

# REV-X MARINE

CHECK OUT OUR **NEW** LINE OF MARINE PRODUCTS

## Oil Additive

REV-X Oil Additive has proven the world over to consistently provide increased performance and protection in marine engine applications! REV-X Oil Additive eliminates friction, reduces metal to metal wear, lowers high operating temperatures and provides extended service life for all treated components and fluids.

## DRIVE-L

DRIVE-L greatly increases the performance of outdrives by upgrading the lubricating properties for reduced friction levels, increased load capacity, increased shock load, elimination of metal to metal wear on gears, bearings and shifting components to provide extended service life of the entire drive. DRIVE-L is the only lightweight outdrive lubricant available that provides serious increases in performance while providing maximum protection to eliminate costly failures.

**\*\*\*DRIVE-L can be used for all OEM applications that call for lightweight or engine oil lubricants\*\*\***

## DRIVE-H

DRIVE-H is a heavily additized 80w-90 GL-5 semi-synthetic heavyweight lubricant that provides race proven high performance benefits that are simply not available in any other product! DRIVE-H unleashes all of the performance your outdrive has to offer by reducing friction to an absolute minimum and eliminating metal to metal wear on gears, bearings and shifting components while lowering high operating temperatures. DRIVE-H is mandatory for all high performance marine applications.

**\*\*\*DRIVE-H can be used for all OEM and aftermarket drives that call for a GL-4, GL-5, 80w+ lubricating fluid\*\*\***
