

Transducer Notice!

Check the Transducer Label

Use the following instructions to identify the correct ice transducer part number for your installation.

WARNING! The ice transducers may look identical, but they are not the same equipment. It is critical to connect the correct transducer to the correct control head.

Checking the Transducer Part Number

- 1. XI 9 20:** Does the transducer cable have a white tag? The part number is also printed on the cable. Check the part number and confirm it is XI 9 20. This transducer will connect to control heads from the following ICE™ Series: 300, 500, 600, and HELIX™.
- 2. XI 9 19:** Check the other transducer(s). Note the part number that is printed on the cable near the connector. The XI 9 19 transducer will connect to the ICE™ Flasher Series control head.
- 3.** Read the installation guide and follow the instructions to connect each transducer to the correct control head.
