Vision and Innovation

Sea Hawk XL Dual Colour LED Floodlights

Series: Sea Hawk-XL

Professional sports fisherman, commercial operators, and ocean racers all recognise the 'non-glare' night vision preservation advantages of red lighting.

Two rows of bright white light is ideal when working, docking or landing the big one while the third row of secondary colour adds versatility. Red is perfect for preserving your night vision, blue is popular when added bling or a point of difference is needed, while warm white creates added comfort when you want to relax or match the rest of your interior lighting.

The new Sea Hawk-XL continues using the latest Hi-Tech materials. A heavy duty Grilamid lens provides exceptional impact resistance. The unique ceramic thermal polymer housing distributes heat away from internal components and avoids potential corrosion issues associated with metal housings.

Multivolt™ circuitry provides constant illumination and circuit protection from 9-33V DC, even under severe voltage fluctuations. Sea Hawk-XL lamps are prewired with three core marine cable and completely sealed for reliable operation in exterior applications.

Hella marine Sea Hawk lamps offer class-leading energy efficiency, unmatched durability and are supported with a 5-year warranty for a total 'fit and forget' solution and complete peace of mind.

Explanations

Electromagnetic Compatibility (EMC) All Hella marine LED products are electronic devices. Their electrical circuits contain components that suppress possible interference, both emission as well as susceptibility to emissions, to the limits prescribed in international standards.

IP 67- Completely Sealed. Each Hella marine LED lamp is a completely sealed opto-electronic device. Proven design, precision engineering. and the use of high impact acrylic and polymer materials ensures superior resistance to water, impact and UV damage

Light Emitting Diode

12V DC Dimmable via Hella marine Dimmer 5XA 998 572-001

24V DC Dimmable via Hella marine dimmer 5XA 998 572-001

UV Resistant. Proven design, precision engineering and the use of high quality materials ensures superior resistance to water, impact, UV and general wear and tear

All LED based lighting products manufactured by Hella marine carry a 5 Year Warranty covering faults in material. components or workmanship

2 NM Visibility

Complying with IMO ColReg 72.

Complies with USCG (United States Coast Guard) requirements.

Complies with ABYC (American Boat and Yacht Council) Navigation Lamp Standard A-16

Maritime New Zealand Certified

This product comes with a 1 year manufacturers warranty

Approved by the Italian RINA (Registro Italiano Navale) authority Approved lamps carry a RINA type approval number

Designed specifically for European waters these lamps approved by the German BSH-Cert at Bundesamt für Seeschifffahrt und Hydrographie (Federal Maritime and Hydrographic Agency) and carry BSH type approval numbers. BSH was formerly called DHI (Deutsches Hydrographisches Institut).

12 & 24V DC Multivolt. This product is designed for operation on 12V and 24V systems.

High-tech Grilamid lens for superior strength in extreme conditions.

Small craft - Electrical devices Protection against ignition of surrounding flammable gases.

IP 6K9K - Completely Sealed. Each Hella marine LED lamp is a completely sealed opto-electronic device. Proven design, precision engineering, and the use of high impact acrylic and polymer materials ensures superior resistance to water, impact and UV damage

Approved under the Marine Equipment Directive (MED) 96/98/EC by BSH-Cert for use throughout Europe in all EC member states for both pleasure and commercial vessels. These lamps carry the Wheelmark approval symbol.

Suitable for vessels compliant with RCD (Recreational Crafts and Personal Watercraft Directive) 2013/53/EU. RCD promotes a single set of EU safety and technical requirements for new recreational vessels less than 24m in length within the European Community

High-tech Grilamid lens for superior strength in extreme conditions
