75' Expandable Hose Kit

Part# HCE75K

Expandable hose with rubber tip spray nozzle and storage bag

Includes nylon & mesh storage bag

New Packaging
• Environmentally friendly
• Ships efficiently

The Expandable Hose shrinks to 1/3rd of its usable length for ease of stowage. It is built with double-layered rubber inner tube and durable Dacron outer cover. Dacron is known for its tough and abrasion resistant properties. The Expandable Hose easily coils and feels just like a quality 3/4" braided dock line. The kit includes a two-tone nylon & mesh bag and spray nozzle. The nozzle has an adjustable rubber spray tip, trigger handle and rubber over-molded comfort grip.

HoseCoil

Canvas Bucket Kit with Expandable Hose

NEW

The Expandable Hose shrinks to 1/3rd of its length for ease of storage and is built with double-layered rubber inner tube and durable Dacron outer cover. Dacron is known for its tough and abrasion resistant properties. The Expandable Hose easily coils and feels just like a quality 3/4" braided dock line. The kit includes a heavy duty Canvas Bucket, Rubber Tip Nozzle with comfort grip and Quick Release for fast hose removal.

Includes

- 75' Expandable Hose stows easily, built with a durable Dacron cover
- Quick Release for fast hose removal
- Rubber Tip Nozzle with comfort grip
- Heavy Duty Canvas Bucket

Part# HCE75CB
Canvas Bucket with 75' Blue Expandable Hose, Rubber Tip Nozzle and Quick Release

HoseCoil

HoseCoil PRO - Heavy Duty, 1/2" ID, 4.75" Diameter

15'

15' HoseCoil PRO
Part# HCP1500HP
Heavy Duty 1/2" ID HoseCoil

20'

20' HoseCoil PRO
Part# HCP2000HP
Heavy Duty 1/2" ID HoseCoil

25'

25' HoseCoil PRO
Part# HCP2500HP
Heavy Duty 1/2" ID HoseCoil

The 1/2" ID HoseCoil PRO provides a 30% increase in flow rate over 3/8" ID. HoseCoil PRO features a large 4.75" coil for better ease of handling and dual strain reliefs to reduce kinking. The HoseCoil PRO is not only larger in size, it is made with much thicker material for added strength and durability. Built with 3/4" garden style fittings, it fits all standard US hose connections.

HP
Polyether

Product is built with HoseCoil's new top of the line, high performance Polyether material.

15' HoseCoil
Part# HS1500HP
Medium duty 3/8" ID HoseCoil

25'

25' HoseCoil
Part# HS2500HP
Medium duty 3/8" ID HoseCoil

The easy to use, self storing 3/8" ID HoseCoil are made of top-of-the-line, high performance Polyether material. Single strain relief for reduced kinking. Built with 3/4" garden style fittings, it fits all standard US hose connections.

HP
Polyether

Product is built with HoseCoil's new top of the line, high performance Polyether material.

External Hose

Through Bulkhead

HoseCoil Gen3 Thermoforming

Gen3 Material Enhancements - A thicker gauge material that improves strength and provides better structural rigidity is now used. It is a custom co-extruded Acrylic-capped ABS sheet stock that we have specially made for us. The excellent UV stability of the Acrylic is combined with the durability of the ABS. The Acrylic cap protects the ABS from UV and its potentially damaging effects on plastic. We want to make sure that we use only the best material while producing a HoseCoil Enclosure for you. We thermoform HoseCoil Enclosures because it's the best way to produce a product with excellent high gloss retention.

Nickel Chrome-Plated Stainless Steel Screws - We use all 316 stainless steel hardware that is supplied with each enclosure. For Gen3 HoseCoil Enclosures we provide nickel chrome-plated stainless steel tamperproof screws for security combined with a long lasting shine.

Reconfigurable Shutoff Valve - For a clean installation we recommend mounting through the bulkhead to cleanly connect to a designated washdown pump or into the boat's fresh water plumbing system below decks. The valve can also be reconfigured to exit the bottom of the enclosure. This will allow convenient access to an external spigot in the cockpit. A feeder hose to connect the Shutoff Valve to the external spigot is not included. The shutoff component is important for two reasons. First, water pressure needs to be removed from the expandable hose in order for the hose to shrink to its original size before it can be stowed back into the enclosure. Secondly, it is important to have a physical shutoff for source water when not plumbing to a designated washdown pump with its own electrical shutoff switch. In the event you would like to remove or replace the hose, simply turn the switch on the valve and unscrew the hose from the fitting.

HoseCoil

Side Mount Expandable - 25'

25'

**Side Mount Expandable
with 25' Expandable
Hose Kit**

Part# HCE25SW-BLUE

The Side Mount Expandable is a great way to mount and store a 25' hose on your boat for cockpit washdown. This enclosure includes a 25' Expandable Hose with nozzle designed to connect directly to your existing pressurized water system or raw water washdown pump.

NEW

Side Mount Expandable - 50'

50'

**Side Mount Expandable
with 50' Expandable
Hose Kit**

Part# HCE50SW-BLUE

The Side Mount Expandable is a great way to mount and store a 50' hose on your boat for full boat washdown. This enclosure includes a 50' Expandable Hose with nozzle designed to connect directly to your existing pressurized water system or raw water washdown pump.

Side Mount Enclosure

Side Mount Enclosure
Part # HC15S

The Side Mount Enclosure is popular for mounting a 15' HoseCoil in the cockpit. This enclosure includes a 3/8" ID 15' HoseCoil with a nozzle and hardware to connect directly to your existing pressurized water system or raw water washdown pump.

Dimensions - 8"w x 15"h x 5"d

Horizontal Mount Enclosure

Horizontal Mount Enclosure
Part # HC25H2

The Horizontal Mount Enclosure is constructed of durable, high density ABS. The enclosure includes a 3/8" ID 25' HoseCoil and nozzle which can be plumbed directly into your existing pressurized water system or raw water washdown pump. Also includes a 5' feeder hose for connecting to an external water spigot.

Dimensions - 20.5"w x 9.5"h x 5"d

Product is built with HoseCoil's new top of the line, high performance Polyether material.

Flush Mount Enclosure

Flush Mount Enclosure
Part # HC15F

The Flush Mount Enclosure is designed to mount into the deck or bulkhead. The enclosure is supplied with hardware that will allow you to connect to the boat's pressurized water system or washdown pump. The Flush Mount Enclosure has a clear housing for easy inspection and a brass fitting on the bottom for attachment of a drainage hose. Includes a 3/8" ID 15" HoseCoil.

Dimensions - 8" diameter x 13" depth

Requires a 6 3/4" cut out and 13" below deck clearance.

PETG housing material

- Extremely durable
- See-through for easy inspection

15' High Performance HoseCoil

- Highest quality Polyether material
- UV resistant
- Quick recoil for easy storage
- Brass, long-life fittings

Tight O-ring Seal

- High quality seal for tight fit

Polyethylene Lid

- Easy-to-use locking latch

Brass Twist Nozzle

- Positive shutoff
- Variable flow rate
- Rubber tip for protection

Brass Bulkhead Inlet Fittings

- 3/8" diameter for better flow rate
- 3/8" fitting

Product is built with HoseCoil's new top of the line, high performance Polyether material.
