

Why upgrade from TZ Odyssey to TZ Navigator?

First of all, our mantra is that your love of the sea and sailing should be equally matched by the enjoyment of having great marine navigation software. That's why one of the objectives of TZ Navigator has been to make the interface more user friendly than ever.

Touch screen functionality
We are now finger friendly

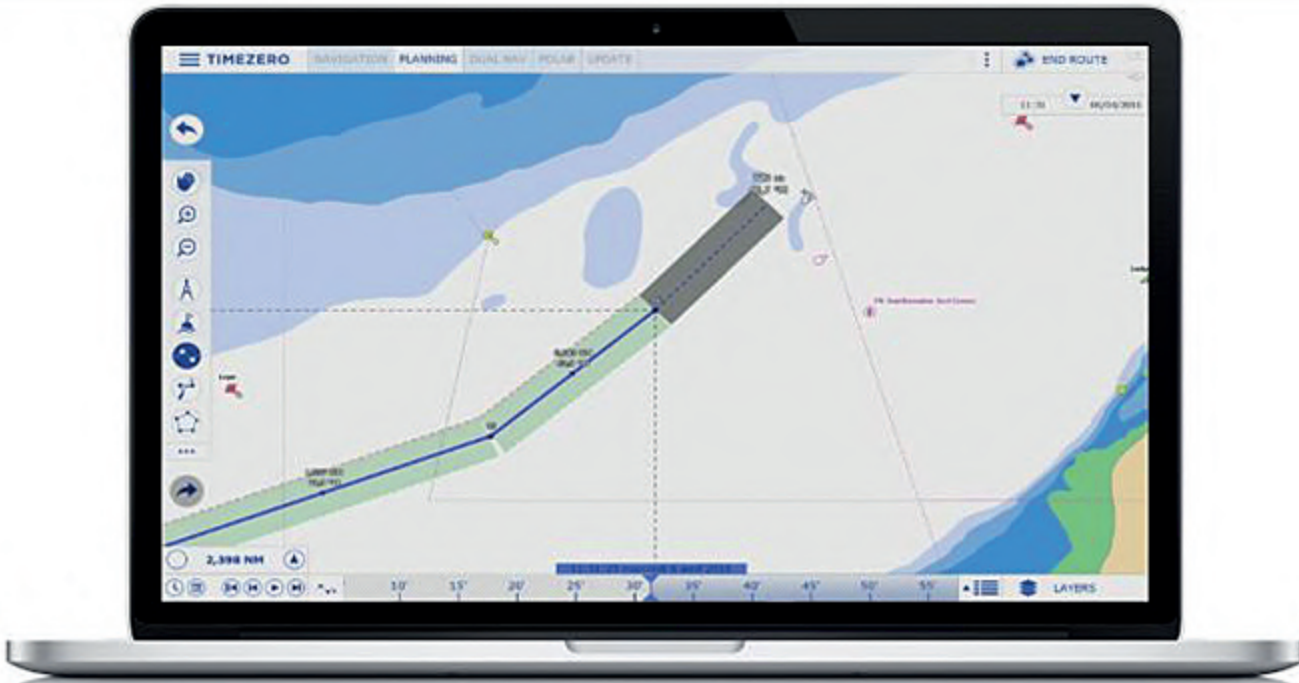

Bigger buttons
Because bigger is better

Quick Access
Your favorite features is one click

But, that's not all...

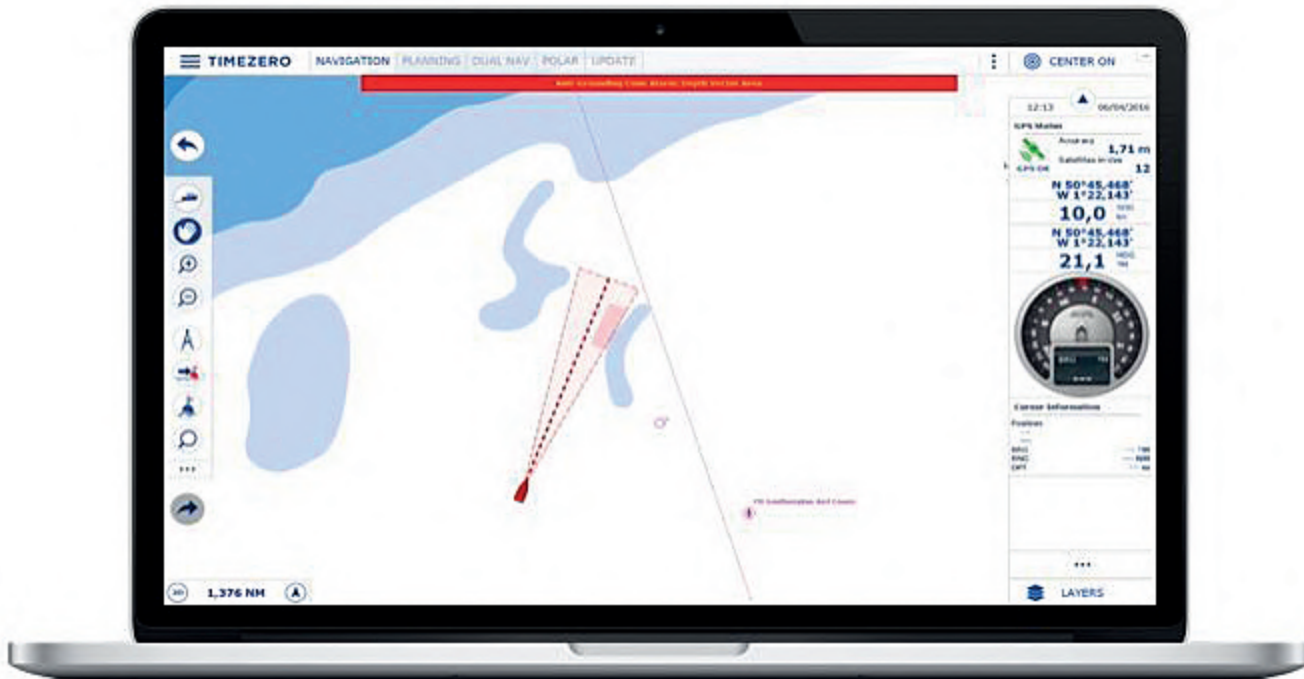

New route planning safety

Anti-grounding security cone

New route wizard

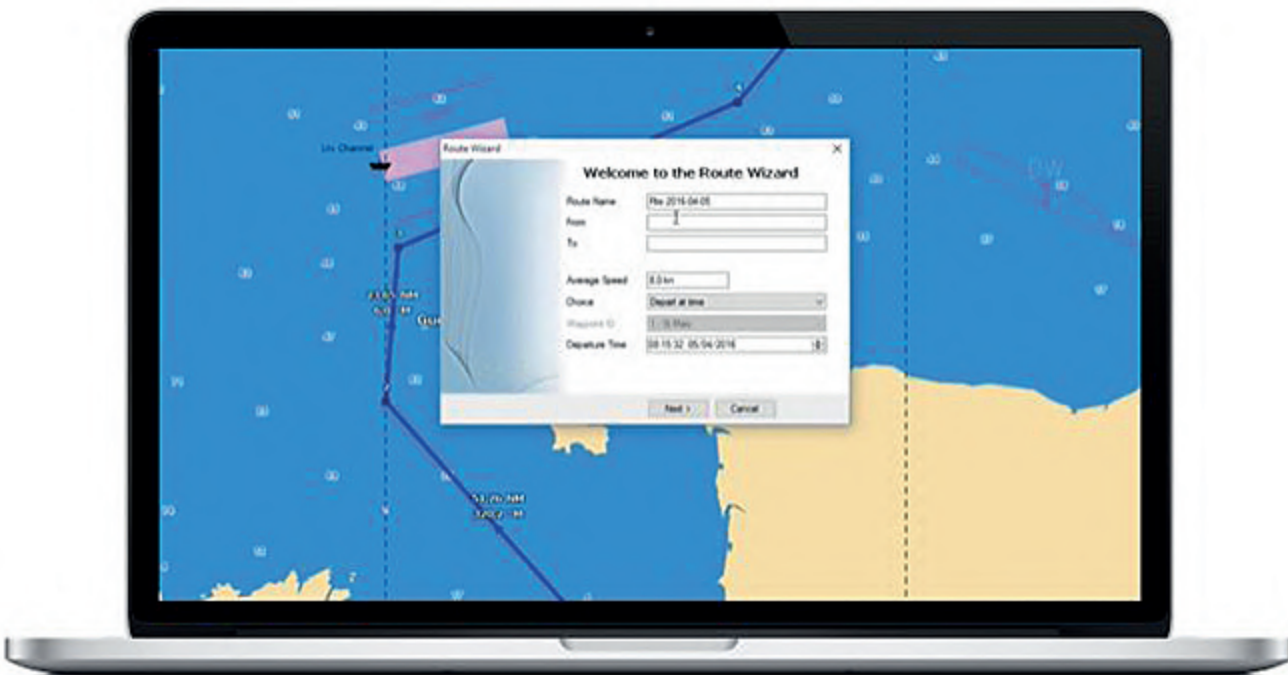

New route planning safety

Anti-grounding security cone

New route wizard

New route planning safety

Anti-grounding security cone

New route wizard

A route wizard is displayed when a route is created offering a calculation for the optimal route based upon tides and currents (optimal departure time, arrival at high tide, etc.). Lots of smaller features that specific customers could find very attractive: Odometer, Print Route detail, Possibility to link two routes, Better control of Tidal Currents computation in Planning and Active Route, NMEA2000 priority, Sensor Offset and Damping.
