Micro V Gap** also features a straight hook eye, but adds a deep V bend to improve retention.*

Gamakatsu G-Carp Hooks

We've dialed in our carp hook selection to make it the best selling line of hooks in many European countries.

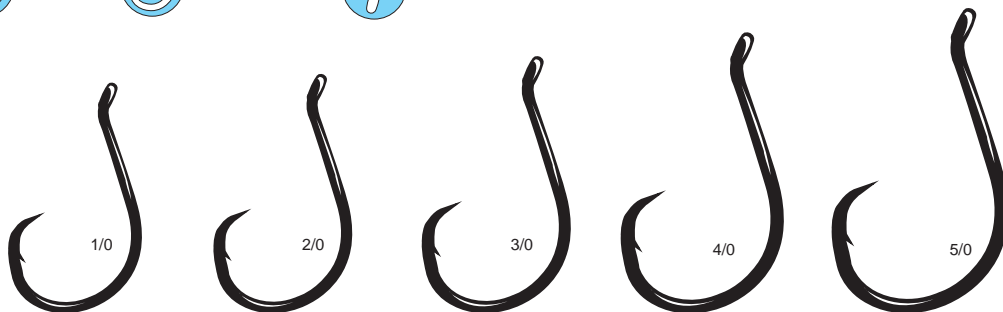

There's two simple points that are critical for carp – hide the hook and hold the bait. That's why we've carefully shaped all the new G Carp hooks to hide perfectly concealed within every type of bait. Furthermore, we've included unique micro barbs to grab onto soft dough balls and putty baits and hold them in place. All G Carp hooks are forged for strength and feature the innovative **Nano Smooth Coat** for fast penetration.

Big Cat Circle

There's a new dog in the fight for cat fishermen. The new Gamakatsu Big Cat Circle Hook is designed specifically for tough-lipped, thick-mouthed catfish. The offset, precision sharpened hook point penetrates quickly even with light hook sets. It features an "up eye" so snelling is fast and easy. 2X strong forged steel is plenty of power for the biggest Blues -- even Wels and Mekong cats if you ever get the opportunity. It's the right hook for the job because it never stops working

Heavy wire and forged for extra strength, this hook is the go to hook for big fish on big baits.

Live Bait Heavy Duty Circle, **TOURNAMENT LEGAL**

SIZES	5/0	6/0	7/0	8/0	9/0	10/0	11/0	12/0
Ns Black	LS 210415(6)	210416(5)	210417(5)	210418(4)	210419(3)	210420(3)	210421(2)	210422(2)

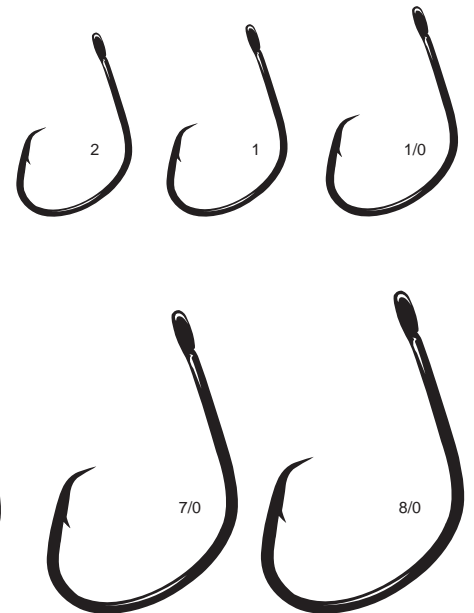

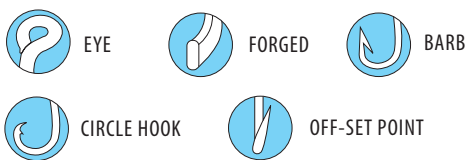

Same design as the Live Bait Heavy Duty, but with a non-offset circle hook point. The perfect hook for giant fish on big chunk baits.

Nautilus Light

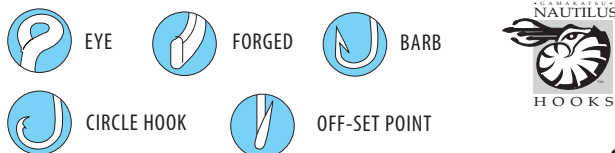

Sizes	2	1	1/0	2/0	3/0	4/0	5/0	6/0	7/0	8/0
Ns Black	332409(8)	332410(8)	332411(7)	332412(6)	332413(5)	332414(5)	332415(4)	332416(3)	332417(3)	332418(3)

A light wire hook that was developed for fishing fragile live baits. Produced from forged high carbon steel, it features a straight eye and offset point for superior hooking performance. The unique circle hook shape is designed to hook and hold which is precisely why more saltwater anglers make Gamakatsu their hook-of-choice. Superior strength, sharpness and design add-up to make a sure bet for live bait and chunk bait anglers from coast-to-coast.

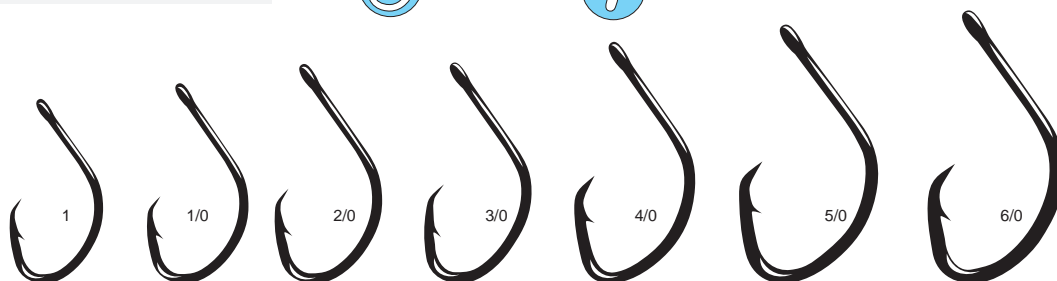

Nautilus Circle

SIZES	1	1/0	2/0	3/0	4/0	5/0	6/0
Na Black LS	42410(8)	42411(7)	42412(7)	42413(6)	42414(6)	42415(5)	42416(5)
Na Black	25	42410-25	42411-25	42412-25	42413-25	42414-25	42415-25

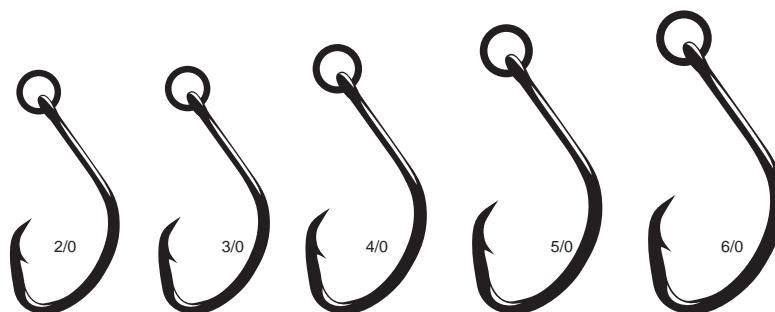

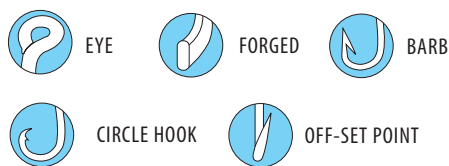

One of the meanest circle hook designs around. The Nautilus grabs its prey and simply doesn't let go. This hook can be used for live bait or chunk bait presentations and has proven its strength many times.

Nautilus Circle With Solid Ring

SIZES	2/0	3/0	4/0	5/0	6/0
Na Black LS	42412R(5)	42413R(5)	42414R(4)	42415R(4)	42416R(4)
Na Black	25	42412R-25	42413R-25	42414R-25	42415R-25

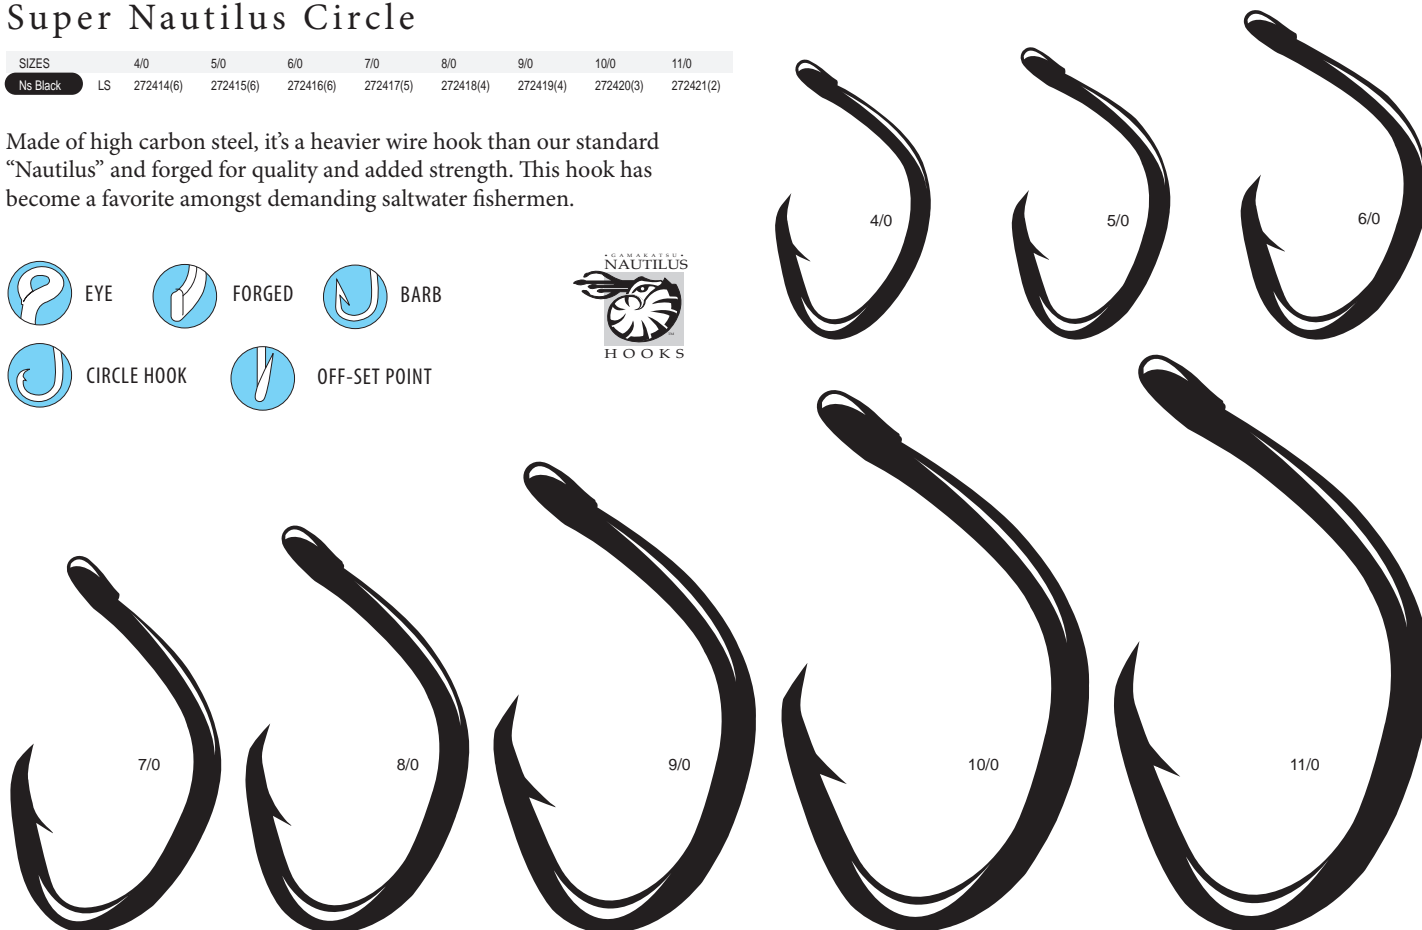

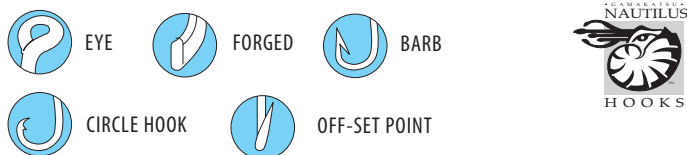

The most popular circle hook with solid ring, grabs its prey and simply does not let go.

Super Nautilus Circle

SIZES	4/0	5/0	6/0	7/0	8/0	9/0	10/0	11/0
Na Black LS	272414(6)	272415(6)	272416(6)	272417(5)	272418(4)	272419(4)	272420(3)	272421(2)

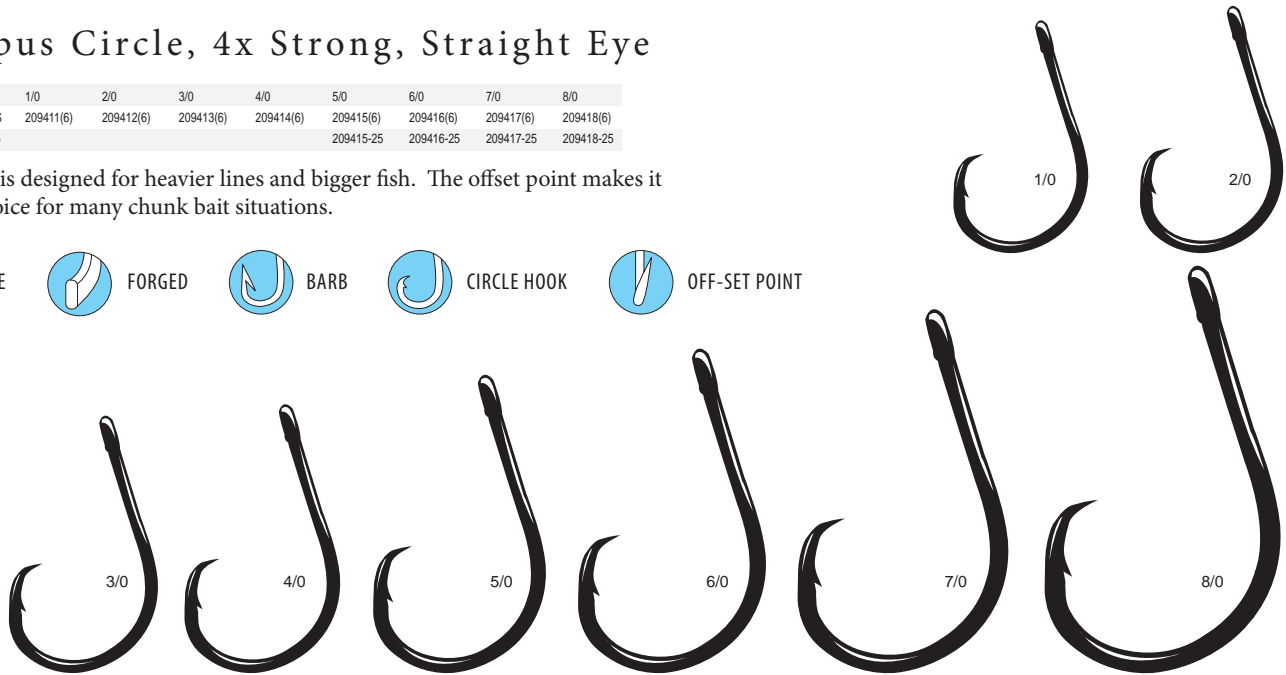

Made of high carbon steel, it's a heavier wire hook than our standard "Nautilus" and forged for quality and added strength. This hook has become a favorite amongst demanding saltwater fishermen.

Octopus Circle, 4x Strong, Straight Eye

SIZES	1/0	2/0	3/0	4/0	5/0	6/0	7/0	8/0
NS Black	LS 209411(6)	209412(6)	209413(6)	209414(6)	209415(6)	209416(6)	209417(6)	209418(6)
NS Black	25				209415-25	209416-25	209417-25	209418-25

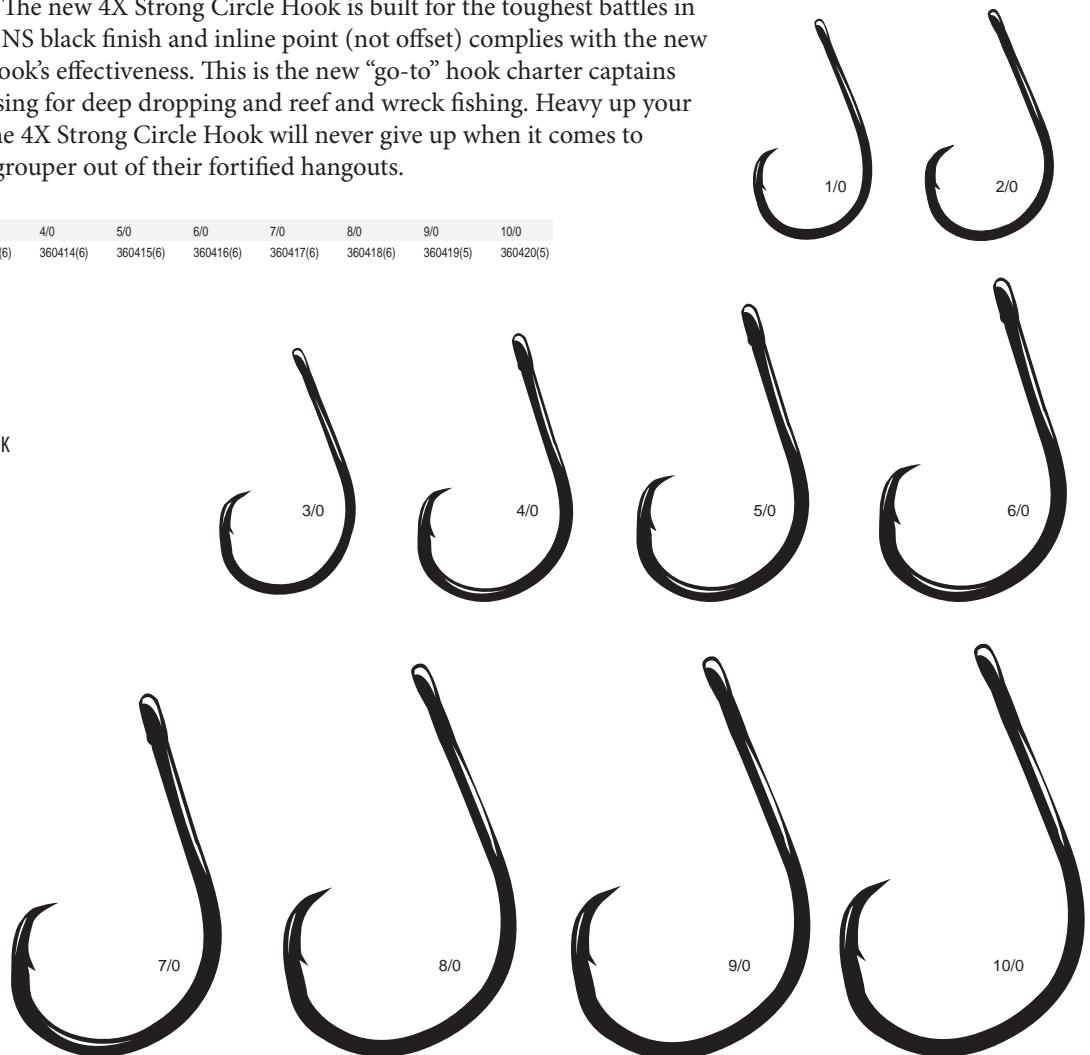

This hook is designed for heavier lines and bigger fish. The offset point makes it a good choice for many chunk bait situations.

Octopus Circle, 4x Strong, Straight Eye (Inline-point) **TOURNAMENT LEGAL**

To comply with new angling regulations in the Gulf of Mexico, we've redesigned and reinforced our most popular circle hook. The new 4X Strong Circle Hook is built for the toughest battles in the deep sea. The straight eye, NS black finish and inline point (not offset) complies with the new rules, but doesn't reduce the hook's effectiveness. This is the new "go-to" hook charter captains and professional anglers are using for deep dropping and reef and wreck fishing. Heavy up your rods, reels and line, because the 4X Strong Circle Hook will never give up when it comes to pulling snapper and monster grouper out of their fortified hangouts.

Assist 510

SIZES	1	1/0	2/0	3/0	4/0	
Tin	LS	219510(4)	219511(4)	219512(3)	219513(3)	219514(2)

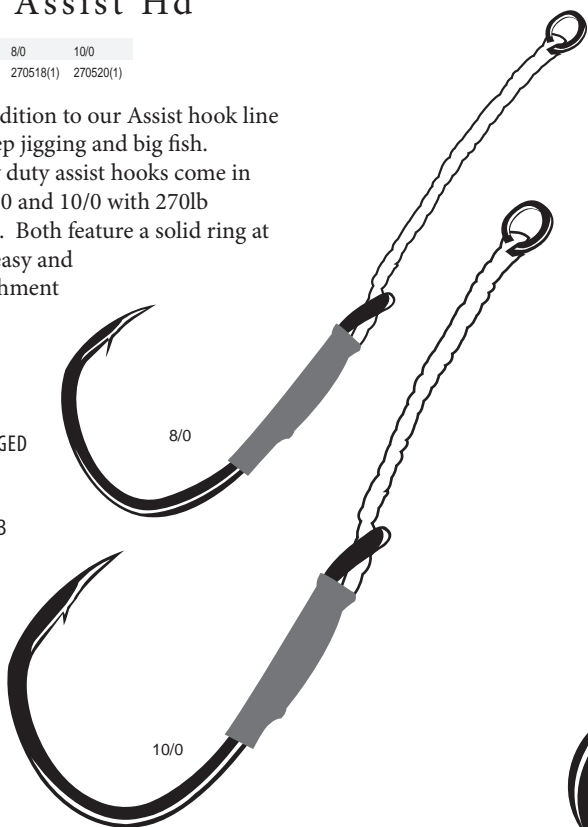

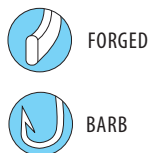

The Assist 510 features a curved point with an outbarb that will not nick the leader if it were to catch the line. No vertical jig should be fished without one. The super strong braided line loop easily attaches to any jig. One of the first Assist hooks introduced in this country and still the best designed.

Tuned Assist Hd

SIZES	8/0	10/0
Tin	LS	270518(1) 270520(1)

This new addition to our Assist hook line up is for deep jigging and big fish. These heavy duty assist hooks come in two sizes, 8/0 and 10/0 with 270lb braided line. Both feature a solid ring at the top for easy and secure attachment to the jig.

Magnum Assist

SIZES	8/0	10/0
NS Black	LS	256418(2) 256420(2)

Featuring a 200lb. braided line loop and our 4x Strong Octopus hook in 8/0 and 10/0, the Magnum Assist is perfect for larger Halibut jigs and deep drop speed jigs.

Steel Assist With Magic Eye Swivel

SIZES	3/0	5/0
NS Black	LS	269413(2) 269415(2)

Don't sacrifice your favorite jig to toothy fish like Wahoo and Mackerel. This Assist Hook features our Magic Eye Swivel for fast and easy attachment to the split ring on any jig. No pliers needed. 90lb. wire and a 4x Strong Straight Eye Octopus hook make this the ultimate big game, toothy fish Assist hook. Comes in a 3/0 short version and 5/0 long version for bigger jigs.

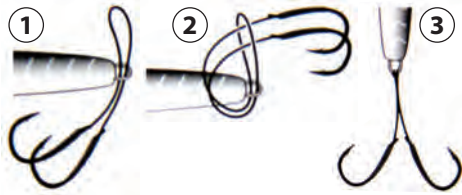

Double Assist 520

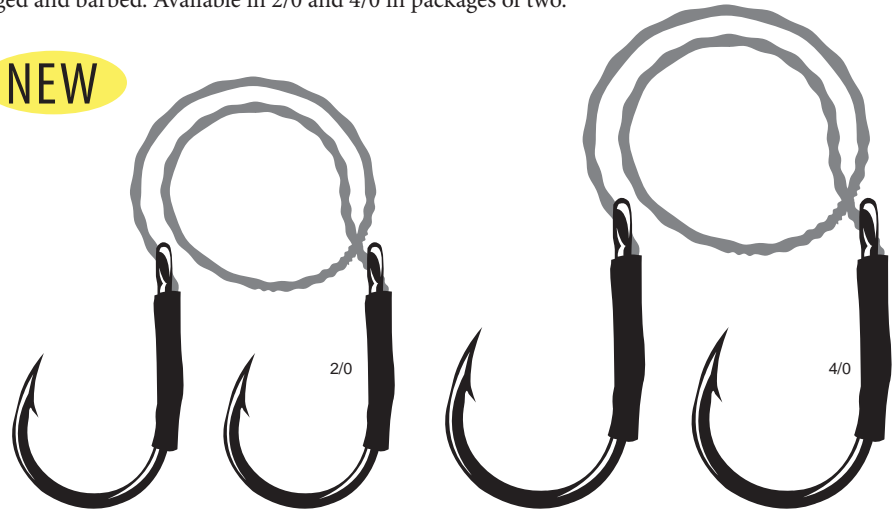

SIZES	2/0	4/0
TIN	LS 368512(2)	368514(2)

New vertical jigging techniques like “slow pitch” and “shore” jigging are gaining attention at a rapid rate. Many of the top anglers are using two assist hooks instead of one. Think about it, you’re doubling your odds of hooking short or soft biters. Gamakatsu’s Double Assist hooks are designed for fast and easy replacement on all types of butterfly, flat fall and “iron” jigs. The 6” super strong braided line loop can be adjusted to position each hook at the exact desired length, even or offset. Red heat shrink tubing on the hook shank is an added attractor and prevents chafing and bite-offs. And there’s no concern of knots coming undone. Hooks are forged and barbed. Available in 2/0 and 4/0 in packages of two.

NEW

Big Eye Circle **TOURNAMENT LEGAL**

SIZES	6/0	7/0	8/0	9/0	10/0	11/0	12/0
TIN	LS 12050(5)	12051(4)	12052(4)	12053(3)	12054(3)	12055(2)	12056(2)

Our standard circle hook designed with a big eye for rigging heavier monos or dacrons. Also good for chunking for tuna and halibut.

Single 510

SIZES	1	1/0	2/0	3/0	4/0	
Tin	LS	232510(6)	232511(5)	232512(5)	232513(4)	232514(4)
Tin	25 pk	232510-25	232511-25	232512-25	232513-25	232514-25

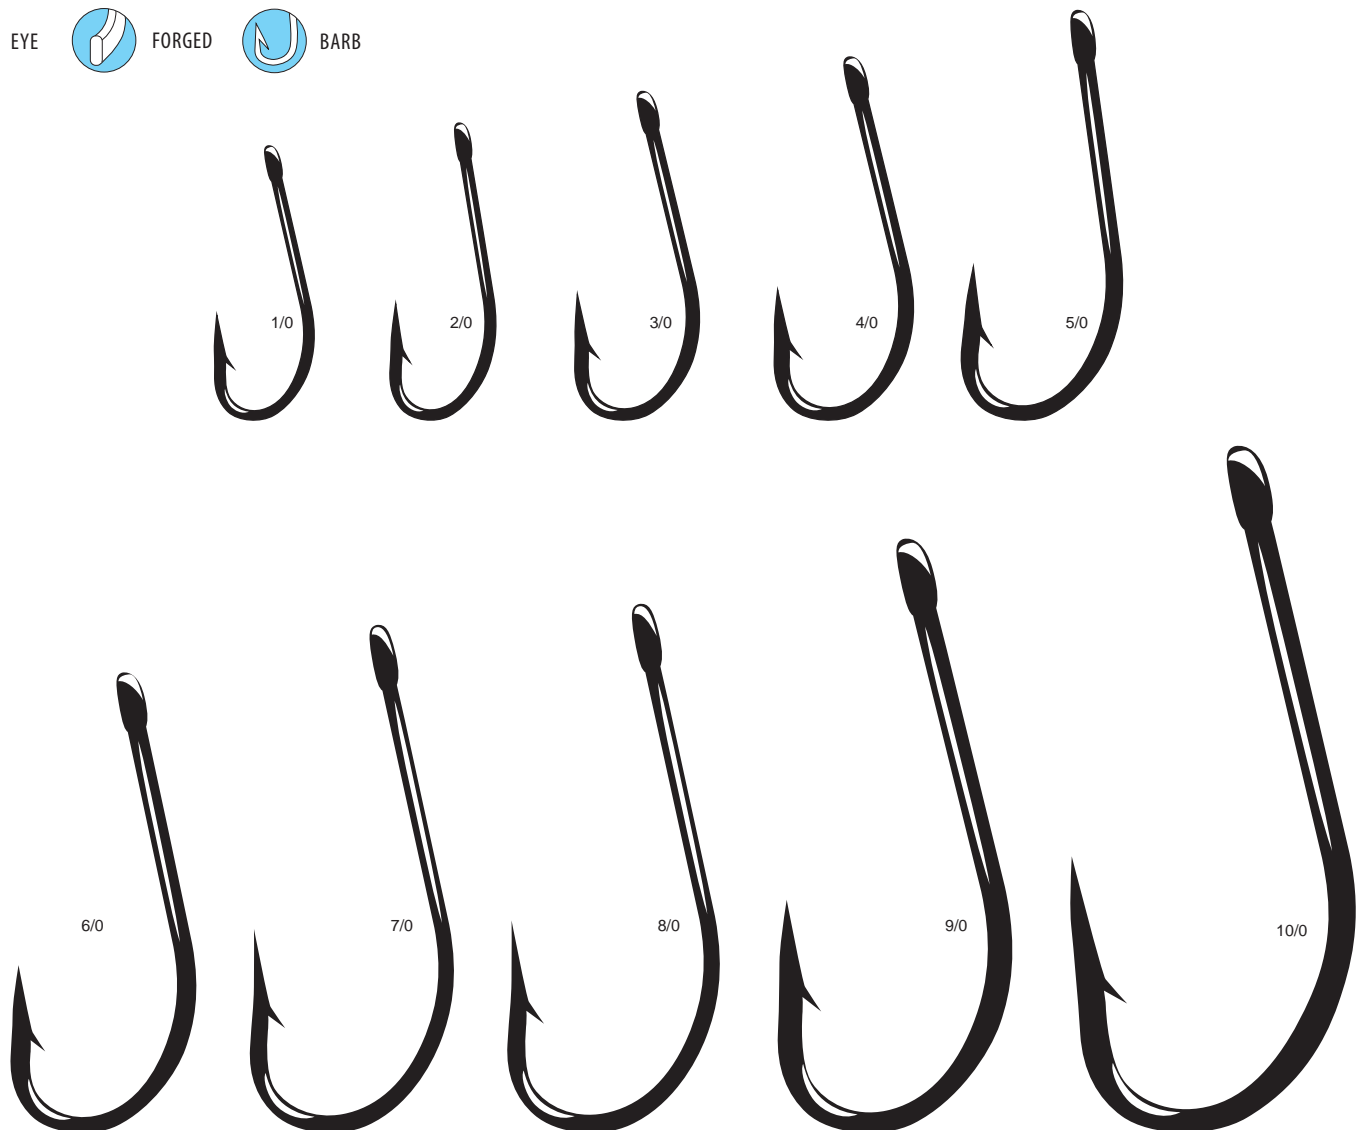

Single 510 has an open eye so it can be used as a replacement hook for spoons, plugs and other lures. It features a sticky sharp curved point with an out barb for fast penetration and secure hook ups.

O'Shaughnessy

SIZES	1/0	2/0	3/0	4/0	5/0	6/0	7/0	8/0	9/0	10/0
Tin	13011(6)	13012(5)	13013(5)	13014(4)	13015(4)	13016(3)	13017(3)	13018(2)	13019(2)	13020(2)

Traditional saltwater style for trolling or general purpose bait fishing.

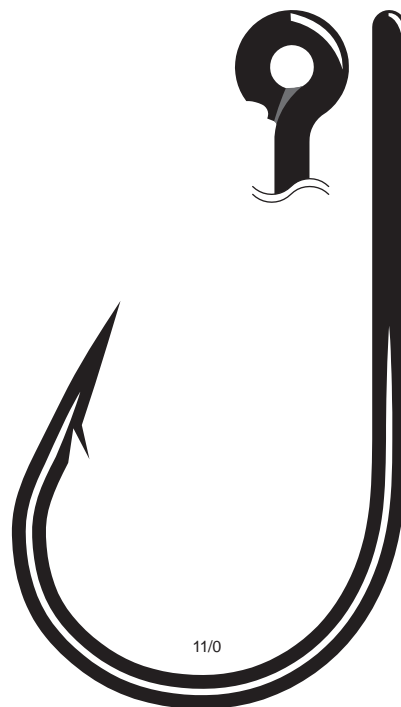

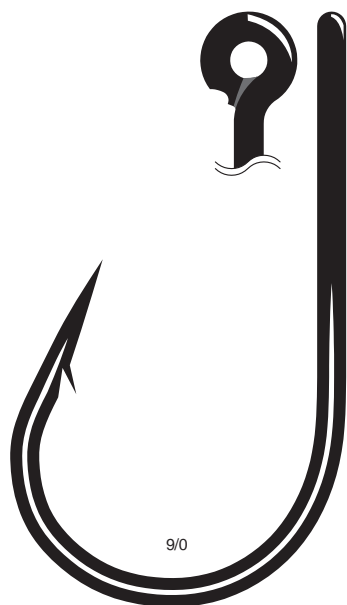

Tuned Tuna With Welded Eye

SIZES	8/0	9/0	10/0	11/0
TIN	LS 369018(3)	369019(3)	369020(2)	369021(2)

A great hook for Stiff Rigs and other trolling applications. The forged needle point helps ensure a solid hook set. New welded eye will not open or flex.

NEW

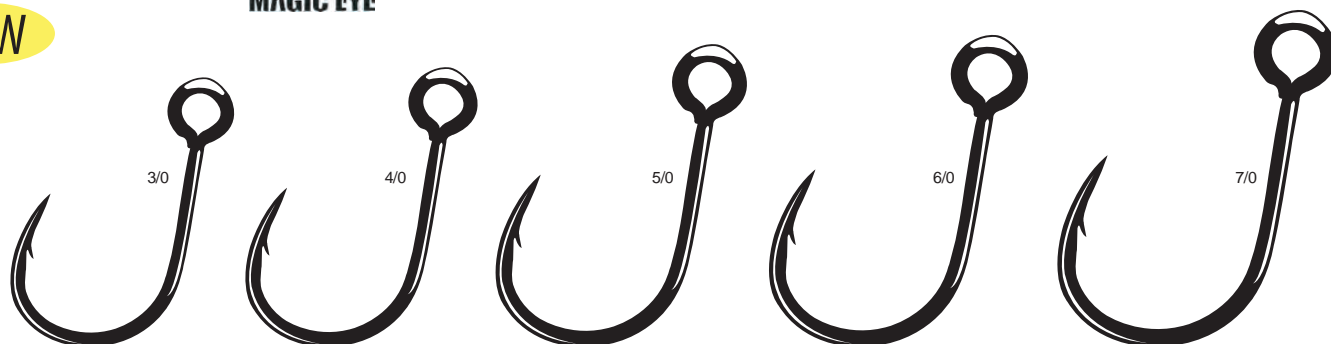

Magic Eye Tuna Plug 3X

SIZES	3/0	4/0	5/0	6/0	7/0
TIN	LS 365513(5)	365514(5)	365515(5)	365516(4)	365517(4)

NEW

You've likely heard about the advantages of using tandem Gamakatsu double, single-point hooks instead of factory trebles on your favorite tuna plugs. Hookup ratios increase and releases are far kinder to our finned friends. Magic Eye Tuna Plug 3X Hooks make rigging the system dramatically easier because the hook eyes are beveled so they slide right on a split ring without needing special pliers or tools. It's faster, easier and foolproof. Attach with hook points opposed.

Two hook rig with adjustable top hook. Includes glowbead and tube.

Treble Stinger Rig

Hook Size	12	10	8	6
Ns Black	364404(3)	364405(3)	364406(3)	364407(3)

It's widely known that trailing stinger rigs are the ticket for catching short-biting walleyes when jigging in cold water conditions. For years, seasoned anglers have painstakingly tied their own stinger rigs using premium Gamakatsu hooks. Now, we've done all the work for you. Gamakatsu Treble Hook Stinger Rigs are 100% ready to use and will outlast most others on the market. A coated steel wire is machine crimped and then dipped in a durable rubberized coating; allowing it to hang perfectly behind your jig or bait. And since they're connected to a premium Gamakatsu treble hook, they'll stay sticky sharp, fish after fish, after fish. Save time. Save money. Keep fishing longer with Gamakatsu Treble Hook Stinger Rigs.

EWG Walleye Snell

As barbless hook regulations expand, Gamakatsu has met the challenge with a better designed, sharper and stronger Barbless Octopus hook. Designed expressly for the application, Gamakatsu's Barbless Octopus hooks feature a slightly wider gap that provides better fish-holding benefits than traditional barbed Octopus hooks. These hooks comply with state regulations requiring "barbless hooks". Proven effective for a variety of species, Gamakatsu's Barbless hooks are now available in pre-tied mooching rigs. Tied on premium monofilament line with 6 foot leaders, Gamakatsu Barbless Mooching Rigs are packaged individually.

Sockeye Rig

NEW

Hook Size	Line (lb)	Stock #
3/0 Chartreuse	30	372313-C-30(3)
3/0 Flame Red	30	372313-FR-30(3)

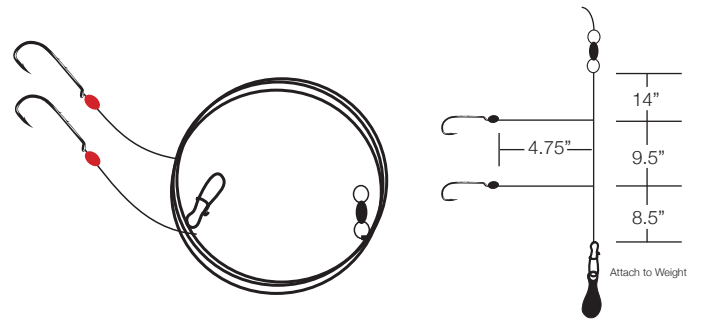

When the sockeye start running, you better be ready to get in the game fast. With our Sockeye Rigs, you are geared up in seconds. Tied on 30 lbs. leaders with sticky sharp 3/0 red Octopus hooks, available in 2 colors - chartreuse or flame red. Nothing is easier or faster, except maybe your limit. We've done the work for you to maximize your time on the water.

Top And Bottom Rig

Hook Size	Line (lb)	Stock #
2	30	238409(1)

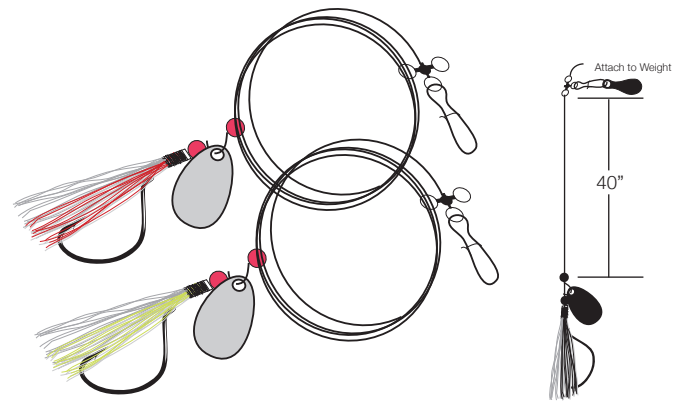

Designed primarily for bottom fishing, this rig uses two size 2 NS Black Baitholder hooks attached to a 40lb. leader so they stick out about 4" from the main line and are spaced about 10" apart. It includes a barrel swivel at the top of the rig and a cross lock for easy weight attachment at the bottom.

Fluke Rig With Teaser

Hook Size	Line (lb)	Stock #
2/0 White/Red	40	239412-RW(1)
2/0 White/Chartreuse	40	239412-CW(1)

Two different color combination fluke rigs available in a size 2/0 hooks with a 40 lb. leader. The Fluke Rigs feature a spinner blade and a teaser made with synthetic hair material that is more tooth resistant and durable in saltwater. The teasers are in either red and white or a chartreuse and white combination with either red or green beads to match. They also feature a 3 way swivel with a crosslock to attach the weight.

Russian River Sockeye Rig

Hook Size	Line (lb)	Stock #
2 White/Red	30	285109-WR-30(3)
2 White/Chartreuse	30	285109-WC-30(3)

Tied on 34" of 30 lb. mono with our popular Russian River hook, it's available in two color combinations, red and white, or chartreuse and white.

Striper Rig

Hook Sizes	4/0	5/0	6/0	7/0	8/0
NS Black	305414-40(2)	305415-40(2)	305416-40(2)	305417-40(2)	305418-40(2)

Striper fishermen are a demanding group. Striper anglers have asked for a dependable pre-tied rig to meet their needs and Gamakatsu has answered.

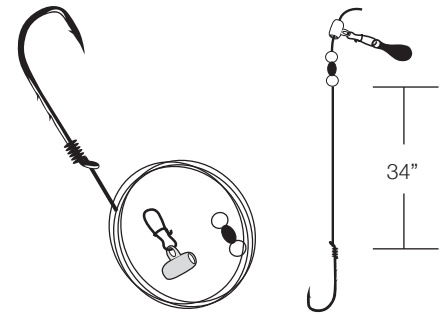

The Striper Rig features a proven Octopus hook, tied on 28" of premium 40 lb. monofilament. The rig also includes a high quality #4 SPRO barrel swivel rated at 130 lb. This rig is sure to give any striper fisherman the confidence they need to catch that trophy of a lifetime.

Striper Rig With Sliding Sinker Lock

Hook Size	Line (lb)	Stock #
5/0	80	241415(2)

This rig features a 5/0 NS Black Baitholder hook snelled to a 80 lb. clear leader with a 100 lb. barrel swivel and a sliding sinker lock that goes on the main line above the swivel.

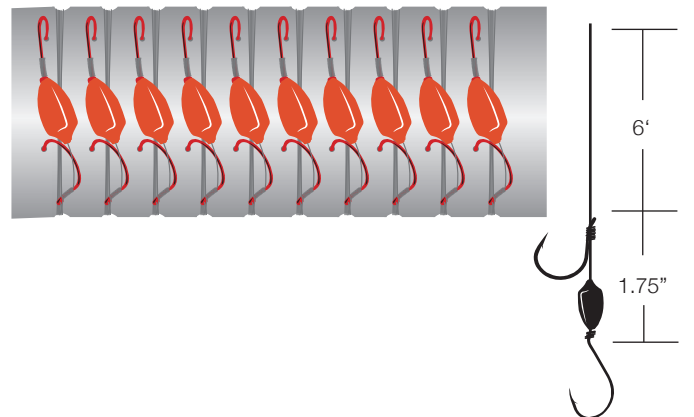

Side Drifting Rig

Hook Size	Line (lb)	Stock #
4 Peach Luminous	8	259308-PL(10)
4 Clown	8	259308-C(10)
4 Orange Clown	8	259308-OC(10)
4 Pearl Red	8	259308-PR(10)

Peach Luminous
Clown
Orange Clown
Pearl Red

Rigged with two of our most proven hooks, a size 4 Red Finesse Wide Gap in front and size 4 Red Octopus hook in back with a Yakima Bait "Winner Body" in the middle for floatation and added attraction. Ten rigs come pre-tied on 6ft of clear premium 8lb. mono neatly wrapped around a 6 inch closed cell foam dispenser. They come in 4 of the most popular fish catching colors, PR-Pearl Red, PL-Peach Luminous, C-Clown, and OC-Orange Clown.

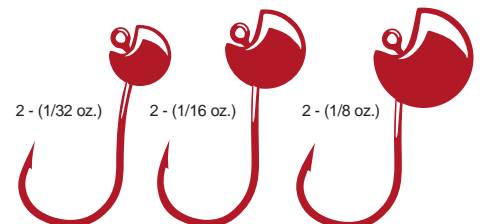

Wacky Head

SIZES	2	2	2
WEIGHT	LS 1/32	1/16	1/8
	282309-1/32(4)	282309-1/16(4)	282309-1/8(4)

Gamakatsu is known for its innovative and functional designs, the "Wacky Head" jig is no exception. With its unique flat shape, the "Wacky Head" will entice the finickiest of biters with its side to side rolling type action. Also to add to its attraction is the red epoxy head, and a short shank wide gap designed hook.

Skip Gap Head

Looking for the quintessential stand-up jig head? Gamakatsu's developed the answer with its all-new Stand-Up Alien Head. Perfect for rock or hard bottom fishing, The innovative keeper pin holds plastics without tearing. The benefit is a better presentation, more casts and more mileage out of your plastics. Features a NS Black finesse hook and is available in Green Pumpkin and Black jig heads.

SuperLine

Until now, you simply couldn't find a premium, swim bait jig head with a premium Gamakatsu hook. The new Superline Swim Bait Head changes all that. The head profile is streamlined for a natural action. Choose premium painted heads or unpainted for anglers that prefer a do-it-yourself custom look. A heavy wire, 60-degree Superline hook performs optimally with braided line and heavy monofilament. Completing the package, The Spring Lock keeper holds all soft plastic swim baits secure and tight.

WEIGHT LS	1/32	1/16	1/8
	501410-1/32(5)	501410-1/16(5)	501410-1/8(5)

A totally unique design with a short shank and a matte black beak point. Great for live and finesse baits.

Finesse Jig Head

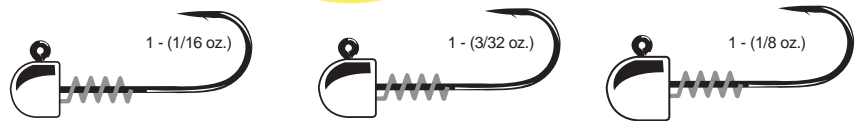

SIZES	1	1	1
WEIGHT LS	1/16	3/32	1/8
	506410-1/16(4)	506410-3/32(4)	506410-1/8(4)

When new tournament techniques emerge, our pro-staff are usually holding the rod. Case in point, the new Finesse Jig Head is designed to optimize the "Ned Rig." It's all about precise positioning of small soft plastics in a manner that translates into that slow, gliding fall that big bass can't resist. The spring keeper and light wire #1 hook are critical features. Lead heads are unpainted allowing for easy customization.

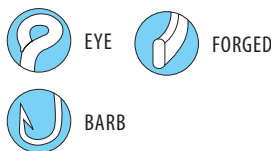

NEW

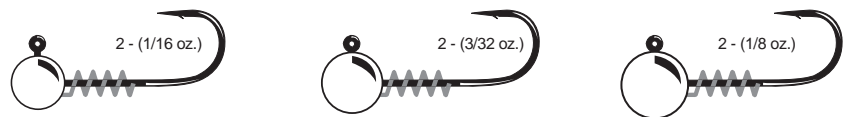

Crappie Jig Head

SIZES	2	2	2
WEIGHT LS	1/16	3/32	1/8
	507409-1/16(5)	507409-3/32(5)	507409-1/8(5)

Designed for tournament focused crappie anglers. This premium design, specialized Crappie Jig Head, features a sticky sharp Gamakatsu hook fully molded through the lead head. The smooth eye won't burr even the lightest line. A heavy-duty spring lock keeper encircles the shank for nearly half its length. Soft plastics won't move a millimeter with this innovation. #2 light wire jig hooks in NS black.

NEW

GAMAKATSU®

Fly Hooks

Gamakatsu has been making premium quality hooks since 1955. Every hook is made using Gamakatsu's own high quality, high carbon steel and is meticulously crafted to the highest of standards. Unlike other hook manufacturers, Gamakatsu hooks are made in their own facility which is one of the most technologically advanced in the world and their consistency is unmatched. What you'll find in this catalog are 34 styles of super sharp, super strong fly hooks made for the serious fly tyer and fly angler who will settle for nothing but the best. While an investment in a good fly rod, fly reel, fly line and the knowledge on how to properly use them can enhance the fly fishing experience, the hook is the one piece of equipment at the end of it all that has to hang on to the object of pursuit. Don't settle for anything less than Gamakatsu quality.

The Executive Series

Executive Series fly hooks offer some very unique designs like the R10B Retainer Bend and the C13U Keel Balance. Hooks like the S10 series of hooks have beak points that allow for effortless penetration, especially with light tippets and a slightly wider gap. They also have a shank length just a little longer than standard dry fly hooks. While the R10B and C13U are matte black, the B10S Stinger hooks and the rest of the Executive series have a beautiful NS Black finish that not only looks good, but is also very corrosion resistant. There's no other hook series like it.

Traditional Series

The Traditional Series hooks are mostly all bronze finished, have needle points, and are designed to match up in style and size with other popular hook brands. The key difference being the quality of the steel used in them and the sharpness of the hook. The Traditional Series hooks also feature the traditional Salmon/Steelhead tapered loop up eye hooks, but in non-traditional finishes like Red in addition to the traditional NS Black finish. The styles all match, but the quality is unmatched.

Saltwater Series

By far and away the finest selection of Saltwater fly hooks available. 9 styles featuring our most popular SC15 and other hooks ranging in sizes from 18 to 10/0. The SC15 is used for many different patterns but is also a great hook for tube flies. The SP11-3L3H makes a great popper hook. There's a hook style for every saltwater application imaginable. Every Saltwater Series fly hook is made from the highest quality high carbon steel and has a durable tin plating or NS black finish for corrosion resistance. Because of the steel used, even the 3x strong hooks are surprisingly light for their size and their strength is unparalleled. These hooks will hold a point much better than stainless steel hooks and are sticky sharp right out of the bag. No sharpening is ever needed before fishing with a Gamakatsu hook and because they're not stainless, they will eventually corrode out of a fish's mouth if the hook is taken deep and cannot be removed. From the flats to blue water, there's no hook selection better than this.

Executive Series

"The most advanced fly hook available"

- Corrosion Resistant N.S. Black Finish
- Beak Points

Gamakatsu Luxxe fishing line

A PE based filament, that is much stronger than classic braided line.

It is a 4 strand braided line, along with the PE fibers makes it more abrasion resistant and has less memory. In turn the benefits are less tangles, and better casting distances.

Available in the following test # 8, 10, 12, 14, 16.

TEST#	8	10	12	14	16
164 YD Spool	19511-08	19511-10	19511-12	19511-14	19511-16

Gamakatsu Finger Protector

Protects your finger from the abuse of stripping line all day.
One size - GF003(1)

Gamakatsu Aluminum Heavy Duty Pliers

5 x Heavy P001(1)
