

# Launch Lines

Made In Wisconsin

When launching or loading your boat use the launch line to make your job easier. The stainless steel clip attaches to your boat and the handle loop makes it easy to maneuver. Put the loop around your winch stand to secure the boat in water and free your hands.

- Lines are soft, flexible, and easy to grip
- Lightweight and easy to clean
- Stays pliable and will not sliver
- Releases knots easier than nylon or cotton ropes
- Strong hand sewn webbing connections
- Customized lengths are available, call in design

The specific gravity of polypropylene rope is less than water so it naturally floats. You won't lose a line overboard or get it caught in your propeller.
