Rail2 - LED Light

Wire Exit Hole Drill Template

PRINT TO SCALE!

For 2-color operation with an external switch:

Light ramps in intensity over about 3 seconds.

To dim light interrupt this ramp with a brief Off/On toggle. This will stop the ramp and set the light at the desired intensity.

Subsequent Off/On toggles will change light color.

Light circuits should be protected with an appropriately sized fuse. Each light draws approximately 290mA at 12VDC and 160mA at 24VDC. Fuses on circuits with multiple lights should be sized accordingly.
