

# Off The Dock

Hydro Glow Fishing Lights manufactures high quality, energy efficient, water proof lights for both above the water and underwater applications. Hydro Glow Fishing Lights utilize high output LEDs for great fish attracting capability. The fish attracting capability of our high output LED dock lights will enhance fishing, and just watching fish, right off your dock for the entire family. Factors such as water depth, clarity, boat traffic, and the desired appearance of the illuminated area should be considered when choosing the best suited dock light. Our above the water models are the DM260 and the FL30 LED floodlight. Our anchored to the bottom model is the SF60 and coming soon, the SF100.

For enhancing fishing around your dock or just making a cool look, chose a Hydro Glow Dock Light best suited for your particular situation.

The graphic below illustrates the three types of mounting options available for off the dock lighting.
