MINN-KOTA

RIPTIDE POWERDRIVE

BORN WITH ITS NOSE TO THE GRINDSTONE.

Riptide PowerDrive has been counted on for years by saltwater anglers who want reliable performance with smart boat control features. So naturally, we just made it better. A tougher, sleeker new mount houses an arsenal of innovative options. Nobody outworks a Riptide.

REDESIGNED MOUNT & AESTHETICS

Riptide PowerDrive has been redesigned with new technology, and remodeled to handle the workload that goes along with it - giving you a stronger mount and bigger brains in a sleeker package.

NEW i-PILOT*

Boat positioning becomes automatic with the revolutionary, GPS-powered i-Pilot. Set Spot-Locks, record paths, control speed and steering, and more, all on a redesigned remote that has a 33% larger screen, and the ability to communicate via Bluetooth. New i-Pilot puts more options and easier operation at your fingertips, including reinvented Spot-Lock - the most accurate electronic GPS anchor ever.

Bluetooth

i-PILOT PHONE APP*

Bluetooth communication allows new i-Pilot to pair with your smartphone, allowing for easy software updates and quick command of speed, steering, Spot-Lock, high speed bypass, and Advanced AutoPilot.

DEPLOY-ASSIST LEVER

Riptide PowerDrive's Deploy-Assist lever lets you get in and out of the water without breaking a sweat. Depress the lever to deploy. And when it's time to move, it stows easily and securely.

COPILOT

The CoPilot wireless remote comes standard on Riptide TerraNova to give you push-button control of speed, steering, AutoPilot and high speed bypass. It's total wireless control from anywhere on the boat.
