SeaSense™

Quality marine products that make sense.

SeaSense has been developing quality marine and trailer products since 1984. We have spent over a quarter of a century rigorously testing and improving our entire line. This means you can offer better quality products to your customers at affordable prices. We are confident in our products and are proud to offer the industry best warranty.

Give Yourself Peace of Mind with SeaSense!
We Stand Behind Every Product We Sell!

"Creating the best on-the-water experience through innovation, passion, and a dedication to our customers"

We are proud members of: NMMA ABYC NMDA GROW BOATING

What can I find in this catalog?

This catalog will show you the long line of marine products SeaSense has to offer. The Table of Contents displays how our products are divided into nine sections. Each page specifies the item's part number and image, dimensions, and a complete description explaining its features and uses. Charts are also printed to help you make quick comparisons between alike products.

Rope & Cordage

100% Twisted Polypropylene Winch Rope

Twisted polypropylene winch rope with galvanized spring hook is used for winches rated up to 1200 lbs.

NEW

Model No.	Dia.	Length	Spliced End	Load	Construction	Fiber	Color	Break Strength (lbs.)	Safe Working Load (lbs.)
50013044	3/8"	20'	Spring Hook	Light	Twisted	Poly	Blue	1800	198

Fender Line

3/8" twisted fender line specifically made for fenders. Pre-spliced fender line has small eye at one end.

Description	Model
3/8" x 4' Twisted Fender Line, White	50012810
3/8" x 6' Twisted Fender Line, White	50012811
3/8" x 4' Twisted Fender Line, Black	50012816
3/8" x 6' Twisted Fender Line, Black	50012817
3/8" x 4' Twisted Fender Line, Blue (Not shown)	50012822
3/8" x 6' Twisted Fender Line, Blue (Not shown)	50012823

Stretch Cord with Coated Hooks

- Vinyl coated hooks prevent scratching
- Fray resistant cord
- No knots to slip out
- Bonded to hook for secure connection

Description	Model
48" Stretch Cord	50090148

Rope Cutting Gun

Lightweight rope cutting gun from SeaSense® provides boaters and campers with a simple way to make quick and clean cuts to any type of synthetic rope or line. 4' Cord.

- 120 V   • 150 W   • 1.5 amp   • 1-1/2 lbs.

Description	Model
Rope Cutting Gun	50014090

Portable Hot Knife Rope Cutter

The best choice for cutting rope, webbing, belts, ribbon, and cord. It cuts in 10 seconds and reaches temperatures up to 1112°F (600°C). When properly used, the portable rope hot knife is a very convenient tool. It charges by USB cable and is easy to carry anywhere. (charging cable included) The blade head swivels 360 degrees and can be easily removed for cleaning.

FOR BOATS UP TO 50'
HEAVY LOAD
5/8"

Light Duty
POLYPROPYLENE

For Small Boats & Inland Waterways with Light Current & Multi-Purpose Applications

Floats because of its light weight. Poly has a moderate resistance to deterioration from sunlight (UV Stability), but storing it away from direct sunlight will increase life.

Standard
MFP Multi-Filament Polypropylene

Daytime Docking & Mooring

Soft and handles exceptionally well. Floats because of its light weight. Moderate resistance to deterioration from sunlight (UV Stability). Storing away from direct sunlight will increase life.

Premium
NYLON

Docking & Anchoring

Retains original length when stretched - best suited for absorbing shock loads. Excellent resistance to deterioration from sunlight. Very good resistance to abrasion & will last 4-5x longer than natural fiber ropes. Rot proof & not damaged by oils, gasoline, grease, marine growth or most chemicals.

ANCHOR RODE: Line or chain, or a combination of both, connecting an anchor to a vessel.

The Typical Combination Style Rode Consists Of:

ANCHOR LINE
The best all around line for anchoring is nylon in a three-strand twist, with a nylon or metal thimble spliced into one end. Three-strand twisted nylon line can absorb shock associated with anchoring.

ANCHOR SHACKLE
It is important to make sure you have selected the proper size for your application. Use shackles one size larger than the chain. (1/4" chain uses 5/16" shackle).

CHAIN
Galvanized chain is the most common. It is recommended to have one foot of chain for each foot of boat length. Small boats commonly use 4' or 6' of chain for temporary anchoring (lunch hook).

The amount of rode that you have out (scope) when at anchor depends generally on water depth and weather conditions. The deeper the water and the more severe the weather, the more rode you will put out. For recreational boaters, the minimum scope you should have is 5:1 for day anchoring and 7:1 to 8:1 for overnight.

All SeaSense® suggestions are under normal conditions.

Premium

NYLON - Premium Material, Docking & Anchoring

Nylon is the best material commonly used for lines. It has a "memory" for retaining its original length when stretched. This makes it best suited for absorbing shock loads. Nylon has excellent resistance to deterioration from sunlight (U.V. Stability). Due to its elasticity, nylon can absorb sudden shock loads that would break ropes of other fibers. It has very good resistance to abrasion and will last four to five times longer than natural fiber ropes. Nylon rope is rot proof and not damaged by oils, gasoline, grease, marine growth or most chemicals other than acids.

Rope Construction Guide		Mtrl.	Construction	Spliceable	Strength To Weight	Flexibility	Flattens Under Load	Mechanical Elongation	Abrasion Resistance
Double Braid		Nylon	Superior	Yes	High	High	No	Moderate	High

Do You Know The Difference Between Rope, Line & Cord?

"Rope" is cordage above 1/8" diameter but once it is in use onboard, it is called "Line" or by the name of the rigging part that it has become. Anything below 1/8" diameter is labeled "Cord".

Dock lines are commonly separated by two categories, transient and permanent. Transient mooring lines need to be more flexible in length due to different size of lines which should be carried for each purpose. Permanent mooring lines can be sized to fit a specific mooring pattern. This allows them to be ready for use when you approach the dock. Common rope size and mooring patterns change in severe weather conditions. Double the amount of lines or larger sizes are recommended as an option to ride out a storm. Severe weather conditions are a common cause for extreme abrasion to lines. If you choose the correct line, the only other concern for failure would be from abrasion. Protect your lines from chafe in the eyes and any contact point. This will considerably increase your line's life and reduce breakage risk.

Rope & Cordage

SeaSense™
Quality marine products that make sense.

Recommended Dock Line Chart

Boat Length	Line Diameter	Min. Qty./Size	Daytime/Transient Docking	Overnight/Permanent Mooring
Up to 12'	3/8"	2 @ 10'	MFP/Twisted Nylon	Twisted Nylon/Double Braid
UP to 17'	3/8"	3 @ 15'	MFP/Twisted Nylon	Twisted Nylon/Double Braid
Up to 20'	3/8"	2 @ 15' 2 @ 20'	MFP/Twisted Nylon	Twisted Nylon/Double Braid
Up to 25'	3/8"	2 @ 20' 2 @ 25'	MFP/Twisted Nylon/Double Braid	Twisted Nylon/Double Braid
Up to 30'	1/2"	2 @ 20' 2 @ 25'	MFP/Twisted Nylon/Double Braid	Twisted Nylon/Double Braid
35' to 50'	1/2-5/8"	2 @ 25' 2 @ 30'	MFP/Twisted Nylon/Double Braid	Twisted Nylon/Double Braid

This reference is to serve as a guide only. Weather conditions, dock conditions, and boat size may require additional or higher quality lines.

Please consult with your dockmaster or other qualified individual for specific recommendations. Rough water and weather conditions will require additional lines. Recommend upgrading to a larger diameter dock line for rough weather and/or water conditions.

WARNING: (Applies to all ropes in this catalog)

- This product should be used only as intended. Do not use as a towline. Damage may occur to the line, which may result in failure.
- When tensioned rope is released or breaks, the rope and/or its attachments can snap back into the boat or in unpredictable directions with extreme force, resulting in injury or death.
- Inspect the rope and its attachments before use. Replace when signs of deterioration are indicated by discoloration, broken filaments, unraveling or other obvious signs of wear.
- When securing ropes to cleats, pillings, etc., be aware that fingers and hands can become caught between rope and fixed objects due to unexpected movement of the boat. Never have any part of the body between rope and fixed objects as it may result in injury.
- Knots will decrease breaking strength of a rope up to 50% and will increase the risk of breakage during use.

NOTE: Use one size larger or double the amount of lines used for storm conditions.

STRENGTH RATINGS:

Breaking Strength
The load, in pounds of "pull" at which the rope would begin to break or part.

Safe Working Load
Laid line should not exceed 11% of its tensile strength.

NOTE: All SeaSense® suggestions are under normal conditions.

Rope & Cordage

![SeaSense - Quality marine products that make sense.]

Premium Double Braid Dock Line, 100% Nylon

Two ropes in one! Superior cover and core construction manufactured from the highest quality marine grade nylon, giving you the strongest and easiest dock line to handle. This line has some stretch but less than three-strand twisted lines. The eye is professionally spliced and whipped for a secure, clean and attractive splice and also whipped at the bitter end to prevent fraying. Line is comprised of many small strands that allow wear to be distributed and makes line very flexible, easy to coil, and virtually kink free.

50012983	3/8"	25'	10"	Light	Twisted	Nylon	White	2700	290

100% Twisted Nylon Dock Line

Beware of cheap imitations! This "Premium" construction is manufactured from three strand nylon fibers giving you elasticity that can absorb sudden shock loads including harbor surges and boat wakes. This line has high resistance to abrasion, chafing, oil, rot and mildew along with superior UV resistance making an excellent dock line. Rope will not stiffen or curl. Suited to the harshest marine environment, it stays flexible when rope is wet or dry, has minimal shrinkage and has a professionally spliced eye on one end.

Three-Strand Twisted Nylon Anchor Line

Three-strand twist anchor line features excellent elongation properties and is designed to handle the shock loads caused by boat motion. Made with special high quality nylon fibers that will not shrink or stiffen due to moisture. Each line is factory eye-spliced with a non-corrosive, chrome plated nylon thimble in one end. Conveniently packaged on spools.

Bulk Spools

Save yourself time, money, and energy by buying our rope in bulk! Bulk buying gives you the opportunity to get any project done on time without having to worry about running out of material. This cost-efficient and flexible way of buying rope also benefits our environment by allowing us to condense packaging, requiring less material.

SeaSense Superior Quality Boat Fenders & Accessories

24" Mooring Snubber

Highly elastic rubber provides maximum protection against stress caused by wind, waves and wakes on boat's cleats, chocks, and lines. Prevents mooring line breakage along with compensating for sudden jolting and excess stretching of lines beyond parting strength. No tools needed to install. Locks lines safely and securely.

Description	Model
24" Mooring Snubber Black	50072306

EPDM Mooring Snubber

High-tensile rubber resists saltwater, fuels & acids, and provides maximum protection against stress caused by wind, waves and wakes on boat's cleats, chocks, and lines. Prevents mooring line breakage along with compensating for sudden jolting and excess stretching of lines beyond parting strength. No tools needed to install.

Description	Model
17" EPDM Mooring Snubber, for 3/8" Line, Black	50072305
19-1/2" EPDM Mooring Snubber, for 1/2" Line, Black	50072308
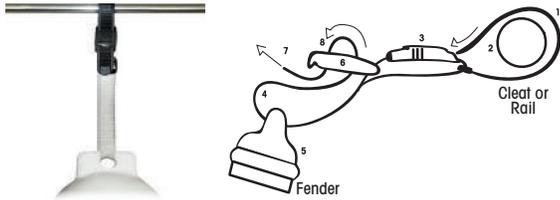

Fender Holder

Installs in seconds and keeps fender lines securely attached to railings and cleats. Easily adjust fender height from 6" to 24".

Understanding Scope

Scope is the ratio between anchor line paid out and depth of water. Most anchors achieve maximum holding power at a scope of 7:1. Any reduction of scope should be made up by using larger anchors and chain.

- Lightweight boats should use 1/8" diameter for every 10' of boat total length

- Most standard boats should use 1/8" diameter for every 9' of boat total length

- Extra heavy boats or boats subject to high wind should use 1/8" diameter for every 8' of boat length

- Chain size should equal half of the diameter of the rope (1/2" line should pair up with 1/4" chain)

- Always use a shackle one size larger than the chain

More Scope Equals More Holding Power

The greater the scope the better the holding power.

$$SCOPE = \frac{LENGTH}{DISTANCE}$$

DEPTH

LENGTH LENGTH LENGTH

2:1   5:1   7:1
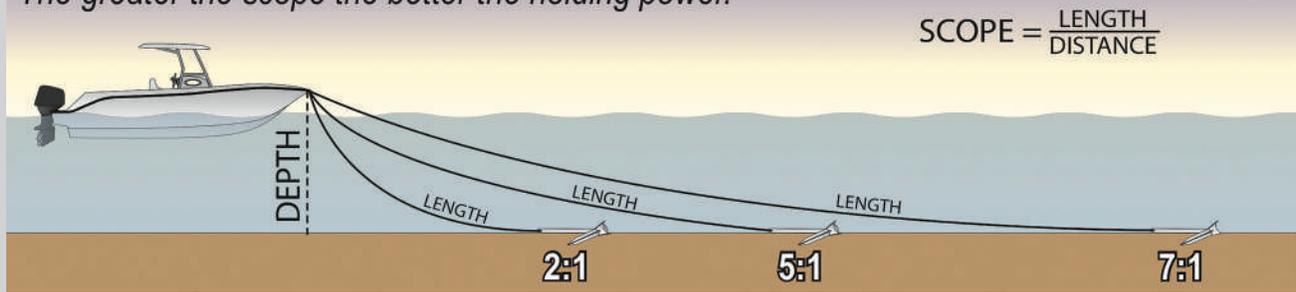

Galvanized Slip-Ring Economy Anchor

Corrosion resistant meets strong holding power. Great second anchor or lunch hook. Slip ring provides easy release for anchors caught on bottom. Must use anchor chain and shackles for proper holding.

Description	Boat Size	A	B	C	Model
4 lb. Slip Ring Anchor	12' to 15'	15"	9-1/4"	15-1/2"	**50074563**
5 lb. Slip Ring Anchor	15' to 17'	15"	9"	15-1/2"	**50074565**
6 lb. Slip Ring Anchor	17' to 19'	18"	13-3/8"	15-1/4"	**50074567**
8 lb. Slip Ring Anchor	19' to 21'	21"	14"	18"	**50074569**
9 lb. Slip Ring Anchor	21' to 23'	25"	15"	18"	**50074575**

Anchors & Mooring

SeaSense™
Quality marine products that make sense.
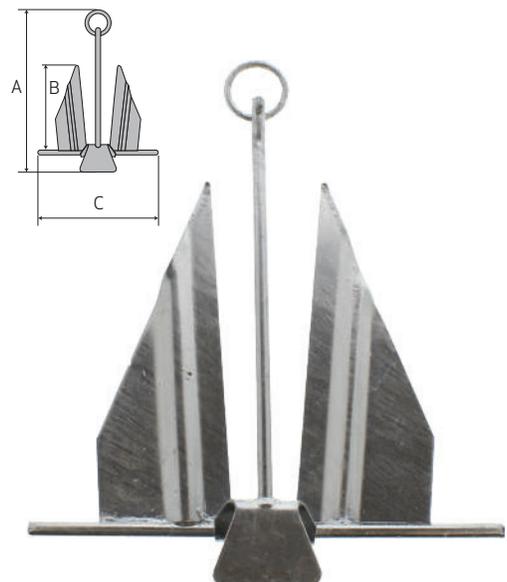

Fluke Style Anchor, Anti-Foul Mechanics

SeaSense® penetrating fluke style anchor features simple, yet valuable anchor retrieval methods that provide not only ways to save your anchor and time but also your safety. Listed are a couple of suggested methods to rigging a foul-free anchor.

Break Trip Line

Use anchor's retrieval ring as a fastener for your anchor's chain. Direct length of chain flush with shank, fastening with zip ties along and securing at the tip. **(A)** Simply take up excess rode and slowly motor in the opposing direction anchored, zip ties will break under pressure. **(B)**
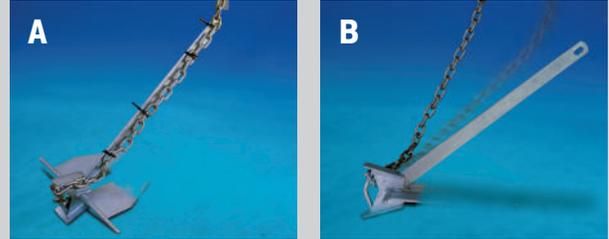

This reference is to serve as a guide only. Recommended for sandy and muddy bottoms. Do not use a zip tie when encountering rough weather/water conditions. Always have a second anchor available in case of bad weather or loss of first anchor.

Floating Trip Line

Using a 3/8" polypropylene line, attach one end to the anchor's retrieval ring and the other to a small buoy (P/N 50071016). In case of a snag, take in anchor rode as approaching float, bow-first. Pull in the opposite direction of which the anchor has penetrated.
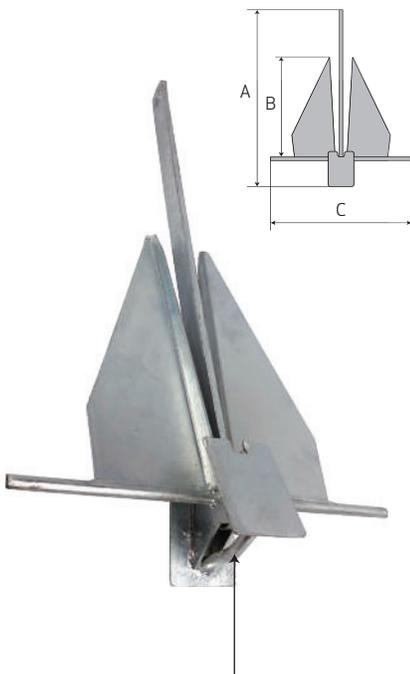

Penetrating Galvanized Fluke Style Anchor

Maintain a firm hold with a modern classic. The SeaSense® galvanized penetrating fluke style anchor is designed to penetrate sand, mud, gravel and grassy bottoms quickly while maintaining a firm hold. Arc welded oversized flukes pivot downward into bottom to set fast, stow flat and provide years of reliable service. Excellent weight-to-holding power ratio compared to cast anchors. Must use anchor chain and shackles for proper holding.

Description	Boat Size	A	B	C	Model
8 lb. Penetrating Fluke Style Anchor	10' to 17'	26"	11-1/4"	14-1/2"	**50073771**
10 lb. Penetrating Fluke Style Anchor	17' to 20'	27-1/4"	13-3/8"	15-1/4"	**50073772**
16 lb. Penetrating Fluke Style Anchor	20' to 25'	29"	16"	22-3/4"	**50073774**
32 lb. Penetrating Fluke Style Anchor	25' to 30'	35-1/4"	23-1/2"	27"	**50073776**

Did You Know?

Using a section of chain 6 to 8 feet long to connect your line to the anchor can protect your anchor under normal conditions. This nylon/chain combination creates a lower angle of pull due to increased weight. Sand does not stick to or chafe the chain and your line is preserved with the increased distance.

All SeaSense® Suggestions Are Under Normal Conditions.

Stainless Steel Straight D Anchor Shackle

Made of stainless steel with screw pin. Measured by pin thread. Straight D anchor shackles make connecting and disconnecting from one side of the shackle chain to an anchor easy while keeping it secure.

Description	Shank Opening	Safe Working Load (lbs.)	Break Strength (lbs.)	Model
5/16" Stainless Steel Straight D Anchor Shackle	9/16"	520	2600	**50011411**
3/8" Stainless Steel Straight D Anchor Shackle	11/16"	800	4000	**50011413**

Anchor Roller

Easily raise and lower the anchor without scarring the hull of your vessel. Designed for boats 20' to 30' with anchors up to 35 lbs. Handles line up to 1" diameter and chain up to 3/8". 304 stainless steel mount with nylon roller.

Description	Height	Length	Width	Model
Stainless Steel Anchor Roller, Small	2-15/16"	7-3/4"	2-5/16"	**50074605**
Stainless Steel Anchor Roller, Small	2-15/16"	9-3/4"	2-5/16"	**50074615**

NOTE: Not intended as an anchor keeper, anchor must be removed once drawn in.

Locking Anchor Control

The locking anchor control pulley allows for easy and safe setting of a mushroom or river anchor, typically from a small freshwater fishing boat. Easy operation allows the operator to set and retrieve the anchor from a sitting position. Zinc plated steel.

• Holds up to a 20 lb. anchor

• Accommodates 1/4" to 7/16" rope

Description	A	B	C	Model
Locking Anchor Control	1-1/16"	6"	2"	**50074440**
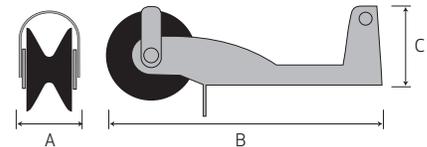

Anchor Retrieval Ring

First mates best friend!

Just add a buoy, snap and short line. A large fender can be substituted for the buoy. Great to keep onboard in case of an anchor windlass failure. 5-1/2" diameter, stainless ring with 1-1/4" diameter loops.
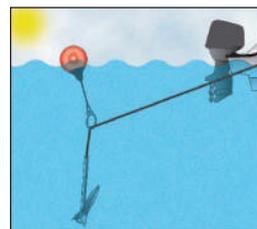

Description	Model
Anchor Retrieval Ring	**50074600**

Signal Flags

Our Distress Flag has a black square and circle printed on an international orange flag. It is a U.S.C.G. approved daytime distress signal. Our quarantine flag is a vibrant yellow flag.

- Meets U.S.C.G. requirements
- 4 Grommets with lanyards

Description	Model
(**A**) Distress Flag 36" x 36"	**50073766**
(**B**) Quartantine Flag 12" x 18"	**50071054**
(**C**) Skiers Down Flag 12" x 18" with 24" PVC Pole	**50071006**

Nylon Dive Flag

U.S.C.G. regulation size. This nylon flag is 20" x 24" in size. Complete with two grommets and a removable three piece fiberglass stiffener. Held into place in a sewn sleeve with a Hook and loop fastener™ sealed opening.

- Removable carbon stiffener allows for minimum storage and display space

Shown with Telescopic Flag Pole

Description	Model
Dive Flag w/Three Piece Stiffener	**50071039**
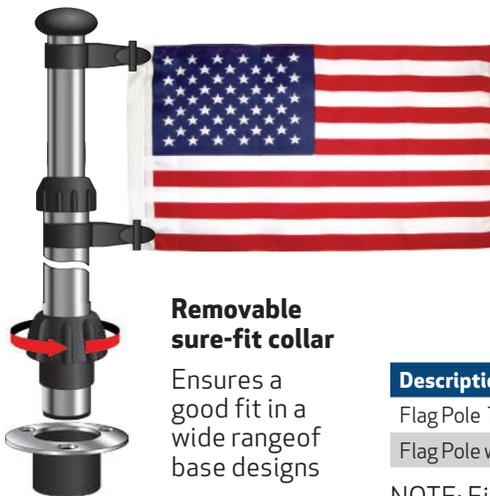

Telescopic Flag Pole

Use with our locking stern light base featured below.
Make use of your stern light base during the day. This 3/4" diameter telescopic flag pole mounts into most two prong stern light bases. Ideal for dive, national and nautical flags. Telescoping feature allows the pole to be raised for maximum visibility. Clam pack with or without 12" x 18" reinforced nylon U.S. Flag. Recommended speed < 35 mph.

- Telescopes from 26" to 48" to fit most flags
- Comes with flag attachments
- *Base Not Included

Removable sure-fit collar

Ensures a good fit in a wide range of base designs

Description	Model
Flag Pole Telescopic	**50071024**
Flag Pole w/U.S. Flag	**50071027**

NOTE: Fits Most Existing Stern Pole Light Bases!

Locking Stern Light Base

Works with telescopic flag pole. Also fits SeaSense® telescopic stern lights and plug-in combination light. Each base is capped to help keep water out when not in use.

- Includes sure-fit locking collar
- Accepts most navigational lights on the market today

From U.S.C.G. Auxiliary Vessel Safety Check List:

Sound Producing Device:

A boat less than 12 meters (39.4 ft.) in length must have "an efficient sound signaling device." This may be a whistle, horn, or other means to signal their intentions and/or position in periods of reduced visibility.

Eco-Blast
Refillable Air Horn

Save Money While Protecting the Environment!

This horn emits 115 dB signal that meets all U.S.C.G. requirements. Unlike chemical horns, the ECO-BLAST is environmentally safe and operates in all weather and temperature extremes. This powerful horn works in any position.

Original SeaSense® Safety Blaster

Great for kayaking!

Extremely loud! Screams 115 dB of sound that can be heard for over a mile away. Meets U.S.C.G. regulations. Easily replaceable diaphragm. Works when wet and it floats.

- Great replacement for traditional whistles
- Comes with lanyard
- Waterproof
- 4-1/2" tall

Description	Model
Safety Blaster	**50074062**

Pea-Less Flat Whistle

Identical to the one developed for the U.S. Navy, used by NASA, major airlines and shipping companies. Can be attached to life jackets, foul weather gear, ring buoys, rafts and keychains. Meets U.S.C.G. regulations. Includes lanyard. 115 dB of sound.

Description	Model
Pea-Less Flat Whistle	**50074027**

Pea-Less Safety Whistle

Made of orange injection molded ABS plastic with a stainless split ring. Our "pea-less" design means there is no "pea" to stick when it gets wet, allowing for a loud sound every time. Meets U.S.C.G. regulations. Includes lanyard. 115 dB of sound.

Description	Model
Pea-Less Safety Whistle	**50074032**
Pea-Less Safety Whistle PDQ 36 Piece Box	**50074030**

Dry Box

Rope Ladder

5-step rope ladder is great for watersports and diving from ladder-less boats. Top loop secures your ladder to a cleat or railing easily.

- 5, 11-3/4" blow molded steps
- UV resistant PVC
- Durable nylon rope
- 200 lb. weight capacity

Collapses 8-1/2"

Description	Model
5 Step Rope Ladder	**008702**

Portable Boat Ladder

Portable boat ladder. Adjustable leg support extensions to fit most boats. Great for watersports and diving from ladder-less boats. Step design provides improved traction for stability once wet. Available in both 3 and 4 steps.

- Quickly and easily hooks over the side of the boat
- Plastic coated hooks prevent marring
- Heavy walled aluminum tubing for extra strength
- Fold flat for easy storage on boat
- HDPE injection molded steps w/UV inhibitors
- Fits most boats (10.5" Hooks)
- 250 lb. weight capacity

Description	A	B	C	Model
3-Step Portable Boat Ladder	7-1/2"	10-1/2"	12-1/2"	**008703**
4-Step Portable Boat Ladder	7-1/2"	10-1/2"	12-1/2"	**008704**

Stainless Steel Telescopic Ladder

Heavy-duty, 4-step, 10" wide boarding ladder telescopes (45-5/8") and folds directly to boat platform for convenient storage (15-5/8") with 250 lbs. weight capacity. Nylon locking strap included.

SeaSense® Solid-State Sensing Bilge Switch with LED

With our SeaSense® Solid-State Bilge Switch, you can know at a glance if your bilge system is functioning properly. If the green LED is illuminated, the switch is in stand-by mode. If both the LEDs are illuminated, the bilge pump should be active. If not, it is a clear indication that further troubleshooting is required. The SeaSense Solid-State Sensing Bilge Switch is designed to eliminate the problems associated with old-style float switches. Our switch has sensors that activate automatically when water reaches the installed height of switch in the bilge. It conserves energy by running only when water activates the pump. When the water reaches the preset level, the switch senses it and turns on the attached bilge pump (not included). When the water level drops, the switch turns the pump off. It's that simple! We designed our switch to be mounted in small spaces.

SeaSense **EXCLUSIVE DESIGN**

SeaSense® **Bilge Pump** for Larger Boats

Uses 1-1/8" hose. Meets U.S.C.G./ABYC standards.

- 36" tinned marine grade wire leads
- Quick release strainer base for easy cleaning
- Ignition protected

Description	Model
1500 GPH Bilge Pump	**50010435**

SeaSense® **Hand** Bilge Pump

Our self-priming hand pump was designed in conjunction with the agricultural industry for large scale water removal. This same design has been scaled down for evacuating small boats, canoes, kayaks, bilges or any place water collects. Removable hose length of 20", 36" or 72".

- Light weight
- Anti-leak design
- Removable hose for easy storage
- Self-priming
- Corrosion resistant
- Reaches small, compact areas with ease
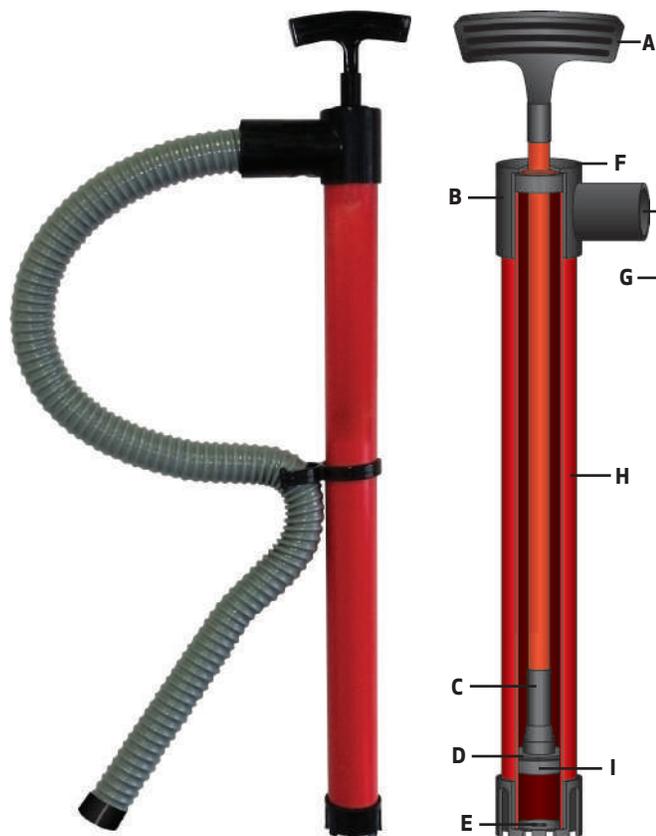

Description	Model
Hand Bilge Pump 18" Length x 20" Hose	**50002320**
Hand Bilge Pump 24" Length x 36" Hose	**50002323**
Hand Bilge Pump 24" Length x 72" Hose	**50002326**
Hand Bilge Pump 36" Length x 36" Hose	**50002328**

(**A**) Large ergonomic, easy grip, high impact handle.

(**B**) Tube cap. Caps the tube and forces the water out of the outlet and also supports the plunger shaft.

(**C**) Plunger spacer keeps the shaft from coming up too far and damaging the plunger washer.

(**D**) Plunger washer forces water up and thru the outlet.

(**E**) Intake foot filters water coming in. Screws off for easy cleaning.

(**F**) Washer seal eliminates any leaking from the top of the pump.

(**G**) Outlet features improved threads for a more secure hold on the hose and eliminates leaking.

(**H**) Corrosion proof plastic construction.

(**I**) Plunger stop supports plunger washer when being pulled up allowing better water flow.

SeaSense™
Quality marine products that make sense.

Dual-Bilge Y-Valve

Add a Second Bilge Pump with the SeaSense® Dual-Bilge Y-Valve to your Existing Discharge Hose

Always on the leading edge of innovation in the marine industry, SeaSense is proud to bring you a product that boats of any size can appreciate.

Now a secondary bilge pump can be added to your vessel without the need for adding another hole in your boat's hull. Now you can easily use your existing through-hull hose. Our Y-Valve consists of two one-way check valves that allow for the use of either bilge pump individually, or both simultaneously without the risk of back flow. It will accept both 3/4" and/or 1-1/8" bilge hose.

Easily add a secondary bilge pump to your vessel to back up your existing system or add a smaller pump to drain your bilges dry. Use in conjunction with our solid-state sensing bilge switch and you will have a bilge system that will take the worry away while you're away!

- Easy installation
- Accepts 3/4" and 1-1/8" bilge hose
- Durable construction
- Built-in check valves (to prevent back-flow)
- Easily connect to the existing discharge hose
- * Upgrade your existing discharge hose with check valve

*Patented
*Includes 2 check valves to prevent back flow

50' Low Permeation Fuel Line

- 3/8" I.D. low permeation fuel line
- U.S.C.G. type B1-15 SAE J1527
- Use with ABYC compliant system fittings (from hose) only

Description	Model
50' X 3/8" Low Permeation Fuel Line	50052660

Low Permeation Fuel Line Requirements

In an effort to reduce smog-forming emissions, the EPA has put requirements in place to limit the amount of gasoline that permeates (vapor escapes) through fuel handling and fuel system components. Many of the fuel system components permeate as gas vapors over time. The changes will benefit your customers by decreasing gasoline consumption and benefit the environment by reducing the amount of gas vapors lost to the atmosphere plus benefit from safer fuel systems for both the boater and the environment.

HEAVY FLOW 3/8"
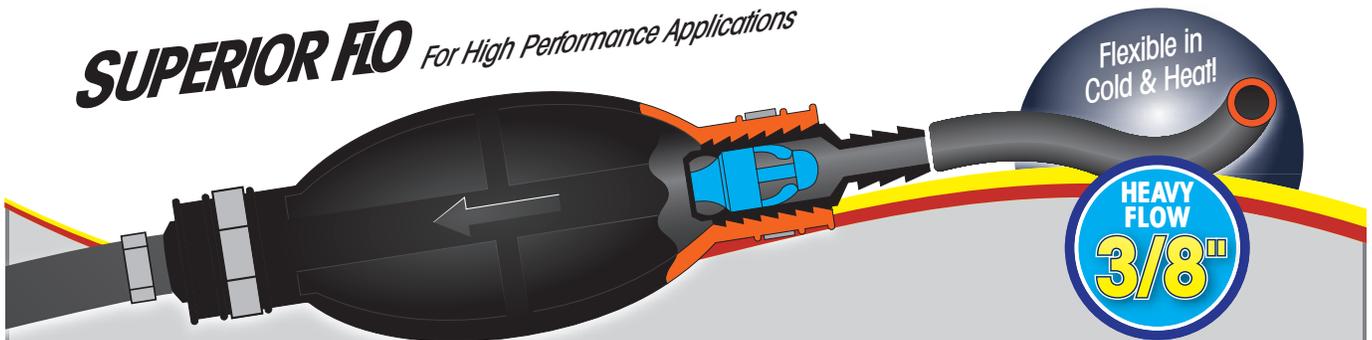

SeaSense® Low Permeation Fuel Line Assemblies

SeaSense® fuel line assemblies are designed specifically for use with portable fuel systems and come complete with a primer bulb, fuel line hose, stainless steel hose clamps, engine connectors and tank fittings. Our 3/8" I.D. fuel hose provides the highest flow rate for large and small engines. The new packaging is informative to help minimize questions and help the consumer make their own decision by providing bold graphics to quickly see engine type and provided connectors. **See Our Complete Selection on the Next Page.**

Primer Bulbs

50073811
50073812

- E.P.A./C.A.R.B. compliant
- Large I.D. for highest flow rate
- Double check valves to hold prime longer
- Oversized bulb works for most HP outboards
- UV inhibitors protect from exposure to sunlight

All-In-One Primer Bulb

All-In-One Primer Bulb has threaded ends and changeable fittings to accommodate 1/4", 5/16" or 3/8" I.D. fuel hose in a single product. Consumers can no longer purchase the incorrect size bulb, eliminating retail returns while reducing your number of primer bulb SKUs.

Universal Water Separating Fuel Filter
with Water Collecting Bowl (2 & 4 Cycle)

Designed for the suction side of the pump, our 10 micron filtration protects from water, dirt and other contaminants. High grade aluminum filter head withstands the harshest marine environments. Quick drain release valve and reusable plastic bowl allow for easy visual inspection and removal of water build-up. 11/16"-16 thread size.

- 50052119 replaces RACOR B32013
- For outboard use only
- Includes Mercury filter
- Gasoline use only

50052116 Kit includes:

1	Heavy-Duty Aluminum Head *Protects against saltwater corrosion*	1	Reusable Bowl
		1	10 Micron Filter
		2	3/8" Hose Barbs

2	3/8" Plugs
2	Hose Clamps

SeaSense® Proudly Offers the Industry's Best Selection of Motor Flushers

Increases Engine Life!

SeaSense® motor flushers are perfect for washing away dirt, mud, sand and salt after a trip on the water or just to keep your motor cool while servicing. Our large selection of motor flushers cover outboards, dual outboards, inboards and stern drives from small kickers to large performance motors.

SeaSense EXCLUSIVE DESIGN

15 HP or Less Outboard Motor Flusher

Fits motors up to 15 HP. Slip on design allows easy installation without removal of prop. Allows the cooling system to be flushed out using a garden hose. Patent #6,830,493

- Fits most motors 15 HP and under
- Test your motor before heading onto the water
- Easy slip-on design
- Slides onto cavitation plate

Description	Model
Small Outboard Motor Flusher	50073745

Dual Flow Motor Flusher

Protect your investment by flushing the motor every time you use your boat. Motor flushers flush salt, silt and sand out of the cooling system of your motor.

- Easy to use
- No tools required
- For engines with side water inlets
- Great for larger motors 50 HP & up
- Extend your engine life

Description	Model
Dual Flow Motor Flusher (Round)	50073757
Dual Flow Motor Flusher (Rectangle)	50073750

Universal Motor Flusher

Universal motor flusher allows the cooling system to be flushed out using a garden hose. Works on most outboards and inboard/outboards. Also a great way to test run your boat before heading for the water.

- Increases the life of all outboard engines
- Cups rotate for easy application
- Soft, rubber cups for proper circulation and to prevent scratching

Description	Model
Universal Motor Flusher (Round)	50073755
Universal Large Motor Flusher (Rectangle)	50073756

Inboard Motor Flusher

Perfect for inboard engine flushing or running an inboard engine out of the water for maintenance. Place plunger over flush port and extend handle until it supports it firmly against the hull.

- Adjusts from 15-1/2" to 30"
- No tools required, installs in seconds
- Telescoping handle provides precise alignment
- Flush away sand, silt, salt or mud with ease
- Perform engine maintenance while boat is out of water
- Large cup for a secure fit and prevents water blow-by

Fits Hard to Reach Areas

Description	Model
Inboard Motor Flusher	**50073761**

Volvo Motor Flusher

Protect your investment by flushing the motor every time you use your boat. Motor flushers flush salt, silt and sand out of the cooling system of your motor.

- Great for tune-ups and other maintenance that require running an outboard engine out of the water
- Fits Volvo marine engines

Description	Model
Volvo Motor Flusher	**50073749**

Universal Kill Switch with Coiled Lanyard

Universal kill switch contains 7 keys to fit Johnson, Evinrude, Mercury, Yamaha, Suzuki, Tohatsu and Honda kill switches. If you lose or break your original kill switch key, this spare set of keys will save your day!

- Swivel snap hook prevents tangling
- Tangle-free coiled lanyard
- Corrosion resistant
- 7-1/2' Long

Description	Model
Universal Kill Switch w/Coiled Lanyard	**50031952**

Outboard Motor Lock

Great for dinghies and small outboards!

Provides security for transom mounted outboards, works on all outboards with wing type screws. EDC coated steel brackets lock over the screws making them inaccessible to theft. Includes a pad lock that fits inside the tube making it difficult to cut.

- Locks most outboard motors up to 40 HP
- Marine grade brass lock
- Hardened steel tube

20 HP Universal Motorbracket

Aluminum or Stainless Steel

Spring-loaded outboard motor lift provides universal design for all styles of motors. Four position locking arm easily raises or lowers motor into up or down position. 11-1/2" wide mounting pad.

- Locks motor into an up or down position for propulsion
- HP rating - 20 HP/115 LBS
- Mounting size - 5-1/4" x 9" (Aluminum)
- Mounting size - 8" x 8-5/8" (Stainless Steel)
- Vertical travel of 11-1/4", designed to accomodate lower HP engines
- Wide, black poly mounting board for extra support
- Stainless steel hardware included
- Weight not to exceed 115 lbs.

Universal Premium Motor Support Bracket

Protects transom, motor and steering components from road shock while trailer is in use. Our universal fit bracket adjusts from 34" to 46" and comes with both roller and trailer mounting hardware. The cast aluminum head has side pads as well as a skeg pad for lower unit protection. Easy to install and comes with a 10" motor strap and 5" trailer strap.

- Universal mount
- Includes 2 rubber straps
- Made of aluminum
- Adjustable from 34" To 46"
- Includes bolt on trailer adapter
- Mounts over roller or bolts on

12 Volt Oil Changer

Change oil the easy way. Completely self contained 12V electric rotary pump. Drains five quarts of oil through the dip-stick hole in just three minutes! Comes with on/off switch, battery clips with eight foot leads, one small pick-up tube (I.D. 1/8" & O.D. 1/4") and discharge hose (I.D. 5/16" & O.D. 1/2").

• Drains oil in minutes
• Saves time and money
• Built-in storage for electrical cord

Description	Model
12 Volt Oil Changer	**50091450**

Portable Oil Change Kit

The SeaSense® portable oil change kit is versatile for all applications including boats, RVs, motorcycles, automobiles and industrial use.

Kit Includes:

• 1-1/2 gallon (6 liter) plastic container
• Hand pump stored on the container
• 2 black pump tubes, 1/4" O.D. & 3/8" O.D. X 47" long
• A clear drainage tube 5/8" O.D. X 96" long
• Tight seal cap
• Spark plug boot

* Not for use with gasoline.

Description	Model
Portable Oil Change Kit	**50091446**

Fluid Extractor

Empty oil from inboard and I/O engines. This innovative design enables manual and pneumatic oil extracting, automatically alternated, suitable for boats or vehicle maintenance.

• Holds up to 6.5 liters
• Equipped with one 39-3/8" hose and two 33 7/16" hoses for draining

* Not for use with gasoline.

Description	Model
Fluid Extractor	**50091449**

Brass Oil Transfer Pump

Empty oil from inboard and I/O engines. Brass construction with removable tubing for ease of use and cleaning. Designed to fit engine dipstick tube.

Universal Gear Lube Pump

Allows for mess free lube changes. Simply thread the fitting in the lower drain hole and pump until filled. Fits 3/8", M10 & M8 - 16" thread drain screw.

- 3/8" adapter for Johnson/Evinrude, Mercury/Mariner, OMC, Mercruiser, Speedmaster, & Volvo
- M10 & M8 adapter for Suzuki, Honda, Mercury, Nissan & Tohatsu.

Description	Model
Universal Gear Unit Pump	**50091462**

SeaSense NEW

Lower Unit Lube Pump

Fits quart bottles of lower unit lubricant and allows for mess free lube changes. Simply thread the fitting in the lower drain hole and pump until filled. Fits any 3/8" - 16" thread drain screw.

- Includes adapter fitting for yamaha and nissan lower units.
- Also for Tohatsu and Honda (2-50 HP) engines.

Description	Model
Lower Unit Pump	**50091461**

Oil Mixing Bottle

Makes mixing two-cycle oil into your gas easy and accurate. A large mouth, oil resistant 32 oz plastic bottle that is easy to pour into any size container. Has all of the most popular oil to gas ratios for a clean and exact mix every time. Also can be used to store unused oil.

Description	Model
Oil Mixing Bottle	**50091443**

Trolling Motor Connectors

- Quick connection between trolling motor and the power source
- Boat side trolling motor connectors feature an integrated weather cover
- Boat side trolling motor connectors offer a face plate for flat surface mount
- Motor side trolling motor connectors offer easy pull-wing tabs for easy installation and removal
- Includes butt connectors

Quality marine products that make sense.

All-Round Light, Height Regulation

The United States Coast Guard requires boats under 12 meters (39.4') to have an all-round light at a minimum height of one meter above the combination bow light. Non-glare lens directs light's focus upward, out of the driver's vision. 360° light visibility distinguishes the boater's location in the water from any direction.

Give your customers the ability to customize their pole height while reducing the amount of items on your shelf with our exclusive LED telescopic all-round light.

On some of today's boats, stern lights can be up to 6' long. With SeaSense's 3 SKU program, that 6' bow can be stored collapsed in a 3' 4" space!

1 METER = 39-3/8"
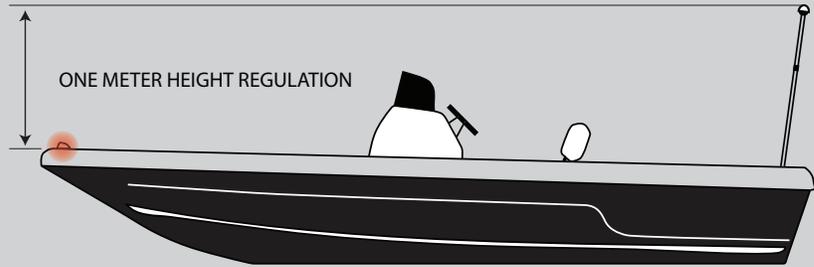

ONE METER HEIGHT REGULATION

LED Stowable, Telescopic All-Round Light

Our telescopic, stowable stern light demonstrates the next generation in user-friendly boating products. This innovative adaptation of a standard stow away stern light allows for increased user applications, effectiveness, versatility and convenience. Can be stored in less space than conventional stern lights. Removes quickly from easy-to-install, standard 2 pin base. Aluminum pole, with a 360° light that can be seen for up to two nautical miles. Don't be fooled by cheap imitations! US Patent 6,155,195

- Sizes ranging from 26" to 72"
- Meets U.S.C.G. and ABYC Requirements
- Only .35 amp draw for longer battery life
- Perfect for boats up to 39'
- Water resistant
- Low heat

Plug-In Bow Light

Stowaway red/green combination light features convenient plug-in base that enables the light to be activated or removed quickly and easily.

- 14" height raises running light above obstacles like trolling motors
- Use SeaSense stern light base with your plug-in bow light (50023957)
- Standard 2 pin base
- Annodized aluminum pole

Description	Model
Plug-In Side-Marker Light	**50023884**
Plug-In Side-Marker Light, EDC	**50023885**

Ultra Corrosion Resistant Nylon Stern Light Base

Tired of your base corroding? Protect your socket from the elements with our corrosion resistant, black nylon design. Sliding cover keeps water out when not in use.
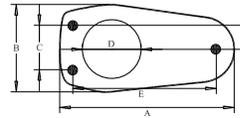

- Fits 2 prong stern lights
- No rust, no corrosion

Description	A	B	C	D	E	F	Model
Nylon Stern Light Base	3-7/8"	2"	1"	1-1/8"	3-3/16"	1/2"	**50023953**

Chrome Stern Light Bases

Fits SeaSense® telescopic stern lights and plug-in combination light. Also works with telescoping flag pole! Each base is capped to keep water out when not in use.

- 2 pin round light base accepts most navigational lights
- Fits 2 prong stern lights
- 50023957 includes sure-fit collar
- Requires #8 mounting screws (Not Included)

LED Rail Light

LED fixture is the ideal solution for upgrading older fluorescent fixtures with the latest power saving technology. Its linear LED lighting delivers a wide angle of high intensity bright white light that rotates, for focused light where needed. No more delicate fluorescent bulbs to change. Its attractive design and rugged construction make it perfect for on board, interior living spaces.

- Easy flip switch
- Easy mounting for boat or rv use
- Covers conceal all mounting hardware

COMPLETE ROTATION — **Directs light source in any direction**

Industry Leading

1. Cap can be easily removed to grease gears.
2. Handle has positive lock mechanism for better stability and strength.
3. Built-in grease fitting helps keep worm gear and shaft well lubed for continuous, smooth performance.
4. Bevel gear retained by squared gear shaft for superior strength and maximum torque.
5. Ergonomically designed power grip handle for supreme comfort. (*A)
6. Worm gear with grease retaining bevel for continuous lubrication.
7. Fully plated worm gear for corrosion protection. Cold formed from a single piece of steel. Is stronger than a welded or bolted design.
8. Large diameter pivot washers for reduced stress and increased surface contact, strength and safety.
9. Dual pin locking mechanism for added safety and strength.
10. Galvanized hardware and components for excellent corrosion resistance. (*B, *C)
11. Proprietary SEACOAT™ coating inside and out for superior corrosion resistance. (*B)
12. Large stamped flare to increase strength.
13. Stamped ribs for added strength.
14. Wheel has large cross sectional area and spoke design for added strength. (*A)

Zinc Plating involves an electrolysis application of zinc by immersing clean steel parts in a zinc salt solution and applying an electric current. This process applies a layer of pure zinc.

EDC (Electrostatic Discharge Coating) is the process of using an electrical current to deposit the finish smoothly onto metal surface. The process produces a smooth coat of uniform thickness, is able to coat awkward areas, and is more adhesive and rustproof than normal sprayed paint.

SEACOAT™ is a proprietary process and ONLY available from SEASENSE®. SEACOAT™ consists of dispersed zinc particles which are laminated in several dozen layers. The layers are bonded together then heated to chemically bond with the metal surface. SEACOAT™ delivers significantly better rust resistance than electro-galvanizing, hot dip galvanizing, nickel or zinc plating.

Stainless Steel is a ferrous alloy with a minimum of 10.5% chromium content and provides the ultimate in corrosion protection.

Trailer Winches

1. Available in four premium finishes: Black EDC, SEACOAT™, zinc & stainless steel

2. Solid gear construction provides smooth operation and greater strength than laminated gears

3. Ergonomically designed power grip handle for supreme comfort (most models)

4. The reinforced cap distributes the load from the nut to the handle drive for added strength

5. Universal mounting base fits most trailers

6. Solid Pawl for greater strength. EZ SHIFT thumb bar on select winch models.

SeaSense™

Quality marine products that make sense.

The SeaSense marine assortment consists of high margin, innovative boating products that recreational boaters need and want. Products are continuously tested and improved by SeaSense quality control staff members to ensure that customers always receive the best value. SeaSense manufacturers make unique, innovative, patented products that will not be found anywhere else.

Freight/Delivery Claims

We are not responsible for damaged or lost merchandise in transit. This becomes the responsibility of the carrier. It is essential that a signature is obtained from the driver prior to accepting damaged or short shipments. We are unable to accept responsibility for these shipments once the bill is signed, relieving the carrier. Please contact us immediately if you have received a short or damaged shipment so that we can assist you.

Customer Satisfaction Guarantee

We encourage the end user of SeaSense products to contact us directly. The feedback that we receive has proven to
be invaluable over the years for evolving and improving products and packaging. If our products do not perform or enhance the boating experience, we will do whatever it takes to satisfy the customer.

Technical Specifications

These catalog features technical specifications designed around OEM requirements and general product knowledge. All unit measurements are in inches.

UPC Codes (Bar Codes)

All products include a UPC code for your convenience.

Product Improvements

SeaSense reserves the right to make alterations to the items in this catalog when deemed necessary. We are continually modifying our product mix to provide our customers with the most innovative quality marine products in the industry.

Breaking Strength & Safe Working Load

Breaking strength and safe working load are ratings which are applied to SeaSense products. Usually this type of rating will not apply to a cast part, regardless of the material, since there may be air voids and other inconsistencies due to the process of casting which may affect structural integrity and cannot be seen without cutting the part open. It is up to the end user to determine if the part may cause personal injury, using a common sense evaluation of the part. Unless specifically stated otherwise in the product description, no product in this catalog in intended to lift humans or tow where personal or property damage may result from such an application. SeaSense accepts no responsibility for damage or injury resulting from the misuse or "use other than intended" of any product.

Warning

Items shown in this catalog may contain lead, a substance known to the State of California to cause cancer, birth defects or other reproductive harm. There are NO items manufactured by SeaSense which are intended for human or animal consumption. Some items may have a lead warning although they may not contain lead as this warning also pertains to packaging materials.

Due to current economic uncertainty, SeaSense reserves the right to adjust pricing and apply shipping and handling charges as necessary. "We reserve the right to correct printing errors. Possession of this catalog does not constitute an intent to sell"

Rely only on high-grade anchors and docking offered on our virtual shelves.
