

Warm White EuroLED 75 LED Down Lights

Series: EuroLED 75

Stylish, reliable and energy efficient, these lamps will provide excellent illumination to enhance interior and exterior spaces.

The EuroLED 75 uses a highly efficient optical system that produces a very wide and even illumination that is specifically designed to reduce individual light source glare, which can lead to discomfort and eye strain.

This precision optic, coupled with the latest LED technology delivers exceptional colour rendering, reproducing colours in their natural richness. The EuroLED 75 replicates the pleasing appearance of a traditional round lamp but contains all the advantages of a high efficacy, durable solid state light - giving you the best of both worlds.

EuroLED 75 is available in warm or neutral white which will beautifully enhance the materials chosen for your vessel. Screw or spring mount options, pre-wired and sized for a standard cut out make new or refit installation a breeze.

Hella marine EuroLED lamps are completely sealed and manufactured using the highest grade materials that will not corrode, fade or embrittle in the harsh marine environment. Innovative, ceramic based thermally conductive materials dissipate heat generated by the LED's, thereby extending the life of the luminaire, whilst being completely corrosion free. This means you can use the same light fittings for both the interior and exterior to create a clean and consistent lighting plan.

Like all Hella marine LED lamps the EuroLED 75 is supported by a 5 year warranty for complete peace of mind.

CE

Explanations

Electromagnetic Compatibility (EMC) All Hella marine LED products are electronic devices. Their electrical circuits contain components that suppress possible interference, both emission as well as susceptibility to emissions, to the limits prescribed in international standards.

IP 67- Completely Sealed. Each Hella marine LED lamp is a completely sealed opto-electronic device. Proven design, precision engineering. and the use of high impact acrylic and polymer materials ensures superior resistance to water, impact and UV damage

Light Emitting Diode

12V DC Dimmable via Hella marine Dimmer 5XA 998 572-001

24V DC Dimmable via Hella marine dimmer 5XA 998 572-001

UV Resistant. Proven design, precision engineering and the use of high quality materials ensures superior resistance to water, impact, UV and general wear and tear

All LED based lighting products manufactured by Hella marine carry a 5 Year Warranty covering faults in material. components or workmanship

2 NM Visibility

Complying with IMO ColReg 72.

Complies with USCG (United States Coast Guard) requirements.

Complies with ABYC (American Boat and Yacht Council) Navigation Lamp Standard A-16

Maritime New Zealand Certified

This product comes with a 1 year manufacturers warranty

Approved by the Italian RINA (Registro Italiano Navale) authority Approved lamps carry a RINA type approval number

Designed specifically for European waters these lamps approved by the German BSH-Cert at Bundesamt für Seeschifffahrt und Hydrographie (Federal Maritime and Hydrographic Agency) and carry BSH type approval numbers. BSH was formerly called DHI (Deutsches Hydrographisches Institut).

12 & 24V DC Multivolt. This product is designed for operation on 12V and 24V systems.

High-tech Grilamid lens for superior strength in extreme conditions.

Small craft - Electrical devices Protection against ignition of surrounding flammable gases.

IP 6K9K - Completely Sealed. Each Hella marine LED lamp is a completely sealed opto-electronic device. Proven design, precision engineering, and the use of high impact acrylic and polymer materials ensures superior resistance to water, impact and UV damage

Approved under the Marine Equipment Directive (MED) 96/98/EC by BSH-Cert for use throughout Europe in all EC member states for both pleasure and commercial vessels. These lamps carry the Wheelmark approval symbol.

Suitable for vessels compliant with RCD (Recreational Crafts and Personal Watercraft Directive) 2013/53/EU. RCD promotes a single set of EU safety and technical requirements for new recreational vessels less than 24m in length within the European Community

High-tech Grilamid lens for superior strength in extreme conditions
