MINN KOTA

TERROVA®

CHALLENGE ACCEPTED.

How can you possibly improve a motor with up to 112 pounds of thrust and i-Pilot or i-Pilot Link compatibility? By making it easier than ever to stow it with an innovative Lift-Assist mechanism. Now you get brains, brawn, and effortless control of it all. Hey, we like a challenge.

LIFT-ASSIST

A new Lift-Assist mechanism on the redesigned Terrova carries the weight of the motor for you to make stowing easier - so you can save your strength to reel in the big ones.
REDESIGNED STOW/DEPLOY LEVER

Terrova's Stow/Deploy lever has been redesigned to allow for one-step stow or deploy - making it even easier to use. Just push down with your hand or foot when you're ready to move.

QUIETER STEERING MOTOR

New Terrova has a completely new motor design - engineered to run quieter than ever before. So fish won't be spooked, but you might be.

NEW i-PILOT OR i-PILOT LINK WITH NEW PHONE APP*

Boat positioning becomes automatic with the redesigned, GPS-powered i-Pilot or i-Pilot Link system. i-Pilot lets you set Spot-Locks, record paths, control speed and steering, and more. Link does all that plus the ability to control your motor from your Humminbird, follow depth contours, and automatically navigate to your favorite spots. Both systems feature reinvented Spot-Lock - the most accurate electronic GPS anchor ever - and have redesigned remotes with larger screens, more options, and Bluetooth technology, so you can connect to your smartphone for quick control of basic functions and easy software updates.

Bluetooth®

*available on i-Pilot / i-Pilot Link models only

REDESIGNED FOOT PEDAL WITH NEW SPOT-LOCK BUTTON

Low-profile and loaded with control features, including a new Spot-Lock button for fast, hands-free access to hold on a spot. Includes 18' cord.
