

DUAL IGNITION CONTROL KIT, PART # HA1201

Installation of the power assist unit on two or more engine applications you may want to install the Dual Ignition Control Kit so that the power assist will be on if one of the motors is running.

Installation Procedure

NOTICE

If your boat is equipped with triple engines, you will need to purchase two (2) of the HA1201 Ignition Switches. Refer to figure A1.

- Connect "purple" ignition wire from the P/A unit to the P/A location on the switch.
- Connect ENG. A to the one ignition switch.
- Connect ENG. B to the other ignition switch.
- Mount Dual ignition control switch to the underside of the dash and away from the elements.

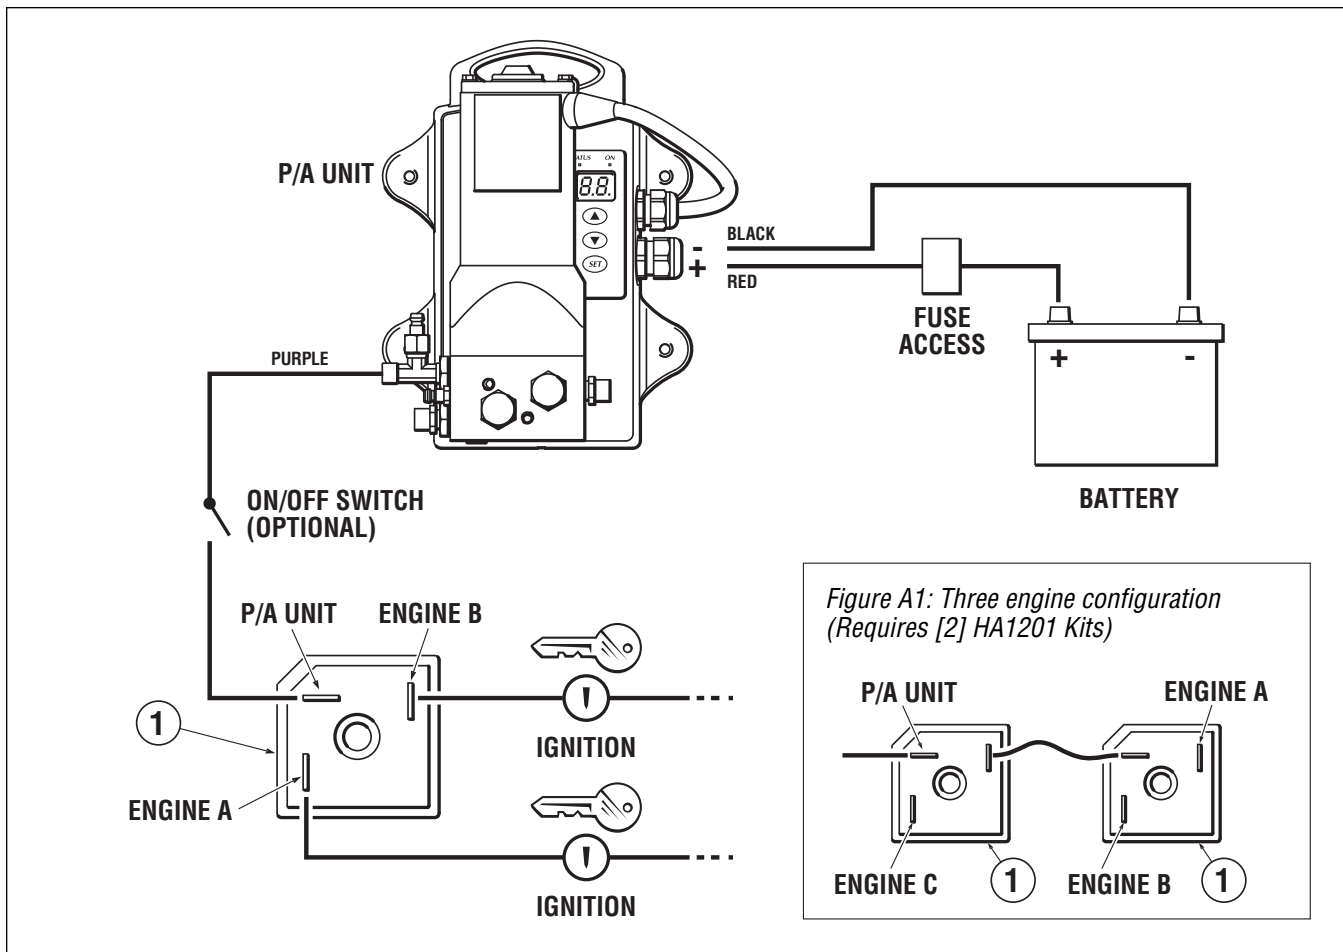

Figure A. Two engine configuration.

| ITEM | PART # | QTY | DESCRIPTION |
|------|--------|-----|------------------------------|
| 1 | 799100 | 1 | Dual Ignition Control Switch |
