

## ACCESSORY RESOURCE GUIDE

ACCESSORY RESOURCE  
GUIDE 12.15.2020

---

**Transducers**

Transom Transducers.....	3-6
In-Hull Transducers. ....	6-7
Trolling Motor Transducers.....	7-11
Portable Transducers.....	11
S.S & Bronze Thru Hull Transducers.....	11-12
Plastic Thru Hull Transducers.....	12-14
Ice Transducers. ....	14
Trolling Motor Transducer Kit.....	15

**Mounts, Hardware, Sensors**

Transom Mounting Hardware & Adapters	16
Portable Mounting Hardware .....	16
In-Dash Mounts.....	17-19
Mounting Hardware .....	19-20
Temperature and Speed Sensors.....	21

**Cables**

Extension Cables.....	21-22
Power Cables.....	22-23
Transducer Adapter Cables.....	24-25
Ethernet Cables.....	25-27

**Other Accessories and Systems**

MEGA 360 Imaging.....	28-30
Advanced Fishing Systems.....	30-34
Unit Covers.....	34-36
Portable Configurations.....	36
Ice Accessories.....	36-37
Autopilot and Accessories.....	37-39
RADAR.....	39

TRANSOM TRANSDUCERS – 2D Sonar	Item Number	Description	Compatible Units
 <p>XNT 9 HW T</p>	710274-1	Transom mount Dual Spectrum CHIRP Transducer with temperature sensor and 20' cable	<ul style="list-style-type: none"> <li>• All HELIX models with CHIRP <ul style="list-style-type: none"> <li>○ G2 / G2N and newer models</li> </ul> </li> <li>• All ICE HELIX models with CHIRP <ul style="list-style-type: none"> <li>○ G2/G2N and newer models</li> </ul> </li> </ul>
 <p>XNT 14 HW T</p>	710285-1	Transom mount Dual Spectrum CHIRP transducer with temperature sensor and 20' cable	<ul style="list-style-type: none"> <li>• APEX 13 / 16 / 19 Series <ul style="list-style-type: none"> <li>○ All Models</li> </ul> </li> <li>• SOLIX 10 / 12 / 15 Series <ul style="list-style-type: none"> <li>○ All G2 / G3 Models</li> </ul> </li> </ul>
 <p>XNT 9 20 T</p>	710198-1	Transom Mount Single/Dual Beam 20/60 Degree 200/83kHz Temperature Sensor	<ul style="list-style-type: none"> <li>• All 100, 300, 500, 600, 700, 800, 900, 1100 except DI models</li> <li>• All HELIX Series except DI models</li> </ul>
 <p>XNT 9 28 T</p>	710236-1	Transom mount Dual Beam, 28/16 Degree, 200/455kHz, Temp	<ul style="list-style-type: none"> <li>• PiranhaMAX 4 and PiranhaMAX 4 PT</li> </ul>
 <p>XNT 9 DB 74 T</p>	710237-1	Transom mount Dual Beam, 20/74 Degrees, 200/50 kHz with built in temp for use with extended depth models	<ul style="list-style-type: none"> <li>• 1159ci HD XD Combo</li> <li>• 859ci HD XD Combo</li> <li>• 678c HD XD</li> <li>• 688ci HD XD Combo</li> <li>• 959ci HD XD Combo</li> <li>• All HELIX models except HELIX 7 SONAR G2, HELIX 7 SI GPS, HELIX 7 DI GPS, HELIX 7 SONAR GPS, HELIX 7 DI, HELIX 5 DI G2, HELIX 5 SI GPS, HELIX 5 DI GPS, HELIX 5 SONAR GPS, HELIX 5 DI, HELIX 5 SONAR</li> </ul>

 <p>XNT 14 20 T</p>	710247-1	Transom mount Dual Beam transducer 20/60 degree, 200/83 kHz, temp included	<ul style="list-style-type: none"> <li>• ION* Series</li> <li>• ONIX10ci COMBO</li> <li>• ONIX 10ci COMBO NT</li> <li>• ONIX8ci COMBO</li> <li>• ONIX 8ci COMBO NT</li> <li>• SOLIX 10 CHIRP GPS</li> <li>• SOLIX 12 CHIRP GPS</li> <li>• SOLIX 15 CHIRP GPS</li> </ul> <p>*Must also have the Sonar Module</p>
<b>TRANSOM TRANSDUCERS – Down Imaging</b>			
 <p>XNT 9 HW MDI 75 T</p>	710295-1	Transom Mount transducer with MEGA Down Imaging, Dual Spectrum CHIRP, temperature sensor and 20' cable	<ul style="list-style-type: none"> <li>• HELIX 7 and 8 CHIRP MDI <ul style="list-style-type: none"> <li>o G3 / G3N and newer models</li> </ul> </li> </ul>
 <p>XM 9 HW MDI T</p>	710280-1	Transom Mount transducer with MEGA Down Imaging+, Dual Spectrum CHIRP, temperature sensor and 20' cable	<ul style="list-style-type: none"> <li>• HELIX 9 / 10 / 12 CHIRP MEGA DI+ <ul style="list-style-type: none"> <li>o G3 / G3N and newer models</li> </ul> </li> </ul>
 <p>XM 14 HW MDI T</p>	710290-1	Transom Mount transducer with MEGA Down Imaging+, Dual Spectrum CHIRP, temperature sensor and 20' cable	<ul style="list-style-type: none"> <li>• SOLIX G2 &amp; G3 Series <ul style="list-style-type: none"> <li>o All models (provides 2D &amp; MDI+ only)</li> </ul> </li> <li>• APEX 13 / 16 / 19 Series <ul style="list-style-type: none"> <li>o All models (provides 2D &amp; MDI+ only)</li> </ul> </li> </ul>
 <p>XM 9 MDI T</p>	710269-1	Transom mount MEGA DI, DualBeam PLUS, 20/60/86/55 degrees, 200/83/455/800 kHz and 1.2 MHz, temperature built-in	<ul style="list-style-type: none"> <li>• HELIX 9 CHIRP MEGA DI GPS G2N</li> <li>• HELIX 10 CHIRP MEGA DI GPS G2N</li> <li>• HELIX 12 CHIRP MEGA DI GPS G2N</li> </ul>

 <p>XNT 9 DI T</p>	710226-1	Transom Mount Down Imaging 83/200/455 kHz Temperature Sensor	<ul style="list-style-type: none"> <li>• 1159ci HD DI, 959ci HD DI, 859ci HD DI, 571 HD DI, 561 DI, 386ci DI, 346c DI, 688ci DI, 678 DI, 1158c DI, 958c HD DI, 958c DI, 858c HD DI, 858c DI, 798ci SI and 798ci HD SI and 899ci HD SI</li> <li>• PiranhaMAX 4 DI</li> <li>• All HELIX non-CHIRP DI models</li> </ul>
TRANSOM TRANSDUCERS – Side Imaging			
	Item Number	Description	Compatible Units
 <p>XNT 9 HW MSI 150 T</p>	710297-1	Transom mount MEGA Side Imaging, MEGA Down Imaging, Dual Spectrum CHIRP transducer with temperature sensor and 20' cable	<ul style="list-style-type: none"> <li>• HELIX 7 CHIRP MSI models <ul style="list-style-type: none"> <li>o G3/G3N and newer models</li> </ul> </li> </ul>
 <p>XM 9 HW MSI T</p>	710282-1	Transom mount MEGA Side Imaging+, MEGA Down Imaging+, Dual Spectrum CHIRP transducer with temperature sensor and 20' cable	<ul style="list-style-type: none"> <li>• HELIX 8 / 9 / 10 / 12 / 15 CHIRP MSI+ <ul style="list-style-type: none"> <li>o G3N and G4N models only</li> </ul> </li> </ul>
 <p>XM 14 HW MSI T</p>	710292-1	Transom mount MEGA Side Imaging+, MEGA Down Imaging+, Dual Spectrum CHIRP transducer with temperature sensor and 20' cable	<ul style="list-style-type: none"> <li>• APEX 13 / 16 / 19 Series <ul style="list-style-type: none"> <li>o All models</li> </ul> </li> <li>• SOLIX 10 / 12 / 15 MEGA SI+ <ul style="list-style-type: none"> <li>o G2 and G3 models</li> </ul> </li> </ul>
 <p>XM 9 20 MSI T</p>	710262-1	Transom mount MEGA SI, MEGA DI, DualBeam PLUS, 20/60/86/55 degrees, 200/83/455/800 kHz and 1.2 MHz, temperature built-in	<ul style="list-style-type: none"> <li>• HELIX 9 CHIRP MEGA SI GPS G2N</li> <li>• HELIX 10 CHIRP MEGA SI GPS G2N</li> <li>• HELIX 12 CHIRP MEGA SI GPS G2N</li> </ul>

 <p>XM 14 20 MSI T</p>	710265-1	<p>Transom mount MEGA SI, MEGA DI, DualBeam PLUS, 20/60/86/55 degrees, 200/83/455/800 kHz and 1.2 MHz, temperature built-in</p>	<ul style="list-style-type: none"> <li>• SOLIX 10 MEGA SI GPS</li> <li>• SOLIX 12 MEGA SI GPS</li> <li>• SOLIX 15 MEGA SI GPS</li> </ul>
 <p>XHS 9 HDSI 180 T</p>	710201-1	<p>Transom Mount Dual/HD Side Imaging 20/74/84 Degree 200/83/455/800 kHz Temperature Sensor</p>	<ul style="list-style-type: none"> <li>• 1199ci SI, 999ci HD SI, 898c HD SI, 899ci HD SI, 998c HD SI</li> <li>• HELIX 9 SI GPS</li> <li>• HELIX 10 SI GPS</li> <li>• HELIX 12 SI GPS</li> </ul>
 <p>XNT 9 SI 180 T</p>	710200-1	<p>Transom Mount Compact Dual/Side Imaging 20/74/84 Degree 83/200/455/800 kHz Temperature Sensor</p>	<ul style="list-style-type: none"> <li>• 398C SI, 698ci HD SI, 798ci SI, 899CI HD SI</li> <li>• HELIX 5 SI GPS</li> <li>• HELIX 5 CHIRP SI GPSG2</li> <li>• HELIX 7 SI GPS</li> <li>• HELIX 7 CHIRP SI GPSG2</li> <li>• HELIX 7 CHIRP SI GPSG2N</li> <li>• HELIX 9 SI GPS</li> </ul>
<p><b>IN-HULL TRANSDUCERS – 2D sonar</b></p>	<p><b>Item Number</b></p>	<p><b>Description</b></p>	<p><b>Compatible Units</b></p>
 <p>XP 9 HW</p>	710275-1	<p>In-Hull Dual Spectrum CHIRP Narrow Beam - 25 Degrees, 180-240 kHz Wide Beam - 42 Degrees, 140-200 kHz</p>	<ul style="list-style-type: none"> <li>• HELIX 5 CHIRP G2 (GPS models)</li> <li>• HELIX 7 CHIRP G2/G3 models</li> <li>• HELIX 7 CHIRP G2N/G3N models</li> <li>• HELIX 8 G3N/G4N models</li> <li>• HELIX 9 G2N/G3N/G4N models</li> <li>• HELIX 10 G2N/G3N/G4N models</li> <li>• HELIX 12 G2N/G3N/G4N models</li> <li>• HELIX 15 G4N models</li> <li>• ICE HELIX CHIRP G2/G3/G3N models</li> </ul>
 <p>XP 9 HW T</p>	710276-1	<p>In-Hull Dual Spectrum CHIRP Narrow Beam - 25 Degrees, 180-240 kHz Wide Beam - 42 Degrees, 140-200 kHz with Temperature Sensor</p>	<ul style="list-style-type: none"> <li>• HELIX 5 CHIRP G2 (GPS models)</li> <li>• HELIX 7 CHIRP G2/G3 models</li> <li>• HELIX 7 CHIRP G2N/G3N models</li> <li>• HELIX 8 G3N/G4N models</li> <li>• HELIX 9 G2N/G3N/G4N models</li> <li>• HELIX 10 G2N/G3N/G4N models</li> <li>• HELIX 12 G2N/G3N/G4N models</li> <li>• HELIX 15 G4N models</li> <li>• ICE HELIX CHIRP G2/G3/G3N models</li> </ul>

 <p>XP 14 HW</p>	710286-1	<p>In-Hull Dual Spectrum CHIRP Narrow Beam - 25 Degrees, 180-240 kHz Wide Beam - 42 Degrees, 140-200 kHz</p>	<ul style="list-style-type: none"> <li>• APEX 13 / 16 / 19 Series <ul style="list-style-type: none"> <li>○ All models</li> </ul> </li> <li>• SOLIX 10 / 12 / 15 Series <ul style="list-style-type: none"> <li>○ G2 / G3 models</li> </ul> </li> </ul>
 <p>XP 14 HW T</p>	710287-1	<p>In-Hull Dual Spectrum CHIRP Narrow Beam - 25 De- grees, 180-240 kHz Wide Beam - 42 Degrees, 140-200 kHz Temperature Sensor</p>	<ul style="list-style-type: none"> <li>• APEX 13 / 16 / 19 Series <ul style="list-style-type: none"> <li>○ All models</li> </ul> </li> <li>• SOLIX 10 / 12 / 15 Series <ul style="list-style-type: none"> <li>○ G2 / G3 models</li> </ul> </li> </ul>
 <p>XP 9 20 T</p>	710147-1	<p>In-Hull Mount Single or Dual Beam 20°/60° 200/83 kHz Temp. Sensor Pigtail</p>	<ul style="list-style-type: none"> <li>• All 100 and 300 Series except DI</li> <li>• All 500 Series except DI</li> <li>• All 600 Series except DI</li> <li>• All 700 Series except DI</li> <li>• All 800 Series except DI</li> <li>• All 900 Series except DI, models</li> <li>• All 1100 Series except DI models</li> <li>• All HELIX Series except DI models</li> <li>• HDR650</li> </ul>
 <p>XP 14 20 T</p>	710248-1	<p>In-Hull transducer Dual Beam, 20/60 degrees, 200/83 kHz, temp pigtail. For use in single layer fiberglass hull boats</p>	<ul style="list-style-type: none"> <li>• All ONIX Series</li> <li>• SOLIX 10 CHIRP GPS</li> <li>• SOLIX 12 CHIRP GPS</li> <li>• SOLIX 15 CHIRP GPS</li> <li>• ION* Series</li> </ul> <p>*Must also have the Sonar Module</p>
<p><b>TROLLING MOTOR TRANSDUCERS– 2D Sonar</b></p>	<p><b>Item Number</b></p>	<p><b>Description</b></p>	<p><b>Compatible Units</b></p>
 <p>XTM 9 HW T</p>	710277-1	<p>Trolling Motor Mount Dual Spectrum CHIRP Narrow Beam - 25 Degrees, 180-240 kHz Wide Beam - 42 Degrees, 140-200 kHz temperature Sensor</p>	<ul style="list-style-type: none"> <li>• HELIX 5 CHIRP G2 (GPS models)</li> <li>• HELIX 7 CHIRP G2/G3 models</li> <li>• HELIX 7 CHIRP G2N/G3N models</li> <li>• HELIX 8 G3N/G4N models</li> <li>• HELIX 9 G2N/G3N/G4N models</li> <li>• HELIX 10 G2N/G3N/G4N models</li> <li>• HELIX 12 G2N/G3N/G4N models</li> <li>• HELIX 15 G4N models</li> <li>• ICE HELIX CHIRP G2/G3/G3N models</li> </ul>

AS QD NMEA 2000

720114-1

Quick-disconnect cable to convert NMEA 2000® drop cable for connection with HELIX models.

• HELIX 8 / 9 / 10 / 12 / 15 Series  
 - G4N models

AS NMEA

720116-1

The AS NMEA is an adapter cable that allows APEX chartplotters to connect directly with a NMEA 0183 accessory (sold separately). The AS NMEA measures 40" in length and connects to the MFD via a waterproof connector.

• APEX 13/16/19 Series  
 - All models

 <p>NMEA 2000 Starter Kit- Single</p>	760064-1	<p>The NMEA 2000 Starter Kit - Single provides the essential components to build a single device NMEA 2000 network.</p>	<ul style="list-style-type: none"> <li>• Compatible with all NMEA 200 accessories</li> </ul>

## INSTALLATION PREPARATION

Read the instructions in this transducer guide completely to understand the mounting guidelines before starting the installation.

**NOTE:** This transducer requires drilling a hole in the hull of the boat; therefore, installation should be performed by a qualified marine technician

Review your boat manufacturer's owner's manual for recommended transducer installation locations and cable routing methods. You will also need your hull's deadrise angle.

Read and understand your boat's warranty before starting this installation.

**Test Route the Cable Installation:** Test route the transducer cable connector to the control head and confirm that the cable is long enough for the planned route. Your boat may have a pre-existing wiring channel or conduit that you can use for the transducer cable. See section **6: Route the Cable** for requirements. Your installation may require extension cables and hardware for routing the cable to the control head.

Visit our Web site at [humminbird.com](http://humminbird.com) for additional information and resources for transducer installations.

Confirm your boat is level for the installation.

**Supplies:** In addition to the supplied hardware, you will need a drill, a small drill bit for the pilot holes, a 1 1/32" [.8 cm] and 1 9/16" [3.9 cm] hole saw, a level, a 1/2" socket driver or wrench, and marine-grade silicone sealant.

## INSTALLATION OVERVIEW

**NOTE:** This type of transducer installation is not recommended for trailerable boats.

### 1 | Test the Transducer Prior to Installation

Prior to installation, test the transducer to make sure that no damage occurred during shipping.

1. Confirm the control head is connected to power. See your control head installation guide for instructions.
2. Connect the transducer cable connector to the transducer [or sonar] port on the control head. See section **7: Connect the Cable**.
3. **Power On:** Press the POWER key to turn on the control head.  
If the transducer is detected, the control head will start Normal mode.
4. Select a 2D Sonar View to display on-screen.

**NOTE:** See your control head operations manual for more information.

5. Lower the transducer into the water. [The transducer must be fully submerged because the sonar signal cannot pass through air and air pinging can damage the transducer].  
If the bottom is visible on-screen with a digital depth readout, the transducer is working properly.
6. After confirming proper operation, power off the control head, and unplug the transducer cable connector from the control head.

**2 | Determine the Transducer Mounting Position**

The Side Imaging transducer has specific mounting requirements. Consider the following to find the best mounting location for the transducer.

**⚠ WARNING!** Do NOT install the transducer in line with the engine intake.

**Determining the Transducer Mounting Position**

- 1** The best mounting location for the transducer is aft midship, as close to the centerline of the boat as possible.
  - 2** Make sure nothing is in front, behind, or to the side of the transducer that is closer than 12" [30.5 cm]. The transducer should be mounted forward of the propellers on inboard boats, and separated adequately from other transducers, strakes, rivet lines, or other protrusions on the boat.
  - 3** **Deadrise:** The transducer, when mounted, must be parallel with the waterline. If the selected mounting location has a hull deadrise of 2 degrees or greater, the included leveling block should be used to level the transducer housing and direct the sonar signal straight down.
  - 4** The Side Imaging transducer must NOT have anything obstructing the 'view' of the side looking beams. For example, nothing can be in the line of sight of these beams (not a hull, motor, or other transducer, etc.)
- ✍ NOTE:** Side Imaging sonar is best performed at boat speeds from 2 to 6 mph, and it is not recommended for high-speed operation (as gaps between strips of information can appear). However, the transducer can support traditional 2D sonar and Down Imaging® sonar at higher speeds. Rough seas and air bubbles can also affect the reading of the Side Imaging transducer.
- 5** **Inside the Boat:** There must be room to access the mounting location for installation and cable routing. If you need to use the leveling block, make sure the inside surface of the hull is smooth enough to seat the leveling block securely.

**RECOMMENDED:**  
In the illustration, the transducer is close enough to the centerline so that the hull will not interfere with the Side Imaging beams.

**NOT RECOMMENDED:**  
In the illustration, the transducer is too far from the centerline, and the hull is blocking the Side Imaging beams.

**Installation Scenarios for Consideration:**

**Flat Hull, One Transducer:** Locate a flat area on the bottom of the hull, forward of where the propeller shaft comes out of the hull. Make sure there is nothing lower than this location to the right or left.

**V-shaped Hull, Two Transducers:** Install two thru-hull transducers, one on each side of the V. Connect the transducers with a Y-Cable.

**Two Back Engines, Two Transducers:** Install two thru-hull transducers outboard from the dual engines. Connect the transducers with a Y-Cable.

**V-shaped Hull, Two Transducers  
OR  
Two Back In-Board Engines,  
Two Transducers**

**✍ NOTE:** Installations with two transducers require a Y-Cable [or Splitter Cable], which vary based on the control head model. To purchase a cable, visit our Web site at [humminbird.com](http://humminbird.com).

## INSTALLATION

Perform the procedures in the following sections to install the transducer on your boat.

### 3 | Drill the Holes and Prepare the Leveling Block

Follow the instructions below for the installation type that matches your hull and deadrise. Review the instructions and measurements indicated on the mounting template.

 **CAUTION!** Use only the leveling block included with this transducer. Do NOT use a wooden leveling block, as any swelling of the wood might cause the plastic on the transducer to shatter.

 **NOTE:** A separately-purchased fairing block can also be used to create a hydrodynamic waterflow around the transducer body. The design and fabrication of this block varies greatly with different hull shapes; therefore, it should be customized by a qualified marine technician.

#### Standard Installation (Flat Hull, Deadrise less than 2°):

For an installation that needs to minimize the impact of a small obstruction, but where the deadrise is less than 1 to 2 degrees, use the included leveling block (uncut), and mount it outside the hull.

1. Tape the template at the mounting location you selected in section 2.
2. From the outside of the hull, drill 3 small pilot holes (smaller than the centering bit of your drill bit or hole saw), as shown on the template. **Drill the holes perpendicular to the hull.**
3. Use the center pilot hole (from the outside of the hull) to drill a 1 9/16" (3.9 cm) hole that is sized to fit the threaded stem of the transducer. **Drill the hole perpendicular to the hull.**
4. Use the 2 outer pilot holes (from the outside of the hull) to drill 11/32" (.8 cm) holes that are sized to fit the anti-rotation bolt. **Drill the holes perpendicular to the hull.**
5. Thoroughly clean and deburr the drilled holes and clean the outside of the hull.
6. The leveling block will be installed (uncut) on the outside of the hull. Proceed to Section 4: **Attach the Transducer.**

#### Alternate Installation (Deadrise more than 2°):

For an installation where the deadrise is more than 2 degrees, use the included leveling block, cut at the appropriate angle, to compensate for the deadrise.

1. Tape the template at the mounting location you selected in section 2.
2. From the outside of the hull, drill 3 small pilot holes (smaller than the centering bit of your drill bit or hole saw), as shown on the template. **Drill the holes perpendicular to the waterline.**
3. Use the center pilot hole (from the outside of the hull) to drill a 1 9/16" (3.9 cm) hole that is sized to fit the threaded stem of the transducer. **Drill the hole perpendicular to the waterline.**
4. Use the 2 outer pilot holes (from the outside of the hull) to drill 11/32" (.8 cm) holes that are sized to fit the anti-rotation bolts. **Drill the holes perpendicular to the waterline.**
5. Thoroughly clean and deburr the drilled holes and clean the outside of the hull.
6. **If the hull angle is greater than 2 degrees**, cut the included leveling block and use both pieces to level the transducer. The block should be cut to match the angle of the deadrise of the hull.
  - Cut the leveling block into two equal pieces: one which mounts outside the hull and is shaped to match the profile of the transducer, and one which mounts inside the hull and provides a level surface for the fasteners.
  - The thinnest wall of the outside leveling block must be at least 1" (25 mm).

- The leveling block included with your transducer can accommodate a maximum deadrise angle of 25 degrees.
7. The leveling block will be installed (cut) on the inside and outside of the hull. Proceed to Section 4: *Attach the Transducer*.

## 4 | Attach the Transducer

1. Feed the transducer cable through the drilled center hole, then temporarily install the transducer to check the fit.
2. Apply a generous amount of marine-grade silicone sealant or slow-curing epoxy inside the drilled center hole and along the mating surfaces of the transducer housing and leveling block.
3. Proceed to the instructions that correspond with your transducer orientation (see illustrations).
4. Make sure the rounded end of the transducer is facing the bow, pointing forward, and parallel to the centerline.
5. Insert the transducer into the drilled hole from outside the boat with the leveling block(s) installed according to your installation type.
6. From inside the boat, install the large washer and nut onto the threaded stem. **Hand tighten only.**
7. Install the small washers and nuts onto the two anti-rotation bolts. Apply the included anti-seize compound to each bolt as you are installing the hardware.

## 5 | Finish the Installation

1. Hand tighten the nuts onto the threaded transducer stem and the anti-rotation bolts **ONLY** until the assembly is firmly seated, then tighten **NO MORE** than 1/8 of a turn extra.

**⚠ WARNING!** To avoid damage, do not overtighten the nuts.

**📝 NOTE:** This type of transducer is directional in nature and must be aligned with the front of the boat (the direction of travel) and parallel to the centerline. Failure to align the transducer properly will result in incorrect bottom readings and incorrect fish locations. [See the illustrations for orientation].

2. Remove the excess adhesive sealant from the outside of the hull to ensure smooth water flow over the transducer.

## 6 | Route the Cable

The transducer cable must be routed to the point where the control head is mounted. Your boat may have a pre-existing wiring channel or conduit that you can use for the routing.

1. Route and secure the transducer cable connector to the control head, avoiding areas where it may be damaged or interfere with normal boating operations.

**⚠ CAUTION!** Do not cut or shorten the transducer cable, and try not to damage the cable insulation. Route the cable as far as possible from any VHF radio antenna cables or tachometer cables to reduce the possibility of interference. If the cable is too short, extension cables are available to extend the transducer cable up to a total of 50' (15 m). For assistance, contact Humminbird Technical Support for more information.

**⚠ CAUTION!** Do NOT mount the cables where the connectors could be submerged in water or flooded. If cables are installed in a splash-prone area, it may be helpful to apply dielectric grease to the inside of the connectors to prevent corrosion. Dielectric grease can be purchased separately from a general hardware or automotive store.

**Standard Installation  
(Flat Hull)**

**Alternate Installation  
(Deadrise greater than 2°)**

**Correct Orientation of  
the Transducer**

**7 | Connect the Cable**

Proceed to the instructions that correspond with your control head model.

**SOLIX Series**

1. Connect the transducer cable connector to the sonar port on the control head or cable tray (if applicable). See your control head installation guide for details.

The ports are labeled and the connectors are keyed to prevent incorrect installation, so do not force the connector into the wrong port.

2. The control head will automatically detect the transducer and configure it with the control head. For additional configuration information, see your control head operations manual.

**HELIX Series**

**NOTE:** Installations with HELIX control heads require a 10' HELIX Transducer Adapter Cable (part number 490537-1).

1. Connect the transducer cable connector to the adapter cable.
2. Connect the adapter cable to the sonar port on the control head or cable tray (if applicable). See your control head installation guide for details.

The ports are labeled and the connectors are keyed to prevent incorrect installation, so do not force the connector into the wrong port.

3. The control head will automatically detect the transducer and configure it with the control head. For additional configuration information, see your control head operations manual.

**HELIX 7 Control Head Ports**

**HELIX 8, 9, 10, 12 Cable Tray**

**SOLIX Sonar-Temp Port**

**HELIX Transducer Connectors**

**Hexagon-Shaped Connector**

**Round Connector**
