

FAQ

Q: WHAT IS AN APPROPRIATE ROPE SIZE FOR SWIMMING LEASHES

What is an appropriate rope size for swimming leashes?

- 1/4" diameter swim leashes are used by very small dogs.
- 3/8" diameter swim leashes are used by medium sized dogs.
- 1/2" diameter swim leashes are used by larger dogs that require larger SS hardware.

Note:

- All leashes float in the water and will not tangle or drag your pet down keeping them safe and secure.
- Well mannered dogs may use a smaller diameter leash.
- We use a high quality stainless steel clip hook in place of standard clips for rust and jam protection.
