Insert the rubber grommet into the groove located in the light bar hole at the back of the mount.

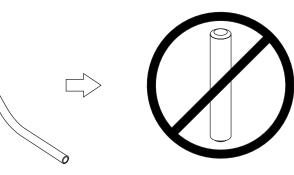

Place rubber gasket in the groove on the top of the mount.

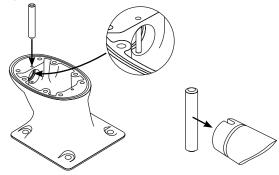

If you are using a light bar, do not use the provided pin.

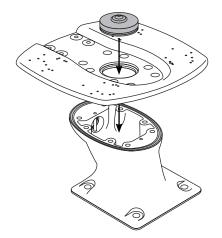

If you are not using a light bar insert the pin. Then insert the white plastic plug into the light bar hole. It should snap onto the pin.

Insert the rubber radar cable grommet into the center of the Seaview Top Plate (sold separately). Make sure that the lip in the center of the Top Plate hole sits in the groove of the rubber grommet.

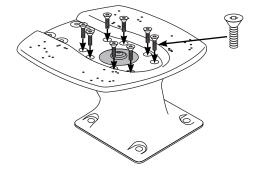

Then place the Top Plate on top of the mount, making sure that eight center bolt holes line up.

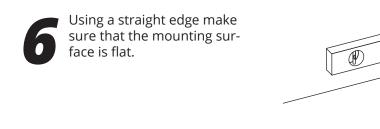

Using the eight 5/16 - 18x1" bolts from the Seaview Top Plate kit, bolt down the Top Plate.

Refer to the provided Seaview Top Plate installation instructions for more information.

using the foam gasket as a

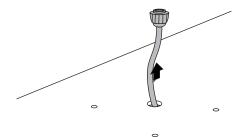

Using a 3/8" drill bit, drill the four bolt holes.

Use a 11/2" hole saw to cut a whole for the radar cable.

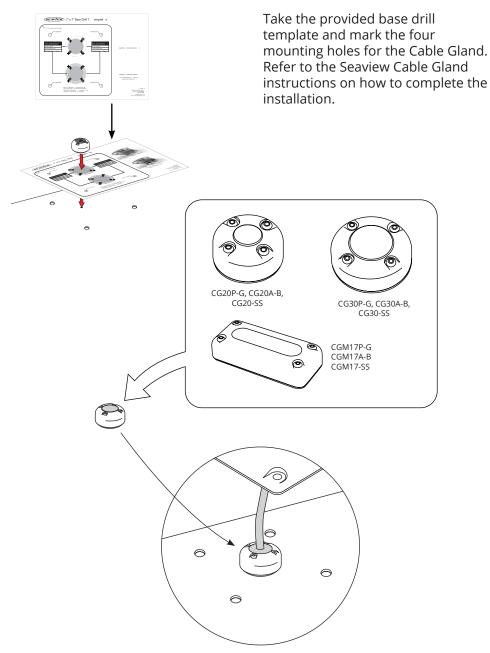

Route the radar cable through the 1½" hole you just cut.

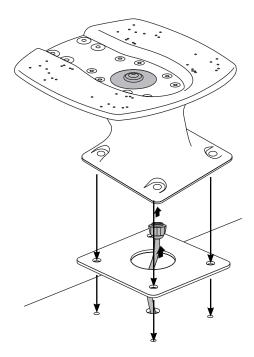

For increased water security you can use a Seaview Cable Gland (sold separately) to route your marine electronic cables.

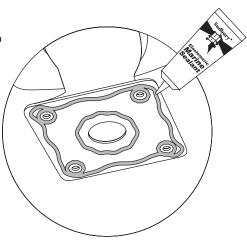

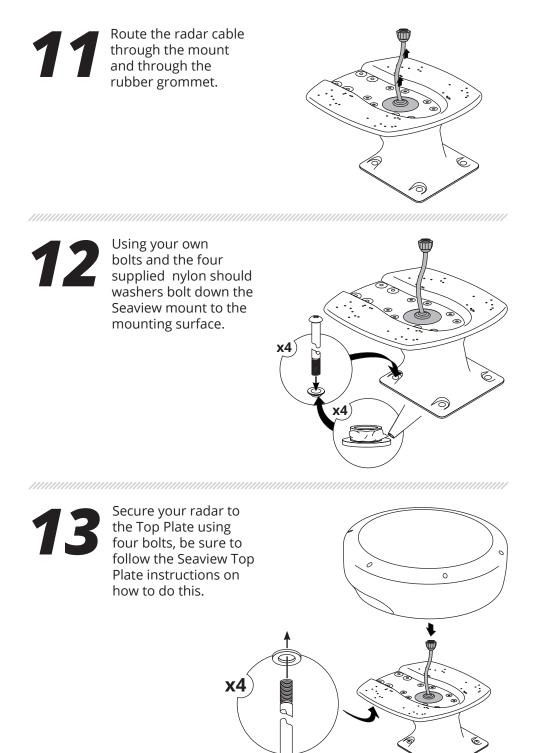

Place the foam gasket and Seaview mount over the bolt holes.
