WATER SEPARATING FUEL FILTER KIT

Warning: Stop engine before installing fuel filter kit or replacing old filter.

Installation Instructions

1. Mount bracket as securely as possible.
2. Coat threads of all fittings used with teflon pipe sealant. Do not use teflon tape.
3. Install desired fuel fittings (straight barb or 90 degree) to insure that fuel lines are not bent or kinked.
4. Start engine and check for leaks. Always keep handy a coast guard approved fire extinguisher for gasoline fires in case of emergency.
5. When necessary replace old filters with SEACHOICE water separating filter model 20911.
