

TRANSOM CROSS TIE CLEAT XL

When the dock's surface drops below the tops of your motor cowlings, the Transom Cross Tie Cleat XL keeps lines organized and elevated. You'll never have to find a place to tie off at the stern when docking again. The patented locking mechanism allows for a secure cleat that is easy to reach, remove and reinstall. These are also great for hanging fenders and chum bags.

FEATURES & BENEFITS

- Patent US 10,427,757
- Brushed aluminum finish
- 15° large s-shape 9" cleat design
- Sleeve diameter 5-1/2" fits into standard rod holders 1-7/8" diameter
