BETTER SOLUTIONS FOR SAFETY AT SEA

LIFEBUOY RELEASE SYSTEM

– A SAFE AND QUICK WAY TO SAVE LIVES

The time it takes to launch a lifebuoy can be the difference between life and death, when someone falls overboard from a ship or vessel. The Hammar Lifebuoy Release System can be released quickly and safely from any point onboard.

Most lifebuoys are installed in a holder on the bridge wing or a similarly remote location, to which access may take time. The Hammar Lifebuoy Release System is a complete, easy-to-fit package for the rapid launch of lifebuoys onboard a ship. It fits ships, vessels and workboats of all types. There is one version for electronic remote release as well as one for manual release. When the system is activated, a stainless steel lever is

removed by a strong spring in order to ensure the safe, rapid deployment of the system. The GRP holder is double-sided and can therefore be mounted on either the starboard or port side.

For a ship yard, the system offers easy installation and trouble-free sourcing, as all parts are delivered in a complete package. The system is cost-effective, not only because it saves time but, more importantly, it may even save lives.

Special features:

- Safe and quick operation to save lives
- Electric activation from the bridge
- One complete package
- Easy and quick installation onboard
- Economical solution

HOW DOES IT WORK?

Using the Hammar Lifebuoy Release system is easy. Just push the button, the ERU activates and the stainless steel lever is removed by a strong spring in order to ensure the safe, rapid deployment of the system.

The Hammar Lifebuoy System Mk II consists of:

- GRP holder with metal spring holder and manual backup
- Hammar ERRS remote activation package

MOB signal can be mounted. When mounting, please follow the mounting instructions from the MOB manufacturer.

LIFEBUOY SYSTEM COMPONENTS

Part no. HM-0600

Lifbuoy System Mk II complete package for electric remote release

- GRP holder with pre-installed metal holder and bracket
- ERU (electric remote unit) with cord pre-installed on metal holder
- Release switch
- Connector box
- 20m cable from connector box to release switch, screened 2 x 0.75 mm², diameter 8 mm
- Manual safety pin
- Pilot line for loading the lifbuoy
- Installation manual
- User Guide
- Marking instruction

Not supplied in the kit from CM Hammar: Lifbuoy, mounting bolts for the installation onboard.

Part no. HM-0610

Lifbuoy System Mk II complete package for manual release only

- GRP holder, metal spring holder, manual safety pin, release cord and installation manual in English.

Not supplied in the kit from CM Hammar: Lifbuoy, mounting bolts for the installation onboard.

SPARE PARTS
